**Projects, Responsibilities and Skills**

**Tifozi #HeForShe (Mobile Application)**

TifoziHeForShe is a mobile application developed for use during the campaign of the UN's Women Organization. Through the application users can play on quizzes online and offline, the questions of which are inserted dynamically from the control panel. After the quizzes finish (the quizzes are manually closed by the system administrator), the system defines which is the winning user and notifies them by push notifications (service of Firebase platform). The system administrator also manages the visibility of the messages (commitments) made by

the users by approving them and making them visible to other users through the app. TifoziHeforshe reached more than 7.000 users during the campaign.

**Can share the Link of the app on Google Play: Tifozi #HeForShe**

- Ensure applications are properly integrated with Android API's
- Translate designs and wireframes into high quality code
- Design, build, and maintain high performance, reusable, and reliable Java code
- Publish App on Google Play
- Optimize and update frequently
- Implement Facebook Login feature
- Continuous communication during different phases of the project with the client.

**NatureGuideAlbania (Mobile Application and Website)**

The application was designed on behalf of the 'Agjensia Kombetare e Zonave te Mbrojtura' (National Agency of Protected Areas) with mediation of NACCON SYSCON. The application and the website consists in a map which contains all the protected areas of Albania with their information and points of interest. All the content which includes polygons , polylines , pinpoints , text, images or audioguide, is stored dynamically from the control panel.

**Can share the Link of the app on Google Play: NatureGuideAlbania**

- Ensure applications are properly integrated with Android API's
- Integrate Skoobler map
- Create Content provider to share data
- Make data as Image, Text, and Audio available offline
- Continuous communication with the client.

**E-Konsullata (Mobile Application)**

The application was built for Ministry of Foreign Affairs. The purpose of the app is to help Albanian people that live abroad to get the information such as where the Albanian Embassy is located, places where Albanian people need a visa or nonemergency numbers and other information.

E-Konsullata has more than 3.000 users now.

**Can Share the Link of the app on Google Play: E-Konsullata**

- Responsibilities and Tasks Ensure applications are properly integrated with Android API's Design
- Build, and maintain high performance, reusable, and reliable Java code
- Translate designs and wireframes into high quality code

**EDUCATION AND TRAINING**

**15/09/2011–06/06/2014 Bachelor of Science (B.S.), Computer Science**  
**Faculty of Natural Science, Tirana (Albania)**

**11/09/2015–20/07/2018 Master of Science (M.S.), Computer Science**  
**Faculty of Natural Science, Tirana (Albania)**
