Personal Information and Qualities

I'm interested in developing my IT skills and grow as a professional, I also like to learn by my own and gather experience by working on projects of my own to learn more things about my career and not only what they teach me at the university. I like putting myself to the test by solving new challenges to become a better programmer and also keep learning new things everyday. I want to accomplish my goals and become a better person everyday.

- Proactive
- Positive Attitude
- Initiative
- Teamwork
- Charisma
- Ease of Speech

Work Experience

Centro para el Desarrollo de la Industria del Software (CDIS)

March 2015 – February 2017

MOBILE DEVELOPER

- Mobile developer using Cordova (Javascript, HTML, CSS, JQuery, AJAX)

I developed hybrid applications following the design and specifications provided by the client, the applications connected with RESTful APIS using AJAX for sending data to the server and downloading data from the server to display it in the app, I created all the logic behind the application and tested then to ensure the proper functioning.

Eciton Global
March 2017 - Present
IOS DEVELOPER

- Maintenance and support of existing applications.
- Migration of app from swift 2 to swift 3.
- Development of new requirements for the apps.

I migrated the current application from swift 2 to swift 3, also I identified and solve some bugs that were present in the application and helped to optimize the application code, also I develop new functionalities for the app and give support to old functionalities in order to give a better user experience for the user.

Nexta Technology Services S.A. de C.V.
October 2017 – August 2018
