Software Developer

Multilingual computer programmer with background developing software, mobile applications, and online systems.

Technically sophisticated with extensive expertise in all facets of mobile and web software development from initial conception and planning to programming, testing, bug fixing, and production release. History of producing innovative modules and features while integrating the latest technologies and methodologies. Collaborative leader with proven ability to provide robust training and guidance to cross-functional teams through all stages of the project.

*Software Programming • Strategic Planning • Software Testing & Debugging
Leadership & Guidance • Remote Collaboration • Cross-Functional Communication*

TECHNICAL PROFICIENCIES

Languages	Python, Javascript, Typescript, C++, C#, Clojure, SQL
Development	React, Angular, Redux, Webpack, Node, Flask, Sinatra, Ruby on Rails, Swagger, Spring Boot, microservices, Jasmine, Jest, Mocha, Selenium, Cypress, Unity, Godot, Game Maker, MonoGame
Infrastructure	GoCD, Jenkins, Docker, Hashicorp Vault, AWS, IBM Bluemix

PROFESSIONAL EXPERIENCE

Software Developer (2018 - Present)

X-Team, Remote, Ecuador

Collaborate with cross-functional teams of developers, marketers, and relationship managers through the proper development and maintenance of an e-commerce store. Produce quality code as well as complete testing and debugging for email templates and help desk formatting.

Key Achievements:

- Strategized and developed modules for Beachbody's OpenFit store front.

ThoughtWorks, Various, Ecuador

Software Development Consultant (2015 - 2018)

Partnered with numerous teams for diverse international clients within the banking, airline, healthcare, and e-commerce industries to provide extensive software development guidance, supply best programming practices, and program and test various aspects of mobile applications and online systems.

Key Achievements:

- Established the initial architecture and design of mobile projects for Chile's biggest bank, and for a medical center affiliated to a University in New York City, which accumulated over 400 users within the first week of publication and secured the position of Technical Lead on the project.
 - Integrated new features and modernized the tech stack for an online payment system in Ecuador, a web application in an American multinational investment bank, and a cross-functional engineering team in South America's most important airline.
 - Interacted with team members to provide collaborative leadership and training as necessary.
-

EDUCATION & CREDENTIALS

Technical Training
