### **Mobile Application Developer (react-native) Lusio Rehab**

Oct 2018 – Dec 2018 Sydney, Australia

children with Cerebral Palsy who have to participate in ongoing programs to achieve movement goals that many of us take for granted.

Our Physiotherapists told us they would love to monitor and motivate clients after they have left the clinic to drive compliance and to maximise the likelihood of goals being met.

So for clients, clinicians and those in need of motivation to do movement we created LusioMATE.

my role : I Work as remote mobile application developer to fix some bugs and add some features in to the existing lusio application.

you can contact <https://www.linkedin.com/in/armin-songhori/> as reference.

### **Frontend Developer (backbone & vue.js) & Mobile Application Developer (react-native ios) FullFekr**

Aug 2016 – Jan 2018 Tehran Province, Iran

I liked to experience being in a Startup so , I start working at "Fullfekr" , it's a web base psychology therapy where people can chat or call psychologist.

my role - I developed this website on backbone (it was CTO's decision) , then after couple months I rewrite it to Vue.js , meanwhile I started developing ios app using react native

technologies: css, materialize css ,gulp, backbone, Vue.js,vuex , Webpack, xmpp, sass, fullcalendar.io, react-native, redux, redux-thunk, experimental navigator, shoutem ui,Bringing Sinch for react-native, Parse (notification)
