REFRIGERATOR MANUFACTURER  
***Turbo air***

## My 50-Year Journey with Refrigeration

At 13 years old, I began my part-time job to pay for school, which started my 50-year career in refrigeration. I found that I had an aptitude for the work, and more importantly, I enjoyed it. It didn't take long until it wasn't just about raising money for school. I kept at it, and I dropped out of college my freshman year to start my own refrigeration business. I invested my last \$30, taking a risk that paid off. It grew rapidly, and when I was 25 I founded South Korea's first plant to mass-produce commercial refrigerators.

In 1985, I emigrated from South Korea to Los Angeles, where I continued to follow my passions. I opened my business selling and repairing refrigerators. I also constructed restaurants and grocery stores, finding the refrigeration systems and layouts that best fit their needs. Through my combined experiences, I became an expert on the environments which refrigerators operated in and all my competitor's products. As I built my expertise, I noticed that there was little-to-no technological advancement. The products had remained the same over several decades, across all major manufacturers. I knew there was a better way.

I founded Turbo Air with innovation and consumer convenience at the forefront. Turbo Air was the first company to apply digital control in commercial refrigerators, a mere 22 years ago, and now it's the industry standard. I pioneered the use of automatic fans, temperature control and external monitoring, and indoor illumination for under-counter and salad/sandwich units. I work towards improving Turbo Air products every day, and I continue to lead the charge with my patented Self-Cleaning Condenser. This revolutionary device marks the end of the 100-year-old problem, rooted in ill-maintained condensers.

My innovation goes beyond technology, as I am the trailblazer of innovation in customer service. One of the many precedents I have set in this industry is direct delivery to dealers, with 13 warehouse locations nationwide. Multiple locations ensure damage free delivery within 1-2 days. Also, I utilize in-house technicians, who complete 95% of service calls within 3 business days. I am also the first to implement the MSP (minimum sales price) program in the refrigeration industry to alleviate excessive competition among dealers. I am always looking to improve, not only the products but your experience with customer service.

It has been 50 wonderful years, and my journey still continues.

Sincerely,

Brian S. Kim  
Chief Engineer & CEO

# Patented **Self-Cleaning Condenser**

Dust accrue rapidly in areas where refrigeration is installed and used. Dust is drawn through the fan and accumulated, preventing the condenser from properly releasing heat. This causes the compressor to increase its pressure on refrigerants, increasing the possibility of the compressor breaking down.

The 'Self-Cleaning Condenser' cleans the condenser with a rotating brush that moves up and down 2-3 times a day, preventing any dust build-up and maintaining the highest efficiency while saving additional energy.

Only Turbo Air refrigerators require  
**No Maintenance  
for three years**

# Condenser Coil Maintenance Pays Off

(‘Energy Manager Today’)

Richard Fennelly, the Director of Product Development for CoilPod LLC says that there is not a lot of research on how much money can be saved, but all signs point to a significant amount. It is also a distasteful job that often gets pushed aside.

The condensers coils that are at the heart of cooling equipment need to be cooled. This cooling is provided by a fan that draws in air. That air carries minute pieces of debris along for the ride. The vents get clogged and the fan must work harder to do its job. This causes three problems: The fans use more electricity and therefore are costlier to run, they require more service calls and, ultimately, many fail. Often, these failures result in ruined inventory.

Addressing this problem leads relatively easy gains. The greatest are “grab and go” type refrigerator units common in delicatessens and convenience stores since they are in high trafficked public areas. Fennelly, whose company offers a new approach to condenser coil cleaning, pointed to statistics compiled by the Food Service Technology Center (FSTC) and presented at the Restaurant Facility Managers Association and Commercial Food Equipment Service Association conferences last year.

The estimates, which presumably are based on refrigeration devices the FSTC found in the field, are predicated on an electric rate of \$0.11 per kWh. A six-year-old double door merchandiser costs \$1,325 per year when dirty. Operating expense is cut to \$625 – a reduction of 47 percent – when the coils are cleaned. A large double door fridge (age unspecified) cost \$950 per year to run. That cost is shaved by 46 percent, to \$433, when the coils are cleaned. The other examples are in the same range.

Fennelly said that food service technicians often say that the most common cause of service calls are problems that arise from clogged condenser coil housings. Typically, the approach to cleaning debris is to use a brush, vacuum or wetvac. These steps are a good start but, ultimately ineffective because the problems often are deeper in the apparatus and can’t be dislodged in this way.

October 18, 2016 by Carl Weinschenk

Energy Consumption Ratio

# Natural Refrigerant

**Natural refrigerant is used in all Turbo Air refrigerators**

The most common refrigerants that have been used in the industry are HFCs (hydrofluorocarbons R-134a, R-404A), replacements for CFCs (chlorofluorocarbons) which are harmful substances proven to deplete the ozone layer. HFC's are not directly ozone-depleting but these strong greenhouse gases have been shown to have a negative impact on the environment, contributing to global warming up to 4,000 times more than CO<sub>2</sub>. These GWP refrigerants are listed among substances regulated by the Kyoto Protocol of 1992, and HFC substances such as R-134a and R-404A will be banned by new **U.S government regulations starting January 1, 2019.**

The industry must embrace the new climate-friendly natural refrigerant HC (hydrocarbons).

**All temperature information provided is obtained through NSF standard testing environment.**

Each of our products certifications may differ under certain specifications and various options.

## Turbo Air is committed to the environment with innovative and eco-friendly technology!

By utilizing our innovative, eco-friendly technology, Turbo Air has now replaced all previous refrigerants with climate-friendly hydrocarbons R-600A (Isobutane) and R-290 (Propane). In our efforts to protect our environment, we have decreased energy consumption by 25%.

## What is Hydrocarbon?

HC (hydrocarbon) is a sustainable alternative to HFC. Hydrocarbons (R-600A, R-290) are natural refrigerants that have no ODP (ozone depleting potential) and very low GWP (global warming potential). Moreover, HC based equipment have been shown to be more energy efficient compared to HFC based equipment, which translates to lower operating costs. The EPA approved R-290 (Propane) and R-600A (Isobutane) as acceptable refrigerants for use in commercial refrigeration, stand-alone equipment refrigerators, and freezers.

U.S. Environmental Protection Agency [2010] EPA-430-F-10-043

# Why Turbo Air?

**Turbo Air has  
the most Energy Star®  
certificates in the industry**

## **High performance, low energy consumption**

We built our products to rely on their naturally emitted energy, thus reducing electrical energy consumption. Turbo Air strives for sustainability without sacrificing performance and durability.

## Refrigeration Reinvented Turbo Air

---

### Only at Turbo Air, Only in the World

Turbo Air's 2 & 3 Glass Door Freezers are powered by 115V. Not only is our 115V simple and easy to plug in and operate, it also saves customers over \$1,000 in electrical line installation costs required for 220V powered glass door freezers. We are the only company to have achieved this feat, which is proof of our dedication to energy efficiency and the environment.

### Self-Cleaning Condenser (Patented)

Dust accrue rapidly in areas where refrigeration is installed and used. Dust is drawn through the fan and accumulated, preventing the condenser from properly releasing heat. This causes the compressor to increase its pressure on refrigerants, increasing the possibility of the compressor breaking down. The 'Self-Cleaning Condenser' cleans the condenser with a rotating brush that moves up and down 2-3 times a day, preventing any dust build-up and maintaining the highest efficiency while saving additional energy.

### Efficient Refrigeration System

Refrigerators achieve their cooling effect by discharging heat through the condenser. In order to achieve high efficiency, it is important to increase the effectiveness of the condensers, especially in hot & humid places, such as the kitchen. Turbo Air uses condensers that are 10%~20% larger than the industry standard.

### No Electrical Cabinet Heater Needed

Electrical heaters in glass door freezers operate 24/7 in order to prevent water flow to the cabinet surface. This causes unnecessary energy consumption, and sometimes is the reason behind overheating. Instead of frame heaters, Turbo Air glass door freezers harness the heat produced by the compressor during the condensing stage, eliminating any unnecessary energy consumption as well as providing the most efficient freezer performance available.

### Condensate Water Cooling System

Unique to Turbo Air Reach-In products, our anti-corrosion pipes are coated on the surface with a special treatment, allowing the excess condensate waters to cool down the pipe's hottest area during the refrigerant compression process. This not only saves energy, but also eliminates the need for additional drains, which prevents slippery floors from becoming a safety issue.

### Turbo Cooling & Freeze Feature for Faster Chilling

The Turbo Cooling and Freeze function, located on the control panel, allows the compressor to run continuously for up to two hours. When this function is activated, the temperature inside the cabinet quickly decreases and cools drinks, food, and other products much more quickly. An ideal time to use the Turbo Cooling and Freeze function is when the unit is stocked with new products.

### Preventing Heat Transfer

Triple pane vacuum glass and plastic frame material are used to prevent heat transfer and to increase energy efficiency. Specially gilded aluminum exterior materials have both beauty and durable practicality.

Turbo cooling & freeze

Condensate water cooling system

# Why Turbo Air?

**Outstanding Reliability  
Superior Functionality  
Excellent Convenience  
Environment Friendly**

We are constantly striving to make products that are durable and functional while also beautiful with excellent convenience. Our innovations keep continuing and, for your peace of mind, the light never goes off in our R&D department.

## Refrigeration Reinvented Turbo Air

---

### Self-Cleaning Condenser (Patented)

Dust accrue rapidly in areas where refrigeration is installed and used. Dust is drawn through the fan and accumulated, preventing the condenser from properly releasing heat. This causes the compressor to increase its pressure on refrigerants, increasing the possibility of the compressor breaking down. The 'Self-Cleaning Condenser' cleans the condenser with a rotating brush that moves up and down 2-3 times a day, preventing any dust build-up and maintaining the highest efficiency while saving additional energy.

### Digital Temperature Control System

Digital technology provides precise and consistent temperatures throughout the cabinet. This allows food products to remain fresh over an extended period of time.

### Early Warning System (Only at Turbo Air)

Malfunctions are generally recognized when an increase in temperature is detected, 2 to 3 hours after the refrigerator has stopped running. This causes the user to become aware of malfunction issues the next morning when the contents have already spoiled. To eliminate this risk, Turbo Air units have a warning system in place that diagnose and monitor itself for risk factors, which gives early warning signals to preserve contents and prevent future problems.

### Self-Diagnosis System

When a refrigerator breaks, it will immediately run a self-diagnosis to figure out what the problem is, saving both service time and unnecessary expenses that could have occurred by misdiagnosis. It also allows for broken parts to be replaced easily.

### Door Pressure Release Device (Patented)

Pressure relief doors are designed to eliminate vacuum pressure and allow easy, fast door opening.

### On-Line Connected, Real Time Monitoring System

When the unit is connected to the internet, it will retain all of its temperature history. Wherever you are, you will be able to check the unit's status via mobile devices or the computer. You will also be able to control temperatures as well as turn the unit on and off remotely. If the unit becomes defective, it will automatically contact the designated person.

### 60mm Thick High Density Wall

To prevent heat transfer from where it's produced the most (compressor room), Turbo Air designed a specially reinforced 60mm thick, high-density wall to provide greater insulation and to increase overall efficiency.

# Why Turbo Air?

Turbo Air is proud to introduce this astonishing, convenient device as a great solution in the refrigeration industry:

## **Self-Cleaning Condenser**

**Did you know that dirty condenser coils are the main reason for most service calls?**

Busy marketplaces and restaurant kitchens with heavy traffic accumulate massive amounts of dust. Dust is drawn through the fan and builds rapidly in the system, increasing energy consumption and the workload of the compressor which shortens its lifespan. Though condenser cleaning is one of the most important maintenance procedures in

refrigeration, whether you do it yourself or hire a technician, manually cleaning the condenser regularly is both costly and time consuming.

### Major Issues

ENERGY CONSUMPTION  
**INCREASE**

COMPRESSOR  
**FAILURE**

HEALTH INSPECTION  
**FAILURE**

MANUFACTURER  
**WARRANTY VOID**

**Save on operating cost & maintenance cost  
= Low ownership cost**

With Turbo Air's Self-Cleaning Condenser, operators could potentially save from \$200~\$800 on professional cleaning services per call, and save on repair costs related to compressor replacement.

**Self-Cleaning Condenser is a standard feature at no additional cost and applicable on most of our product lines.** Turbo Air's customers can enjoy the full 3-year warranty coverage without maintenance requirements.

## SELF-CLEANING CONDENSER

### HOW DOES IT WORK?

Turbo Air's patented Self-Cleaning Condenser is an innovative feature that uses a fine mesh filter to catch the dust, while the rotating brush moves up and down 2~3 times a day to remove the excess outward and away from the condenser, effectively preventing dust from accumulating in the first place.

**This allows your system to maintain the highest efficiency while mitigating premature system failure.**

Solid Doors

# SOLID/HALF SOLID DOOR REFRIGERATORS NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

- Keep food products safe by maintaining constant temperatures.
- Alarms that sound when doors are not sealed shut; protect against food spoilage that originates from cold air leaks.
- Early warning alarm program detects issues before malfunction occurs.
- Digital display allows for easy monitoring.
- Programs interpret the condition of refrigeration systems by self-diagnosis.
- Rapid cool-down function (Turbo cooling).
- Automatic evaporator fan motor delays.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Cold air distribution system

Provides uniformly maintained temperature within the food zone.

### ■ Hot gas condensate system

Through Turbo Air's creative innovation, the condensate system surfaces have been specially treated to resist corrosion. This not only increases efficiency without the risk of refrigerant leakage from corrosion, but also prevents the overflow of condensate water.

### ■ All stainless steel cabinet construction

The PRO series model boasts a stainless steel interior and a 22 gauge stainless steel exterior (galvanized steel top, bottom). It guarantees the utmost in cleanliness and long product life. The PRO series model adds a touch of style to the most refined setting.

### ■ Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions. Only the Turbo Air PRO series uniquely provides stainless steel shelving.

### ■ LED interior lighting

### ■ Left hinged model available

(PRO-12R-N-L, PRO-15R-N-L, PRO-12-2R-N-L, PRO-15-2R-N-L)

### ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

### ■ Top mount compressor

### ■ Refrigerator holds 33°F ~ 38°F for the best in food preservation

### ■ Standard features

- Anti-corrosion coated evaporator
- Easily replaceable one-piece magnetic door gaskets
- Self-contained system
- Solid and sturdy grille design
- Door locks standard
- 4" dia. swivel casters with locks on the front set standard
- Lead time applies

### ■ Optional features

- Legs available for all models

# HALF SOLID DOOR FREEZERS

**NATURAL  
Refrigerant**
**Self-Cleaning Condenser Equipped Units**
**Self-Cleaning Condenser (Patented)**

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

**Digital temperature control & monitor system**

- Keep food products safe by maintaining constant temperatures.
- Alarms that sound when doors are not sealed shut; protect against food spoilage that originates from cold air leaks.
- Early warning alarm program detects issues before malfunction occurs.
- Digital display allows for easy monitoring.
- Programs interpret the condition of refrigeration systems by self-diagnosis.
- Smart defrost system will defrost as needed.
- Rapid cool-down function (Turbo freeze).
- Automatic evaporator fan motor delays.

**Hydrocarbon refrigerants (R-290)**

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

**Cold air distribution system**

Provides uniformly maintained temperature within the food zone.

**Hot gas condensate system**

Through Turbo Air's creative innovation, the condensate system surfaces have been specially treated to resist corrosion. This not only increases efficiency without the risk of refrigerant leakage from corrosion, but also prevents the overflow of condensate water.

**All stainless steel cabinet construction**

The PRO series model boasts a stainless steel interior and a 22 gauge stainless steel exterior (galvanized steel top, bottom). It guarantees the utmost in cleanliness and long product life. The PRO series model adds a touch of style to the most refined setting.

**Sturdy, clean stainless steel shelving**

Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions. Only the Turbo Air PRO series uniquely provides stainless steel shelving.

**Left hinged model available (PRO-26-2F-N-L)**
**LED interior lighting**
**Maintenance free,  
Self-Cleaning Condenser**

PRO-26-2F-N

PRO-50-4F-N

**High-density polyurethane insulation**

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

**Top mount compressor**
**Freezer holds -10°F ~ 0°F for the best in frozen food preservation**
**Standard features**

- Anti-corrosion coated evaporator
- Easily replaceable one-piece magnetic door gaskets
- Self-contained system
- Solid and sturdy grille design
- Door locks standard
- 4" dia. swivel casters with locks on the front set standard
- Thermostatic expansion valves

**Optional features**

- Legs available for all models
- Full and half pan racks available
- Tray slides available

## ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

## ■ Digital temperature control & monitor system

- Keep food products safe by maintaining constant temperatures.
- Alarms that sound when doors are not sealed shut; protect against food spoilage that originates from cold air leaks.
- Early warning alarm program detects issues before malfunction occurs.
- Digital display allows for easy monitoring.
- Programs interpret the condition of refrigeration systems by self-diagnosis.
- Rapid cool-down function (Turbo cooling).
- Automatic evaporator fan motor delays.

## ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## ■ Cold air distribution system

Provides uniformly maintained temperature within the food zone.

## ■ Hot gas condensate system

Through Turbo Air's creative innovation, the condensate system surfaces have been specially treated to resist corrosion. This not only increases efficiency without the risk of refrigerant leakage from corrosion, but also prevents the overflow of condensate water.

## ■ All stainless steel cabinet construction

The PRO series model boasts a stainless steel interior and a 22 gauge stainless steel exterior (galvanized steel top, bottom). It guarantees the utmost in cleanliness and long product life. The PRO series model adds a touch of style to the most refined setting.

## ■ Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions. Only the Turbo Air PRO series uniquely provides stainless steel shelving.

## ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

PRO-26-2R-PT-N

### ■ WARRANTY: 3 Year Parts and Labor Warranty, Additional 4 Year Warranty on Compressor

# ROLL-IN SOLID DOOR REFRIGERATORS NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

- Keep food products safe by maintaining constant temperatures.
- Alarms that sound when doors are not sealed shut; protect against food spoilage that originates from cold air leaks.
- Early warning alarm program detects issues before malfunction occurs.
- Digital display allows for easy monitoring.
- Programs interpret the condition of refrigeration systems by self-diagnosis.
- Rapid cool-down function (Turbo cooling).
- Automatic evaporator fan motor delays.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Cold air distribution system

Provides uniformly maintained temperature within the food zone.

### ■ Corrections - ready features

Our PRO series CRT units from fully equipped with all the required correctional facilities' features. It includes the stainless steel light cover with security screws, stainless steel PCB cover with security screws, hinges without covers, stainless mesh hasp cover on top, locking hasp (padlock not included), tray slide with security screws, flanged leg, and tamper-resistant torx screws.

### ■ All stainless steel cabinet construction

The PRO series model boasts a stainless steel interior and a **22 gauge** stainless steel exterior (galvanized steel top, bottom). It guarantees the utmost in cleanliness and long product life. The PRO series model adds a touch of style to the most refined setting.

### ■ LED interior lighting

### ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

Maintenance free,  
Self-Cleaning Condenser

PRO-50R-RI-N-CRT

### ■ Top mount compressor

### ■ Refrigerator holds 33°F ~ 38°F for the best in food preservation

### ■ Standard features

- Anti-corrosion coated evaporator
- Door locks standard
- Self-contained system
- Solid and sturdy grille design
- Heavy duty stainless steel ramp standard
- Thermostatic expansion valves
- Hot gas condensate system
- Lead time applies

## All stainless steel cabinet construction

The PRO series model boasts a stainless steel interior and a **22 gauge** stainless steel exterior (galvanized steel top, bottom). It guarantees the utmost in cleanliness and long product life. The PRO series model adds a touch of style to the most refined setting.

## Sturdy, clean stainless steel shelving

Only the Turbo Air PRO series uniquely provides stainless steel shelving. Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions.

## LED interior lighting

## High-density polyurethane insulation

Structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

## Half solid doors length stainless steel doors with locks

## Self-closing doors with stay open feature at 120 degrees

## Left hinged models available (PRO-26-2H-L, PRO-26-2H2-L)

## Heated cabinet holds 140°F ~ 180°F for the best in food preservation

PRO-50-4H

PRO-26-2H

## Standard features

- Door locks standard
- 4" dia. swivel casters with locks on the front set
- Easy replaceable one piece magnetic door gaskets
- Solid and sturdy grille design
- Lead time applies

## Optional features

- Legs available for all models
- Half pan racks available
- Tray slides available

Net Weight (lbs.)	279	279	499	699
Gross Weight (lbs.)	324	324	567	767

Design and specifications subject to change without notice. Most updated spec sheets are available at [www.turboairinc.com](http://www.turboairinc.com).

Actual shipping weight may differ due to extra packing materials for product protection.

\* Depth does not include 2-1/2" for door handles. † Height does not include 5" for caster height.

## ■ WARRANTY: 3 Year Parts and Labor Warranty

# PASS-THRU GLASS DOOR HEATED CABINETS

## Digital temperature control & monitor system

- Keep food products safe by maintaining constant temperatures.
- Alarm beeps when doors are not sealed.
- Early warning alarm program detects issues before malfunction occurs.
- Digital display allows for easy monitoring.
- Sensitive touch display.

## Ducted fan air distribution system

Maintains temperature within the food zone.

## On/Off switch

ON/OFF switch is located on control panel

## All stainless steel cabinet construction

The PRO series model boasts a stainless steel interior and a **22 gauge** stainless steel exterior (galvanized steel top, bottom). It guarantees the utmost in cleanliness and long product life. The PRO series model adds a touch of style to the most refined setting.

## Sturdy, clean stainless steel shelving

Only the Turbo Air PRO series uniquely provides stainless steel shelving. Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions.

## LED interior lighting

## High-density polyurethane insulation

Structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

## Glass doors length stainless steel doors with locks

## Self-closing doors with stay open feature at 120 degrees

## Left hinged models available (PRO-26H-G-PT-L, PRO-26H2-G-PT-L)

## Heated cabinet holds 140°F ~ 180°F for the best in food preservation

PRO-50H-G-PT

PRO-77H-G-PT

## Standard features

- Door locks standard
- 4" dia. swivel casters with locks on the front set
- Easy replaceable one piece magnetic door gaskets
- Solid and sturdy grille design
- Lead time applies

## Optional features

- Legs available for all models
- Full and half pan racks available
- Tray slides available

Design and specifications subject to change without notice. Most updated spec sheets are available at [www.turboairinc.com](http://www.turboairinc.com).

Actual shipping weight may differ due to extra packing materials for product protection.

\* Depth does not include 2-1/2" for door handles. † Height does not include 5" for caster height.

## ■ WARRANTY: 3 Year Parts and Labor Warranty

# ROLL-IN SOLID DOOR HEATED CABINETS

## ■ Digital temperature control & monitor system

- Keep food products safe by maintaining constant temperatures.
- Alarm beeps when doors are not sealed.
- Early warning alarm program detects issues before malfunction occurs.
- Digital display allows for easy monitoring.
- Sensitive touch display.

## ■ Ducted fan air distribution system

Maintains temperature within the food zone.

## ■ On/Off switch

ON/OFF switch is located on control panel

## ■ All stainless steel cabinet construction

The PRO series model boasts a stainless steel interior and a **22 gauge** stainless steel exterior (galvanized steel top, bottom). It guarantees the utmost in cleanliness and long product life. The PRO series model adds a touch of style to the most refined setting.

## ■ Sturdy, clean stainless steel shelving

Only the Turbo Air PRO series uniquely provides stainless steel shelving. Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions.

## ■ LED interior lighting

## ■ High-density polyurethane insulation

Structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

## ■ Full solid doors length stainless steel doors with locks

## ■ Self-closing doors with stay open feature at 120 degrees

## ■ Left hinged models available (PRO-26H-RI-L, PRO-26H2-RI-L)

## ■ Heated cabinet holds 140°F ~ 180°F for the best in food preservation

PRO-26H-RI

PRO-50H-RI

## ■ Standard features

- Door locks standard
- 4" dia. swivel casters with locks on the front set
- Easy replaceable one piece magnetic door gaskets
- Solid and sturdy grille design
- Lead time applies

## ■ Optional features

- Legs available for all models
- Full and half pan racks available
- Tray slides available

# SOLID DOOR REFRIGERATORS NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

- Keep food products safe by maintaining constant temperatures.
- Alarms that sound when doors are not sealed shut; protect against food spoilage that originates from cold air leaks.
- Early warning alarm program detects issues before malfunction occurs.
- Digital display allows for easy monitoring.
- Programs interpret the condition of refrigeration systems by self-diagnosis.
- Rapid cool-down function (Turbo Cooling).
- Automatic evaporator fan motor delays.

### ■ Hydrocarbon refrigerants (R-290 / R-600a)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Stainless steel cabinet construction

The Turbo Air Super Deluxe model boasts a stainless steel interior and exterior (galvanized steel top, bottom and back). It guarantees the utmost in cleanliness and long product life. Sharp corners and edges have been rounded to reduce the risk of injury. The Super Deluxe adds a touch of style to the most refined setting.

### ■ Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions. Only the Turbo Air Super Deluxe series uniquely provides stainless steel shelving.

### ■ Left hinged model available (TSR-23SD-N6-L)

### ■ LED interior lighting

### ■ Bottom mount compressor

### ■ Refrigerator holds 33°F ~ 38°F for the best in food preservation

Maintenance free,  
Self-Cleaning Condenser

TSR-72SD-N

TSR-23SD-N6

### Door pressure release device (Patented)

Pressure relief doors are designed to eliminate vacuum pressure and allow easy, fast door opening.

### ■ Standard features

- Anti-corrosion coated evaporator
- Positive seal self-closing doors
- Easily replaceable one-piece magnetic door gaskets
- Self-contained system
- Solid and sturdy grille design
- High-density polyurethane insulation
- Door locks standard
- 4" dia. swivel casters with locks on the front set standard

### ■ Optional features

- Legs available for all models
- Full and half pan racks available (except TSR-35SD-N6)

### ■ Digital temperature control & monitor system

- Keep food products safe by maintaining constant temperatures.
- Alarms that sound when doors are not sealed shut; protect against food spoilage that originates from cold air leaks.
- Early warning alarm program detects issues before malfunction occurs.
- Digital display allows for easy monitoring.
- Programs interpret the condition of refrigeration systems by self-diagnosis.
- Rapid cool-down functions (Turbo Cooling).
- Automatic evaporator fan motor delays.

### ■ Hydrocarbon refrigerants (R-290 / R-600a)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Stainless steel interior & exterior

The Turbo Air Super Deluxe glass door model is constructed with stainless steel exterior. The door is glass with AL frame. The interior is stainless steel that guarantees the utmost in cleanliness and long product life. The Super Deluxe adds a touch of style to the most refined setting.

### ■ Double pane glass doors with Low-E glass

Energy saving double pane glass doors are equipped with Low-emissivity glass, which reduces outer heat gain and decreases energy consumption. It enhances energy efficiency and minimizes condensation. Lightweight door construction also reduces door maintenance and bushing wear, which in turn facilitates smoother door opening.

### ■ Ergonomically designed doors

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. Self-closing features make this the ultimate choice in customer convenience.

### ■ Adjustable, heavy duty, PE (polyethylene) coated wire shelves

### ■ LED interior lighting

### ■ Bottom mount compressor

### ■ Door pressure release device (Patented)

Pressure relief doors are designed to eliminate vacuum pressure and allow easy, fast door opening.

### ■ Refrigerator holds 33°F ~ 38°F for the best in food preservation

### ■ Standard features

- Anti-corrosion coated evaporator
- Easily replaceable one-piece magnetic door gaskets
- Self-contained system
- Solid and sturdy grille design
- Door locks standard
- 4" dia. swivel casters with locks on the front set standard
- High-density polyurethane insulation

### ■ Optional features

- Legs available for all models

# GLASS DOOR FREEZERS NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

- Keep food products safe by maintaining constant temperatures.
- Alarms that sound when doors are not sealed shut; protect against food spoilage that originates from cold air leaks.
- Early warning alarm program detects issues before malfunction occurs.
- Digital display allows for easy monitoring.
- Programs interpret the condition of refrigeration systems by self-diagnosis.
- Rapid cool-down functions (Turbo Freeze).
- Automatic evaporator fan motor delays.
- Smart defrost system will defrost as needed.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

- Keep food products safe by maintaining constant temperatures.
- Alarms that sound when doors are not sealed shut; protect against food spoilage that originates from cold air leaks.
- Early warning alarm program detects issues before malfunction occurs.
- Digital display allows for easy monitoring.
- Programs interpret the condition of refrigeration systems by self-diagnosis.
- Rapid cool-down function (Turbo Freeze & Turbo Cooling).
- Smart defrost system will defrost as needed.
- Automatic evaporator fan motor delays.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Two separate refrigeration systems (M3RF45-2-N)

The M3 series dual temp. model is designed with two separate compressors for refrigerator & freezer. The single section model is built as a refrigerator on the top half and as a freezer on the bottom half. The two section model is built as a **freezer on the left 35% and as a refrigerator on the right 65%.**

### ■ Exterior & interior of cabinet construction

Stainless steel exterior (galvanized steel top, bottom and back) and AL interior with stainless steel floor. It guarantees the utmost in cleanliness and long product life. Unlike other companies' products, sharp corners and edges have been rounded to reduce the risk of injury.

### ■ Adjustable, heavy duty, PE (polyethylene) coated wire shelves

### ■ Left hinged model available (M3RF19-2-N-L)

### ■ LED interior lighting

### ■ Refrigerator holds 33°F ~ 38°F, and freezer holds -10°F ~ 0°F for the best in food preservation

Maintenance free,  
Self-Cleaning Condenser

M3RF45-2-N

M3RF19-2-N

### Door pressure release device (Patented, M3RF45-2-N only)

Pressure relief doors are designed to eliminate vacuum pressure and allow easy, fast door opening.

### ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Door locks standard
- Solid and sturdy grille design
- High-density polyurethane insulation

### ■ Optional features

- Legs available for all models

## Self-Cleaning Condenser Equipped Units

### Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

### Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### Cold Bunker system

Our innovative forced air system allows cold air to flow all around the food pan area, covering not only underneath the pan, but also the front, top and the rear. This unique air flow creates a cold air-shield around the pan, which maintains the food temperature at under 41°F (NSF requirement) even when the lids are opened. In addition, the compartment isolates pans from the reach-in area to prevent food spillage.

### Stainless steel cabinet construction

The PRO series model boasts a stainless steel interior (Aluminum door liner) and a **22 gauge** stainless steel exterior (galvanized steel bottom). It guarantees the utmost in cleanliness and long product life. The PRO series adds a touch of style to the most refined setting.

### Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. Only the PRO series uniquely provides stainless steel shelving.

### 9-1/2" deep, 1/2" thick high-density Polyethylene cutting board included with convenient side rail

### Left hinged model available (PST-28-N-L)

### Spring assisted heavy duty gravity hinge

### Easy removal hood & hood lid for cleaning

### Insulated hood & hood lid

### Refrigerator holds 33°F ~ 39°F for the best in food preservation

### LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature.

### Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Standard 1/6 size, 4" deep condiment pans included
- Door locks standard
- High-density polyurethane insulation
- Lead time applies

### Optional features

- Stainless steel double overself available (except PST-28-N)
- Removable food covers available
- Legs available for all models: 6" high
- Casters available for all models: 1", 2.5", 5"

In addition, the compartment isolates pans from the reach-in area to prevent food spillage.

## Stainless steel cabinet construction

The PRO series model boasts a stainless steel interior (Aluminum door liner) and a **22 gauge** stainless steel exterior (galvanized steel bottom). It guarantees the utmost in cleanliness and long product life. The PRO series adds a touch of style to the most refined setting.

## Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. Only the PRO series uniquely provides stainless steel shelving.

## 9-1/2" deep, 1/2" thick high-density Polyethylene cutting board included with convenient side rail

## Spring assisted heavy duty gravity hinge

## Easy removal hood & hood lid for cleaning

## Insulated hood & hood lid

## Refrigerator holds 33°F ~ 39°F for the best in food preservation

PST-28-D2-N

PST-48-D2R-N

## LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature (Only PST-48-D2R(L)-N).

## Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Standard 1/6 size, 4" deep condiment pans included
- Door locks standard
- High-density polyurethane insulation
- Lead time applies

## Optional features

- Stainless steel double overshef available (except PST-28-D2-N)
- Removable food covers available
- Legs available for all models: 6" high
- Casters available for all models: 1", 2.5", 5"

# SANDWICH/SALAD UNITS - DRAWERS NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Cold Bunker system

Our innovative forced air system allows cold air to flow all around the food pan area, covering not only underneath the pan, but also the front, top and the rear. This unique air flow creates a cold air-shield around the pan, which maintains the food temperature at under 41°F (NSF requirement) even when the lids are opened. In addition, the compartment isolates pans from the reach-in area to prevent food spillage.

### ■ Stainless steel cabinet construction

The PRO series model boasts a stainless steel interior (Aluminum door liner) and a **22 gauge** stainless steel exterior (galvanized steel bottom). It guarantees the utmost in cleanliness and long product life. The PRO series adds a touch of style to the most refined setting.

## WARRANTY: 3 Year Parts and Labor Warranty, Additional 4 Year Warranty on Compressor

# MEGA TOP UNITS - DRAWERS NATURAL Refrigerant

Self-Cleaning Condenser Equipped Units

## Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

## Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

## Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## Cold Bunker system

Our innovative forced air system allows cold air to flow all around the food pan area, covering not only underneath the pan, but also the front, top and the rear. This unique air flow creates a cold air-shield around the pan, which maintains the food temperature at under 41°F (NSF requirement) even when the lids are opened. In addition, the compartment isolates pans from the reach-in area to prevent food spillage.

## Stainless steel cabinet construction

The PRO series model boasts a stainless steel interior (Aluminum door liner) and a **22 gauge** stainless steel exterior (galvanized steel bottom). It guarantees the utmost in cleanliness and long product life. The PRO series adds a touch of style to the most refined setting.

## Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. Only the PRO series uniquely provides stainless steel shelving.

## 9-1/2" deep, 1/2" thick high-density Polyethylene cutting board included with convenient side rail

## Spring assisted heavy duty gravity hinge

## Easy removal hood & hood lid for cleaning

## Insulated hood & hood lid

## Refrigerator holds 33°F ~ 39°F for the best in food preservation

PST-60-24-D2R-N

Maintenance free,  
Self-Cleaning  
Condenser

## LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature (Only PST-48-18-D2R(L)-N, PST-60-24-D2R(L)-N).

## Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Standard 1/6 size, 4" deep condiment pans included
- Door locks standard
- High-density polyurethane insulation
- Lead time applies

## Optional features

- Stainless steel double overshef available (except PST-28-D2-N)
- Removable food covers available
- Legs available for all models: 6" high
- Casters available for all models: 1", 2.5", 5"

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Cold Bunker system

Our innovative forced air system allows cold air to flow all around the food pan area, covering not only underneath the pan, but also the front, top and the rear. This unique air flow creates a cold air-shield around the pan, which maintains the food temperature at under 41°F (NSF requirement) even when the lids are opened. In addition, the compartment isolates pans from the reach-in area to prevent food spillage.

### ■ Stainless steel cabinet construction

The Turbo Air Super Deluxe model boasts a stainless steel interior (ABS door liner) and exterior (galvanized steel back & bottom). It guarantees the utmost in cleanliness and long product life. The Super Deluxe adds a touch of style to the most refined setting.

### ■ Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions. Only the Turbo Air Super Deluxe series uniquely provides stainless steel shelving.

### ■ Extra deep HDPE cutting board

Our cutting board is 19-1/4" deep and 1/2" thick to provide ample working space, and is made of easy to use and sanitize HDPE (High Density Polyethylene). The new side rail cutting board bracket makes it easy to secure and remove the cutting board.

### ■ Insulated pan cover

### ■ Front breathing, side mount compressor unit

With compressors positioned on the side of the unit, our refrigerators can now be serviced without being moved. Our innovative, front breathing feature also allows this model to be highly efficient in narrow spaces.

TPR-67SD-N

Maintenance free,  
Self-Cleaning Condenser

TPR-44SD-N

### LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature.

### ■ Refrigerator holds 33°F ~ 41°F for the best in food preservation

#### ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Standard 1/3 size, 6" deep condiment pans included
- 19-1/4" deep, 1/2" thick cutting board included
- Easily replaceable magnetic door gaskets
- High-density polyurethane insulation

#### ■ Optional features

- 2.5" dia. casters available - 1/2" diameter & 13 TPI
- Legs available for all models
- Half size pan rack for 18" x 26" sheet pans available
- Stainless steel single overshelf available (except TPR-93SD-N)
- Door locks available (extra lead time will apply)

# SANDWICH/SALAD UNITS - DRAWERS

**NATURAL**  
 Refrigerant

**Self-Cleaning Condenser Equipped Units**
**Self-Cleaning Condenser (Patented)**

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

**Digital temperature control & monitor system**

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

**Hydrocarbon refrigerants (R-290)**

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

**Cold Bunker system**

Our innovative forced air system allows cold air to flow all around the food pan area, covering not only underneath the pan, but also the front, top and the rear. This unique air flow creates a cold air-shield around the pan, which maintains the food temperature at under 41°F (NSF requirement) even when the lids are opened.

**Stainless steel cabinet construction**

The Turbo Air Super Deluxe model boasts a stainless steel interior (ABS door liner) and exterior (galvanized steel back & bottom) including durable stainless steel drawers. It guarantees the utmost in cleanliness and long product life. The Super Deluxe adds a touch of style to the most refined setting.

**Sturdy, clean stainless steel shelving**

Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions. Only the Turbo Air Super Deluxe series uniquely provides stainless steel shelving.

**9-1/2" deep, 1/2" thick high-density Polyethylene cutting board included with convenient side rail**
**Ergonomically designed doors & drawers**

Customers' fatigue fades away with easy door grip and drawers that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience. ABS sheet door liners resist water condensation with thermal efficiency.

TST-48SD-D2-N

TST-28SD-D2-N

- Each drawer accommodates up to 6" deep sixth (1/6) size pans (drawer pans not included)

Maintenance free,  
Self-Cleaning Condenser

**Insulated pan cover**
**Refrigerator holds 33°F ~ 39°F for the best in food preservation**
**Standard features**

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Standard 1/6 size, 4" deep condiment pans included

**Optional features**

- Stainless steel double overshef available (except TST-28SD-D2-N)
- Clear lids available
- Removable food covers available
- 2.5" dia. casters available - 1/2" diameter & 13 TPI
- Legs available for all models

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Cold Bunker system

Our innovative forced air system allows cold air to flow all around the food pan area, covering not only underneath the pan, but also the front, top and the rear. This unique air flow creates a cold air-shield around the pan, which maintains the food temperature at under 41°F (NSF requirement) even when the lids are opened. In addition, the compartment isolates pans from the reach-in area to prevent food spillage.

### ■ Stainless steel cabinet construction

The Turbo Air Super Deluxe model boasts a stainless steel interior (ABS door liner) and exterior (galvanized steel back & bottom). It guarantees the utmost in cleanliness and long product life. The Super Deluxe adds a touch of style to the most refined setting.

### ■ Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions. Only the Turbo Air Super Deluxe series uniquely provides stainless steel shelving.

### ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place high density, CFC free polyurethane insulation.

### ■ 9-1/2" deep, 1/2" thick high-density Polyethylene cutting board included with convenient side rail

### ■ Insulated pan cover

### ■ Refrigerator holds 33°F ~ 39°F for the best in food preservation

### LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature.

### ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Standard 1/6 size, 4" deep condiment pans included
- Lead time applies

### ■ Optional features

- Stainless steel double overself available
- Removable food covers available
- Legs available for all models
- Door locks available (extra lead time will apply)
- 2.5" dia. casters available - 1/2" diameter & 13 TPI

- Standard 4" dia. swivel casters with locks on the front set
- Standard 1/6 size, 4" deep condiment pans included
- High-density polyurethane insulation

## ■ Optional features

- Stainless steel double overshef available (except TST-28SD-12-N)
- Clear lids available
- Removable food covers available
- Legs available for all models
- Door locks available (extra lead time will apply)
- 2.5" dia. casters available - 1/2" diameter & 13 TPI

## ■ WARRANTY: 3 Year Parts and Labor Warranty, Additional 4 Year Warranty on Compressor

# MEGA TOP UNITS - CLEAR LID NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Cold Bunker system

Our innovative forced air system allows cold air to flow all around the food pan area, covering not only underneath the pan, but also the front, top and the rear. This unique air flow creates a cold air-shield around the pan, which maintains the food temperature at under 41°F (NSF requirement) even when the lids are opened. In addition, the compartment isolates pans from the reach-in area to prevent food spillage.

### ■ Stainless steel cabinet construction

The Turbo Air Super Deluxe model boasts a stainless steel interior (ABS door liner) and exterior (galvanized steel back & bottom). It guarantees the utmost in cleanliness and long product life. The Super Deluxe adds a touch of style to the most refined setting.

### ■ Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions. Only the Turbo Air Super Deluxe series uniquely provides stainless steel shelving.

### ■ Removable insulated slide-back lid

Removable hood and slide-back lid are easy to clean while providing a better view of the top opening.

### ■ 9-1/2" deep, 1/2" thick high-density Polyethylene cutting board included with convenient side rail

### ■ Refrigerator holds 33°F ~ 39°F for the best in food preservation

TST-48SD-18-N-CL

Maintenance free,  
Self-Cleaning  
Condenser

### LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature.

### ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Standard 1/6 size, 4" deep condiment pans included
- High-density polyurethane insulation
- Lead time applies

### ■ Optional features

- Stainless steel double overshef available
- Legs available for all models
- Door locks available (extra lead time will apply)
- 2.5" dia. casters available - 1/2" diameter & 13 TPI

# MEGA TOP UNITS NATURAL Refrigerant

Self-Cleaning Condenser Equipped Units

## ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

## ■ Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

## ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## ■ Cold Bunker system

Our innovative forced air system allows cold air to flow all around the food pan area, covering not only underneath the pan, but also the front, top and the rear. This unique air flow creates a cold air-shield around the pan, which maintains the food temperature at under 41°F (NSF requirement) even when the lids are opened. In addition, the compartment isolates pans from the reach-in area to prevent food spillage.

## ■ Stainless steel cabinet construction

The Turbo Air Super Deluxe model boasts a stainless steel interior (ABS door liner) and exterior (galvanized steel back & bottom). It guarantees the utmost in cleanliness and long product life. The Super Deluxe adds a touch of style to the most refined setting.

## ■ Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions. Only the Turbo Air Super Deluxe series uniquely provides stainless steel shelving.

## ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place high density, CFC free polyurethane insulation.

## ■ 9-1/2" deep, 1/2" thick high-density Polyethylene cutting board included with convenient side rail

## ■ Insulated pan cover

## ■ Refrigerator holds 33°F ~ 39°F for the best in food preservation

TST-48SD-12M-N

Maintenance free,  
Self-Cleaning  
Condenser

## LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature.

## ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Standard 1/6 size, 4" deep condiment pans included
- Lead time applies

## ■ Optional features

- Stainless steel double overshef available
- Clear lids available
- Removable food covers available
- Legs available for all models
- Door locks available (extra lead time will apply)
- 2.5" dia. casters available - 1/2" diameter & 13 TPI

The Turbo Air J series boasts a stainless steel exterior (galvanized steel back and bottom). Interior is stainless steel floor with AL sides, back and AL door liners. It guarantees the utmost in cleanliness and long product life. The J series adds a touch of style to the most refined setting.

## Side mount compressor unit

With compressors positioned on the side of the unit, our refrigerators can now be serviced without being moved. Our innovative, front breathing feature also allows this model to be highly efficient in narrow spaces.

## Hot gas condensate system

Through Turbo Air's creative innovation, the condensate system surfaces have been specially treated to resist corrosion. This not only increases efficiency without the risk of refrigerant leakage from corrosion, but also thoroughly prevents the overflow of condensate water.

## Ergonomically designed doors

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience.

## Easy open front grille with condenser cleaning brush kit

Front grille cover is easily removable without any tools, which makes condenser cleaning easy and convenient at any time. Handy condenser cleaning brush is included inside the front grille cover.

## 9-1/2" deep, 1/2" thick high-density Polyethylene cutting board included with convenient side rail

## Adjustable, heavy duty, PE (polyethylene) coated wire shelves

## Refrigerator holds 33°F ~ 39°F for the best in food preservation

## LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature.

## Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Standard 1/6 size, 4" deep condiment pans included
- High-density polyurethane insulation

## Optional features

- 2.5" dia. casters available - 1/2" diameter & 13 TPI
- Door locks available (extra lead time will apply)
- Legs available for all models

# BUFFET DISPLAY TABLES NATURAL Refrigerant

## ■ Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

## ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## ■ Exterior & interior of the cabinet

The Turbo Air J series boasts all stainless steel exterior including back (galvanized steel bottom). Interior is stainless steel floor with AL sides, back and AL door liners. It guarantees the utmost in cleanliness and long product life. The J series adds a touch of style to the most refined setting.

## ■ Side mount compressor unit

With compressors positioned on the side of the unit, our refrigerators can now be serviced without being moved. Our innovative, front breathing feature also allows this model to be highly efficient in narrow spaces.

## ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

## ■ Ergonomically designed doors

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience.

## ■ Easy open front grille with condenser cleaning brush kit

Front grille cover is easily removable without any tools, which makes condenser cleaning easy and convenient at any time. Handy condenser cleaning brush is included inside the front grille cover.

## ■ Adjustable, heavy duty, PE (polyethylene) coated wire shelves

## ■ Double sided polycarbonate sneeze guard (optional)

The transparent polycarbonate cover is durable, and the two 304 stainless steel side stands are easy to clean and anticorrosive.

## ■ Refrigerator holds 33°F ~ 39°F for the best in food preservation

# UNDERCOUNTER REFRIGERATORS NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

### Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### Stainless steel cabinet construction

The PRO series model boasts a stainless steel interior (Aluminum door liner) and a **22 gauge** stainless steel exterior (galvanized steel bottom). It guarantees the utmost in cleanliness and long product life. The PRO series adds a touch of style to the most refined setting.

### Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. Only the PRO series uniquely provides stainless steel shelving.

### Ergonomically designed doors

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience.

### High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

### Left hinged model available (PUR-28-N-L)

### Spring assisted heavy duty gravity hinge

### Refrigerator holds 33°F ~ 38°F for the best in food preservation

PUR-72-N

PUR-48-N

Maintenance free, Self-Cleaning Condenser

### LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature.

### Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Door locks standard
- Lead time applies

### Optional features

- Legs available for all models: 6" high
- Stainless steel double overshelf available (except PUR-28-N)
- Casters available for all models: 1", 2.5", 5"
- Back splash guard available

# UNDERCOUNTER REFRIGERATORS - DRAWERS NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Stainless steel cabinet construction

The PRO series model boasts a stainless steel interior (Aluminum door liner) and a **22 gauge** stainless steel exterior (galvanized steel bottom). It guarantees the utmost in cleanliness and long product life. The PRO series adds a touch of style to the most refined setting.

### ■ Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. Only the PRO series uniquely provides stainless steel shelving.

### ■ Ergonomically designed doors

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience.

### ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

### ■ Spring assisted heavy duty gravity hinge

### ■ Refrigerator holds 33°F ~ 38°F for the best in food preservation

### LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature (Only PUR-48-D2R(L)-N).

### ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Door locks standard
- Lead time applies

### ■ Optional features

- Legs available for all models: 6" high
- Stainless steel double overshef available (except PUR-28-D2-N)
- Casters available for all models: 1", 2.5", 5"
- Back splash guard available

TUF-60SD-N

### LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature.

### ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set

### ■ Optional features

- Legs available for all models
- Stainless steel double overshef available (except TUF-28SD-N)
- 2.5" dia. casters available - 1/2" diameter & 13 TPI
- Door locks available (extra lead time will apply)
- Back splash guard available

# UNDERCOUNTER FREEZERS - DRAWERS NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Stainless steel cabinet construction

The Turbo Air Super Deluxe model boasts a stainless steel interior, exterior (galvanized steel back & bottom) and durable stainless steel drawers. It guarantees the utmost in cleanliness and long product life. The Super Deluxe adds a touch of style to the most refined setting.

### ■ Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions. Only the Turbo Air Super Deluxe series uniquely provides stainless steel shelving.

### ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

### ■ Ergonomically designed doors

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience. ABS sheet door liners resist water condensation with thermal efficiency.

### ■ Freezer holds -10°F ~ 0°F for the best in frozen food preservation

- Each drawer accommodates up to 6" deep sixth (1/6) size pans (drawer pans not included)

### ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set

### ■ Optional features

- Legs available for all models
- Stainless steel double overshelf available (except TUF-28SD-D2-N)
- 2.5" dia. casters available - 1/2" diameter & 13 TPI
- Back splash guard available

# UNDERCOUNTER REFRIGERATORS NATURAL Refrigerant

## Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

## Hydrocarbon refrigerants (R-600a)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## Side mount compressor unit

With compressors positioned on the side of the unit, our refrigerators can now be serviced without being moved. Our innovative, front breathing feature also allows this model to be highly efficient in narrow spaces.

## Exterior & interior of the cabinet

The Turbo Air J series boasts a stainless steel exterior (galvanized steel back and bottom). Interior is stainless steel floor with AL sides, back and AL door liners. It guarantees the utmost in cleanliness and long product life. The J series adds a touch of style to the most refined setting.

## Hot gas condensate system

Through Turbo Air's creative innovation, the condensate system surfaces have been specially treated to resist corrosion. This not only increases efficiency without the risk of refrigerant leakage from corrosion, but also thoroughly prevents the overflow of condensate water.

## High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

## Ergonomically designed doors

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience.

## Adjustable, heavy duty, PE (polyethylene) coated wire shelves

## Easy open front grille with condenser cleaning brush kit

Front grille cover is easily removable without any tools, which makes condenser cleaning easy and convenient at any time. Handy condenser cleaning brush is included inside the front grille cover.

## Refrigerator holds 33°F ~ 39°F for the best in food preservation

## ■ Hydrocarbon refrigerants (R-600a)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## ■ Side mount compressor unit

With compressors positioned on the side of the unit, our refrigerators can now be serviced without being moved. Our innovative, front breathing feature also allows this model to be highly efficient in narrow spaces.

## ■ Exterior & interior of the cabinet

The Turbo Air J series boasts a stainless steel exterior (galvanized steel back and bottom). Interior is stainless steel floor with AL sides, back and AL door liners. It guarantees the utmost in cleanliness and long product life. The J series adds a touch of style to the most refined setting.

## ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

## ■ Ergonomically designed doors

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience.

## ■ Adjustable, heavy duty, PE (polyethylene) coated wire shelves

## ■ Easy open front grille with condenser cleaning brush kit

Front grille cover is easily removable without any tools, which makes condenser cleaning easy and convenient at any time. Handy condenser cleaning brush is included inside the front grille cover.

## ■ Refrigerator holds 33°F ~ 39°F for the best in food preservation

## ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set

## LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature.

## ■ Optional features

- 2.5" dia. casters available - 1/2" diameter & 13 TPI
- Door locks available (extra lead time will apply)
- Legs available for all models

# WORKTOP REFRIGERATORS NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Stainless steel cabinet construction

The PRO series model boasts a stainless steel interior (Aluminum door liner) and a **22 gauge** stainless steel exterior (galvanized steel bottom). It guarantees the utmost in cleanliness and long product life. The PRO series adds a touch of style to the most refined setting.

### ■ Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. Only the PRO series uniquely provides stainless steel shelving.

### ■ Ergonomically designed doors

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience.

### ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

### ■ Left hinged model available (PWR-28-N-L)

### ■ Spring assisted heavy duty gravity hinge

### ■ Refrigerator holds 33°F ~ 38°F for the best in food preservation

PWR-28-N

### LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature.

### ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Door locks standard
- Lead time applies

### ■ Optional features

- Legs available for all models: 6" high
- Stainless steel double overself available (except PWR-28-N)
- Casters available for all models: 1", 2.5", 5"

# GLASS DOOR WORKTOP REFRIGERATORS NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Stainless steel cabinet construction

The PRO series model boasts a stainless steel interior (Aluminum door liner) and a **22 gauge** stainless steel exterior (galvanized steel bottom). It guarantees the utmost in cleanliness and long product life. The PRO series adds a touch of style to the most refined setting.

### ■ Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. Only the PRO series uniquely provides stainless steel shelving.

### ■ Ergonomically designed doors

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience.

### ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

### ■ Left hinged model available (PWR-28-G-N-L)

### ■ Spring assisted heavy duty gravity hinge

### ■ Refrigerator holds 33°F ~ 38°F for the best in food preservation

PWR-28-G-N

PWR-48-G-N

### LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature.

### ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- Door locks standard
- Lead time applies

### ■ Optional features

- Legs available for all models: 6" high
- Stainless steel double overshelf available (except PWR-28-G-N)
- Casters available for all models: 1", 2.5", 5"

### ■ WARRANTY: 3 Year Parts and Labor Warranty, Additional 4 Year Warranty on Compressor

# WORKTOP FREEZERS NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

Keep food products safe by maintaining constant temperatures. External digital display allows for easy monitoring.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Stainless steel cabinet construction

The Turbo Air Super Deluxe model boasts a stainless steel interior and exterior (galvanized steel back & bottom). It guarantees the utmost in cleanliness and long product life. The Super Deluxe adds a touch of style to the most refined setting.

### ■ Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions. Only the Turbo Air Super Deluxe series uniquely provides stainless steel shelving.

### ■ Ergonomically designed doors

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience. ABS sheet door liners resist water condensation with thermal efficiency.

### ■ Freezer holds -10°F ~ 0°F for the best in frozen food preservation

### ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- Standard 4" dia. swivel casters with locks on the front set
- High-density polyurethane insulation

### LED interior lighting & fan control (only at Turbo Air)

Energy efficient LED lighting lights every corner, making items easy to find. Fan control function automatically shuts off the fan when the door is open, which prevents hot air from being drawn in, thus maintaining the cool inner temperature.

### ■ Optional features

- 2.5" dia. casters available - 1/2" diameter & 13 TPI
- Legs available for all models
- Door locks available (extra lead time will apply)

# CHEF BASE REFRIGERATORS NATURAL Refrigerant

Self-Cleaning Condenser Equipped Units

## Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing the condenser daily.

## Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## Digital temperature display on front panel

## Strong body and durable construction

Built with heavy duty 16 ga. stainless steel, Chef Base top is manufactured of one-piece reinforced stainless steel to ensure durability.

## Countertops

PRCBE-36/48/60R-N supports up to 788 pounds of equipment.  
PRCBE-72/84/96R-N supports up to 1,192 pounds of equipment.

## Durable stainless steel drawers

## Top is insulated to eliminate heat transfer to the interior of cabinet

## Front breathing design for easy maintenance and zero-clearance installation

With compressors positioned on the side of the unit, our refrigerators can now be serviced without being moved. Our innovative, front breathing feature also allows this model to be highly efficient in narrow spaces.

## High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

## Stainless steel top with Drip Guard (marine) edge

## Hot gas condensate system

## Full length drawer with gasket guard

\* Each drawer accommodates up to 6" deep full size pans (drawer pans not included)

## Drawer slider load capacity up to 180lbs

## Magnetic snap-in gasket

## Refrigerator holds 33°F ~ 38°F for the best in food preservation

## Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- 4" dia. swivel casters

## Optional features

- Legs available for all models

Actual shipping weight may differ due to extra packing materials for product protection.

\* Height does not include 5" for caster height.

### ■ WARRANTY: 3 Year Parts and Labor Warranty, Additional 4 Year Warranty on Compressor

# Why Turbo Air?

Self-Cleaning Condenser equipped refrigerators and freezers  
**Standard** option at no additional cost

Let's watch our  
Self-cleaning condenser video!

"Dirty condenser coils are the  
main reason for service calls"

**Must clean condenser  
every 30~90 days**

- ✓ Manufacturer Warranty **Void**
- ✓ Stored Goods **Lost**
- ✓ Compressor Life **Decreased**
- ✓ Energy Efficiency **Reduced**
- ✓ Health Inspection **Failed**

## SOLUTION

Self-Cleaning Condenser  
patented, only at Turbo Air

**3 YEARS  
NO MAINTENANCE  
REQUIRED**

# Glass Door Merchandisers

## Super Deluxe Series

Swing Door Refrigerators / Freezers

## Standard Series

Swing Door Refrigerators  
Sliding Door Refrigerators  
Swing Door Freezers

## Diamond Show Cases

## Ice Merchandisers

## Ice Cream Dipping Cabinets

## Top Open Island Freezers

# GLASS DOOR MERCHANDISERS NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily (except TGM-5SD/7SD-N6).

### ■ Digital temperature control & monitor system (except TGM-5SD-N6, TGM-7SD-N6)

- Keep food products safe by maintaining constant temperatures.
- Alarms that sound when doors are not sealed shut; protect against food spoilage that originates from cold air leaks.
- Early Warning Alarm program detects issues before malfunction occurs.
- Digital display allows for easy monitoring.
- Programs interpret the condition of refrigeration systems by self-diagnosis.
- Rapid cool-down function (Turbo Cooling).
- Automatic evaporator fan motor delays.

### ■ Hydrocarbon refrigerants (R-600a)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Energy conserving fan control

Utilizing algorithmic air circulation for optimal temperature levels, our innovative fan control system conserves energy by at least 15% and increases compressor life by up to 30% (except TGM-5SD/7SD-N6).

### ■ Double pane glass doors with Low-E glass

Energy saving double pane glass doors are equipped with Low-emissivity glass, which reduces outer heat gain and decreases energy consumption. It enhances energy efficiency and minimizes condensation. Lightweight door construction also reduces door maintenance and bushing wear, which in turn facilitates smoother door opening.

### ■ High-density polyurethane insulation

The entire cabinet structure is foamed-in-place using high density, HCFC free polyurethane insulation.

### ■ LED interior lighting

Maintenance free,  
Self-Cleaning Condenser  
TGM-12SDW-N6

TGM-10SDB-N6

### ■ Refrigerator holds 33°F ~ 38°F for the best in food preservation

### ■ Standard features

- Anti-corrosion coated evaporator
- Door locks standard
- ‡ Two color options available (standard): Super Deluxe series comes in white cabinet (W) and black cabinet with black color trim (B).
- \* Please allow extra lead time for white cabinet with wine color trim.

### ■ Optional features

- 2.5" dia. casters available -1/2" dia. & 13 TPI (except TGM-5SD/7SD-N6)
- Price tag channel available

Maintenance free,  
Self-Cleaning Condenser

TGF-72SDW-N

TGF-47SDB-N

### Only at Turbo Air, Only in the World

Turbo Air's 2 & 3 Glass Door Freezers are powered by 115V. Not only is our 115V simple and easy to plug in and operate, it also saves customers over \$1,000 in electrical line installation for 220V powered glass door freezers. We are the only company to have achieved this feat, which is proof of our dedication to energy efficiency and the environment.

### ■ LED interior lighting

### ■ Freezer holds -10°F ~ 5°F for the best in frozen food preservation

### ■ Standard features

- Anti-corrosion coated evaporator
- Door locks standard
- High-density polyurethane insulation
- Two color options available (standard): Super Deluxe series comes in white cabinet (W), and black cabinet with black color trim (B).
- \* Please allow extra lead time for white cabinet with wine color trim.

### ■ Optional features

- Price tag channel available
- 4" dia. casters available -1/2" dia. & 13 TPI

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Digital temperature control & monitor system

- Keep food products safe by maintaining constant temperatures.
- Alarms that sound when doors are not sealed shut; protect against food spoilage that originates from cold air leaks.
- Early Warning Alarm program detects issues before malfunction occurs.
- Digital display allows for easy monitoring.
- Programs interpret the condition of refrigeration systems by self-diagnosis.
- Rapid cool-down function (Turbo Freeze).
- Smart defrost system will defrost as needed.
- Automatic evaporator fan motor delays.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Energy conserving fan control

Utilizing algorithmic air circulation for optimal temperature levels, our innovative fan control system conserves energy by at least 15% and increases compressor life by up to 30%.

### ■ Individual two cycle refrigeration systems (TGF-72SDH-N only)

### ■ No electrical cabinet heater is needed

Turbo Air is the first in the industry to replace a frame heater with a method of using compressor-produced heat. This eliminates any unnecessary energy consumption while providing efficient freezing performance.

### ■ Triple pane heated glass doors

Equipped with unique triple-pane heated glass doors which enhance energy efficiency by preventing heat transfers and minimizing condensation. Lightweight door construction reduces door maintenance, bushing wear, and facilitates smooth door opening.

### ■ LED interior lighting

### ■ Freezer holds -10°F ~ 5°F for the best in frozen food preservation

# GLASS DOOR MERCHANDISERS NATURAL Refrigerant

## ■ Hydrocarbon refrigerants (R-600a)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## ■ Hot gas condensate system

Through Turbo Air's creative innovation, the condensate system surfaces have been specially treated to resist corrosion. This not only increases efficiency without the risk of refrigerant leakage from corrosion, but also prevents the overflow of condensate water (except TGM-5R-N6).

## ■ LED advertising panel

LED lighting offers 5 times longer lasting life than fluorescents and conserves energy (except TGM-5R-N6, TGM-11RV-N6).

## ■ Double pane glass doors with Low-E glass

Energy saving double pane glass doors are equipped with Low-emissivity glass, which reduces outer heat gain and decreases energy consumption. It enhances energy efficiency and minimizes condensation. Lightweight door construction also reduces door maintenance and bushing wear, which in turn facilitates smoother door opening.

## ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, HCFC free polyurethane insulation.

## ■ Adjustable, heavy duty, PE (polyethylene) coated wire shelves

## ■ LED interior lighting

## ■ Refrigerator holds 33°F ~ 38°F for the best in beverage preservation

## ■ Standard features

- Anti-corrosion coated evaporator
- White color cabinet & black color frame on door

TGM-5R-N6

TGM-11RV-N6

TGM-22RV-N6

## ■ Optional features

- Gravity feed shelf available (except TGM-5R-N6)
- White and black color cabinet available (TGM-22RV-N6 only)
- Price tag channel available (TGM-22RV-N6 only)
- Door locks standard (TGM-5R-N6 only)
- 2.5" & 4" casters available (special stem nuts required, sold in separate, TGM-22RV-N6 only)

# DIAMOND SHOW CASES NATURAL Refrigerant

## ■ LED interior lighting display system

Safety shielded 4 LED lighting system on every corner of the cabinet ensures a longer life and brighter lighting than fluorescent light bulbs, providing attractive, enhanced and shadow-free illumination.

## ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## ■ Sturdy, clean stainless steel shelving

Shelves are the most important part of cleanliness as they come in direct contact with food. After a while, PVC coated wire shelves may peel, rust and lead to unsanitary conditions. Only the Turbo Air Diamond Show Case uniquely provides stainless steel shelving.

## ■ Beautiful 4 sided glass cabinet allows visibility from all sides to optimize display effect

## ■ Compact size and countertop design occupies minimum space but maximize impulse sales

## ■ Great space efficiency is ideal for narrow space restaurants and convenience stores

## ■ Elegant contemporary Euro design will enhance the interior and space decoration of any store

## ■ Standard features

- Self-contained system
- Door locks standard

## - Recommended operating conditions

CRT models are designed to operate in environments where temperature & humidity do not exceed 75°F and 55% relative humidity.

# ICE MERCHANDISERS NATURAL Refrigerant

Self-Cleaning Condenser Equipped Units

## ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

## ■ Digital temperature control & monitor system

- Keep food products safe by maintaining constant temperatures.
- Alarms that sound when doors are not sealed shut; protect against food spoilage that originates from cold air leaks.
- Digital display allows for easy monitoring.
- Programs interpret the condition of refrigeration systems by self-diagnosis.
- Rapid cool-down function (Turbo Freeze).
- Smart defrost system will defrost as needed.
- Automatic evaporator fan motor delays.

## ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## ■ Ice stays frozen even in hot climates

Turbo Air ice merchandisers are based on a freezer system that is adjusted to the ideal temperature range for bagged ice storage, whereas our competitors use refrigerator based systems. This system maintains an avg. temperature of 12°F or lower, which eliminates the problem of ice melting during hot weather conditions.

## ■ Triple pane heated glass doors

Equipped with unique triple-pane heated glass doors which enhance energy efficiency by preventing heat transfers and minimizing condensation. Lightweight door construction reduces door maintenance, bushing wear, and facilitates smooth door opening.

## ■ No electrical cabinet heater is needed

Electrical heaters in freezers operate 24/7 in order to prevent water flow to the cabinet surface. This causes unnecessary energy consumption, and sometimes is the reason behind overheating. Instead of frame heaters, Turbo Air freezers harness the heat produced by the compressor during its condensing stage, eliminating any unnecessary energy consumption as well as providing the most efficient freezer performance available.

## ■ High-density polyurethane insulation

The entire cabinet structure is foamed-in-place using high density, HCFC free polyurethane insulation.

## ■ LED advertising panel

LED lighting offers 5 times longer lasting life than fluorescents and conserves energy.

Maintenance free,  
Self-Cleaning Condenser

TGIM-49W-N

TGIM-23W-N

## ■ LED interior lighting

## ■ Bottom mount compressor units

Turbo Air's bottom mount compressor allows easier access for service and extra storage space above. In addition, the lower area provides a cooler and less greasy operating environment which results in reduced compressor running time.

## ■ Freezer holds 10°F ~ 15°F for the best in bagged ice storage

## ■ Standard feature

- Anti-corrosion coated evaporator
- Magnetic door gaskets

## ■ Optional features

- 4" dia. swivel casters available

# ICE CREAM DIPPING CABINETS

**NATURAL**  
Refrigerant

## ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## ■ Locked-in temperature equal from top to bottom

New technology of the Cold Wall System eliminates temperature fluctuations throughout the top and bottom areas of the interior cabinet. No more melting ice cream above while freezing below. Scooping has never been easier.

## ■ 5 years cleaning-free condenser

1/5" condenser pin gaps and electrodeposition coating allow the condenser to stay clean and prevent it from becoming tarnished, further guaranteeing the durability of the condenser.

## ■ Low-emissivity front glass and tempered glass sides

Energy saving Low-emissivity front glass reduces heat transfer and decreases energy consumption. Reinforced tempered safety glass is equipped on both sides.

## ■ Attractive contemporary design with curved glass front and top

Sleek new curved front and top glass is attractive and draws attention at once. Deep lowered glass front optimizes product visibility and impulse buying. This merchandiser is perfect for ice cream viewing and dipping.

## ■ LED interior lighting

Brighter and longer lasting LED light bulbs produce less heat, saving energy while maximizing display effect. Independent on/off light switch equipped.

## ■ Extra storage space (except TIDC-26-N)

Extra storage space accommodates additional ice cream tubs underneath the basket. Doors located to the rear allow easy access to the storage area eliminating inconvenient bracket usage in picking up ice cream tubs.

## ■ Sturdy, clean stainless steel shelves

## ■ PE coated removable magnetic frost shields

Provides fast and easy removal of accumulated frost on inside walls.

## ■ Standard plastic night covers for case opening

## ■ Manual defrost

## ■ Maintains -10°F ~ 8°F for the best in frozen ice cream preservation

## ■ Standard features

- White (W) and Green (G) color exterior available

## ■ Optional features

- 2.5" dia. casters available - 1/2" diameter & 13 TPI

## ■ Recommended operating conditions

These models are designed to operate in air conditioned environments where temperature and humidity are below 75°F and 55% relative humidity. Place units away from direct sunlight, rapid air movement and extreme temperature changes.

# TOP OPEN ISLAND FREEZERS **NATURAL Refrigerant**

## ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

## ■ Horizontal display freezer for high impulse sales

Flat lid display freezer provides convenient access and fast service and is ideal for high impulse sales such as frozen treats. Minimal frame glass lids allow excellent visibility with maximum merchandising effect.

## ■ Tempered, energy-saving, Low-E glass sliding top

Energy saving Low-emissivity glass top reduces outer heat gain and lowers energy consumption. Reinforced tempered glass lids for safety.

## ■ White, anti-rust coating on the exterior reduces fingerprints

## ■ LED interior lighting with on/off switch

## ■ External digital temperature control

## ■ Painted white powder-coated steel interior

## ■ Two layers of rubber bumper guards around the cabinet

## ■ Manual defrost system with drain

## ■ Wire baskets come standard

## ■ Freezer holds -10°F ~ 8°F for the best in frozen food preservation

## ■ Standard features

- No plumbing required
- Self-contained system
- 2.5" dia. casters standard, two locking
- Please allow extra lead time for TFS models

## ■ Recommended operating conditions

These models are designed to operate in air conditioned environments where temperature and humidity are below 75°F and 55% relative humidity. Place units away from direct sunlight, rapid air movement and extreme temperature changes.

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Modern design

By integrating great contours with durable structures, our modern style product designs are user-friendly while maintaining the highest product visibility and aesthetics. Safety reinforced tempered glass front shield and side walls optimize the merchandiser's display effects of fresh salads, sandwiches, desserts and beverages. Its elegant contemporary euro design will enhance any store application. Ideal for eye-catching displays and convenient access with fast service in high traffic areas.

### ■ Standard back-guard improves airflow

### ■ Stainless steel interior standard including back wall and deck pans

### ■ Stainless steel solid shelves standard

### ■ Perforated interior back wall & top for improved airflow

### ■ Foamed with polyurethane, high-density cell insulation (CFC free)

### ■ Front air intake and rear air discharge

### ■ Stainless steel color option available

### ■ Standard features

- Simple plug-in installation
- No plumbing required
- White and black color come standard
- Solar powered digital thermometer
- Digital electronic thermostat with defrost control
- LED interior lighting

Maintenance free,  
Self-Cleaning Condenser

TOM-60SS-N

TOM-50SB-N  
TOMD-50HB

### ■ Optional features

- Top display dry cases (TOMD-H, L) available in all sizes
- Night cover available (white / black)
- \* Night cover can not be used in conjunction with a TOMD dry case
- Security cover available
- Leveling leg available
- Casters available

### - Recommended operating conditions

TOM models are designed to operate in an environment where temperature & humidity do not exceed 80°F and 55% respectively. Units should not be installed near HVAC vents, fans or doorways that will disrupt the air curtain and compromise the function of the cabinet. Air curtain models will run most efficiently when completely loaded with product.

### ■ Modern design

By integrating great contours with durable structures, our modern style product designs are user-friendly while maintaining the highest product visibility and aesthetics. Safety reinforced tempered glass front shield optimizes the merchandiser's display effects of fresh salads, sandwiches, desserts and beverages. Its elegant contemporary euro design will enhance any store application. Ideal for eye-catching displays and convenient access with fast service in high traffic areas.

### ■ Interior materials available in two standards

SP: stainless steel interior for sanitary purposes.

SP-A: black coated interior with mirrored sides for maximized display effects.

### ■ Solid side panels used to ensure durability

### ■ Standard back-guard improves airflow

### ■ Perforated interior back wall & top for improved airflow

### ■ Foamed with polyurethane, high-density cell insulation (CFC free)

### ■ Front air intake and rear air discharge

### ■ LED lighting interior

**Maintenance free,  
Self-Cleaning Condenser**

**TOM-50LB-SP-A-N**

\* Please allow extra lead time  
for solid side panel option.

### ■ Standard features

- Simple plug-in installation
- No plumbing required
- Standard color comes in black only
- Solar powered digital thermometer
- Digital electronic thermostat with defrost control

### ■ Optional features

- Top display dry cases (TOMD-H, L) available in all sizes
- Night cover available (white / black)  
\* Night cover can not be used in conjunction with a TOMD dry case
- Security cover available
- Price tag channel available
- Casters available

### ■ Recommended operating conditions

TOM models are designed to operate in an environment where temperature & humidity do not exceed 80°F and 55% respectively. Units should not be installed near HVAC vents, fans or doorways that will disrupt the air curtain and compromise the function of the cabinet. Air curtain models will run most efficiently when completely loaded with product.

# HORIZONTAL OPEN DISPLAY CASES NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Modern design

By integrating great contours with durable structures, our modern style product designs are user-friendly while maintaining the highest product visibility and aesthetics. Safety reinforced tempered glass front shield and side walls optimize the merchandiser's display effects of fresh salads, sandwiches, desserts and beverages. Its elegant contemporary euro design will enhance any store application.

### ■ Standard back-guard improves airflow

### ■ Stainless steel interior standard including back wall and deck pans

### ■ Glass shelves standard (Cantilever type)

### ■ Perforated interior back wall & top for improved airflow

### ■ Foamed with polyurethane, high-density cell insulation (CFC free)

### ■ LED interior lighting

### ■ Front air intake and rear air discharge

### ■ Digital temperature controller

### ■ Stainless steel color option available

### ■ Standard features

- Simple plug-in installation
- No plumbing required
- Standard color comes in black only
- Digital electronic thermostat with defrost control
- Energy saving night curtain
- 3" dia. swivel casters with locks on the front set

### ■ Optional features

- Price tag channel available
- White color option available (Lead time applies)

### - Recommended operating conditions

TOM models are designed to operate in an environment where temperature & humidity do not exceed 75°F and 55% respectively. Units should not be installed near HVAC vents, fans or doorways that will disrupt the air curtain and compromise the function of the cabinet. Air curtain models will run most efficiently when completely loaded with product.

### ■ Modern design

By integrating great contours with durable structures, our modern style product designs are user-friendly while maintaining the highest product visibility and aesthetics. Safety reinforced tempered glass front shield and side walls optimize the merchandiser's display effects of fresh salads, sandwiches, desserts and beverages. Its elegant contemporary euro design will enhance any store application.

### ■ Standard back-guard improves airflow

### ■ Stainless steel interior standard including back wall and deck pans

### ■ Bottom stainless steel solid shelf and glass shelves standard

### ■ Perforated interior back wall & top for improved airflow

### ■ Foamed with polyurethane, high-density cell insulation (CFC free)

### ■ LED interior lighting

### ■ Front air intake and rear air discharge

### ■ Sliding rear door for product loading & unloading

### ■ Stainless steel color option available

Maintenance free,  
Self-Cleaning Condenser

TOM-36L-UFD-S-2S-N

TOM-48L-UFD-B-3S-N

### ■ Standard features

- Simple plug-in installation
- No plumbing required
- White and black color come standard
- Solar powered digital thermometer
- Digital electronic thermostat with defrost control
- Energy saving night curtain

### ■ Optional features

- Casters available

### - Recommended operating conditions

TOM models are designed to operate in an environment where temperature & humidity do not exceed 80°F and 55% respectively. Units should not be installed near HVAC vents, fans or doorways that will disrupt the air curtain and compromise the function of the cabinet. Air curtain models will run most efficiently when completely loaded with product.

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Modern design

By integrating great contours with durable structures, our modern style product designs are user-friendly while maintaining the highest product visibility and aesthetics. Safety reinforced tempered glass front shield and side walls optimize the merchandiser's display effects of fresh salads, sandwiches, desserts and beverages. Its elegant contemporary euro design will enhance any store application.

**■ WARRANTY: 2 Year Parts and Labor Warranty, Additional 3 Year Warranty on Compressor**

**DROP IN TYPE HORIZONTAL OPEN DISPLAY CASES****Self-Cleaning Condenser Equipped Units**■ **Self-Cleaning Condenser (Patented)**

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

■ **Hydrocarbon refrigerants (R-290)**

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

■ **Modern design**

By integrating great contours with durable structures, our modern style product designs are user-friendly while maintaining the highest product visibility and aesthetics. Safety reinforced tempered glass front shield and side walls optimize the merchandiser's display effects of fresh salads, sandwiches, desserts and beverages. Its elegant contemporary euro design will enhance any store application.

■ **Standard back-guard improves airflow**■ **Stainless steel interior standard including back wall and deck pans**■ **Perforated interior back wall & top for improved airflow**■ **Foamed with polyurethane, high-density cell insulation (CFC free)**■ **LED interior lighting**■ **Stainless steel color option available**■ **Standard features**

- Simple plug-in installation
- No plumbing required
- White and black color come standard
- Solar powered digital thermometer
- Digital electronic thermostat with defrost control
- Energy saving night curtain

- **Recommended operating conditions**

TOM models are designed to operate in an environment where temperature & humidity do not exceed 80°F and 55% respectively. Units should not be installed near HVAC vents, fans or doorways that will disrupt the air curtain and compromise the function of the cabinet. Air curtain models will run most efficiently when completely loaded with product.

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ High-density polyurethane insulation

The entire cabinet structure is foamed-in-place using high density, CFC free polyurethane insulation.

### ■ Digital temperature controller

### ■ Single pane glass is tempered for safety

### ■ Stainless steel floor and airflow grille

### ■ Stainless steel color option available

### ■ Standard features

- No plumbing required
- Standard color comes in black only
- 3" dia. swivel casters with locks on the rear set

### ■ Optional features

- White color option available (Lead time applies)

### - Recommended operating conditions

TOS models are designed to operate in an environment where temperature & humidity do not exceed 75°F and 55% respectively.

# VERTICAL AIR CURTAINS NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Modern design

By harmonizing curvature and rigidity, our modern style product designs are user-friendly while maintaining the highest product visibility and aesthetics. The glass front shield optimize the merchandiser's display effects of fresh salads, sandwiches, desserts and beverages.

### ■ Designed to enhance impulsive sales

Ideal for eye-catching displays and convenient access with fast service in high traffic area.

### ■ White coated galvanized steel interior

### ■ White coated galvanized steel solid shelves

### ■ Energy saving night curtain standard

### ■ Standard back-guard improves airflow

### ■ Foamed with polyurethane, high-density cell insulation (CFC free)

### ■ Perforated interior back wall and top for improved airflow

### ■ Front air intake and rear air discharge

### ■ LED interior lighting

### ■ Stainless steel color option available

Maintenance free,  
Self-Cleaning Condenser

TOM-72EB-N

TOM-36ES-N

### ■ Standard features

- Simple plug-in installation
- Patented self-contained system, no plumbing required
- Standard color comes in black only
- Solar powered digital thermometer
- Digital electronic thermostat with defrost control
- Price tag channel

### ■ Optional features

- Security cover available
- Leveling leg available
- Casters available

### - Recommended operating conditions

TOM models are designed to operate in an environment where temperature & humidity do not exceed 75°F and 55% respectively. Units should not be installed near HVAC vents, fans or doorways that will disrupt the air curtain and compromise the function of the cabinet. Air curtain models will run most efficiently when completely loaded with product.

# EUROPEAN STRAIGHT DISPLAY CASES NATURAL Refrigerant

## Self-Cleaning Condenser Equipped Units

### ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

### ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

### ■ Attractive, elegant, glass sided Euro design

Straight tempered front glass and minimal frame provide full product visibility to optimize display effects. Its elegant contemporary euro design and luxurious colored case will not only enhance any store atmosphere but also will keep product presentation at its best and most beautiful.

### ■ High-density polyurethane insulation

The entire cabinet structure is foamed-in-place using high density, CFC free polyurethane insulation.

### ■ Low-E coated double pane glass is tempered for safety

### ■ Adjustable, tempered glass shelves with stainless steel front and back edges

### ■ Stainless steel floor and airflow grille

### ■ Sliding rear doors for product loading & unloading

### ■ Rear access to compressor compartment for quick and easy service

### ■ Stainless steel color option available

Maintenance free,  
Self-Cleaning Condenser

TCGB-72UF-W-N

TCGB-48UF-B-N

### ■ Refrigerated bakery case holds avg. 33°F ~ 41°F for fresher bakery products

### ■ Standard features

- No plumbing required
- White and black colors come standard
- Safety shielded LED interior lighting
- Solar powered digital thermometer
- Digital electronic thermostat with defrost control

### - Recommended operating conditions

TCGB models are designed to operate in an environment where temperature & humidity do not exceed 75°F and 55% respectively.

# SUSHI CASES NATURAL Refrigerant

## ■ Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants.

Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## ■ Ambient temperature range 50°F ~ 80°F, saturation temperature 39°F

## ■ Beautifully curved, angled down top front glass

## ■ 1" diameter drain hole with plastic cover

## ■ Slightly inclined bottom for better drainage

## ■ Larger interior for optimized display effect

## ■ Stainless steel solid food plates

## ■ Low-E coated, tempered glass doors with durable plastic door handles at chef side

## ■ Exterior body is beautifully made from unique and stylish stainless steel material

## ■ Side mount compressor makes it easy to be serviced without being moved

## ■ Elegant contemporary Euro design enhances any store application

## ■ Easy cleaning and excellent durability

## ■ Condenser located on left or right from the front view

## ■ Drain hole located on left from the chef side

## ■ Refrigerator maintains 35°F ~ 41°F for the best in food preservation

- **Easy cleaning and excellent durability**
- **Condenser located on left or right from the front view**
- **Refrigerator maintains 35°F ~ 41°F for the best in food preservation**

## ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- No plumbing required
- Simple plug-in installation

## - Recommended operating conditions

SAS models are designed to operate in environments where temperature & humidity do not exceed 75°F and 55% relative humidity.

SAS-50R-N

SAS-60R-N

SAS-70R-N

### LED interior lighting

LED lighting is energy efficient and illuminates with eight times the clarity and brightness.

### Digital temperature display and control

Digital technology provides precise and constant temperatures throughout the cabinet. This allows food products to remain fresh over an extended period of time.

# REMOTE SUSHI CASES

**TSSC-6**

- Condensing units sold separately

## FEATURES & BENEFITS

- All models supplied with removable tempered glass back-doors (ANSI standard approved)
- Sliding glass rear access doors
- 304 stainless steel mirror finished look
- Designed for easy cleaning with drain hole
- NSF listed under standard No.7
- All units prepped and ready for remote refrigeration hook-up

# Elevate your expectations with Turbo Air

We fulfill your every need and beyond  
with a wide selection of 800+ refrigeration units.

Let's Watch Turbo Air's  
Self-Cleaning Condenser Video!

## Patented, Maintenance free Self-Cleaning Condenser only at Turbo Air

The 'Self-Cleaning Condenser' cleans the condenser with a rotating brush that moves up and down 2-3 times a day, preventing any dust build-up and maintaining the highest efficiency while saving additional energy.

# BOTTLE COOLERS NATURAL Refrigerant

Self-Cleaning Condenser Equipped Units

## ■ Self-Cleaning Condenser (Patented)

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

## ■ Hydrocarbon refrigerants (R-290 / R-600a)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## ■ Forced air cooling system

Fast cooling and balanced temperature throughout the cabinet.

## ■ Stainless steel cabinet construction

Super Deluxe (SD) models boast a stainless steel exterior (except galvanized steel back and bottom). SB models have an attractive wear-resistant black vinyl exterior. Heavy gauge stainless steel countertop and glide lids are perfect for sanitation and durability. The interior is stainless steel except galvanized steel top. Turbo Air Bottle Cooler model guarantees the utmost in cleanliness and long product life. It also adds a touch of style to the most refined setting.

## ■ High-density polyurethane insulation

The entire cabinet structure is foamed-in-place using high density, HCFC free polyurethane insulation.

## ■ Adjustable, heavy duty, PE (polyethylene) coated dividers

## ■ Rugged built-in removable bottle cap opener and cap catcher

## ■ Large capacity cooler cabinet requires only minimum floor space

## ■ Side mount compressor unit

With compressors positioned on the side of the unit, our refrigerators can now be serviced without being moved. Our innovative, front breathing feature also allows this model to be highly efficient in narrow spaces.

# NARROW BACK BARS NATURAL Refrigerant

## ■ Equipped with easy-to-clean Air Filter

The accumulation of dust in the condenser causes failures and/or breakdowns in refrigeration. Refrigeration operate normally until they accumulate a certain amount of dust. When they reach their limit, performance will drop rapidly, resulting in damages and possible disposal of stored goods. This is why all refrigeration manufacturers require the condenser to be cleaned at least once a month for warranty to remain valid. With Turbo Air, this process is simple and easy due to the frontal access air filter device. Pull out the filter and vacuum lightly to remove the dust. Place it back into position when complete.

## ■ Hydrocarbon refrigerants (R-290 / R-600a)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## ■ Forced air cooling system

Fast cooling and balanced temperature throughout the cabinet.

## ■ Stainless steel countertop and interior

The exterior of the cabinet is constructed with heavy gauge reinforced stainless steel countertop and wear-resistant black vinyl coated galvanized steel. The interior is stainless steel except galvanized steel top. Turbo Air Back Bar model guarantees the utmost in cleanliness and long product life. It also adds a touch of style to the most refined setting.

## ■ Ergonomically designed doors

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience.

## ■ LED lighting interior

## ■ Double pane glass doors with Low-E glass (SG Models)

## ■ High-density polyurethane insulation

The entire cabinet structure is foamed-in-place using high density, HCFC free polyurethane insulation.

## ■ Adjustable, heavy duty, PE (polyethylene) coated wire shelves

## ■ Side mount compressor unit

With compressors positioned on the side of the unit, our refrigerators can now be serviced without being moved. Our innovative, front breathing feature also allows this model to be highly efficient in narrow spaces.

## ■ Refrigerator holds 33°F ~ 38°F for optimal beverage preservation

## ■ Standard features

- Anti-corrosion coated evaporator
- Self-contained system
- 4" dia. swivel casters standard
- Door locks standard

## ■ Optional features

- 2" dia. casters available
- 6" height adjustable legs available

# Why Turbo Air<sup>®</sup>?

Self-Cleaning Condenser equipped Underbar Equipments  
*Standard option at no additional cost*

Let's watch Turbo Air's  
Self-cleaning condenser video!

## Refrigeration Reinvented

### Super Deluxe Series Underbar Equipments

- Self-Cleaning Condenser
- Forced air cooling system
- Hydrocarbon Refrigerants (R-290/R-600a)
- Stainless steel cabinet construction
- CFC Free Polyurethane insulation
- Heavy duty, PE coated dividers
- LED interior lighting (Back Bars)
- Double pane glass doors with Low-E glass (Back Bars - SG models only)
- 3 years parts & labor, 4 years compressor warranty

Milk Coolers

# MILK COOLERS - DUAL SIDED DOOR NATURAL Refrigerant

Self-Cleaning Condenser Equipped Units

## ■ Hydrocarbon refrigerants (R-600a)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

## ■ 5 years cleaning-free condenser

1/5" condenser pin gaps and electrodeposition coating allow the condenser to stay clean and prevent it from becoming tarnished, further guaranteeing the durability of the condenser.

## ■ Exterior digital thermometer standard for easy visibility

Exterior digital temperature display allows easy reading and precise and constant temperature. This level of precision allows milk to remain fresh and safe over an extended period of time.

## ■ Sturdy and clean, durable stainless steel cabinet construction

Exterior is stainless steel with stainless steel door. Interior is comprised of stainless steel.

## ■ High-density polyurethane insulation

The entire cabinet construction is foamed-in-place using high density, environmental friendly CFC free polyurethane insulation.

## ■ Convenient bottom floor drain standard with hose adapter

Floor drain is located in the rear on the right hand side for easy clean out. The hose adapter allows for convenient connecting to drain hose.

## ■ Stainless steel self-service doors have drop front feature and hold-open flip-up top lid

## ■ 4" dia. swivel casters standard for easy movement, two with brakes to lock the unit in place

## ■ Refrigerator holds 33°F ~ 38°F for the best in milk preservation

## ■ Standard features

- Door locks standard
- Heavy duty floor racks standard
- Door support bumpers standard

## ■ Optional features

- Corner bumpers available

# LOW PROFILE UNIT COOLERS

## LOW PROFILE UNIT COOLER STANDARD FEATURES

- Blue anti-corrosion-fin increases the life span of the coil.
- Air-pass guard is located at the bottom of the coil to improve heat exchange rate.
- Easy to replace defrost heater (LED model).
- Corrugated fin is used to increase heat exchange rate by expanding the surface area.

- Even in confined space, all parts can be reached easily by opening the front cover.
- Location of power connector makes replacement of motor convenient.
- **1 Year fan motor and parts warranty!**

- Seamless inner groove copper tube increases the heat exchange rate by reducing the space between the fin and the copper tube.
- Venturi type distributor and precise orifice hole are used to minimize the pressure drop and maximize the freezing capacity respectively.
- Even in confined space, all parts can be reached easily by opening the front cover.

- Thermostat is installed to prevent over temperature on heater.
- Circuit opens automatically over 50°F.
- Parts available: Expansion Valve (**Sporlan**) (**Factory Pre-mounted**)  
Solenoid Valve (**Sporlan**) (**Factory Pre-mounted**)  
Thermostat (**Johnson Control**) (**Shipped Loose**)

- The spiral fan guard enables cold air to be delivered efficiently and thoroughly.
- The protruding fan and motor placement substantially reduce vibration and noise.
- PSC fan motor, which prevents oil evaporation, is used for long life expectancy.
- **EC motor (optional) for high energy efficiency.**

- Unique air flow system (Patent pending) results in improved circulation within crowded walk-in cooler/freezer.
- Anti-oxidizing stainless steel mounting and bolts.

**All Replacement Parts are Universal!**

# MEDIUM PROFILE UNIT COOLERS

## MEDIUM PROFILE UNIT COOLER STANDARD FEATURES

### Feature

- More space in the electrical cavity.
- Electrical board is now facing side for easy installation and servicing.
- All wiring (solenoid and motor) is now located in the bottom of the unit for easy access.
- Charge nipple provided for suction pressure measurement.
- Aluminum cases are now powder coated for corrosion protection.
- FAN GUIDE GRILL provided for air throw extension.
- Drain pan hinged on rear for easy access and applied double drain pan for thermal efficiency.

### Front Access with More Space

- Design features easy front access to both electrical and refrigeration components.
- More space in the electrical cavity makes the unit easier to service and install.
- Side facing electrical control board.

### Wiring

- Solenoid harness is standard.
- Motor and solenoid harnesses are attached to sheet metal panels and are now located at the bottom of the unit for easy access.
- Easy plug connectors for motor harness.

### Heaters & Coil

- Coil heater slots have been enlarged for easier installation and replacement.
- Fixed defrost termination and adjustable defrost cycle on electric defrost (selection).

## Test for Guided Fan Guard

Without Guided Fan Guard distance reach up to 52ft

With Guided Fan Guard distance reach up to 109ft

## CONDENSING UNITS

### CONDENSING UNIT STANDARD FEATURES

- Blue anti-corrosion fin increases the life span of the coil.
- Seamless inner groove copper tube is used to increase the heat exchange rate by reducing the space between the fin and the copper tube.

- Highest quality compressor in the world.

- 1 year compressor warranty (4 year extended warranty available).
- 1 year fan motor and parts warranty.

- Condenser Fan Speed Controller controls the speed of a condenser fan to keep condensing pressure constant in low ambient for stable operation, minimize formation of flash gas, and prevent compressor damage by controlling high pressure.
- Experienced engineers have designed the system for maximum efficiency.
- Fan blades: Specifically matched with motors and coil for maximum air movement and cooling.

- Control box is designed for easy installation.
- Dual pressure control (Low and High) is adjustable.
- All the parts are compliant with industry standards and interchangeable with readily available parts.
- Wiring: Easily accessible. Compressor comes with a wiring harness that is manufactured with connections that will not come loose with vibration.

- Control box and service valves are located outside for easy service.
- Base: Heavy duty steel. Legs are 2-1/6" tall.
- Cabinet: Prepainted with galvanized body. Protects against corrosion.
- All products carry UL, cUL, ISO 9001 approvals.

**All Replacement Parts are Universal!**

# PACKAGE REFRIGERATION UNITS *SMART 7*

## PACKAGE UNIT STANDARD FEATURES

■ **SM 1: Blue Anti-corrosion-fin and Coated Copper Tube**

Protects aluminum and copper pipes from toxic gases generated from foods, retards refrigerant leakage, and prolongs the cooling capacity.

■ **SM 2: Expansion Valve**

Allows safe storage of foods with a feature that self-adjusts the circulation of refrigerant as the internal temperature changes, thus recovering the required temperature quickly.

■ **SM 3: Compressor Protected Solenoid Valve**

Decreases the inflow of refrigerant into the compressor when it is restarted after a stop. This extends compressor life and reduces compressor failure.

■ **SM 4: 18% Bigger Condenser than the Standard**

The condenser's efficiency affects most of the refrigerator's performance. Particularly, when used in a small compartment under high ambient temperatures or a dusty area, the package unit's condenser needs to be bigger than standard ones in order to achieve the best performance. In consideration of the environments that our products may be subject to, condensers utilized in our products are 18% larger than competitors'.

■ **SM 5: Energy Efficient EC Motor**

Through the use of highly efficient EC motors, our products reduce energy consumption and lower electricity costs, thus protecting the environment. Our products are designed with easy-to-replace motor and fan blades.

■ **SM 6: Leak Free Patented Hot Gas Condensate System**

The hot gas condensate system is an ideal system because of its fast evaporation of condensed water and its enhancing refrigeration efficiency. In spite of these advantages, many companies have stopped the application of such a system because of the high risk of discarding the refrigerators due to the rapid corrosion of hot gas lines causing refrigerant leakage and water inflow into the cooling pipes. Such problems are completely resolved in our products, thanks to a patented technology that prevents pipes from corrosion.

■ **SM 7: Highly Efficient Air Circulation Enclosure**

This system is designed to release hot air to the outside faster than competitors' and to enhance cooling efficiency. At the same time, it retards elevation of compressor temperature and keeps refrigerant pressure from increasing, thus saving energy as a result.

**All Replacement Parts are Universal!**

# PRODUCT AND SERVICE

## IMPORTANT PRODUCT AND SERVICES DETAILS

We want to provide the information you need to take advantage of the great products and services in this catalog. Please check our website or call our toll free number for more information.

### ■ **Changes:**

- Price, products and offers in the catalog may change without notice.
- Turbo Air cannot be responsible for pricing or other errors and reserves the right to cancel orders arising from such errors.

### ■ **Prices:**

- Our catalog prices do not include taxes and other fees (applicable for U.S. only).

### ■ **Shipping and Handling Charges:**

- Turbo Air will **offer free shipping and handling** under the following conditions:
  - The amount of one order is more than U.S. \$5,000.
  - Any combination of 5 or more products.

### ■ **Warranties:**

- 1 year parts and 1 year compressor warranty on condensing units and unit coolers. Labor not included. (4 year extended warranty available for compressor: total 5 years)
- 2 year parts and 2 year compressor and 1 year labor on packaged refrigeration units. (Smart 7) (3 year extended warranty available for compressor: total 5 years)

*For more details, please refer to the "Warranty Statement" on our website - [www.turboairinc.net](http://www.turboairinc.net)*

### ■ **Exchange and Returns:**

Under the following conditions, you can return the ordered products without any charge:

- Received wrong item(s) due to our errors.
- Delivery delayed more than 3 days from promised date.
- Signs of external damage on arrival

If any of our product(s) do not meet your expectations, you may return them within 7 days after receiving the return confirmation from Turbo Air. The returned product(s) must be insured and prepaid. Please enclose your copy of the invoice or packing slip with the return. Please indicate whether you wish to exchange for another product(s), receive credit, or request a full refund of the purchase price. All products must be in new condition with original packaging and all included accessories. Please note there is a 20% restocking and repacking fee from the purchase price.

### ■ **Freight Damage:**

Inspection of the shipment is the consignee's obligation. Please make sure you are receiving the right merchandise in good condition upon delivery. When in doubt, write a note of "Damaged" on the delivery receipt before signing it. Notify the carrier and file a claim for any concealed damage. Please retain all cartons and product for inspection. Turbo Air is willing to assist and support you in filing your claim, but you must take the action of filing the claim.

# WARRANTY STATEMENT

## PACKAGE REFRIGERATION SYSTEMS (Smart 7)

Turbo Air Corp. warrants that package refrigeration products conform to the manufacturer's specifications and be free of defects in material and quality. Should any defects occur, Turbo Air Corp. will correct the defects subject to the following conditions.

**PARTS:** Two years from the date of sale or installation, Turbo Air Corp. will supply new, or at its option, rebuilt replacement parts.

**COMPRESSOR:** Two years from the date of installation or thirty months from the date of shipment, whichever comes first, Turbo Air, Corp. will supply a new compressor. During the two year warranty period, Turbo air, Corp. limits to one compressor ONLY.

Replacement compressor comes with one year warranty covered by the supplier. If a second replacement compressor is needed within a year, the warranty must be claimed to the supplier directly.

If the extended warranty is purchased, it is extended to three years from the end date of factory warranty. Turbo air, Corp. supplies ONLY one compressor during this period. Replacement compressor comes with one year warranty covered by the supplier as well. If a second replacement compressor is needed within a year, the warranty MUST be claimed to the supplier directly.

**LABOR:** For one year from date of sale or installation, Turbo Air Corp. can arrange a service technician to diagnose and resolve the issue of the unit.

**PROOF OF PURCHASE:** Copy of the proof of purchase is required to make this warranty valid. Alternatively, a valid manufacturer's serial number of the unit is required.

## REMOTE REFRIGERATION SYSTEMS

Turbo Air Corp. warrants that remote refrigeration products conform to the manufacturer's specifications and be free of defects in material and workmanship. Should any defects occur, Turbo Air Corp. will correct the defects subject to the following conditions.

**PARTS:** One year from date of sale or installation (Not to exceed 20 months from factory ship date), Turbo Air Corp. will supply new, or at its option, rebuilt replacement parts.

**COMPRESSOR:** One year from the date of installation or twenty months from the date of shipment, whichever comes first, Turbo Air, Corp. will supply a new compressor. During the one year warranty period, Turbo air, Corp. limits to one compressor ONLY.

Replacement compressor comes with one year warranty covered by the supplier as well. If a second replacement compressor is needed within a year, the warranty must be claimed to the supplier directly.

If the extended warranty is purchased, it is extended to four years from the end date of factory warranty. Turbo air, Corp. supplies ONLY one compressor during this period. Replacement compressor comes with one year warranty covered by the supplier as well. If a second replacement compressor is needed within a year, the warranty MUST be claimed to the supplier directly.

**PROOF OF PURCHASE:** Copy of the proof of purchase is required to make this warranty valid, or a valid manufacturer's serial number of the unit is required.

### THIS WARRANTY DOES NOT COVER LABOR OR:

- Shipping damage.
- System installation.
- Unpacking and/or removal of protective shipping material.
- Usage outside manufacturer's limitations as specified in the owner's manual.
- Service required as a result of improper installation, incorrect or insufficient AC supply voltage.
- Installation, set up, or adjustments of consumer controls.
- Any owner than the original owner.
- Damage from modification into other products.
- Any failure, loss, damage or personal injury due to accident, neglect, or abuse by the consumer, or to improper operation, maintenance or storage or to alteration or to failure to follow normal procedures as outlined in the instruction manual.
- Any unit purchased from an unauthorized dealer, any online retailer or not directly from Turbo Air.
- Transportation charges incurred in connection with warranty service.
- Indirect, consequential, or special damages, except as required by Federal or State laws.
- Repair or replacement of warranted part by other than qualified installer.

**THE WARRANTY AND REMEDY STATED ABOVE ARE EXCLUSIVE AND IN LIEU OF ALL OTHER EXPRESS OR IMPLIED WARRANTIES INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. SOME LAWS DO NOT ALLOW EXCLUSION OF IMPLIED WARRANTY, THEREFORE THIS WARRANTY SHALL BE DEEMED MODIFIED TO BE CONSISTENT WITH SUCH LAWS.**

Some states do not allow limitation on how long an implied warranty lasts; therefore these limitations or exclusions may not apply to you. This limited warranty gives you specific legal rights. You may also have other rights that may vary from state to state. This warranty applies to the United States (AK and HI excluded).

# WARRANTY

## Warranty Claims...

All claims for parts or labor must be made directly through Turbo Air. All claims should include: model number of the unit, the serial number of the cabinet, proof of purchase, date of installation, and all pertinent information supporting the alleged defect. In case of compressor replacement under warranty, either compressor or compressor tag must be returned to Turbo Air along with above listed information. Failure to comply with warranty policies will result in voiding claims.

## Up to Three-Year Parts & Labor Warranty...

Turbo Air warrants all new refrigerated components, the cabinet and all parts, to be free from defects in materials or workmanship, under normal and proper use and maintenance service as specified by Turbo Air and upon proper installation\* (indoor building only) and start-up in accordance with the instruction packet supplied with each Turbo air unit. Turbo Air's obligation under this warranty is limited to a period of one (1), two (2), or three (3) years, depending on models from the date of original installation or fifteen (15) months, twenty seven (27) months, thirty nine (39) months after shipment date from Turbo Air, whichever occurs first. Any part, covered under this warranty, that is by Turbo Air to have been found defective within one (1), two (2), or three (3) years of original installation or fifteen (15) months, twenty seven (27) months, thirty nine (39) months after shipment date from manufacturer, whichever occurs first, is limited to the repair or replacement, including labor charges, of defective parts or assemblies. The labor warranty shall include standard straight time labor charges only and reasonable travel time, as determined by Turbo Air. (\*Installation in unstable, mobile, and enclosed area may not be considered as proper installation.)

### Parts and Labor Warranty Period by Model

- o All Super Deluxe (SD) Series, PRO Series, M3 Series, Milk Coolers, Underbar Equipment: 3 years †
- o E-line, J-Series, Glass Door Products (All TGM, TGF, TGIM): 2 years
- o Open Display, Bakery and Deli Cases, Ice Cream Dipping Cabinets, Sushi Cases (Refrigerated): 2 years
- o CRT Units and Others: 1 year †

† Remote units and TSSC series are limited to one (1) year parts warranty, relative only to original cabinet components. No labor will be covered.

## Up to Seven-Year Compressor Warranty...

In addition to the parts and labor warranty stated above, Turbo Air warrants its hermetically sealed compressor to be free from defects in both material and workmanship under normal and proper use and maintenance service for a period of two (2), three (3), or four (4) years, depending on models stated above, from the date of original installation, but not to exceed seven (7) years and three (3) months after shipment from the manufacturer. Compressor determined by Turbo Air to have been defective within this extended period will, at Turbo Air's discretion, be either repaired or replaced with a compressor or compressor parts of similar design and capacity.

The extended compressor part warranty applies only to hermetically sealed parts of the compressor and does not apply to any other parts or components, including, but not limited to, cabinet, paint finish, temperature control, refrigerant, metering device, driers, motor starting equipment, fan assembly and/or other electrical components, etcetera.

\* Total seven-year compressor part warranty applies to PRO and Super Deluxe models only.

## R-290/R-600a Hydrocarbon Compressor Warranty...

The two-year or four-year additional compressor warranty detailed above will be void if the following procedure is not carefully adhered to:

1. This system may contain R290 refrigerant and polyol ester lubricant. The polyol ester lubricant has rapid moisture absorbing qualities. If long exposure to the ambient conditions occur, the lubricant must be removed and replaced with new.
2. Drier replacement is very important and must be changed when a system is opened for servicing. Drier with XH-7 molecular sieve or better must be used.
3. Micron level vacuums must be achieved to ensure low moisture levels in the system. 500 microns or lower must be maintained.
4. Compressor must be obtained through Turbo Air, unless otherwise specified in writing, through Turbo Air's warranty department.

## What is Not Covered by This Warranty...

Turbo Air's sole obligation under this warranty is limited to either repair or replacement of parts, subject to the additional limitations below. This warranty neither assumes nor authorizes any person to assume obligations other than those expressly covered by this warranty.

NO CONSEQUENTIAL DAMAGES. TURBO AIR IS NOT RESPONSIBLE FOR ECONOMIC LOSS; PROFIT LOSS; OR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, INCLUDING WITHOUT LIMITATION, LOSSES, OR DAMAGES ARISING FROM FOOD OR PRODUCT SPOILAGE REGARDLESS OF WHETHER OR NOT THEY RESULT FROM REFRIGERATION FAILURE.

WARRANTY IS NOT TRANSFERABLE. This warranty is not assignable and applies only in favor of the original purchaser/user to whom delivered. ANY SUCH ASSIGNMENT OR TRANSFER SHALL VOID THE WARRANTIES HEREIN AND SHALL VOID ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR LABOR COVERAGE FOR COMPONENT FAILURE OR OTHER THE WARRANTY PACKET PROVIDED WITH THE UNIT. Turbo Air will not be held responsible for the following external factors: ALTERATION, NEGLECT, ABUSE, MISUSE, ACCIDENT, DAMAGE DURING TRANSIT OR INSTALLATION, FIRE, FLOOD, ACTS OF GOD, OR IMPROPER ELECTRICAL CONNECTIONS. TURBO AIR IS NOT RESPONSIBLE FOR THE REPAIR OR REPLACEMENT OF FAILED OR DAMAGED COMPONENTS RESULTING FROM ELECTRICAL POWER FAILURE, THE USE OF EXTENSION CORDS, LOW VOLTAGE, OR VOLTAGE DROPS TO THE UNIT.

Use of NON-OEM parts without manufacturer's approval may void cabinet warranty. NO IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE; THE FOREGOING WARRANTIES ARE EXCLUSIVE AND EXPRESSLY GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED OR STATUTORY. THERE ARE NO WARRANTIES, WHICH EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF.

Warranty information card must be submitted via post mail or electronically on our website at [www.turboairinc.com/registration](http://www.turboairinc.com/registration) within 7 days from the purchase date. Failure to comply may result in your warranty being voided.

All coverage provided within this warranty is applicable only to the United States, including Alaska and Hawaii, and Canada, excluding U.S. Territories; limited parts only warranty in U.S. Territories. Turbo Air is not responsible for any warranty claims made on products sold or used outside the fifty states of the United States.

The extended warranty period specific to each Turbo Air product applies to all units sold by Turbo Air starting January 1, 2020.
