summary

I'm a BSc in Computer Science and Computer Engineering with plenty of social skills. Energetic, creative and fun to work with. Passionate and experienced in Android applications, Kotlin, Javascript, Java, C#, but open to other languages and tools to use when a new solution is needed. With knowledge of REST API architecture.

Curious to embrace new challenges in this area.

education

- 2013–2018 **B.Sc. Computer Science and Computer Engineering** ISEL, Lisbon
Majoring in Computer Science
- 2010–2013 **High-School, Science & Technologies** ESARS, Setubal
Preparation for national entrance exams to leading Portuguese universities

experiences

- 2016-2018 **Member of Student Association** ISEL, Lisbon

applications

- 2018 **Breadcrumbs - Travelers mobile application** Final project
A simple and easy to use app, developed to create a trail just by uploading the photos taken on the spot.
Android app (Kotlin, Volley), Hypermedia API (Node.js, Express), NoSQL (Mongo)
- 2018 **YACMS - Yet Another Checklist Management System** YACMS.repo
System for managing checklists, with support for checklist templates.
Hypermedia API (Spring in Kotlin), Web app (React), SQL (PostgreSQL)
- 2018 **COIMA - Chelas Open Internet Movie Application** COIMA.repo
Detailed information about movies, where users can search, have their own lists and post comments.
Web app (Node.js, Express), NoSQL (couchDB)
- 2018 **Web Auth App** SI.repo
Users are authenticated through Google. They can check milestones from a GitHub repository and create all-day events, in Google Calendar, from them.
Web app (Node.js, Express), OpenID Connect and OAuth2.0
- 2017 **Squares game** Squares.repo
Android app (Java)
- 2017 **MapperReflect** MapperReflect.repo
Mapping between members (e.g. fields, properties) of different types objects (e.g. value types or reference)
C# .NET FRAMEWORK
