The second most accurate PTE scoring system in the world

A. Speaking	32
Read Aloud	32
1. Urban Forests	32
2. Root Network	32
3. Child Psychology	32
4. Political Problems	32
5. Statistics	32
6. William Shakespeare	32
7. Rates of Depression	32
8. Tutor	33
9. Attendance	33
10. Enough Fluid	33
11. Single Research	33
12. Tortoise	33
13. Department Stores	33
14. Attendance to Theater	33
15. Norms and Values	34
16. Expression	34
17. Learner Experience	34
18. Natural Enviroment	34
19. Emigrants	34
20. Humanities	34
21. Making Notes	34
22. Word Radical	34
23. New Textbook	35
24. Volcano Behaviors	35
25. Medical Cannabis	35
26. Hybrid Rice	35
27. Motivation to Fight	35
28. Baby Hearing	35
29. Stroke Risk	35
30. Abortions	36
31. Pandemic	36
32. Vitamin and Death	36
33. Pollution Reduction	36
34. Video Games	36
35. Seismic Mars	36

36. Ozone Pollution	36
37. Lullaby	36
38. Essential Carbon	37
39. Subject Outlines	37
40. Global Changes	37
41. Flood Control	37
42. Circumcision	37
43. Psychology	37
44. Brain Efficiency	37
45. Photorealistic Images	37
46. Climate Effects	38
47. Executive Residence	38
48. Carbohydrate Intake	38
49. Era of Mayan	38
50. Graduate Admission School	38
51. Mature Tree	38
52. Manchester (Incomplete)	38
53. Roman Army (Shadowing)	38
54. Personal Libraries (Shadowing)	39
55. Behavioral Science (Shadowing)	39
56. Undergraduates Education	39
57. Antarctic	39
58. Loggerhead Turtle (Shadowing)	39
59. Globalization (Shadowing)	39
60. Agricultural Science (Shadowing)	39
61. Paraphrasing (Incomplete)	40
62. Goods and Services	40
63. Job Hours	40
64. Tissues and Organs	40
65. Examination of Domicile	40
66. Aquaculture	40
67. Blue Whale	40
68. Conscientiousness	41
69. Spanish and French (Incomplete)	41
70. Smartphones	41
71. Student Loan	41
72. Ed Tech (B) (Incomplete)	41

73. Selective History (Shadowing).....	41
74. Credit Cards (Incomplete).....	41
75. Sandra Lousada (Incomplete).....	42
76. Interdisciplinary Studies (Incomplete).....	42
77. Planet Nine (Incomplete).....	42
78. Superhighway Network (Incomplete).....	42
79. Chasing the Flame.....	42
80. Telecommunication (Shadowing).....	42
81. Stone Tools (Incomplete).....	43
82. Economies of Scale.....	43
83. Case Approach.....	43
84. Constellation (Shadowing).....	43
85. Colloquialism (Shadowing).....	43
86. Values of Literature (Shadowing).....	43
87. Beauty Contests (Shadowing).....	43
88. Elephant (Shadowing).....	44
89. Shrimp Farm (Shadowing).....	44

91. Fast Food (Shadowing).....	44
92. Restaurant Location (Shadowing).....	44
93. Legal Writing (Shadowing).....	44
94. Russia (Shadowing).....	44
95. The UN (Shadowing).....	45
96. Blue (B).....	45
97. December Sales (Shadowing).....	45
98. Consumer Confidence.....	45
99. Students' Declarations.....	45
100. Co-evolutionary Relationship (Incomplete).....	45
101. Vanilla (Shadowing).....	45
102. Industrial Revolution (Shadowing).....	46
103. Breeding Areas.....	46
104. Population Growth (Shadowing).....	46
105. Living Room (Incomplete).....	46
106. Climate Change.....	46
107. Productive Capacity (Shadowing).....	46
108. Augustus (Shadowing).....	46
109. Blue (Shadowing).....	47

110. Marriage Too Early (Incomplete)	47
111. Tool-user (Incomplete)	47
112. Undesirable Programs (Incomplete)	47
113. Television Viewing (Incomplete)	47
114. Middle Ages (Incomplete)	47
115. Not-for-profit University (Incomplete)	48
116. Charles Darwin (Incomplete)	48
117. Fiscal Year (Shadowing)	48
118. Mobile Commerce (Incomplete)	48
119. Coastal Wetlands (Incomplete)	48
120. Introvert and Extrovert (Shadowing)	48
121. Father	49
122. Grand Canyon (Shadowing)	49
123. Yellow	49
124. Lincoln (Shadowing)	49
Repeat Sentence	50
Describe Image	61
1. Wasted Food	61
2. Kitchen	61
3. Honey Production	62
4. Production Map (Incomplete)	62
5. Airline Passengers	62
6. Fog	63
7. Chocolate Consumers	63
8. NZ House Price	64
9. Age Group (B)	64
10. European Countries	65
11. Household Budget	65
12. Fast Food Times	66
13. Richest Countries or Regions	66
14. Most Powerful Passports	67
15. GNH	67
16. Bermuda Triangle	68
17. Plastic Bottle Recycling	68
18. Tomato Processing Cycle	69
19. Litchfield Population	69
20. Main Hall	70

21. Stationery Shopping (Incomplete)	70
22. Recycling	70
23. Renewable Energy	71
24. Internet Users	71
25. Age group (Incomplete)	72
26. Ship Lock	72
27. Historic Gardens	73
28. Mosquito Life Cycle	73
29. Ice Thickness	74
30. Laboratory	74
31. Disadvantaged Backgrounds of Students	75
32. World Population Density (B)	75
33. Dining Table	76
34. Wash Your Hands	76
35. Personal Protection	77
36. Fruits and Vegetables Market	77
37. Coffee House	78
38. Music Revenues	79
39. Upper Arms (B)	79
40. Grape Fruits	80
41. South American Rainforest	80
42. Formation of Iceberg	81
43. UK Income by Age&Gender	81
44. Product Life Cycle	82
45. Computer Then and Now	82
46. Water Cycle	83
47. Germination	83
48. Penguin	84
49. Journeys in the UK	84
50. Number of Texts	85
51. Auditorium	85
52. Commuting Time	85
53. China Age Group	86
54. Tomato Life Cycle	86
55. Sitting Posture	87
56. Palm Oil Production	88
57. Laboratory Plan	88

58. Temperature and Precipitation	88
59. Teaching Career	89
60. World Population Development	89
61. Arousal Level	90
62. Australian Population Density 1	90
63. Projected Population	91
64. Household Energy	91
65. Morocco Income	92
66. Hours Spent	92
67. Food Pyramid	93
68. Apartment Plan 1	93
69. Educational Activities	94
70. Cell Phone Use in Anytowne	94
71. Overseas Visitors	95
72. Maslow's Hierarchy	95
73. Chemical Lab	96
74. Wind Machine	96
75. Diameter of Planets	97
76. 100% Health	97
77. Gnat Life Cycle	98
78. Temperature&CO2	98
79. Past Transport	99
80. Length of Fish	99
81. Not Attending School	100
82. homologies of structure	100
83. Sunshine Hours in France	101
84. London Street View	101
85. Australian Population Density	102
86. Iron Age Hut	102
87. The Eatwell Plate	103
88. Music Download	103
89. Temperature&Precipitation	104
90. Population&Consumption	104
91. Social Media Impact	105
92. Poverty Rate	105
93. Pupil/Teacher Ratio	106
94. World Water	106

95. Double Population	107
96. Sunrise & Sunset	107
97. World Income Distribution	108
98. Earning&Unemployment	108
99. Pet Expenditure	109
100. Egypt Trading	109
101. Quiz Operation	110
102. Radar Detection	110
103. Power Transmission	111
104. Government Expenditure	111
105. Food&Oil Price	112
106. Pencil Length	112
107. S&P	113
108. Deforestation Reasons	113
109. Switzerland Language	114
110. Bird Feeder	114
111. Solar Eclipse 1	115
112. Parts of Tree	115
113. Tree Ring and Saw	116
114. Food Pyramid 1	116
115. Happiness	117
116. Water Wheel	117
117. Internet Population	118
118. Age Percentage	118
119. Fruit&Vegetable Consumption	119
120. Solar Yard Light	119
121. Meat Consumption	120
122. Foreign Language Proficiency	120
123. Australian Population Density 2	121
124. Fly Life Cycle	122
125. Frog Life Cycle 1	122
126. Urban Percentage 1	123
127. Thoraby Population	123
128. Most Used Technology	124
129. Countries' Age Group	124
130. Metal Refining	125
131. Frog Life Cycle	125

132. Air Temperature	126
133. Fish Shoal	126
134. Life Expectancy	126
135. Number of Arrests	127
136. Azerbaijan Map	127
137. Solar Composition	128
138. Sprouting	128
139. Language Shares	129
140. National Flags	129
141. Depression Probability	130
142. Oxbow Lake	130
143. Psychological Comparison	131
144. Earth Crust (2)	131
145. Electricity Generation	132
146. Adult Literacy	132
147. Virus Replication	133
148. Moon&Fish	133
149. Simple Circuit	134
150. Earth Structure	134
151. Height of Tree	135
152. BMI	135
153. Solar System	136
154. Typing Hands	136
155. Apartment Plan	137
156. Apple Life Cycle	137
Retell Lecture	139
1. Animal Image (Incomplete)	139
2. Cosmic Civilization (Incomplete)	139
3. Universal Philosophy (Audio Available)	139
4. Facial Recognition (Audio Available)	139
5. Hurricane (Incomplete)	140
6. Automation and Jobs (Incomplete)	140
7. Leadership Practices (Incomplete)	140
8. City of Rome (Audio Available)	140
9. Energy Challenge (Audio Available)	140
10. Light Pollution (Audio Available)	141
11. Software (Audio Available)	141

12. Solar Energy (Incomplete)141

13. Interval Training (Incomplete)142

14. Body Language (Incomplete)142

15. Dietary Health (Incomplete)142

16. Sunrise and Sunset in Space (Incomplete)142

17. Bilingual Parents (Audio Available)142

18. Food Influence (Incomplete)142

19. Amazon (Incomplete)142

20. Biological Forgetting (Audio Available)142

21. IT Department (Explanation) (Audio Available)143

22. Graphical Representation (Incomplete)143

23. Psychology (Incomplete)143

24. Street Stalls (Incomplete)143

25. Edmund Wilson (Explanation) (Audio Available)143

26. Children Obesity (Incomplete)144

27. Cloud Formation (Explanation) (Audio Available)144

28. Procedure (Incomplete)144

29. Fatherhood (Incomplete)145

30. King (Explanation) (Audio Available)145

31. Creativity (Explanation) (Audio Available)145

32. Globalization (Explanation) (Audio Available)145

33. Performance of Genders (Explanation) (Audio Available)146

34. Animal Behavior (B) (Explanation) (Audio Available)146

35. Overfishing (Audio Available)147

36. Ageing Population (Incomplete)147

37. Linguistic Training (Explanation) (Audio Available)147

38. Earth v.s. Mars (Incomplete)147

39. Latin America Reform (Audio Available)148

40. Advanced Machine (Audio Available)148

41. Ship (Explanation) (Audio Available)148

42. Loggerhead Turtle (Incomplete)149

43. CO2 Pollution (Incomplete)149

44. Motivation (Incomplete)149

45. Soot Emission (Explanation) (Audio Available)149

46. Telescope (Incomplete)150

47. Advertising Standard Authority (Incomplete)150

48. Large Hadron Collider (LHC) (Audio Available)150

49. Human Behavior (Explanation) (Audio Available).....	150

A. Speaking

Read Aloud

1. Urban Forests

A community's urban forest is an extension of its pride and community spirit. Trees enhance community economic stability by attracting businesses and tourists as people tend to linger and shop longer along tree-lined streets. Apartments and offices in wooded areas rent more quickly and businesses leasing office spaces in developments with trees reported higher productivity and fewer absences.

(APEUni Website / App RA #1031)

2. Root Network

The networks of roots that plants use to absorb water and nutrients can encompass a space larger than the part of the plant visible above ground. The nature of these roots systems can help plants adapt to challenging environments such as deserts. For instance, mesquite trees can develop tap roots capable of digging more than 50 yards deep to reach water.

(APEUni Website / App RA #1030)

3. Child Psychology

Within this free course, you will be introduced briefly to the discipline of child psychology and to theories and approaches that have been developed to help us understand and support children's lives by focusing on the individual children. Psychologists can assess changes in their child's abilities over time, including their physical, cognitive, social, and emotional development.

(APEUni Website / App RA #1029)

4. Political Problems

The course considers the ways in which thinkers have responded to the particular political problems of their day and the ways in which they contribute to a broader conversation about human goods and needs, justice, democracy, and the proper relationship of the individual to the state.

(APEUni Website / App RA #1028)

5. Statistics

Statistics are indicators of change and allow meaningful comparisons to be made. While it may be the issues rather than the statistics as such that grab people's attention, it should be recognized that it is the statistics that informed the issues. Statistical literacy, then, is the ability to accurately understand, interpret and evaluate the data that inform these issues.

(APEUni Website / App RA #1027)

6. William Shakespeare

Three hundred and eighty years after his death, William Shakespeare remains the central author of the English-speaking world; he is the most quoted poet and the most regularly produced playwright — and now among the most popular screenwriters as well. Why is that, and who "is" he?

(APEUni Website / App RA #1026)

7. Rates of Depression

At a time when stress levels are soaring, rates of depression are increasing and the gap between rich and poor is ever widening. We believe that giving can play a positive role in helping people to feel

connected to those around them and generate a sense of purpose and hope. When we give, we feel valued, useful and happy.

(APEUni Website / App RA #1025)

8. Tutor

Your tutor helps you make the most of your time at university by giving you guidance and support along the way. All new students are allocated a personal tutor who will encourage you to get the most out of your course, direct you to other sources of support and help you achieve your goals.

(APEUni Website / App RA #1024)

9. Attendance

To some extent, attendance at cultural venues and events is influenced by a person's age and the composition of the household in which they live. For example, those people in households with dependent children were more likely to visit zoological parks and aquariums than people living in single person households.

(APEUni Website / App RA #1023)

10. Enough Fluid

Your body is nearly two-thirds water. And so it is really important that you consume enough fluid to stay hydrated and healthy. If you don't get enough fluid you may feel tired, get headaches, and not perform at your best.

(APEUni Website / App RA #1022)

11. Single Research

Rarely, however, does a single research study produce the certainty needed to assume that the same results will apply in all or most settings. Rather, research is usually an ongoing process, based on many accumulated understandings and explanations that, when taken together, lead to a generalization about educational issues and practice, and ultimately, to the development of theories.

(APEUni Website / App RA #315)

12. Tortoise

The tortoise size and shell shape varies depending on where they live. The shell is made of bone and is a dull brown color. Their ribs, backbone and breastbone have become part of the shell, which is why you can never separate the tortoise from its shell.

(APEUni Website / App RA #1021)

13. Department Stores

In this course, we will explore how such things as department stores, nationally advertised brand-name goods, mass produced cars and suburbs transformed the American economy, society and politics. The course is organized both thematically and chronologically. Each period deals with a new development in the history of consumer culture.

(APEUni Website / App RA #1020)

14. Attendance to Theater

Experts discuss the significance of attending the theater as a civic occasion, associated with the political and cultural achievements of Athens. Through archeology and analyses of contemporary art forms such as decoration on pottery, a picture is built up of ancient Greek theater.

(APEUni Website / App RA #1019)

15. Norms and Values

Members of a culture must conform to its norms for the culture to exist and function. Hence, members must want to conform and obey rules. They first must internalize the social norms and values that dictate what is normal for the culture. Then they must socialize or teach norms and values to their children. (APEUni Website / App RA #1018)

16. Expression

Expression became important during the romantic movement with artwork expressing a definite feeling, as in the sublime or dramatic. Audience response was important, for the artwork was intended to evoke an emotional response. This definition holds true today as artists look to connect with and evoke responses from their viewers. (APEUni Website / App RA #1017)

17. Learner Experience

We seek to improve learner's experience of education at college and help them to aspire, achieve and progress. We must embed equality and diversity in everything we do, both as a provider and an employer. We hope to prepare our students for work, higher education and citizenship by equipping our staff with the skills to meet this agenda. (APEUni Website / App RA #1016)

18. Natural Environment

The natural environment can be hazardous, and, with increased travel and leisure, people today are more likely than ever to be exposed to potentially life-threatening conditions. Although the human body can adjust to some extent, it cannot cope with poisons or prolonged exposure to extremes of environment. (APEUni Website / App RA #1015)

19. Emigrants

In the late 16th and 17th centuries, many English, French and Dutch emigrants went to North America in search of gold and silver. But they did not find it. Instead, settlers were forced to support themselves by cultivating crops that they could sell in Europe, like tobacco, indigo and rice. (APEUni Website / App RA #1014)

20. Humanities

We believe in the inherent value of research in the humanities and social sciences. And our research data agenda is given by the pursuit of new knowledge that will be of benefit of Australia and the world. We offer one of the most comprehensive programs in the humanities and social sciences in Australia and the Asian Pacific region. (APEUni Website / App RA #1013)

21. Making Notes

The whole purpose of making notes is to aid your learning. It is important to go back over them within a day of making them to make sure they make sense and make them legible for future revisions. Also, going back over them should highlight the key questions of areas in which you want to do further reading. (APEUni Website / App RA #1012)

22. Word Radical

The word radical from the Latin word for roots means anyone who advocates fundamental change in the

political system. Literally, a radical is one who proposes to attack some political or social problems by going deep into the social or economic fabric to get at the root cause and alter this basic weakness. (APEUni Website / App RA #1011)

23. New Textbook

This is a new, accessible and engaging textbook written by academics who also work as consultants with organizations undergoing change. It offers a unique combination of rigorous theoretical exploration together with practical insights from working with those who are actually responsible for managing change.

(APEUni Website / App RA #1010)

24. Volcano Behaviors

There were various explanations for volcano behavior before the structure of the earth mantle as a semisolid material was developed. For decades, awareness that compression and radioactive materials may be heat sources was discounted and volcanic action was often attributed to chemical reactions and a thin layer of molten rock near the surface.

(APEUni Website / App RA #921)

25. Medical Cannabis

According to a peer-reviewed study medical cannabis led to "a statistically significant improvement" in quality of life, employment status, and in the reduction of the number of medications in those with Tourette's Syndrome, in addition to improving comorbidities.

(APEUni Website / App RA #1009)

26. Hybrid Rice

A new breed of rice that is a hybrid of an annual Asian rice and a perennial African rice could be a more sustainable option. The hybrid rice was able to produce grain for 8 consecutive harvests over four years at a yield comparable to the standard annual Asian rice, with much lower costs and labour.

(APEUni Website / App RA #1008)

27. Motivation to Fight

USA sexually 'teased' its troops in the First World War to make them fight harder. Believing that sexually satisfied men could not be easily motivated, the aim of this teasing was to generate unmet sexual desire, which the War Department could leverage as motivation to fight.

(APEUni Website / App RA #1007)

28. Baby Hearing

Most babies start developing their hearing while still in the womb, prompting some hopeful parents to play classical music to their pregnant bellies. Some research even suggests that infants are listening to adult speech as early as 10 weeks before birth, gathering the basic building blocks of their family's native tongue.

(APEUni Website / App RA #1006)

29. Stroke Risk

People in their 20s and 30s who drink moderate to heavy amounts of alcohol may be more likely to have a stroke as young adults than people who drink low amounts or no alcohol, according to a study. The risk of stroke increased the more years people reported moderate or heavy drinking.

(APEUni Website / App RA #1005)

30. Abortions

The Texas law prohibiting abortion after detectable embryonic cardiac activity was associated with a decrease in in-state abortions and an increase in residents obtaining out-of-state abortions. The proportion of out-of-state abortions obtained at 12 weeks increased significantly from 17.1% to 31%. (APEUni Website / App RA #1004)

31. Pandemic

Belief that the COVID-19 pandemic was a hoax — that its severity was exaggerated or that the virus was deliberately released for sinister reasons — functions as a “gateway” to believing in conspiracy theories generally. In study, pandemic skeptics were more likely to believe in 2020 election fraud. (APEUni Website / App RA #1003)

32. Vitamin and Death

Vitamin D deficiency linked to premature death. Over a 14-year follow-up period, researchers found that the risk for death significantly decreased with increased vitamin D concentrations, with the strongest effects seen among those with severe deficiencies. (APEUni Website / App RA #1002)

33. Pollution Reduction

Air pollution reduced when U.S. embassies around the world installed monitors and tweeted the Readings. The resulting reductions in air pollution levels had large health benefits for residents in these cities, speaking to the potential efficacy of other monitoring and information interventions. (APEUni Website / App RA #1001)

34. Video Games

A study of nearly 2,000 children found that those who reported playing video games for three hours per day or more performed better on cognitive skills tests involving impulse control and working memory compared to children who had never played video games. (APEUni Website / App RA #1000)

35. Seismic Mars

Until now, Mars has been generally considered a geologically dead planet. An international team of researchers led by ETH Zurich now reports that seismic signals indicate volcanism still plays an active role in shaping the Martian surface. (APEUni Website / App RA #999)

36. Ozone Pollution

China’s war on particulate air pollution is causing more severe ozone pollution. According to the new research, there was so much particulate matter in the smog around Chinese cities that it helped to quell ozone production by acting as a sponge that collected chemical radicals. (APEUni Website / App RA #935)

37. Lullaby

A lullaby or cradle song, is a soothing song or piece of music that is usually played for children. The purposes of lullabies vary. In some societies they are used to pass down cultural knowledge or tradition. Lullabies can be found in many countries, and have existed since ancient times. (APEUni Website / App RA #874)

38. Essential Carbon

The carbon is essential to life on earth, but scientists still struggle to grasp its complexities. Most research to date has focused on major sources of the greenhouse gas carbon dioxide, and the use of fossil fuels. A new study has come to the counter-intuitive conclusion that plants might accumulate more carbon in the presence of predators and herbivores.

(APEUni Website / App RA #863)

39. Subject Outlines

Your subject outlines are a good place to go to find information about which textbooks to buy. You will usually be given one of these for each subject in the first lecture, but if you are missing one or need one earlier then you should contact the subject coordinator.

(APEUni Website / App RA #862)

40. Global Changes

Globalization refers to a set of changes rather than a single change. Many of these changes are social, cultural and political rather than purely economic, and one of the main drivers in addition to the global marketplace is the communication revolution.

(APEUni Website / App RA #859)

41. Flood Control

We've spent a lot of money over the last seventy years on flood control, and it's protected millions of people and has saved us billions of dollars. We've built dams to hold back the waters. We've built levees to keep the water off the people, and we've raised the ones that were originally started in seventeen eighteen.

(APEUni Website / App RA #836)

42. Circumcision

The role of women in promoting voluntary medical male circumcision uptake: research reveals the important role played by women in influencing men to undergo circumcision. Women are also motivated to convince men to undergo male circumcision because of the benefits associated with them such as reduction of HIV transmission and cervical cancer.

(APEUni Website / App RA #826)

43. Psychology

Psychology is the study of cognitions, emotions, and behavior. Psychologists are involved in a variety of tasks. Many spend their careers designing and performing research to understand how people behave in specific situations, how and why we think the way we do, and how emotions develop and what impact they have on our interactions with others.

(APEUni Website / App RA #819)

44. Brain Efficiency

Efficiency is not your friend when it comes to cognitive growth. In order to keep our brains making new connections and keep them active, you need to keep moving on to another challenging activity as soon as you reach the point of mastery in the one you were engaging in.

(APEUni Website / App RA #818)

45. Photorealistic Images

Using artificial intelligence, researchers can create photorealistic images from three-dimensional

scenery, paving the way for better driving simulators and better testing of driverless cars.

(APEUni Website / App RA #816)

46. Climate Effects

Changes in climate affect, for example, the plant and animal life of a given area. The presence of coal beds in North America and Europe along with evidence of glaciation in these same areas indicates that they must have experienced alternately warmer and colder climates than they now possess.

(APEUni Website / App RA #813)

47. Executive Residence

The Executive Residence in the White House in the United States of America, where the president resides, is divided into several wings. It also includes the vice-president's and president's staff offices. This government building is a national heritage.

(APEUni Website / App RA #797)

48. Carbohydrate Intake

Based on the results from this study, we hypothesized that a high-protein diet coupled with low carbohydrate intake would be beneficial for prevention of bone loss in adults.

(APEUni Website / App RA #789)

49. Era of Mayan

The Classic Era of Mayan came to an end around 900 AD. Why this happened is unclear; the cities were probably over-farming the land, so that a period of drought led to famine. Recent geological research supports this, as there appears to have been a 200-year drought around this time.

(APEUni Website / App RA #788)

50. Graduate Admission School

Since our graduate admission school is not centralized, each of the university's 6 schools and colleges admits students to its own programs. For information about specific program degrees, graduate applications, graduate admission requirements and procedures, graduate scholarships and the status of your application, visit the individual school websites.

(APEUni Website / App RA #778)

51. Mature Tree

The wonderful framework of mature trees creates a secluded, enclosed atmosphere that unites a great variety of plantings to inspire visitors in all seasons. Spring in the garden is marked by leafing up and flowering of trees and the eruption of the flowers in the bulb meadows, and woodland understory.

(APEUni Website / App RA #377)

52. Manchester (Incomplete)

Points: About a person who graduated from Cambridge and what his position was. He lived in Manchester, and died there.

(APEUni Website / App RA #756)

53. Roman Army (Shadowing)

There were two types of soldier in the Roman Army: the roman legionary and the auxiliaries. The legionaries were the very best soldiers and the auxiliaries were actually non-Roman citizens. Legionaries wore an undershirt made of linen and a woollen tunic. The linen helped the soldiers to stay cool while the

wool helped to trap heat, keeping the soldiers warm.

(APEUni Website / App RA #755)

54. Personal Libraries (Shadowing)

Scholars build their own personal libraries to support not only particular projects but also general reading in their field. They buy or make photocopies of materials when possible, so they can consult them frequently, mark pages and write annotation on them. When moving into a new field, they add to their collections, usually concentrating on primary texts.

(APEUni Website / App RA #714)

55. Behavioral Science (Shadowing)

Behavioral and social sciences research helps predict, prevent, and manage illness — in individuals and in whole populations. This research also helps people change their behaviors, understand treatments, and learn how to stick with them. Society's role is significant, too: access to health care affects decision-making and behavior.

(APEUni Website / App RA #713)

56. Undergraduates Education

Undergraduates may choose to major in any one of 125 academic majors. The universities distinguished faculty includes internationally known scientists, authors and teachers who are committed to continuing the university's tradition in providing one of the highest quality undergraduate educations available.

(APEUni Website / App RA #712)

57. Antarctic

The world's fifth largest continent: Antarctica is almost entirely covered by ice 2000 meters thick. The area sustains varied wildlife including seals, whales, and penguins. The Antarctic treaty signed in 1959 and enforced since 1961 provides for international governance of Antarctica.

(APEUni Website / App RA #710)

58. Loggerhead Turtle (Shadowing)

It's time for this young loggerhead turtle to go to work. We can tether turtles in these little cloth harnesses, put them into this tank and dull swimming place. University of North Carolina biologist Ken Loman studies sea turtles that are programmed from birth for an extraordinary journey. Mother turtles buried the eggs on the beach and then returned to the sea and the eggs hatch about 50 to 60 days later.

(APEUni Website / App RA #709)

59. Globalization (Shadowing)

The benefits and disadvantages of globalization are the subject of ongoing debate. The downside to globalization can be seen in the increased risk for the transmission of diseases. Globalization has of course led to great good, too. Richer nations now can come to the aid of poorer nations in crisis. Increasing diversity in many countries has meant more opportunity to learn about and celebrate other cultures.

(APEUni Website / App RA #682)

60. Agricultural Science (Shadowing)

While advances in agricultural science have always been critical to ensuring we help feed the world, its impact and importance is even greater now, as population grows at a rapid rate and the availability of

arable land steadily declines. Science and technology solutions are essential to meeting growing demand for food, maintaining market competitiveness and adapting to land mitigating risks.

(APEUni Website / App RA #668)

61. Paraphrasing (Incomplete)

Points: We define paraphrasing as putting a passage from an author into your own words. However, what are your own words? How different must your paraphrase be from the original? The answer is it should be considerably different. The whole point of paraphrasing is to show you have read and understood another person's ideas and can summarize them in your own writing style rather than borrowing their phrases. If you just change a few words or add some bits of your own to an otherwise reproduced passage, you will probably be penalized for plagiarism. You should aim to condense and simplify a writer's ideas and describe them using different sentence structures and expressions.

(APEUni Website / App RA #607)

62. Goods and Services

Quite obviously, a significant rise in the number of people in a given area or country will affect the demand for a whole host of goods and services. Note that a change in the structure of the population will increase the demand for some goods but reduce the demand for others.

(APEUni Website / App RA #601)

63. Job Hours

Most of us spend on average 18 hundred hours per year in our jobs, and will work for about 40 years before retirement. When you consider the amount of time spent in the office, you soon realize how important it is to feel a sense of achievement at the end of the day, rather than just meeting financial objectives.

(APEUni Website / App RA #600)

64. Tissues and Organs

Tissues are grouped together in the body to form organs. These include the brain, heart, lungs, kidneys, and liver. Each body organ has a specific shape and is made up of different types of tissue that work together. For example, the heart consists mainly of a specialized type of muscle tissue, which contracts rhythmically to provide the heart's pumping action.

(APEUni Website / App RA #596)

65. Examination of Domicile

At an early stage in the examination of the domicile of dependency rule in so far as it related to married women it seemed to the Commission that it would be better to examine the whole concept of domicile, particularly as dependent domicile arises in the case of minors (children under the age of majority) and mentally disordered persons as well as in the case of married women.

(APEUni Website / App RA #594)

66. Aquaculture

Aquaculture, also known as aquafarming, is the farming of aquatic organisms such as fish, crustaceans, molluscs and aquatic plants. Aquaculture involves cultivating freshwater and saltwater populations under controlled conditions.

(APEUni Website / App RA #588)

67. Blue Whale

Blue whales are the largest living mammals. Though reports of maximum length and weight vary from one account to another, Antarctic blue whales are known to have reached lengths to 100 feet and weights of over 150 tons before stocks were severely depleted by whaling operations. North Atlantic blue whales may be expected to reach lengths of 80–85 feet.

(APEUni Website / App RA #579)

68. Conscientiousness

Conscientiousness is a fundamental personality trait. A conscientious person is good at self-regulation and impulse control. This trait influences whether you will set and keep long-range goals, deliberate over choices, behave cautiously or impulsively, and take obligations to others seriously.

(APEUni Website / App RA #577)

69. Spanish and French (Incomplete)

Points: Spanish is one of the languages that are most spoken in the United States. ... French is very common in American.

(APEUni Website / App RA #571)

70. Smartphones

Smartphones have become an everyday essential for millions of us — we rely on them for everything from updating our social media profiles to banking. Taking out a smartphone contract that bundles together your calls, data, and texts with the cost of the handset can help spread the cost — but can also mean you'll pay more over the long run.

(APEUni Website / App RA #554)

71. Student Loan

Since 2003, borrowing for education advanced faster, in percentage terms, than all other types of consumer debt that includes mortgages, auto loans and credit cards, data from the Federal Reserve Bank of New York show. As of the fourth quarter, student loans represented 10.5 percent of a record \$13.1 trillion in household debt, up from 3.3 percent at the start of 2003.

(APEUni Website / App RA #551)

72. Ed Tech (B) (Incomplete)

Points: Today, however, Skinner's heirs are forcing the sceptics to think again (see article). Backed by billionaire techies such as Mark Zuckerberg and Bill Gates, schools around the world are using new software to "personalize" learning. This could help hundreds of millions of children stuck in dismal classes—but only if edtech boosters can resist the temptation to revive harmful ideas about how children learn. To succeed, edtech must be at the service of teaching, not the other way around.

(APEUni Website / App RA #513)

73. Selective History (Shadowing)

History is selective. What history books tell us about the past is not everything that happened, but what historians have selected. They cannot put in everything: choices have to be made. Choices must similarly be made about which aspects of the past should be formally taught to the next generation in the shape of school history lessons.

(APEUni Website / App RA #472)

74. Credit Cards (Incomplete)

Points: credit cards used instead of cash, benefits and problems

(APEUni Website / App RA #448)

75. Sandra Lousada (Incomplete)

Points: London's National Portrait Gallery is currently celebrating the fifty-year career of photographer Sandra Lousada. The twenty one portraits on display depict key figures in literature, film and fashion from the early 1960s. Subsequent to the acquisition of forty portraits by Lousada, the display at The National Portrait Gallery highlights shots taken between 1960 and 1964, many of which feature in Lousada's book *Public Faces Private Places* (2008). Formal commissioned portraits are shown alongside behind the scenes photographs taken on films sets and unguarded portraits of sitters captured at home. (APEUni Website / App RA #447)

76. Interdisciplinary Studies (Incomplete)

Points: Interdisciplinarity or interdisciplinary studies involves the combination of two or more academic disciplines into one activity (e.g., a research project). It draws knowledge from several other fields like sociology, anthropology, psychology, economics etc. It is about creating something by thinking across boundaries. It is related to an interdiscipline or an interdisciplinary field, which is an organizational unit that crosses traditional boundaries between academic disciplines or schools of thought, as new needs and professions emerge. (APEUni Website / App RA #444)

77. Planet Nine (Incomplete)

Points: Astronomers think planets can exist in orbits far from their star, and propose a two-step process: interactions with the star or inner planets kick it out of the inner system, and then a passing star stabilizes the orbit to keep it bound. Such a scenario could explain the hypothesized 'Planet Nine' in our solar system. Astronomers have now confirmed that one binary star system, HD 106906, has a planet in a bound, highly eccentric orbit. (APEUni Website / App RA #414)

78. Superhighway Network (Incomplete)

Points: Researchers have discovered a new superhighway network to travel through the Solar System much faster than was previously possible. Such routes can drive comets and asteroids near Jupiter to Neptune's distance in under a decade and to 100 astronomical units in less than a century. They could be used to send spacecraft to the far reaches of our planetary system relatively fast, and to monitor and understand near-Earth objects that might collide with our planet. (APEUni Website / App RA #413)

79. Chasing the Flame

It is precisely in observing the intertwinings of success and failure that *Chasing the Flame* makes its greatest mark. With piercing insight and relentless logic, it reveals the pitfalls of international politics and details an intricate struggle between individual and institution. It haunts us with the poignant truth that even a great man can do only so much to reinvent the world. (APEUni Website / App RA #397)

80. Telecommunication (Shadowing)

Today, telecommunication is widespread and devices that assist the progress are common in many parts of the world. There is also a vast array of networks that connect these devices, including computer, telephone and cable networks. Computer communication across the Internet, such as e-mail and instant messaging, is just one of many examples of telecommunication.

(APEUni Website / App RA #380)

81. Stone Tools (Incomplete)

Points: Modern humans arrived in westernmost Europe 41,000 to 38,000 years ago, about 5,000 years earlier than previously known, according to an international team of researchers that discovered stone tools used by modern humans dated to the earlier time period in a cave near the Atlantic coast of central Portugal. The tools document the presence of modern humans at a time when Neanderthals were thought to be present in the region.

(APEUni Website / App RA #364)

82. Economies of Scale

If countries can specialize in certain goods they can benefit from economies of scale and lower average cost. This is especially true in the industry with high fixed costs or that require a high level of investment. The benefits of the economy of scale will ultimately lead to lower prices for consumers and greater efficiency for exporting firms.

(APEUni Website / App RA #351)

83. Case Approach

It was found that while many companies express interest in Jacobson's use case approach, actual scenario usage often falls outside what is described in textbooks and standard methodologies. Users therefore face significant scenario management problems not yet addressed adequately in theory or practice, and are demanding solutions to these problems.

(APEUni Website / App RA #347)

84. Constellation (Shadowing)

A constellation is an area on the celestial sphere in which a group of stars forms an imaginary outline or pattern, typically representing an animal, mythological person or creature, or an inanimate object. The origins of the earliest constellations likely go back to prehistory.

(APEUni Website / App RA #331)

85. Colloquialism (Shadowing)

Australians speak English of course. But for many tourists and even some locals, Australian English has only tenuous links with mother tongue. Our speech is peppered with words and phrases whose arcane meanings are understood only by the initiate. It is these colorful colloquialisms that Australian slang set to truly explain.

(APEUni Website / App RA #317)

86. Values of Literature (Shadowing)

Certainly one of the important values of literature is that it nourishes our emotional lives. An effective literary work may seem to speak directly to us especially if we are ripe for it. The inner life that good writers reveal in their characters often gives us glimpses of some portion of ourselves. We can be moved to laugh, cry, tremble, dream, ponder, shriek, or rage with a character by simply turning the page instead of turning our lives upside down.

(APEUni Website / App RA #106)

87. Beauty Contests (Shadowing)

Beauty contests, whether it's Miss Universe or Miss Teen International, are demeaning to women and out of sync with the times. Opponents say that they are nothing more than symbols of decline. Since

Australians Jennifer Hawkins and Lauryn Eagle were crowned Miss Universe and Miss Teen International respectively, there has been a dramatic increase in interest in beauty pageants in this country.

(APEUni Website / App RA #109)

88. Elephant (Shadowing)

The elephant is the largest living land mammal. During evolution, its skeleton has greatly altered from the usual mammal, designed for two main reasons. One is to cope with the great weight of huge grinding cheek teeth and elongated tusk, making the skull particularly massive. The other is to support the enormous bulk of such a huge body.

(APEUni Website / App RA #302)

89. Shrimp Farm (Shadowing)

Shrimp farmers used to hold animals in nursery ponds for 30 to 60 days; now they try to move them into grow-out ponds in less than 30 days. This reduces stress on the animals and dramatically increases survivals in the grow-out ponds. Many farms that abandoned nursery ponds have gone back to them, and the results have been surprisingly positive. They're using the old, uncovered, earthen, nursery ponds.

(APEUni Website / App RA #300)

90. Slang (Shadowing)

Australians do speak English. However, for some tourists and travelers, it can be difficult to understand the slang. Also, the links between Australian and American English were seen to be very tenuous. At least some colloquialisms in Australian English do not exist in other types of English.

(APEUni Website / App RA #79)

91. Fast Food (Shadowing)

Hundreds of millions of American people eat fast food every day without giving it too much thought, unaware of the subtle and not so subtle ramifications of their purchases. They just grab their tray off the counter, find a table, take a seat, unwrap the paper, and dig in. The whole experience is transitory and soon forgotten.

(APEUni Website / App RA #288)

92. Restaurant Location (Shadowing)

The physical location of a restaurant in the competitive landscape of the city has long been known as a major factor in its likely success or failure. Once restaurants are established in such environments they can do little about their location. All they can do is work to improve customer access to their premises. Restaurateurs often do this by engaging in battles with local authorities about car parking.

(APEUni Website / App RA #116)

93. Legal Writing (Shadowing)

Legal writing is usually less discursive than writing in other humanities subjects, and precision is more important than variety. Sentence structure should not be too complex; it is usually unnecessary to make extensive use of adjectives or adverbs, and consistency of terms is often required.

(APEUni Website / App RA #87)

94. Russia (Shadowing)

Long isolated from Western Europe, Russia grew up without participating in the development like the Reformation that many Russians taking pride in their unique culture find dubious value. Russia is, as a result, the most unusual member of the European family, if indeed it is European at all. The question is

still open to debate, particularly among Russians themselves.

(APEUni Website / App RA #278)

95. The UN (Shadowing)

Since its inception, the UN system has been working to ensure adequate food for all through sustainable agriculture. The majority of the world's poorest people live in rural areas of developing countries. They depend on agriculture and related activities for their livelihoods. This makes them particularly vulnerable to man-made and natural influences that reduce agricultural production.

(APEUni Website / App RA #275)

96. Blue (B)

Blue is the most popular color. Food researchers disagree when humans searched for food, they learned to avoid toxic or spoiled objects, which were often blue, black, or purple. When food dyed blue is served to study subjects, they lose appetite.

(APEUni Website / App RA #259)

97. December Sales (Shadowing)

Weakness in electronics, auto and gas station sales dragged down overall retail sales last month, but excluding those three categories, retailers enjoyed healthy increases across the board, according to government figures released Wednesday. Moreover, December sales numbers were also revised higher.

(APEUni Website / App RA #255)

98. Consumer Confidence

The Conference Board's consumer-confidence index, which measures both American consumers' assessment of current conditions and their expectations, rose to its highest level since 2001. Updated figures from the Commerce Department confirmed earlier estimates that the economy grew by 1.6% year-on-year in 2016, the slowest rate for five years—though growth picked up to 1.9% in the final quarter.

(APEUni Website / App RA #225)

99. Students' Declarations

For example, students might try to enrol for the free year despite having previously studied and therefore being ineligible. The report said the government held no records of study from before 2003 in order to verify eligibility, meaning it would have to rely on students' declarations.

(APEUni Website / App RA #196)

100. Co-evolutionary Relationship (Incomplete)

Points: The co-evolutionary relationship between cows and grass is one of nature's underappreciated wonders; it also happens to be the key to understanding just about everything about modern meat. For the grasses, which have evolved to withstand the grazing of ruminants, the cow maintains and expands their habitat by preventing trees and shrubs from gaining a foothold and hogging the sunlight; the animal also spreads grass seed, plants it with his hooves, and then fertilizes it with his manure.

(APEUni Website / App RA #167)

101. Vanilla (Shadowing)

The uniquely scented flavor of vanilla is second only to chocolate in popularity on the world's palate. It's also the second most expensive spice after saffron. But highly labor intensive cultivation methods and the plant's temperamental life cycle and propagation mean production on a global scale is struggling to

keep up with the increasing demand for the product.

(APEUni Website / App RA #152)

102. Industrial Revolution (Shadowing)

As to the Industrial Revolution, one cannot dispute today the fact that it has succeeded in inaugurating in a number of countries a level of mass prosperity which was undreamt of in the days preceding the Industrial Revolution. But, on the immediate impact of the Industrial Revolution, there were substantial divergences among writers.

(APEUni Website / App RA #150)

103. Breeding Areas

Major breeding areas, and breeding islands, are shown as dark green areas or darts. Open darts are shown no-breeding records on islands, and are also used for offshore sightings, that is from ships or boats. Other areas where species are not meant to be seen are plain pale green, with pale green hatching where records are usually sparse.

(APEUni Website / App RA #149)

104. Population Growth (Shadowing)

How quickly is the world's population growing? In the United States and other developed countries, the current growth rate is very low. In most developing countries, the human population is growing at a rate of nearly 3 people per second. Because of this bustling growth rate, the human population is well on its way to reaching 9 billion within lifetime.

(APEUni Website / App RA #145)

105. Living Room (Incomplete)

Points: Living room is the most used part that withholds most of the traffic coming in and out of the house. It is highly recommended that the flooring should be strong enough that it can endure all such amendments done with your furniture or to the increasing and decreasing ratio of visitors. For this purpose, you can opt for hardwood flooring. Being classy and sophisticated in look it is the perfect choice for your living room whenever you are remodelling your home.

(APEUni Website / App RA #143)

106. Climate Change

This is what needs to happen on climate change: the world needs to put a price on carbon emissions and let the market respond. If politicians pretend this can be done without pain, it will probably result in another five to ten years of pretending to take action.

(APEUni Website / App RA #146)

107. Productive Capacity (Shadowing)

The core of the problem was the immense disparity between the country's productive capacity and the ability of people to consume. Great innovations in productive techniques during and after the war raised the output of industry beyond the purchasing capacity of U.S. farmers and wage earners.

(APEUni Website / App RA #136)

108. Augustus (Shadowing)

Augustus was given the powers of an absolute monarch, but he presented himself as the preserver of republican traditions. He treated the Senate, or state council, with great respect, and was made Consul year after year. He successfully reduced the political power of the army by retiring many soldiers, but

giving them land or money to keep their loyalty.

(APEUni Website / App RA #133)

109. Blue (Shadowing)

While blue is one of the most popular colors, it is one of the least appetizing. Blue food is rare in nature. Food researchers say that when humans searched for food, they learned to avoid toxic or spoiled objects, which were often blue, black, or purple. When food dyed blue is served to study subjects, they lose appetite.

(APEUni Website / App RA #131)

110. Marriage Too Early (Incomplete)

Points: Marriage is a big step in anyone's life and there is an argument to be made against getting married too early. As any newlywed couple knows, there is a huge amount of financial pressure associated with marriage. Firstly, the wedding reception and honeymoon will cost you an arm and a leg. Then there's the matter of home loans, rent and energy bills. If you're looking to start a family, your child's education is another thing you need to save up for. Teenagers should probably find a proper job before deciding to tie the knot.

(APEUni Website / App RA #129)

111. Tool-user (Incomplete)

Points: The human animal's status as the only clever tool-user who can talk about our feelings is crumbling. Prairie dogs can make up words for new animals. Crows are born with the ability to make tools. Elephants recognise and stroke the bones of a lost family member. As biologists delve into these subjects, they're demonstrating that we're not nearly as unique as we once thought. It's the perfect time, scientifically speaking, to reassess our place in the animal kingdom.

(APEUni Website / App RA #96)

112. Undesirable Programs (Incomplete)

Points: Parents can communicate their personal feelings about undesirable programs both by discouraging their children from watching them and by writing to their local television station or to the programs sponsors. The public does have a voice. Clearly, not all programs need please everybody. We do have a choice of programs and we also have a choice, for ourselves and at least for our younger children, of watching or not watching. There is an off button on every set!

(APEUni Website / App RA #86)

113. Television Viewing (Incomplete)

Points: Parents need to take control of the television viewing of pre-schoolers and children of early school age. A workable technique is to make a simple but firm weekly plan as to what programs will be permitted and how much time overall may be spent in viewing. Any child's weekly schedule normally involves a certain amount of time for school, naps, outdoor play and indoor play. There should not, therefore, be great amounts of unfilled time when the child gravitates towards the TV set.

(APEUni Website / App RA #85)

114. Middle Ages (Incomplete)

Points: To understand the past you have to be able, as far as possible, to think as the people in the period you are studying thought. The example of what it must have been like to be a peasant in the Middle Ages is used. However, sensibilities change over time and we can't completely throw off the mentality of the present. Therefore, every age will have a slightly different perspective on the same

period of the past, no matter what the facts are.

(APEUni Website / App RA #81)

115. Not-for-profit University (Incomplete)

Points: A university is not a business. More precisely, a not-for-profit college or university is significantly different than a for-profit business. A university has no owners it is a public trust. Without owners it has no one to pay dividends to, and no one for whom it must maximize its profits. A business has a single over-riding goal: the maximization of return for the owners. A university has a multiplicity of goals: to foster learning, to create knowledge, and to serve its community.

(APEUni Website / App RA #80)

116. Charles Darwin (Incomplete)

Points: Charles Darwin published his paper "On the Origin of Species" in 1859. It is one of the most well-known pieces of scientific literature in human history. In the paper, Darwin proposes the theory of natural selection. He states that for any generation of any species, there will always be a struggle for survival. Individuals who are better suited to the environment are "fitter", and therefore have a much higher chance of surviving and reproducing. This means that later generations are likely to inherit these stronger genetic traits.

(APEUni Website / App RA #123)

117. Fiscal Year (Shadowing)

At the beginning of each fiscal year, funds are allocated to each State account in accordance with the University's financial plan. Funds are allocated to each account by objects of expenditure. Account managers are responsible for ensuring that adequate funds are available in the appropriate object before initiating transactions to use the funds.

(APEUni Website / App RA #112)

118. Mobile Commerce (Incomplete)

Points: IT may well change the way you live, yet again. Welcome to the world mobile commerce, where your hand-held device, be it a mobile phone, a personal digital assistant (PDA) or any other wireless application will soon be used for commercial transactions. Skeptical? Consider these facts In Japan, mobile phones are used for location based services where the mobile service providers tie up with a host of other players such as restaurants, car rental companies etc. When the mobile user enters that zone, messages from all these players are flashed on the mobile device. Location base services are proved in several other countries as well.

(APEUni Website / App RA #46)

119. Coastal Wetlands (Incomplete)

Points: The coastal wetlands have environmental and economic importance. Wetlands provide natural wealth. They have important filtering capabilities. As the runoff water passes, they retain excess nutrients and some pollutants. They maintain water flow during dry periods. Thousands of people depend on groundwater for drinking. They act as natural sponges of flood waters and contain soil erosion. They control floods and save the buildings from collapsing during heavy rains. The hardwood-riparian wetlands along the Mississippi River can store sixty days of floodwater.

(APEUni Website / App RA #45)

120. Introvert and Extrovert (Shadowing)

Introverts (or those of us with introverted tendencies) tend to recharge by spending time alone. They lose

energy from being around people for long periods of time, particularly large crowds. Extroverts, on the other hand, gain energy from other people. Extroverts actually find their energy is sapped when they spend too much time alone. They recharge by being social.

(APEUni Website / App RA #29)

121. Father

Ever since I remembered, father woke up at five thirty every morning, made us all breakfast and read newspaper. After that, he would go to work. He worked as a writer. It was a long time before I realized he did this for a living.

(APEUni Website / App RA #22)

122. Grand Canyon (Shadowing)

The Grand Canyon is 277 miles long, up to 18 miles wide and attains a depth of over a mile. While the specific geologic processes and timing that formed the Grand Canyon are the subject of debate by geologists, recent evidence suggests the Colorado River established its course through the canyon at least 17 million years ago.

(APEUni Website / App RA #7)

123. Yellow

Yellow is considered as the most optimistic color. Yet surprisingly, people lose their tempers more often in yellow rooms and babies cry more in them. The reason may be that yellow is the hardest color for eyes to take in. So it can be overpowering if overused.

(APEUni Website / App RA #4)

124. Lincoln (Shadowing)

Lincoln's apparently radical change of mind about his war power to emancipate slaves was caused by the escalating scope of war, which convinced him that any measure to weaken the Confederacy and strengthen the Union war effort was justifiable as a military necessity.

116. I looked in my closet for something to wear but i couldn't find anything appropriate for the occasion. #1171 [\(Audio Available\)](#)
117. Fungi are important in the process of decay, which returns ingredients to the soil, enhances soil fertility, and decomposes animal debris. #1149 [\(Audio Available\)](#)
118. There is no point in designing efficient cars if we use them more and more. #1132 [\(Audio Available\)](#)
119. Please click the logo above to enter the site. #1119 [\(Audio Available\)](#)
120. Young children need education and organized activities. #1118 [\(Audio Available\)](#)
121. Any textual references you make should be cited appropriately in the footnotes. #461 [\(Audio Available\)](#)
122. By using the student identification card you can borrow books from the library. #1115 [\(Audio Available\)](#)
123. The brain is our central computer of our bodies. #1110 [\(Audio Available\)](#)
124. Read the safety instructions before using the equipment during the workshop. #1108 [\(Audio Available\)](#)
125. We have three distinctive libraries which are nationally acclaimed. #1091 [\(Audio Available\)](#)
126. Tuesday sessions will last for approximately two hours. #1088 [\(Audio Available\)](#)
127. Everyone should get access to art galleries no matter where they live. #1085 [\(Audio Available\)](#)
128. Until you complete the form, you cannot attend. #1084 [\(Audio Available\)](#)
129. There is too much information on this topic. #1083 [\(Audio Available\)](#)
130. Presentation skills are important to both universities and workplaces. #1082 [\(Audio Available\)](#)
131. Major sports on campus include rugby, soccer and tennis. #1081 [\(Audio Available\)](#)
132. It is clear that the effects of climate change will damage the world economy. #1080 [\(Audio Available\)](#)
133. The framework will help pose more research questions systematically. #1079 [\(Audio Available\)](#)
134. Experience would be an advantage for this managerial role. #1077 [\(Audio Available\)](#)
135. The library is located on the north side of the campus. #1075 [\(Audio Available\)](#)
136. Today, I'd like to talk a little bit about the other theories that can explain the variations in climate. #1074 [\(Audio Available\)](#)
137. Biographical information should be removed prior to the publication of the results. #1068 [\(Audio Available\)](#)
138. The United States is the largest chocolate manufacturing country. #1067 [\(Audio Available\)](#)
139. If you forget your passport, you need to contact the student center. #1065 [\(Audio Available\)](#)
140. Please be careful when using internet sources. #1030 [\(Audio Available\)](#)
141. Please be careful when using online translation programs. #1024 [\(Audio Available\)](#)
142. The course comprises twenty hours of lectures, seminars and tutorials each week. #1021 [\(Audio Available\)](#)
143. To get further extension, you need to call the education executive on 401. #1020 [\(Audio Available\)](#)
144. There is a new pharmacy on the north side of the university campus. #1012 [\(Audio Available\)](#)
145. Those students have to retake the module if their marks are too low. #1011 [\(Audio Available\)](#)
146. There won't be any space for me in the car. #1007 [\(Audio Available\)](#)
147. The books are filled with drawings of machines invented when he was a student. #1004 [\(Audio Available\)](#)
148. I am wondering if cell phones are actually just as dangerous as cigarettes. #990 [\(Audio Available\)](#)
149. If you want to receive the reimbursement, you must submit the original receipts. #980 [\(Audio Available\)](#)
150. He was regarded as the foremost economist at that time. #979 [\(Audio Available\)](#)

151. Please read the first five chapters to prepare for next week's tutorial. #978 [\(Audio Available\)](#)
152. Students can download the lecture handouts from the course website. #975 [\(Audio Available\)](#)
153. Being a vegan means not consuming any animal products. #974 [\(Audio Available\)](#)
154. The university supplies a number of scholarships for those who have specific goals. #919 [\(Audio Available\)](#)
155. Students should take advantage of the internet before attending the lecture. #710 [\(Audio Available\)](#)
156. I would like an egg and tomatoes on white sandwich bread with orange juice. #640 [\(Audio Available\)](#)
157. Applicants for the course preferably have a degree in English or journalism. #516 [\(Audio Available\)](#)
158. Any textual references you make should be cited appropriately in the bibliography. #351 [\(Audio Available\)](#)
159. The cafeteria closes soon but the snack machine is accessible throughout the night. #826 [\(Audio Available\)](#)
160. The technician left the new microscope in the biology lab. #969 [\(Audio Available\)](#)
161. Only those who are over 18 years of age are eligible to open a bank account in our bank. #243 [\(Audio Available\)](#)
162. Ideally, free trade is beneficial to both trading partners. #968 [\(Audio Available\)](#)
163. All applications of internship are available in the office. #967 [\(Audio Available\)](#)
164. This is how we deliver health care to millions of people over the world. #964 [\(Audio Available\)](#)
165. In English, the first letters of the months of the year are always capitalized. #931 [\(Audio Available\)](#)
166. A thorough bibliography is needed at the end of every assignment. #961 [\(Audio Available\)](#)
167. Contemporary critics dismissed his idea as eccentric. #960 [\(Audio Available\)](#)
168. The United States has developed a coffee culture in recent years. #945 [\(Audio Available\)](#)
169. The lecture theatre one is located on the ground floor of the Pack Building. #944 [\(Audio Available\)](#)
170. Most printers in the library are out of ink. #941 [\(Audio Available\)](#)
171. The number of company bankruptcy skyrocketed in the third quarter. #934 [\(Audio Available\)](#)
172. It is argued that students can learn more in collaborative rather than individual study. #638 [\(Audio Available\)](#)
173. Our capacity to respond to national needs will determine our ability to flourish. #933 [\(Audio Available\)](#)
174. In my free time, I would like to read current affairs and newspapers. #930 [\(Audio Available\)](#)
175. Negative discourse continues to be predominant in discussions about gender. #929 [\(Audio Available\)](#)
176. Anonymous behaviors can be identified without intervention. #917 [\(Audio Available\)](#)

2. Kitchen

Answer:

The following graph gives information about a kitchen. This is a very beautiful picture, and it shows a number of things. According to this graph, in the central area, there is a square table with four chairs; the color of it is green. You can see from this graph that, in the right area, there is a refrigerator; the color of it is white. You can see from this graph that, in the background, there are some cupboards, the color of those are pink. There is also a sink and a gas cooker. And an oven is beside the refrigerator. In

conclusion, this picture is very informative.
 (APEUni Website / App DI #725)

3. Honey Production

Answer:

The following graph gives information about honey production by state in Mexico. The items include central zone, northern zone, and southern zone. You can see from this graph that the value of northern zone is around one to three percent. You can see from this graph that the value of southern zone is around three to ten percent, which is higher. You can see from this graph that the value of central zone is around ten to sixteen percent, which is the highest. You can see from this graph that the value of eastern zone is around ten to sixteen percent, which is the highest, too. In conclusion, this graph is very informative.

(APEUni Website / App DI #717)

4. Production Map (Incomplete)

Points: A map of Africa (Asia?), in which different things are produced in different areas. Himalayas is above, woods in the right upper corner, cotton in the middle, and ...

(APEUni Website / App DI #714)

5. Airline Passengers

Answer:

The following graph gives information about domestic airline passengers. The items include inter-capital, leisure, and all. According to this graph, in all, the value is around two, and that of inter-capital is higher, which is around two point five. You can see from this graph that the highest value is in mining exposed, which is around eight. You can also see from this graph that the lowest value is in leisure. In conclusion, airline passengers have different values.

(APEUni Website / App DI #712)

6. Fog

Answer:

The following graph gives information about the view of a street in fog. This is a very beautiful picture, and it shows a number of things. According to this graph, at the central area, there are three bicycles ridden by women at the front. The color of them is black. You can see from this graph that, behind the bicycles, there is a thick blanket of fog covering a lot of people and street lights; the color of the fog is white. You can see from this graph that, at the background, there are four straight dashed lines on the road surface, the color of those are white. The weather is foggy. The sky is grey. In conclusion, this picture is very informative.

(APEUni Website / App DI #686)

7. Chocolate Consumers

Answer:

The following graph gives information about pounds of chocolate consumed per capita in countries each

year. The items include Switzerland, Germany, Ireland, Norway, etc. According to this graph, in Sweden, the value is eleven point nine, and that of Australia is lower, which is around ten point eight. You can see from this graph that the highest value is in Switzerland, which is nineteen point eight. You can also see from this graph that the lowest value is in France. In conclusion, Switzerland consumes more chocolate than any another county does.

(APEUni Website / App DI #680)

8. NZ House Price

Answer:

The following graph gives information about New Zealand house price. The items include New Zealand and OECD. The horizontal axis is year, ranging from nineteen ninety to twenty–fourteen. According to this graph, in nineteen ninety, the value of New Zealand is around one hundred, and that of OECD is almost the same. According to this graph, the highest value of New Zealand is two hundred and fifty, which is in two thousand and seven. According to this graph, the value of New Zealand is higher than OECD. In conclusion, OECD has smaller changes.

(APEUni Website / App DI #668)

9. Age Group (B)

Answer:

The following graph gives information about percentages by age and sex. The items include age groups, female and male. According to this graph, in male, the value of eighty–five plus is around zero point

seven, and that of seventy–five to eighty–four is higher, which is around three. You can see from this graph that the highest value of female is in twenty–five to thirty–four, which is sixteen point five. You can also see from this graph that the value of less than four is seven point eight. In conclusion, eighty–five plus has the lowest percentage of population in female.

(APEUni Website / App DI #577)

10. European Countries

Answer:

The following graph gives information about Europe. Positions of different countries are displayed on the map. At the central area, there are Austria, Germany, Poland and Czechia. In the left area, there are Ireland and Portugal. According to this graph, the largest country is Russia, which is located on the right side. In comparison, small countries include Denmark and Belgium. In conclusion, there are many European countries shown on the map.

(APEUni Website / App DI #576)

11. Household Budget

Answer:

The following graph gives information about average weekly household expenditure. According to this graph, the items include food, medical, transport, and holidays. You can see from this graph that the value of food is one hundred and twenty–three. And the value of medical care is fifty. The value of transport is one hundred and twenty–four. According to this graph, the value of holiday is thirty–three.

As you can also see that the value of housing is one hundred and sixty-four. In conclusion, this graph is very informative.

(APEUni Website / App DI #575)

12. Fast Food Times

Answer:

The following graph gives information about fast food times a week. The items include everyday, once a week, and never. According to this graph, in several times a week, the value of July two thousand and three is around seventeen percent, and that of twenty thirteen is lower, which is around sixteen percent. You can see from this graph that the highest value of December two thousand and six is in about once a week, around thirty-three percent. You can also see from this graph that the lowest value of July twenty thirteen is in every day, around three percent. In conclusion, Americans usually eat fast food.

(APEUni Website / App DI #572)

13. Richest Countries or Regions

Answer:

The following graph gives information about which economies are really richest. The items include Switzerland, the United States, and Hong Kong. According to this graph, in Australia, the value of average wealth is around four hundred thousand dollars, and that of Netherland is lower, which is around three hundred thousand dollars. You can see from this graph that the lowest value of median wealth is in Denmark, which is one hundred thousand dollars. You can also see from this graph that the highest value

of median wealth is Australia. In conclusion, Switzerland has the highest rank. (APEUni Website / App DI #570)

14. Most Powerful Passports

Answer:

The following graph gives information about the world’s most powerful passports. The items include countries’ names, their ranks and visa–free countries’ numbers. According to this graph, in the first row, the value of Japan is one hundred and ninety–three. And in the second row, the value of Singapore is one hundred and ninety–two. You can see from this graph that the third highest value is in South Korea, which is one hundred and ninety–one. You can also see from this graph that the lowest value is in Luxembourg, which is one hundred and ninety. In conclusion, Japan has the most powerful passport. (APEUni Website / App DI #566)

15. GNH

Answer:

The following graph gives information about Gross National Happiness. Information of different areas are displayed on the map. In the central area, there is a large circle named GNH. There are many small circles surrounding the large circle. According to this graph, these small circles are health, time use, education, good governance, community vitality, living standards, psychological wellbeing and cultural diversity and resilience. And these small circles are respectively red, green, purple, blue, brown, and so on. In conclusion, there are many factors in Gross National Happiness.

(APEUni Website / App DI #565)

16. Bermuda Triangle

Answer:

The following graph gives information about Bermuda Triangle in Atlantic. Information of different areas are displayed on the map. In the central area, there is a light blue triangle named Bermuda, whose points are at Florida peninsula, Puerto Rico, and Bermuda islands. In the left area, there is Gulf of Mexico and Tropic of Cancer runs through it. According to this graph, the largest area is the mainland of America. In comparison, Caribbean Sea is south to Cuba. In conclusion, there are many seas and islands shown on the map.

(APEUni Website / App DI #563)

17. Plastic Bottle Recycling

Answer:

The following graph gives information about plastic bottle recycling. The steps include new bottles, refilling, used bottles and plastic processing, and . According to this graph, the first step is newly–produced bottles, which are empty. According to this graph, the second step is to fill the empty bottles with beverage. You can see from this graph that the third step is to open the bottles and drink up it, followed by the forth step is to transport used bottles back to the factory and use them as materials. The final step is the plastic materials turn into new bottles waiting for refilling. In conclusion, this graph is very informative.

(APEUni Website / App DI #558)

18. Tomato Processing Cycle

Answer:

The following graph gives information about how tomatoes come to consumers. The steps include a tomato tree, transportation, filtering, packaging. According to this graph, the first step is the tomato tree, which grows many tomatoes on the branches. According to this graph, the second step is to transport tomatoes by a green truck. You can see from this graph that the third step is to filter bad tomatoes out on a conveyer belt, followed by a crate full of good tomatoes as the fourth step. The final step is to fill the shopping cart with the good tomatoes for consumers. In conclusion, this graph is very informative.

(APEUni Website / App DI #557)

19. Litchfield Population

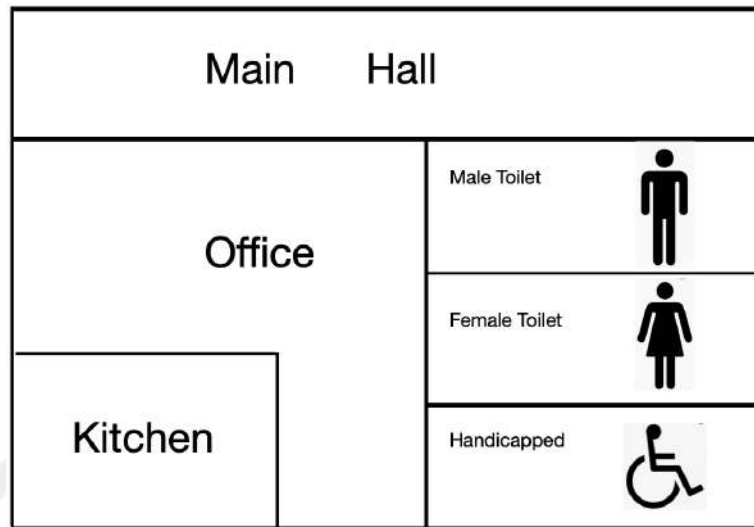

Answer:

The following graph gives information about Litchfield population. The horizontal axis is the years, ranging from nineteen o one to twenty eleven. According to this graph, in the year of nineteen eleven, the value is around eight thousand. And according to this graph, in the year of nineteen forty–one, the value is around ten thousand. The highest value is around thirty–two thousand five hundred, which is in twenty eleven. On the contrary, the lowest value is seven thousand, which is in nineteen o one. In conclusion, if this trend continues, the Litchfield population will keep rising in the future.

(APEUni Website / App DI #330)

20. Main Hall

Answer:

The following graph gives information about a floor plan. The items include a main hall, an office, a kitchen and toilets. You can see from this graph that there is a main hall, which is in the upper area of the plan. You can see from this graph that there are toilets for males and females, which are on the right of the plan. You can see from this graph that there is a toilet for the handicapped, which is in the bottom right corner with a sign of wheelchair. You can see from this graph that there are a kitchen in the bottom left corner and an office in the middle of the plan. In conclusion, this graph is very informative.

(APEUni Website / App DI #553)

21. Stationery Shopping (Incomplete)

Points: Two pictures. The left: in a stationery store, a white woman in pink sweater with her daughter in the arms, and the daughter with a pink bag on the back. The right: the daughter with the bag in the arms and pens in the hand standing in the stationery store alone.

(APEUni Website / App DI #552)

22. Recycling

Answer:

The following graph gives information about different types of recycling. The items include thermal recycling, chemical recycling, and material recycling. You can see from this graph that, in unrecycling, the value is around one point eighty–five million tons. You can see from this graph that, in material recycling, the value is around two million tons, which is higher. You can see from this graph that, in thermal recycling, the value is around five point two million tons, which is the highest. You can also see from this graph that, in chemical recycling, the value is around zero point thirty–eight million tons, which is the lowest. In conclusion, this graph is very informative.

(APEUni Website / App DI #551)

23. Renewable Energy

Answer:

The following graph gives information about renewable energy. The items include heating and cooling, transport and power. You can see from this graph that there are two thermometers in heating and cooling, which is fifty–one percent with ten percent renewable energy in it. You can see from this graph that there are a ship and a plane in transport, which is thirty–two with three percent renewable energy in it. You can see from this graph that there is a plug in power, which is seventeen with twenty–six renewable energy in it. You can see from this graph that there is an arrow below power, which means an increase of the share of renewable energy. It's a beautiful picture and it shows a lot of things. In conclusion, this graph is very informative.

(APEUni Website / App DI #550)

24. Internet Users

Internet users who accessed via a mobile phone, GB, 2011

Answer:

The following graph gives information about internet users who accessed via mobile phone. The items include sixteen to twenty-four, fifty-five to sixty-four, and sixty-five plus. You can see from this graph that, in forty-five to fifty-four, the value is around thirty-two percent. You can see from this graph that, in thirty-five to forty-four, the value is around fifty, which is higher. You can see from this graph that, in sixteen to twenty-four, the value is around seventy percent, which is the highest. You can also see from this graph that, in sixty-five plus, the value is around eight percent, which is the lowest. In conclusion, this graph is very informative.

(APEUni Website / App DI #549)

25. Age group (Incomplete)

Points: age group line chart. 0-14, 14-65, 65+, 2050 population

(APEUni Website / App DI #400)

26. Ship Lock

Answer:

The following graph gives information about how a ship lock works. It shows how the process is done. The items include a ship lock, a ship, dams, and pipes under the bottom. You can see from this graph that the first step is that the upstream gate opens and the ship goes into the lock. You can see from this graph that the second step is that the upstream gate closes and the water level evens. You can see from this graph that the third step is that the downstream gate opens and the ship moves out of the

lock. In conclusion, this graph is very informative.
 (APEUni Website / App DI #548)

27. Historic Gardens

Answer:

The following graph gives information about historic garden noticeboard. The items include icons, characters and background. You can see from this graph that there is a notice board, which is saying 'please respect and enjoy these historic gardens' with black characters. You can see from this graph that there is a notice board, which has three red icons and one green icon on it. You can see from this graph that there are forbidden icons, which say 'no cycling', 'no drinking' and 'no football'. You can see from this graph that there is a permitted activity on the board, which is a guide dog. It's a beautiful picture and it shows a lot of things. In conclusion, this graph is very informative.
 (APEUni Website / App DI #543)

28. Mosquito Life Cycle

Answer:

The following graph gives information about the mosquito life cycle. It shows how the process is done. The items include adult, eggs, larva and pupa. You can see from this graph that the first step is the adult laying eggs into water. You can see from this graph that the second step is eggs developing as the larva below the water surface. You can see from this graph that the third step is the larva developing as the pupa. You can see from this graph that the next step is the adult emerging on the water surface.

The final step is a new fully developed adult flying out of water. In conclusion, this graph is very informative.

(APEUni Website / App DI #372)

29. Ice Thickness

Answer:

The following graph gives information about minimal ice thickness guidelines. The items include an adult, a kid, a car and a truck. You can see from this graph that, in the kid, the value of ice thickness is around four inches. You can see from this graph that, in the sled, the value of ice thickness is around five to seven inches, which is higher. You can see from this graph that, in the green truck, the value of ice thickness is around twelve to fifteen inches, which is the highest. You can also see from this graph that, in the adult, the value of ice thickness is around zero, which is the lowest. In conclusion, this graph is very informative.

(APEUni Website / App DI #542)

30. Laboratory

Answer:

The following graph gives information about a chemistry laboratory. The items include a male teacher, three female students and laboratory apparatus. You can see from this graph that there is a female student, who is on the right side and wearing a blue glove on the hand. You can see from this graph that there is a male teacher, who is smiling and has black hair. You can see from this graph that there are

some iron supports, which are standing in front of these people. You can see from this graph that there is some liquid, which is red and in the glass laboratory apparatus. You can see from this graph that there are four persons in total, who all have white lab-gowns on and wear spectacles. It's a beautiful picture and it shows a lot of things. In conclusion, this graph is very informative.
(APEUni Website / App DI #532)

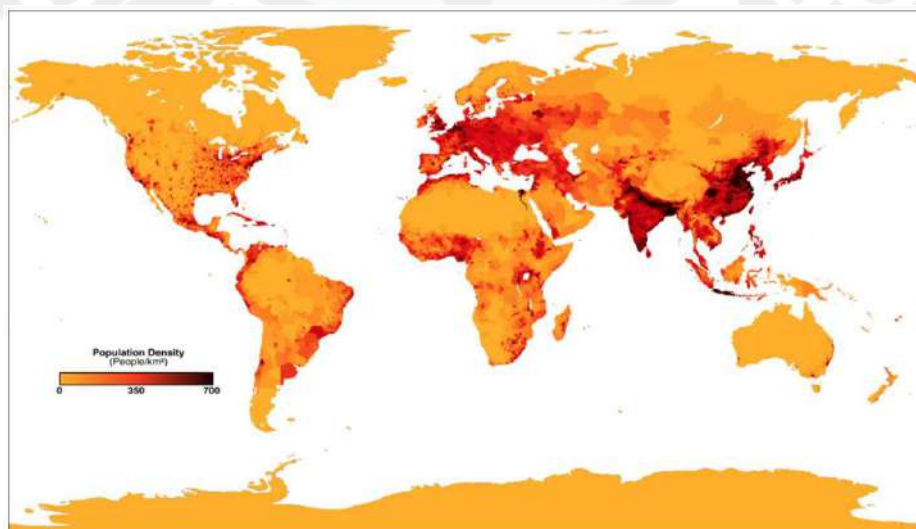

31. Disadvantaged Backgrounds of Students

Answer:

The following graph gives information about percentage of students from disadvantaged backgrounds entering university in England. The items include years and student percentages. You can see from this graph that the value of two thousand and seven is around twelve percent. You can see from this graph that the value of two thousand and eight is around thirteen percent, which is higher. You can see from this graph that the value of twenty fourteen is around eighteen, which is the highest. You can see from this graph that the value of two thousand and six is around eleven percent, which is the lowest. In conclusion, this graph is very informative.
(APEUni Website / App DI #526)

32. World Population Density (B)

Answer:

The following graph gives information about world population density. The items include Asia, Africa, America and Europe. You can see from this graph that the values of central Europe and some eastern

areas of the United States are around 350 people per square kilometer. You can see from this graph that the values of coastal areas of north Africa, southeast Asia and Turkey are around 400, which are higher. You can see from this graph that the values of eastern China and India are around 700 people per square kilometer, which is the highest. You can see from this graph that the values of Antarctic, northern Russia and the inland area of Australia are around 0, which is the lowest. In conclusion, this graph is very informative.

(APEUni Website / App DI #505)

33. Dining Table

Answer:

The following graph gives information about people at dining table. The items include tableware, table and food. You can see from this graph that there is a brown table, which is made of wood and surrounded by adults and babies. You can see from this graph that there is a lot of tableware on the table, which includes forks and knives. You can see from this graph that there are some drinks, which are water, orange juice and wine. You can see from this graph that there is some salad in a glass bowl, which is in the middle of the table. It's a beautiful picture and it shows a lot of things. In conclusion, this graph is very informative.

(APEUni Website / App DI #504)

34. Wash Your Hands

Answer:

The following graph gives information about the way hands are washed. It shows how the process is done. The items include 'rub fingertips', 'rub palms with fingers interlaced', and 'rinse with water', and so on. You can see from this graph that the first step is to wet the hands. You can see from this graph that the second step is to take liquid soap. You can see from this graph that the third step is to rub hands to lather. You can see from this graph that the next step is to rub hand backs. You can see from this graph that the next step is to rub thumbs. The final step is to rinse well with running water. In conclusion, this graph is very informative.

(APEUni Website / App DI #503)

35. Personal Protection

Answer:

The following graph gives information about personal protection. The items include a worker, helmets and rubber boots. You can see from this graph that there is a worker wearing a yellow helmet and a pair of brown gloves, who is standing in the middle of the graph. You can see from this graph that there is a pair of goggles on the face of the worker, which protects his eyes. You can see from this graph that there is a pair of earplugs worn by the worker, which protects his ears. You can see from this graph that there is a blue T-shirt worn by the worker, which is under the yellow overall. You can see from this graph that there is a pair of rubber boots worn by the worker, which protects his feet. It's a beautiful picture and it shows a lot of things. In conclusion, this graph is very informative.

(APEUni Website / App DI #493)

36. Fruits and Vegetables Market

**Answer:**

The following graph gives information about a fruit and vegetable Market. The items include market stalls, products, traders and customers. You can see from this graph that there are bunches of bananas, which are yellow and piled next to green grapes on the stall. You can see from this graph that there is a woman standing in front of the stall, who is buying some green vegetables, with a black plastic bag on the left arm. You can see from this graph that there are many basins, which are red and blue, and put on the electronic balances. It's a beautiful picture and it shows a lot of things. In conclusion, this graph is very informative.

(APEUni Website / App DI #466)

37. Coffee House**Answer:**

The following graph gives information about a coffee house. The items include sale clerks, customers and the counter. You can see from this graph that there is a coffee house, which is bright with sunshine through big windows. You can see from this graph that there is a female sales clerk in white and black, who is smiling and taking a customer's order on an Ipad. You can see from this graph that there is a male customer, who is wearing glasses with black rims and a blue T-shirt. You can see from this graph that there are some coffee facilities including cabinets and coffee makers, which are behind the sale clerks. It's a beautiful picture and it shows a lot of things. In conclusion, this graph is very informative.

(APEUni Website / App DI #464)

38. Music Revenues

Answer:

The following line chart gives information about music revenues by dollars from 1977 to 2017. According to the line chart, the blue area means the physical revenue, which drops from sixteen billion in nineteen seventy eight to nine billion in nineteen eighty two, before reaching the highest point, twenty two billion in two thousand. Then the green area means the digital revenue, which rises from zero in two thousand and five to seven billion in twenty seventeen. In conclusion, we can find the physical revenue is always higher than the digital revenue. The following graph gives information about music revenues by dollars from 1977 to 2017. The items include physical revenue in blue and digital revenue in green. You can see from this graph that, in physical revenue, the value of nineteen seventy eight is around sixteen billion. You can see from this graph that, in physical revenue, the value of two thousand is around twenty two billion, which is higher. You can see from this graph that, in digital revenue, the value of two thousand and five is around zero, which is the lowest. You can see from this graph that, in digital revenue, the value of twenty seventeen is around seven billion, which is the highest. In conclusion, this graph is very informative.

(APEUni Website / App DI #252)

39. Upper Arms (B)

Answer:

The following graph gives information about different species' upper limbs. The items include human

arm, seal limb, bird wing, and bat wing. You can see from this graph that, in human, hand, wrist and fingers are smaller than those in seal limb. You can see from this graph that, in bird wing, radius and ulna are thin and short. You can see from this graph that, in bat wing, humerus is thinner than that in seal limb. You can see from this graph that, in bat wing, there is a wing membrane connecting fingers. In conclusion, this graph is very informative.

(APEUni Website / App DI #461)

40. Grape Fruits

Answer:

The following graph gives information about how the fruits grapes come to customers. According to the graph, the first step is purple grapes ripening on the vine, followed by the second step, in which the grapes are loaded onto a truck and transported. After that, the third step is the grapes conveyed on a conveyer belt, followed by the fourth step, in which the grapes are stowed into a brown paper box as its package. The final step is the grapes loaded in a cart, which means the grapes reach customers. In conclusion, this graph is very informative.

(APEUni Website / App DI #449)

41. South American Rainforest

Answer:

The following graph gives information about the rain forest distribution in South America. According to this graph, the largest part of rain forest is in Brazil, Bolivia, Peru, Colombia, Suriname, which is tropical

rain forest, coloured with light green. We can also see a narrow, long stretch of tropical rain forest lying along the eastern coast of South America, next to Atlantic Ocean. And another stretch is located along the northwest coast of South America, next to Pacific Ocean. We see temperate rain forests in Chile, the southmost area of South America, coloured with dark green. In conclusion, this is an informative map. (APEUni Website / App DI #448)

42. Formation of Iceberg

Answer:

The following graph gives information about the formation of iceberg. The steps is snow, which comes down from the sky. The second step is snow turning into ice sheet on the bedrock, which is coloured brown. According to this graph, the third the ice sheet continuing to stretch beyond the ground line into the sea, which means the formation of ice shelf. The fourth step is the ice shelf melting with warm ocean water. The final step is small part of the ice shelf coming off and iceberg coming into being. In conclusion, this graph is very informative. (APEUni Website / App DI #444)

43. UK Income by Age&Gender

Answer:

The following line chart gives information of median pre-tax income by age and gender in the UK. According to the graph we can see three lines, in which the blue one is male, the red one both, and the green one female. We can see male rises from 12 thousand at under 20, reaches the highest point of 30

thousand at 45 to 49, and falls to the lowest point of 18 thousand at 70 to 74. We can also see female rises from 11 thousand, reaches the highest point of 21 thousand at 30 to 34, and falls to the lowest point of 15 thousand at and over. Finally both reaches the highest point of 25 thousand at 35 to 39, and falls to the lowest point of 17 thousand at and over. In conclusion female is the lower than both, with both lower than male.

(APEUni Website / App DI #432)

44. Product Life Cycle

Answer:

This line chart gives the information about product life cycle, in which sales vary in different periods of time. There are four phases in the line chart, which are intro, growth, maturity and decline. In intro, sales rise from zero, followed by growth, in which sales keep rising. In maturity, sales reach the highest point, and then in decline, sales begin to drop gradually. In conclusion, this line chart gives very thorough information about product life cycle.

(APEUni Website / App DI #430)

45. Computer Then and Now

Answer:

This picture gives a comparison between computer then and now. In the left half, there is a primitive computer with a black and white screen, a green keyboard, and a black panel, which is very cumbersome and can only be placed on the ground. In the right half, there is a modern computer with a blue screen, a

black keyboard and a black mouse, which is light-weight and is also called desktop. In conclusion, this picture about computer then and now is very informative.

(APEUni Website / App DI #428)

46. Water Cycle

Answer:

The following graph gives information about water cycle in nature. It shows how the process is done. The steps include evaporation, transportation, precipitation and surface run-off. According to this graph, the first step is evaporation in the sun, with water forming clouds into the sky from the blue sea. The second step is clouds' transportation into the sky above green and grey mountains, followed by the third step of precipitation, in which water forms surface run-offs. The final step is surface run-offs going to the sea. In conclusion, this graph is very informative.

(APEUni Website / App DI #423)

47. Germination

Answer:

This picture gives information about the process of germination. In the first step, a seed is buried in the soil, before it develops its green embryo in the second step. In the third step, the seed coat begins to peel off and the black root begins to grow. After that, the light green cotyledon can be seen and the seed rises from the soil. Finally, the dark green foliage leaves grow. In conclusion, this picture tells how a seed grows.

(APEUni Website / App DI #421)

48. Penguin

Answer:

The following graph gives information about heights of penguins. According to this graph, emperor is the tallest, which is about 1.2 meters tall. After that, the second tallest penguin is king, which is about 1 meter. The third tallest penguin is gentoo, then chinstrap and macaroni. The smallest penguin is adélie, which is less than 0.7 meter tall. In conclusion, this graph compares the heights of several kinds of penguin.

(APEUni Website / App DI #409)

49. Journeys in the UK

Answer:

The following graph gives information about journeys made in the UK in 2006 according to their purpose. The items include walking, education, shopping, personal business, school run, day trip, sport, entertainment, and commuting. According to this graph, in walking, the value of men and women are around 4%. You can see from this graph that the highest value of women is in shopping, which is 23%, and the highest value of men is in commuting and business, which is 23%. In conclusion, men and women have the lowest value in holiday and day trip, which around 3%.

(APEUni Website / App DI #407)

50. Number of Texts

Adults vs. Teens: Number of texts on a typical day

Based on cell phone users who text

Answer:

The following graph gives information about adults versus teens, number of texts on a typical day. The items include None, one to ten, eleven to twenty, twenty–one to fifty and one hundred and one plus. You can see from this graph that, in None, the value of adults is around 9%. You can see from this graph that, in None, the value of teens is around 2%, which is lowest. You can see from this graph that, in one to ten, the value of adults is around 51%, which is the highest. You can see from this graph that, in eleven to twenty, the value of teens is around 11%, which is the second lowest. In conclusion, this graph is very informative.

(APEUni Website / App DI #397)

51. Auditorium

Answer:

The following graph gives information about an auditorium. This is a very beautiful picture, and it shows a number of things. According to this graph, there are seven columns of seats, which are red. Followed by that, there is a small dais standing in front of the seating area. You can see from this graph that the indoor lighting is very bright. You can also see from this graph that there is a big and white projection screen behind the dais. There are six windows in the walls. In conclusion, this graph is very informative.

(APEUni Website / App DI #394)

52. Commuting Time

Answer:

The following graph gives information about commuting time in different regions in Britain, 2014. The items include London, Yorkshire, South east, North west, and South west. According to this graph, in London, the value of the commuting time is around 107 minutes, which is the highest value. You can see from this graph that the second highest value of the commuting time is in East of England, which is 71. The lowest value of commuting time is in South west, which is around 56. In conclusion, London has the highest value of commuting time.

(APEUni Website / App DI #350)

53. China Age Group

Answer:

The following graph gives information about age group in China. The items include male, female, age group, and the population. According to this graph, in male, the population of age from 20 to 24 is around 52 million, and that of age from 0 to 4 is lower, which is around 45 million. You can see from this graph that the highest population of age from 80 to 84 is in female, which is around 10 million. You can also see from this graph that the lowest population of age from 90 to 94 is in male, which is around 0.5 million. In conclusion, this graph is very informative.

(APEUni Website / App DI #338)

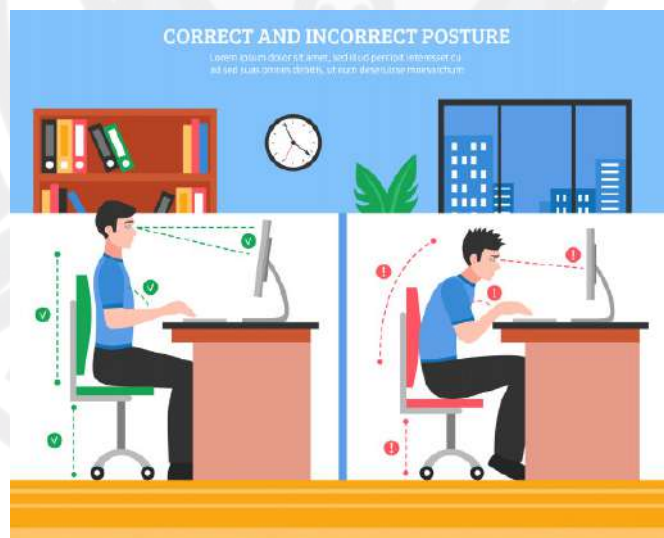

54. Tomato Life Cycle

Answer:

The following graph gives information about how a tomato seed can become a tomato plant. It shows how the process is done. The steps include tomato seed, a young plant, a mature plant, a flower, and a fruit. According to this graph, the first step is tomato seed, which is in a tomato fruit cut in half. According to this graph, the second step is to become a young tomato plant, which is green. You can see from this graph that the third step a mature tomato plant with green leaves rooted in brown soil, followed by a flower as the fourth step. The final step is a red fruit that comes out of the flower, and the cycle will start over. In conclusion, this graph is very informative. (APEUni Website / App DI #337)

55. Sitting Posture

Answer:

This picture gives information about correct and incorrect posture; It is a very interesting picture, because it shows a number of things; (According to the picture, at the top area, I can see there is a clock and a bookshelf, also I can see the window and the sky is dark blue.) According to the picture, at the left area, there is a man sitting on the chair, he sits very straight and his eyes are looking at the computer screen, and his hands placed naturally on the keyboard; According to the picture, at the right area, the man is sitting on the chair and his back is hunched [hant ǝ t]弯腰驼背bend over; (and his hands placed too close to the table) In conclusion, this picture is very informative (because it gives information about correct and incorrect posture;) (APEUni Website / App DI #315)

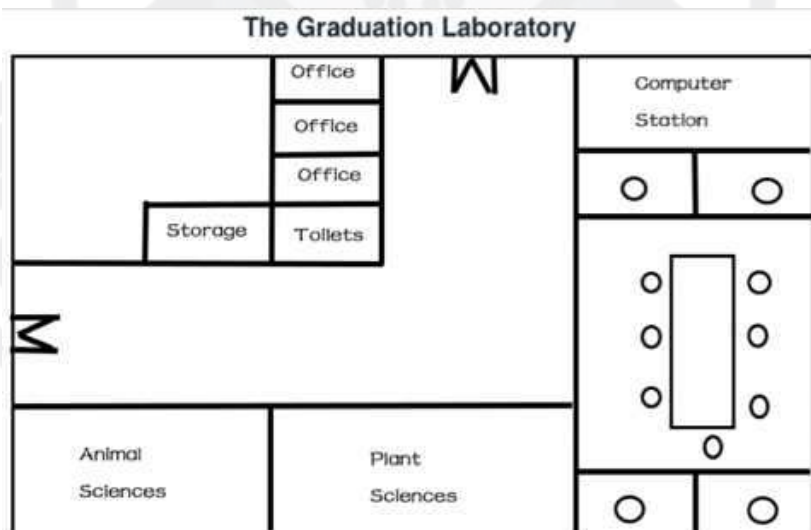

56. Palm Oil Production

Answer:

The following line chart gives information about palm oil production of Indonesia and Malaysia. According to the line chart, we can see the red line of Indonesia rises from the lowest point, about 5 million tons in 1997/1998, to the highest point, about 18 million tons in 2007/2008. We can also see the blue line of Malaysia rises from the lowest point, about 8.5 million tons in 1997/1998, to the highest point, about 16 million tons in 2007/2008. And Malaysia is always higher than Indonesia until 2005/2006. After that, Indonesia is higher than Malaysia. In conclusion, this chart is very informative. (APEUni Website / App DI #308)

57. Laboratory Plan

Answer:

The following graph gives information about the graduation laboratory. Data of different areas are displayed on the map. At the central area, there are storage and toilets. At the left area, there are animal sciences. According to this graph, the largest area is plant sciences. In comparison, the smallest area is office. In conclusion, there are computer station and meeting room shown on the map. (APEUni Website / App DI #301)

58. Temperature and Precipitation

Answer:

The following graph gives information about the monthly temperature and precipitation. The data on precipitation and temperature are displayed. According to this graph, the highest value is the temperature of 70 degree, which is in July. On the contrary, the lowest value is the temperature of 20 degree, which is in January. You can see from this graph that the largest proportion is precipitation of 5 inch, which is in June. You can also see from this graph that the smallest proportion is precipitation of 1 inch, which is in February. In conclusion, June has the highest number of precipitation. (APEUni Website / App DI #286)

59. Teaching Career

Teaching as a career	
Final year students who want to be a teacher	1%
Graduate students working in teaching	7%
Employed in teaching field	95%

Answer:

The following graph gives information about teaching as a career. The items include final year student who wants to be a teacher, graduate students working in teaching, employed in the teaching field. According to this graph, the value of final year students who want to be a teacher is around 1%. And the value of graduate students working in teaching is around 7%, which is higher. You can see from this graph that the highest value is in employed in the teaching field, which is around 95%. You can also see from this graph that the lowest value is in final year students who want to be a teacher, which is around 1%. In conclusion, employed in the teaching field has the highest teaching as a career. (APEUni Website / App DI #209)

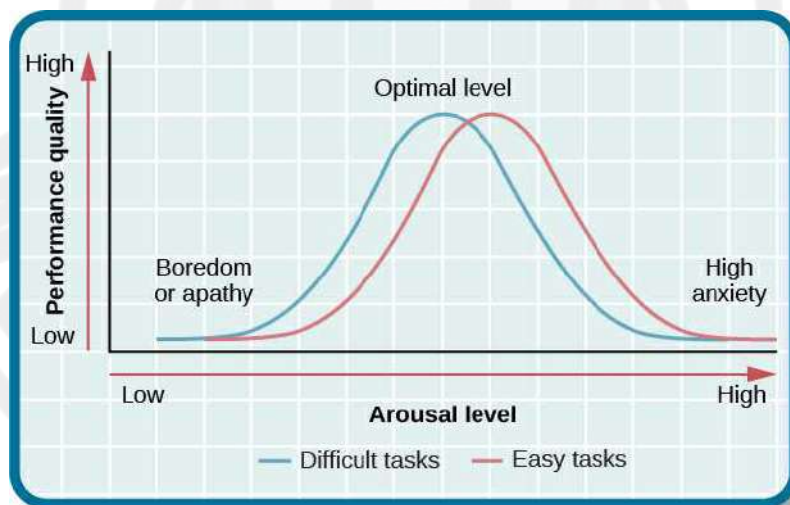

60. World Population Development

Answer:

The following graph gives information about world population development from 1750 to 2050 in developing and industrialized countries. From the graph we can see that the population in developing countries has remained stable in 1 billion from 1750 to 1900, after that it witnessed a dramatic increase to 10 billion until 2050. However, for industrialized countries, it remained at a relatively low level throughout the years, which is around 1 billion. In conclusion, while developing countries have undergone a sharp population increase, the population in industrialized countries has seen little change. (APEUni Website / App DI #79)

61. Arousal Level

Answer:

The following graph gives information about the relationship between arousal level and performance quality. The blue line represents the difficult tasks, and the red line represents the easy tasks. It is clear that when the arousal level and performance quality start at a low level, boredom or apathy. Then difficult tasks reach the highest point called the optimal level earlier than easy tasks. After that the two lines drop to the lowest point called high anxiety. In conclusion, this graph is very informative. (APEUni Website / App DI #110)

62. Australian Population Density 1

Answer:

The following graph gives information about the Australian population density. Data of different areas are displayed on the map, based on statistical local area boundaries, with one dot equal to one thousand people. According to this graph, the most densely populated cities are Sydney, Canberra and Melbourne which are located in southeast coast, followed by eastern Australia’s Brisbane, southern Australia’s Adelaide, Hobart, western Australia’s Perth, northern Australia’s Darwin. In comparison, the most sparsely populated areas are the vast outback in the middle of the continent. In conclusion, the most highly populated areas are in the southeast coast.

(APEUni Website / App DI #33)

63. Projected Population

Answer:

The line chart shows the projected population in Australia in millions. According to the chart, the series A has increased dramatically from 20 in 2001 to 65 in 2101. Following that, series B has increased moderately from 20 to 45, from 2001 to 2101. However, series C has increased slowly from 20 to 35 over the same period. In conclusion, the projected population in Australia is expected to increase in the coming years.

(APEUni Website / App DI #533)

64. Household Energy

The Average Household Energy Consumption

Answer:

The following graph gives information about the average household energy consumption. The items include other appliances, water heating, cooking and so on. According to this graph, the proportion of other appliances is around 24%, and that of water heating is lower, which is around 23%. You can see from this graph that the highest proportion is other appliances, which is around 24%. You can also see from this graph that the lowest proportion is cooking and stand by, which is around 5%. In conclusion, other appliances have the highest proportion of average household energy consumption. (APEUni Website / App DI #481)

65. Morocco Income

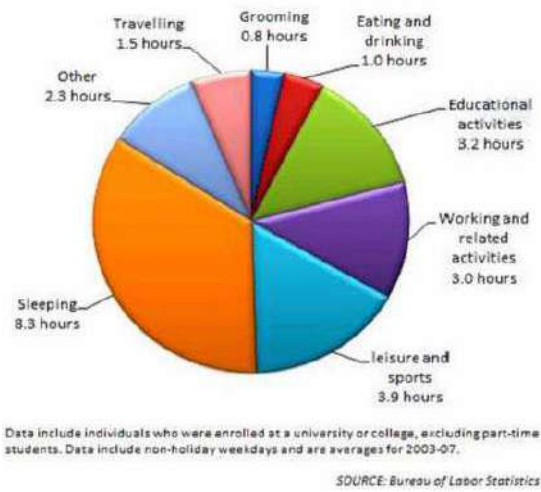

Morocco: Income from various economic sectors: 2003

Answer:

The following graph gives information about income from various economic sectors in 2003. The items include tourism, industry, and agriculture. According to this graph, the proportion of tourism is around 26%, and that of the industry is lower, which is around 24%. You can see from this graph that the highest proportion is tourism, which is around 26%. You can also see from this graph that the lowest proportion is agriculture, which is around 2%. In conclusion, tourism has the highest income from various economic sectors. (APEUni Website / App DI #474)

66. Hours Spent

Answer:

The following graph gives information about students’ hours spent at the University. The items include sleeping, leisure and sports, grooming and so on. According to this graph, the value of sleeping is around 8.3 hours, and that of leisure and sports is lower, which is around 3.9 hours. You can see from this graph that the highest value is sleeping, which is around 8.3 hours. You can also see from this graph that the lowest value is grooming, which is around 0.8 hours. In conclusion, sleeping has the highest number of students’ hours spent at university.
(APEUni Website / App DI #468)

67. Food Pyramid

Answer:

This picture shows the pyramid of food. At the bottom of the pyramid, we can see water, which is the most essential to human bodies. Above water, on the second layer of the pyramid, we can see fruits, bread, and cereals. Above the fruits, bread, and cereals., there is a milk, cheese and meat level. Above the milk products and meat, we can see junk food, which at the top of the pyramid. In conclusion, this graph is very informative.
(APEUni Website / App DI #538)

68. Apartment Plan 1

Answer:

The following graph gives information about the apartment plan. Data of different areas are displayed on the map. According to this graph, the house is 6.2 meters long and 3.8 meters wide. According to this graph, the bathroom is 2 meters long and 1.4 meters wide. You can see from this graph that the kitchen design is without doors. In conclusion, this graph is very informative.

(APEUni Website / App DI #540)

69. Educational Activities

Percent of university and college students who did educational activities, by hour of day on weekdays

Answer:

This picture gives information about percent of university and college students who did educational activities, by the hour of the day on weekdays from 12 am to 11 pm. According to the picture, for full-time students in blue, the largest figure can be found at around 12 pm, which is around 36%, and the smallest figure can be found at around 3 am which is around 0. For part-time students in green, the largest and smallest figure can be found at 10 am and 3 am respectively, which is 20% and 0 respectively. In conclusion, no one is studying at 3 am.

(APEUni Website / App DI #434)

70. Cell Phone Use in Anytowne

Answer:

The following graph gives information about cell phone use in Anytown. The items include men, women, and the year. The horizontal axis is the year, ranging from 1996 to 2002. According to this graph, in 1996, the value of both sexes is around 3000, and that of men is lower, which is around 1500. According to this graph, the highest value of both sexes is around 3500, which is in 2002. According to this graph, the lowest value of women is around 1500, which is in 2000. In conclusion, this graph is very informative. (APEUni Website / App DI #416)

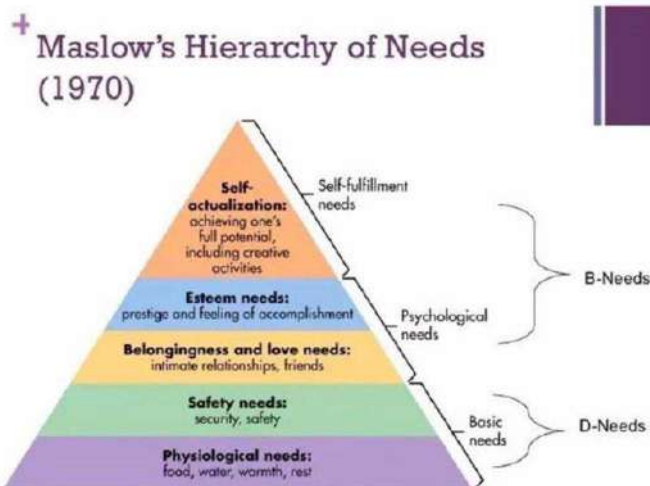

71. Overseas Visitors

Answer:

This line graph contains information about overseas visitors to three different areas including the coast, the mountains, and the lakes, in a European country between 1987 and 2007, measured in thousands of people. The coast, which is represented in blue, starts at 40 thousand people in 1987 and concludes at a maximum of about 70 thousand people in 2007. The minimum occurs in 1992 at about 35 thousand people. The lakes are represented in green and it starts at 10 thousand people in 1987, after which it increases very rapidly to a maximum of 75 thousand people in 2002. It concludes at 50 thousand people in 2007. In conclusion, this graph shows significant information. (APEUni Website / App DI #415)

72. Maslow's Hierarchy

Answer:

The pyramid shows Maslow’s pyramid with different levels of needs. From the top to the bottom; we can see there are 5 kinds of needs, which are self–actualization, esteem needs, belongingness and love needs, safety needs, and physiological needs. Specifically, safety needs include security and safety and belongingness and love needs include intimate relationships and friends. Apart from that, we can also see from the right–hand side that the needs can be divided into three categories, self–fulfillment needs, psychological needs, and basic needs. In conclusion, Maslow’s needs demonstrate that the people’s needs are gradually growing from lower level to higher level.

(APEUni Website / App DI #410)

73. Chemical Lab

Answer:

The picture gives information about the chemical experiment. As we can see from the picture, on the left hand, there is a bottle with blue liquid in it, also there is some chemical equipment which allows the students to do the experiment. In the right of the picture, the man is monitoring the chemical experiment. .Also we can notice that the students are wearing protective glasses and there are big windows behind them. In conclusion, the picture shows how a chemical class can be conducted.

(APEUni Website / App DI #408)

74. Wind Machine

Answer:

The picture describes the wind machine. As can be seen from the graph, the wind machine is rotating counter-clockwise and the rotation used the power of wind blades. We can also see that the advantage of this wind machine is its no pollution and the disadvantaged part is its dependence on wind power. In conclusion, the picture shows a vivid description of the wind machine.

(APEUni Website / App DI #406)

75. Diameter of Planets

Answer:

The graph gives information about the diameter from the earth for different planets. As we can see the largest is taken up by Jupiter, which is 150000 km away. After that Saturn has occupied the second largest, this is 120000 km away. Following that, Neptune and Uranus have a similar diameter, which is 50000 km away. However, Pluto has the smallest which is only 1 km. In conclusion, different planets have different diameters from the earth.

(APEUni Website / App DI #405)

76. 100% Health

Answer:

The following graph gives information about 100% health. It shows how the process is done. The steps include food&nutrition, fitness&exercise, relaxation&stress management. According to this graph, the first step is through food&nutrition to achieve health and wellbeing. According to this graph, the second step is through fitness&exerciese to make a positive change. The final step is through relaxation&stress management to achieve motivation. In conclusion, the process will repeat. (APEUni Website / App DI #390)

77. Gnat Life Cycle

Answer:

The following graph gives information about fungus gnat lifecycle is about 28 days. It shows how the process is done. The steps include eggs, larva, pupa, and adult. According to this graph, the first step is eggs. According to this graph, the second step is from eggs to larva in 4–6 days. You can see from this graph that the third step is from larva to pupa in 12 – 14 days. You can also see from this graph that the next step is from pupa to adult in 3 – 6 days. The final step is from adult to eggs in 7–10 days. In conclusion, the process will repeat. (APEUni Website / App DI #389)

78. Temperature&CO2

Answer:

The graph shows the temperature and CO2 for the last 400000 years. As we can see from the graph, for temperature, the highest one can be found in 5 in every 100 thousand years. Moreover, the lowest one can be found in minus 15 in the same interval. In addition, for the carbon dioxide level, it is range from 200 to 300. Most important, the highest CO2 level can be found at present, which is nearly 400. In conclusion, the CO2 level and temperature follow a similar pattern. (APEUni Website / App DI #388)

79. Past Transport

Answer:

The graph shows the major transportation modes in the past from 1500 to 2000. As we can see from the graph, from 1500 to 1850, the transportation relies on horses carriage and bicycle, etc with the average speed is 15mph. After 1850, people traveled by locomotive in average speed at 75mph, followed by automobile become the major transportation in modern society. In conclusion, 500 years time experience the changes in major transportation modes. (APEUni Website / App DI #387)

80. Length of Fish

Answer:

The following graph gives information about the length of fish. The items include 1 year, 3 years, 8 years and more than 15 years. According to this graph, in 1 year, the length of fish is around 16cm. and that of 3 years is longer, which is around 20cm. You can see from this graph that the highest length of fish is in more than 15 years, which is around 50cm You can also see from this graph that the second biggest length of fish is in 8 years, around 30cm. In conclusion, this graph is very informative. (APEUni Website / App DI #371)

81. Not Attending School

Answer:

The following graph gives information about reasons for no longer attending school. The items include male and female. The data of the completed study, obtained employment, illness and so on are displayed. According to this graph, for the female, the highest value is the completed study, which is 65%. On the contrary, the lowest value is illness, which is 5%. For the male, you can see from this graph that the largest proportion is 60%. You can also see from this graph that the smallest proportion is 3%. In conclusion, the completed study is the most popular reasons for both male and female. (APEUni Website / App DI #352)

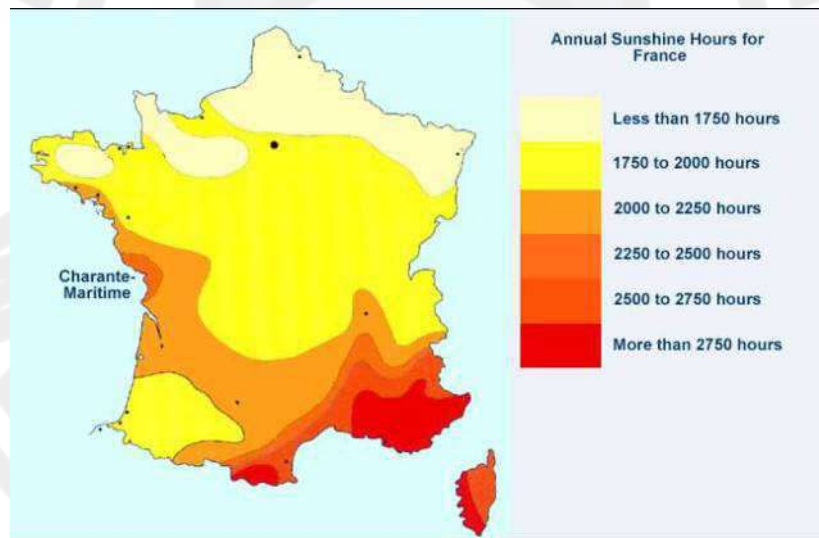

82. homologies of structure

Answer:

The picture gives information about different arm bones. As we can see from the picture, the human has the largest upper arm bone. Following that, birds and bats have the longest lower arm bone and they are almost the similar length. After that the bats have the longest metacarpals, however, the seal limb has the longest fingers. In conclusion, different body structure has different kinds of bones. (APEUni Website / App DI #348)

83. Sunshine Hours in France

Answer:

The map shows us the annual sunshine hours for France. According to the map, more than 2750 hours, which is represented by dark red, is located in the southeastern part of France. After that, 2250–2750 hours, which is represented by orange, is located in the southern part of France. Noticeably, the 1750 – 2000 hours, which is represented by yellow, is located in the middle and the majority areas of France. However, less than 1750 hours can only be found in the northern part of France. In conclusion, France has relatively long hours of annual sunshine hours generally. (APEUni Website / App DI #347)

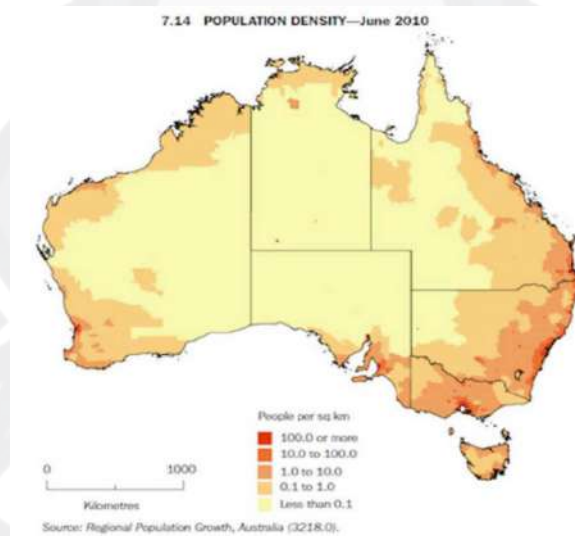

84. London Street View

Answer:

The following graph gives information about London’s Fleet Street Then and Today. This is a very beautiful picture, and it shows a number of things. According to this graph, in the central area, there is a carriage; the colour of it is black. You can see from this graph that, in the right area, there is a bus; the colour of it is red. You can see from this graph that, in the background, there is a temple, the colour of it is white. The weather is sunny. The sky is blue and clear. In conclusion, this picture is very informative. (APEUni Website / App DI #346)

85. Australian Population Density

Answer:

The following graph gives information about Australian Population Density. Data of different areas are displayed on the map. According to this graph, Melbourne and Sydney are the most populated city in Australia. In comparison, the smallest population is in the middle of Australia. You can see from this graph that Queensland will become the third largest populated city in Australia. In conclusion, this graph is very informative. (APEUni Website / App DI #336)

86. Iron Age Hut

the iron age hut

Answer:

The following graph gives information of the iron age hut. According to this graph, this is a cross section of an ancient hut, which is triangular in shape. In the middle of the graph, you can see a pillar supporting the sloping rafters. And the roofs are covered by reed thatch. In the hut, you can see ashes and seats below the ground level. On the ground level, you can see the turf wall. In conclusion, this graph is very informative.

(APEUni Website / App DI #334)

87. The Eatwell Plate

Answer:

The following graph gives information about the proportion of the Eatwell plate. The items include fruit and vegetables, bread&rice, food&drinks and so on. According to this graph, the proportion of fruit and vegetables is around 35%, and that of milk and dairy food is lower, which is around 18%. You can see from this graph that the highest proportion is fruit and vegetables, which is around 35%. You can also see from this graph that the lowest proportion is food and drinks high in fat/sugar, which is around 8%. In conclusion, fruit and vegetables have the highest proportion of the Eatwell plate.

(APEUni Website / App DI #331)

88. Music Download

Answer:

The following graph gives information about how to download music from Tesco Extra. It shows how the process is done. The steps include search, purchase, download and play. According to this graph, the first step is to search for the music you like online. According to this graph, the second step is to purchase it through the website. You can see from this graph that the third step is to download the music on digital devices, such as laptops and phones. The final step is to enjoy the songs after finishing all these steps. In conclusion, the process will repeat.

(APEUni Website / App DI #324)

89. Temperature&Precipitation

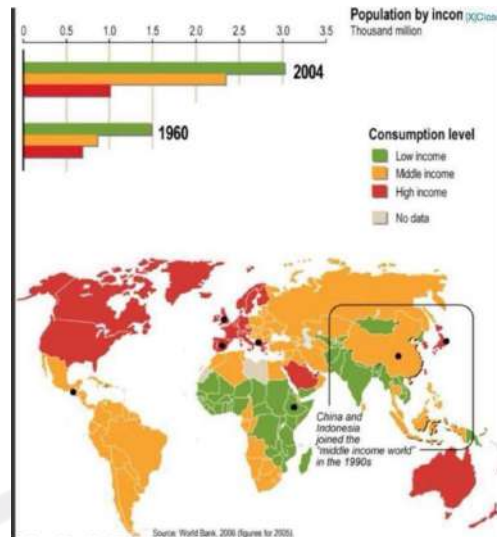

Answer:

This graph presents the relationship between temperature and precipitation throughout the year from January to December. The temperature is represented in an orange line and measured in degree Celsius. It starts at about 26°C in January and gradually increases. A maximum is reached in October at about 20°C. It concludes at about 4°C in December. The precipitation is represented in blue bars and measured in mm. The maximum occurs in May at 110mm, and the minimum occurs in February at about 70mm. In conclusion, this graph gives very detailed information.

(APEUni Website / App DI #322)

90. Population&Consumption

Answer:

The following graph gives information about the population and consumption level worldwide. You can see from this graph that the value of middle income in 2004 is 2.3 thousand million, including Russia and Mexico. You can see from this graph that the value of high income in 1960 is 0.7 thousand million, including the United States and Japan, which is the lowest. You can see from this graph that the value of low income in 2004 is 3 thousand million, including India, which is the highest. You can see from this graph that China and Indonesia joined the middle income world in 1990s. In conclusion, this graph is very informative.

(APEUni Website / App DI #321)

91. Social Media Impact

Answer:

The following graph gives information about social media impact. The items include followers, advocates, and donors. According to this graph, in 2008, the value of followers is around 180. and that of 2009 is higher, which is around 200. You can see from this graph that the highest value of advocates is in 2013, which is around 800. You can also see from this graph that the highest value of donors is in 2013, which is around 600. In conclusion, this graph is very informative.

(APEUni Website / App DI #272)

92. Poverty Rate

Answer:

The following graph gives information about poverty rates by age and by gender in 2012, measured in percentage. In the age group of 65 and older, the poverty rate of the female is 11% while that of the male is 6.6%. In the age group of 18 to 64, the poverty rate of the female is 15.4% and that of the male is 11.9%. In the age group under 18, the poverty rate is much higher than other groups, with female 22.3% and male 21.3%. This graph is sourced from the US Census Bureau, current population Survey, 2013 Annual Social and Economic Supplement. In conclusion, this graph gives very thorough information. (APEUni Website / App DI #195)

93. Pupil/Teacher Ratio

Answer:

The following graph gives information about the ratio between pupil and teacher in primary schools in January of 1997, measured in percentage. It can be seen that only 2% of the schools have a ratio of less than 16, and only 1% have a ratio of 16. Then the percentage gradually increases as the pupil-teacher ratio increases. A maximum occurs when the pupil-teacher ratio is 24. 14% of the schools have this ratio. After that, as the ratio increases, the percentage decreases and concludes at about 6% when the ratio is over 27. In conclusion, this graph shows very impressive information. (APEUni Website / App DI #174)

94. World Water

Answer:

The following graph gives information about the world's water distribution. It can be seen that 97.5% of the world's water is salt water and only 2.5% is freshwater. In the freshwater sector, glaciers and permanent snow occupy the largest proportion at 68.7%, followed by which groundwater occupies 30.06% of the fresh water. Ground ice and permafrost takes 0.86% of fresh water and other resources take 1.22% of fresh water. In the other sector, lakes occupy the majority of the proportion at 0.26%. In conclusion, this image gives very thorough information about the world's water distribution. (APEUni Website / App DI #23)

95. Double Population

Answer:

The following graph gives information about the double population. The horizontal axis is years, ranging from 1700 to 2000. According to this graph, in 1715, the years to double is around 544, and that of 1804 is lower, which is around 304. According to this graph, the highest value of years to double is around 544, which is in 1700. According to this graph, the lowest value of years to double is around 47, which is in 1960. In conclusion, this graph is very informative. (APEUni Website / App DI #283)

96. Sunrise & Sunset

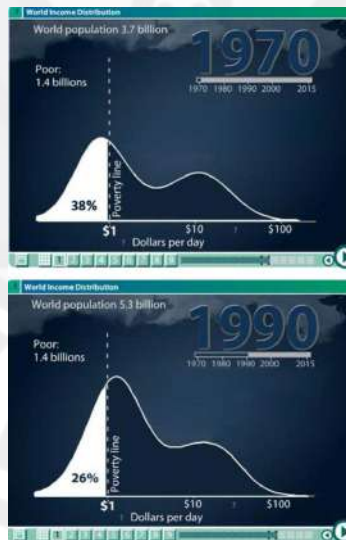

Answer:

This graph reveals the information about sunrise and sunset times over the year, recording the first days and the fifteenth days of the months from January to December. It is clear that the sunrise time represented in blue is early in January and December, and gradually becomes the latest in June. In contrast, the sunset time represented in pink is the latest in January and December, while it is the earliest in June. It can be observed that the times of the sunrise and sunset are exactly the opposite, and the shapes of the trends of both sunrise and sunset times show an “S” shape. In conclusion, this graph gives very interesting information about sunrise and sunset times.

(APEUni Website / App DI #276)

97. World Income Distribution

Answer:

The following line charts give information about world income distribution over the population. According to the upper line chart, in nineteen seventy the world population is three point seven billions, and those spending less than one dollar per day accounts for thirty–eight percent, one point four billions. We see in nineteen ninety the world population is five point three billions, and the poor to the left of the poverty line accounts for twenty–six percent, one point four billions. In conclusion, the poor decrease from nineteen seventy to nineteen ninety.

(APEUni Website / App DI #274)

98. Earning&Unemployment

Answer:

The following graph gives information about the earnings and unemployment rates by educational attainment. The items include doctor degree, professional degree, and master degree. According to this graph, in doctor degree, the value of the unemployment rate is around 2.5. and that of a professional degree is lower, which is around 2.1. You can see from this graph that the highest value of unemployment is in less than a high school diploma, which is 12.4. You can also see from this graph that the highest value of median weekly earnings is 1735, which is on a professional degree. In conclusion, this graph is very informative.

(APEUni Website / App DI #270)

99. Pet Expenditure

Answer:

The following graph gives information about the proportion of pet expenditure in the US. The items include vet care and wellbeing, food and litter, pet purchase and so on. According to this graph, the proportion of vet care and wellbeing is around 47%, and that of food and litter is lower, which is around 41%. You can see from this graph that the highest proportion is vet care and wellbeing, which is around 47%. You can also see from this graph that the lowest proportion is the pet purchase, which is around 2%. In conclusion, vet care and wellbeing have the highest proportion of pet expenditure in the US.

(APEUni Website / App DI #403)

100. Egypt Trading

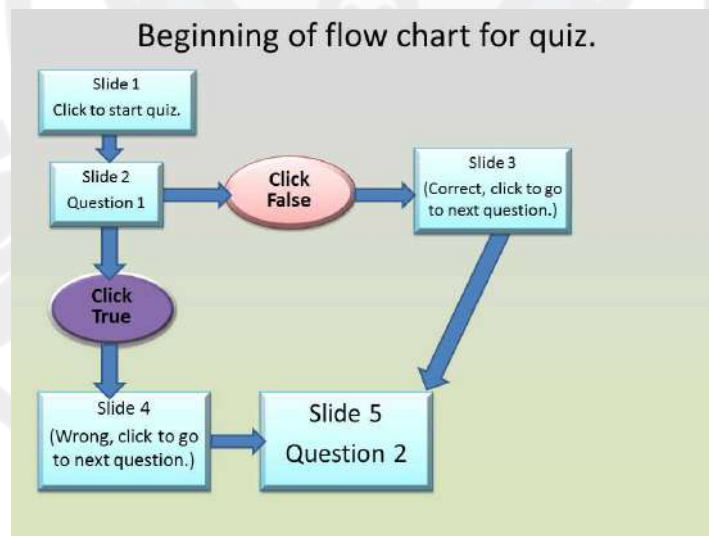

Answer:

The following graph gives information about ancient Egypt trading. It shows how the process is done. The steps include import goods and export goods. According to this graph, the first step is to import cedar oil and timber from Lebanon. According to this graph, the second step is to import copper, precious stones and gold from Nubia. You can see from this graph that the third step is to import slaves and animals from Africa. You can also see from this graph that the next step is to import horses, fruit, and honey from other countries. The final step is to exports linen, tools, bread and weapons to other countries. In conclusion, this graph is very informative.

(APEUni Website / App DI #268)

101. Quiz Operation

Answer:

The following graph gives information about the Beginning of the flow chart for the quiz. It shows how the process is done. The steps include clicking to start the quiz, clicking to go to the next question and click true. According to this graph, the first step is to click to start the quiz. Followed by that, the second step is to go to question 1. You can see from this graph that the third step is to click false or true. You can also see from this graph that the next step is to click to the next question. The final step is to go to question 2. In conclusion, this graph is very informative.

(APEUni Website / App DI #256)

102. Radar Detection

Answer:

The following graph gives information about radar detection. It shows how the process is done. The steps include snow, ice sheet, and ice melting. According to this graph, the first step is the snow formation. According to this graph, the second step is that the ice sheet becomes melting. You can see from this graph that the third step is the grounding line. You can also see from this graph that the next step is the ice shelf melts from the bottom up. The final step is to measure water depth and to predict future sea level rise. In conclusion, this graph is very informative.

(APEUni Website / App DI #253)

103. Power Transmission

Answer:

The following graph gives information about power transmission. It shows how the process is done. The steps include coal, power station, transformer, substation. According to this graph, the first step is mining. According to this graph, the second step is to send to the power station. You can see from this graph that the third step is to use national transmission lines. You can also see from this graph that the next step is to send to the substation. The final step is to send to houses, shops, and other buildings. In conclusion, this graph is very informative.

(APEUni Website / App DI #249)

104. Government Expenditure

Government Expenditure: Education – all sectors

Answer:

This graph shows the government expenditure in different sectors of education. It is shown on the graph that \$11 billion are invested in education in total. At the top of the pyramid, we can see higher education in which \$1.8 billion are invested, followed by which vocational educational training and schools get \$2 billion and \$3–4 billion respectively. At the bottom of the pyramid, we can see the early childhood in which \$0.8–1.4 billion are invested. It can be seen that schools get the highest investment while early childhood gets the least. In conclusion, this graph gives very interesting information. (APEUni Website / App DI #235)

105. Food&Oil Price

Answer:

The following graph gives information about food price vs oil price. The items include oil price, food price index, and years. The horizontal axis is years, ranging from 2000 to 2009. According to this graph, in 2000, the value of the oil price is around 40, and that of the food price index is lower, which is around 20. According to this graph, the highest value of oil price is around 140, which is in 2008. According to this graph, the lowest value of the food price index is around 20, which is in 2001. In conclusion, this graph is very informative. (APEUni Website / App DI #234)

106. Pencil Length

Answer:

The following graph gives information about pencil length. The items include New Jersey, Chicago, and Michigan. According to this graph, in Chicago, the length of the pencil is around 46.750. And that of New Jersey is higher, which is around 50.680. You can see from this graph that the highest length of the pencil is in New Jersey, which is 50.680. You can also see from this graph that the lowest length of the pencil is in Virginia, which is around 18.950. In conclusion, New Jersey has the highest length of the pencil.

(APEUni Website / App DI #233)

107. S&P

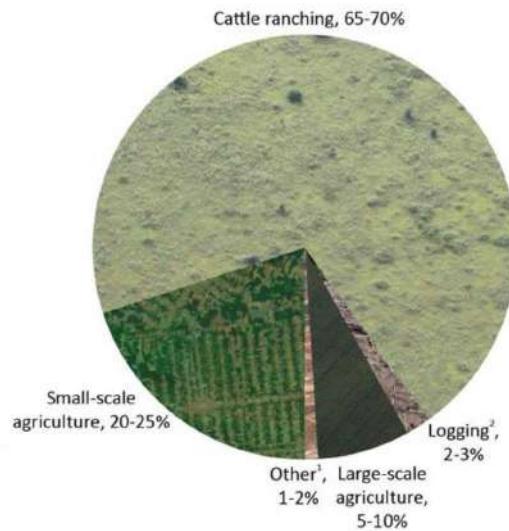

Answer:

The following graph gives information about S&P/ASX 200, a sharemarket index. You can see from this graph that the value of ten is around zero, the lowest. You can see from this graph that the value of eleven is around three thousand four hundred ninety, which is higher. You can see from this graph that the value of eleven thirty is around three thousand five hundred, which is the highest. You can see from this graph that the value of twelve fifteen is around three thousand four hundred ninety-two, which is the third peak. In conclusion, this graph is very informative.

(APEUni Website / App DI #230)

108. Deforestation Reasons

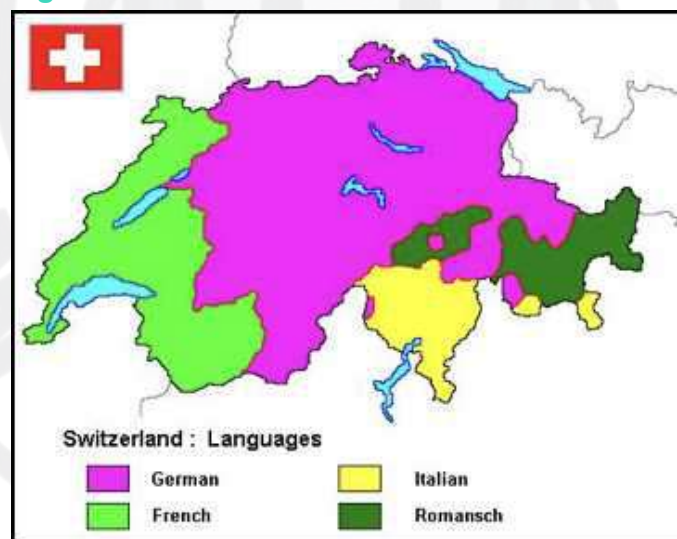

Answer:

The following graph gives information about the proportion of deforestation reasons. The items include cattle ranching, small-scale agriculture, other and so on. According to this graph, the proportion of cattle ranching is around 65%, and that of small-scale agriculture is lower, which is around 20%. You can see from this graph that the highest proportion is cattle ranching, which is around 65%. You can also see from this graph that the lowest proportion is the other, which is around 1%. In conclusion, cattle ranching has the highest proportion of deforestation reasons.

(APEUni Website / App DI #226)

109. Switzerland Language

Answer:

The following graph gives information about Switzerland Language. Data of different areas are displayed on the map. The items include German, Italian, French, Romansch. According to this graph, the largest areas of language is German, which is in the center of Switzerland. In comparison, the smallest areas of language are Romansch, which in the east of Switzerland. In conclusion, using German is much larger than that of using Romansch.

(APEUni Website / App DI #225)

110. Bird Feeder

Answer:

The graph gives information about how to use a plastic bottle as a bird feeder. According to the picture, it is clear that on the first stage, there is a water bottle with two pencils in it, which is brown and blue, respectively, and the bottle is full of food. After that, on the second stage, the two pencils are replaced with two spoons, which are made of wood. In conclusion, the little bird standing on the spoon can get food from the bottle, and we can see the caps of two bottles have different colors, namely blue and white.

(APEUni Website / App DI #224)

111. Solar Eclipse 1

Answer:

The graph shows different eclipse. When we look at the left-hand side of the picture, we can see the sun. In the middle of the picture, we can see the moon, which is on the moon's orbit. On the right of the picture, there is the Earth, which orbits around the sun. As we can see in the graph when the sun, moon, and Earth parallel each other. we can see the shade of moon called penumbra creating the partial eclipse. we also can see the middle of a shade called umbra, which means that there is a total eclipse. In conclusion, this graph shows the formation of different eclipses.

(APEUni Website / App DI #223)

112. Parts of Tree

Answer:

The graph shows a different part of the tree. When we look at the top of the picture, we can see the crown of the tree, which includes leaves on top, a twig in the middle, and branches at the bottom in the crown. Followed by the crown we can see a trunk, which connects the roots in the soil. Finally, the crown of the tree shares a similar size with roots so that they provide a lot of information to scientists. In conclusion, this picture demonstrates the structure of trees.

(APEUni Website / App DI #222)

113. Tree Ring and Saw

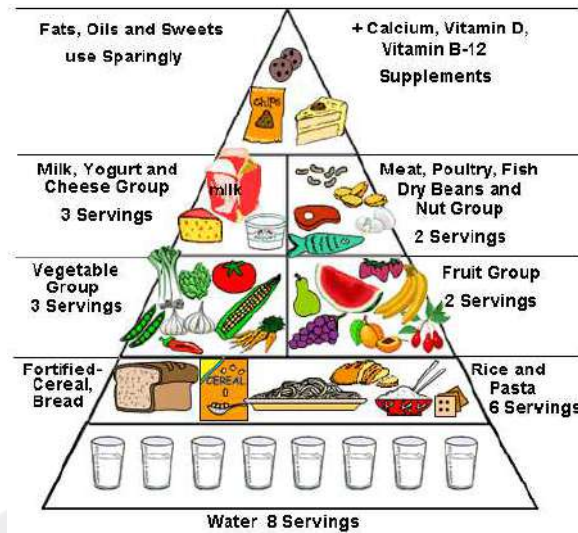

Answer:

The following graph gives information about the evidence of tree growth rings. This is a very beautiful picture, and it shows a number of things. According to this graph, in the central area, there is a tree ring; the colour of it is brown. You can see from this graph that, in the right area, there is a saw; the colour of it is black. You can see from this graph that, in the background, there are grasses, the colour of those is green. The weather is sunny. The sky is blue and clear. In conclusion, this picture is very informative.

(APEUni Website / App DI #219)

114. Food Pyramid 1

Answer:

This picture shows the pyramid of food required by human bodies. At the bottom of the pyramid, we can see water, which is the most essential to human bodies. Above water, on the second layer of the pyramid, we can see whole grain foods such as rice, cakes, and biscuits. Above the whole grain foods level, there is a fruits and vegetable level . We can see grapes, oranges, and apples in the fruit section, and broccoli, potatoes, and carrots in the vegetable section. Above the fruits and vegetables, we can see milk products and fish, poultry and eggs. At the top of the pyramid, there is a sugar and salt level. In conclusion, all the levels in the pyramid are important for human bodies.

115. Happiness

Answer:

The following graph gives information about what determines happiness. The items include the genetic set point, intentional activities, and life circumstances. According to this graph, the proportion of genetic set point is around 50%, and that of intentional activities is lower, which is around 40%. You can see from this graph that the highest proportion is the genetic set point, which is around 50%. You can also see from this graph that the lowest proportion is life circumstances, which is around 10%. In conclusion, this graph is very informative.

(APEUni Website / App DI #203)

116. Water Wheel

Answer:

The following graph gives information about water wheels with different rotational directions. On the left, we can see a water wheel, which is rotating anticlockwise. On the right, we can see another water wheel, which is rotating clockwise. According to this graph, the water wheels are both overshoot ones, with a flume overhead, through which water flows down on the wheels. And we can see tail races lying below the water wheels, in which water falling down from the wheels flow away. In conclusion, the graph is informative.

(APEUni Website / App DI #199)

117. Internet Population

Answer:

The following graph gives information about internet population. The items include Germany, UK and France. You can see from this graph that the value of US is around 160 millions. You can see from this graph that the value of Japan is around 60 millions, which is lower. You can see from this graph that the value of China is around 180 millions, which is the highest. You can see from this graph that the value of Netherlands is around 10 millions, which is the lowest. In conclusion, this graph is very informative.

(APEUni Website / App DI #181)

118. Age Percentage

Answer:

The following graph gives information about the age distribution in the UK from 1911 to 2011. When we look at the age of 65 and over, the percentage has increased from 5% in 1911 to 15% in 2011. In contrast, the age below 14 has decreased from 30% to 20% over the same period. At the same time, people age between 15–64 has remained stable at around 70% throughout the years. In conclusion, it can be expected that the UK is undergoing an aging population from 1911 to 2011.

(APEUni Website / App DI #180)

119. Fruit&Vegetable Consumption

Answer:

The following graph gives information about the US fruit and vegetable consumption trends from 1970 to 2010 in pounds per person per year. For vegetable consumption, it has remained stable at 330 from 1970 to 1980, after that it climbed drastically to 425 in 2000, which is the highest, before dropping down to 400 in 2010. When we look at the fruit consumption, it increased gradually from 230 in 1970 to 280 in 2000, which is the highest, and then it also declined to 250 until the end of the period. In conclusion, vegetable consumption is much larger than fruit consumption throughout the period.

(APEUni Website / App DI #177)

120. Solar Yard Light

Answer:

The following graph gives information about how solar yard lights work. It shows how the process is done. The steps include the glass cover, the solar cells, and the battery. According to this graph, the first step is the glass cover. According to this graph, the second step is solar cells. You can see from this graph that the third step is photoresistor. You can also see from this graph that the next step is the battery. According to this graph, the next step is the controller board. According to this graph, the next step is LED. The final step is the lamp cover. In conclusion, this graph is very informative. (APEUni Website / App DI #173)

121. Meat Consumption

Answer:

The following graph gives information about annual per capita meat consumption from 1961 to 2009, measured in kilograms, in different countries including USA, China, and Liberia. USA, which is shown in blue, starts at 90 kg in 1961 and concludes at 120kg in 2009. China, which is shown in red, starts at 5kg in 1961 and then increases rapidly and concludes at a maximum of 60kg in 2009. However, for Liberia, India, and Ethiopia which are shown in green, orange and grey, the meat consumption remains relatively stable throughout the years. In conclusion, this graph gives impressive information about meat consumption. (APEUni Website / App DI #168)

122. Foreign Language Proficiency

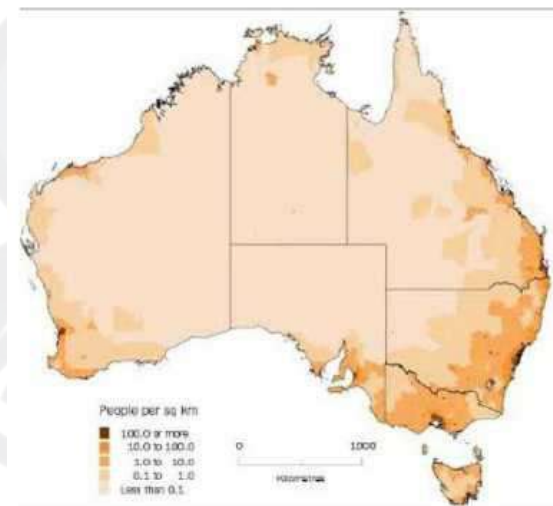

Answer:

The following graph gives information about the percentage of students proficient in a foreign language in different countries, including China, India, and Russia, categorized by males and females. India has the highest percentage of both male and female students proficient in a foreign language, at 56% and 69% respectively. In contrast, China has the lowest percentage of both female and male students proficient in a foreign language, at 33% and 15% respectively. In Thailand, the percentages of male and female students proficient in a foreign language are 30% and 27% respectively. In conclusion, this graph provides interesting information.

(APEUni Website / App DI #164)

123. Australian Population Density 2

Answer:

This map gives information about the population density in Australia, measured in people per square kilometer and categorized by 100 people or more, 10 to 100 people and less than 0.1 people. It is clear that the majority of Australia has a population density of fewer than 0.1 people per sq km, which is represented in very light orange. You can find these areas in the middle of Australia. On the west edge of Australia, the population density is about 0.1 to 1.0 people per sq km. On the east coast of Australia, the population is a little bit denser, about 10 to 100 people per sq km, represented in orange. In conclusion, this map shows very significant information about population density in Australia.

(APEUni Website / App DI #142)

124. Fly Life Cycle

Answer:

The following graph gives information about how houseflies work, that is, the life cycle of a fly. It starts with eggs which are laid by an adult fly, and then the eggs become 1st larva stage. In this stage, the larva is relatively small. Then the cycle goes to the 2nd larval stage where the larva grows larger but the color remains relatively constant. When it comes to the 3rd larva stage, the larva becomes much larger and the color starts to become darker. After that, the cycle reaches the pupa stage where the larva is covered with dark skin. The pupa becomes an adult fly eventually which can lay eggs again and let the process continues. In conclusion, this image gives a vivid illustration of the life cycle of a fly. (APEUni Website / App DI #135)

125. Frog Life Cycle 1

Answer:

The following graph gives information about the life cycle of a frog. It has six stages in total and it is a continuous process. It starts with an egg mass which is produced by an adult frog. The eggs become small tadpoles. Later, legs are grown, and the tadpoles become tadpoles with legs. The size has become a little bit bigger. After that, tadpoles come into the young frog stage where the frog has four legs but with a small, short tail. After the tail falls off, the frog becomes an adult frog eventually. The size becomes much bigger. The adult frogs can lay eggs so that the process can be continued. In conclusion, this image gives a vivid illustration of the life cycle of a frog.

(APEUni Website / App DI #131)

126. Urban Percentage 1

Answer:

The following graph gives information about the percentage of the population in urban areas in 1950, 2007 and 2030. As we can see the largest proportion goes to North America, which increased from 64% in 1950 to 79% in 2007 and ends at 87% in 2030. For the second largest amount, it is Latin America which increased dramatically from 42% to 84% over the same years. However, Africa has taken up the smallest amount which also climbed up from 15% to 51% impressively. In conclusion, the world’s total urban population has significantly increased from 29 % in 1950 to 49% in 2007 and is expected to continue the increase to 60% in 2030.

(APEUni Website / App DI #114)

127. Thorlby Population

Answer:

The following graph gives information about the total population of Thorlby from 1870 to 2010. The information is shown in a blue line. It starts at about 275 in 1870, followed by a decrease to a minimum of about 100 in 1950. During the increase, there are some fluctuations. After 1950, there is a huge increase to a maximum of 325 in 1970. After that, the population decreases rapidly again to about 150 in 1990. The population remains relatively constant after that and concludes at about 150 in 2010. In conclusion, this graph gives very detailed information about the population in Thorlby.

(APEUni Website / App DI #113)

128. Most Used Technology

Answer:

The following graph gives information about the most used technology. The items include the number of users. computer, and telephone. According to this graph, on the computer, the number of users is around 4. and that of TV is higher, which is around 6. You can see from this graph that the highest number of users is in telephone, which is around 8. You can also see from this graph that the lowest value of users is Webcam, which is around 1. In conclusion, the telephone has the highest number of users.

(APEUni Website / App DI #107)

129. Countries' Age Group

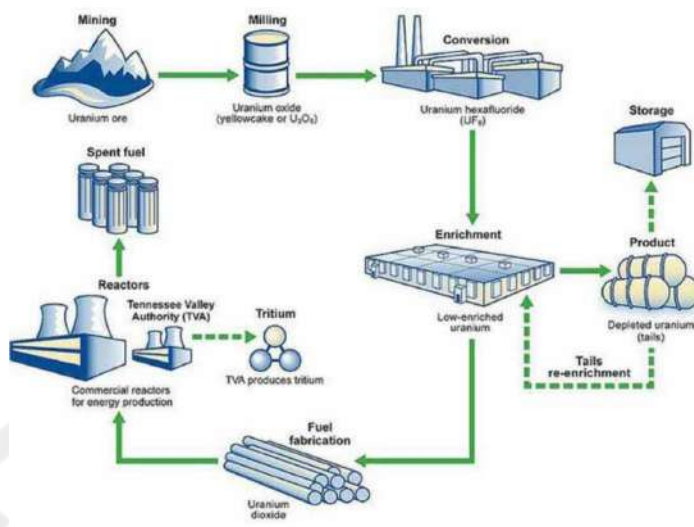

Answer:

The following graph gives information about the population structure of France and India in percentage. As we can see from the graph, the largest population in France is occupied by age 30–35, which is 4% in males and 5% in females. In contrast, the smallest amount is taken up by age above 85, which is 0.5% in males and 2% in females. When we look at India one, age 0–5 has taken up the largest amount, which is 7% in males and 6.5% in females. On the other hand, age 65–70 has made up the smallest amount, which is 1% in males and 1.5% in females. In summary, France and India have totally different population structures but with nearly balanced male and female populations.

(APEUni Website / App DI #101)

130. Metal Refining

Answer:

The following graph gives information about metal refining. It shows how the process is done. The steps include mining, milling, and conversion and so on. According to this graph, the first step is mining. According to this graph, the second step is milling. You can see from this graph that the third step is conversion. You can also see from this graph that the next step is enrichment. According to this graph, the next step is fuel fabrication. According to this graph, the next step is reactors. The final step is spent fuel. In conclusion, this graph is very informative.

(APEUni Website / App DI #99)

131. Frog Life Cycle

Answer:

The following graph gives information about the life cycle of a frog. It shows how the process is done. The steps include eggs, tadpole, and froglet and so on. According to this graph, the first step is eggs. According to this graph, the second step is tadpole. You can see from this graph that the third step is tadpole with lungs. You can also see from this graph that the next step is tadpole with legs. According to this graph, the next step is froglet. According to this graph, the next step is young flog. The final step is adult flog. In conclusion, the process will repeat.

(APEUni Website / App DI #88)

132. Air Temperature

Answer:

The following graph gives information about air temperature. Data of different areas are displayed on the map. According to this graph, the highest temperature areas are in African and South America. In comparison, the lowest temperature areas are in the Arctic and the South Pole. You can see from this graph that the moderate temperature areas are in China and Europe. In conclusion, this graph is very informative.

(APEUni Website / App DI #87)

133. Fish Shoal

Answer:

The following graph gives information about fish shoal. This is a very beautiful picture, and it shows a number of things. According to this graph, In the morning, the number of fish is relatively small but more predatory. You can see from this graph that, in the evening, the number of fish is relatively large but less predatory. The sea is blue and clear. In conclusion, this picture is very informative.

(APEUni Website / App DI #214)

134. Life Expectancy

Figure 1: Life expectancy (years) at birth by sex, 1881–1890 to 2011–2013

Answer:

The following graph gives information about life expectancy at birth by sex. The items include years, males, and females. The horizontal axis is the year, ranging from 1888 to 2013. According to this graph, in 1888, the value of males is around 45, and that of the females is higher, which is around 50. According to this graph, the highest value of males is 75, which is in 2013. According to this graph, the lowest value of females is around 50, which is in 1888. In conclusion, the female has the highest life expectancy at birth.

(APEUni Website / App DI #84)

135. Number of Arrests

Answer:

The following graph gives information about the number of arrests per year for using illegal drugs from 1991 to 2005. It starts at 10 arrests in 1991 and increases to about 23 arrests in 1993, followed by a much steeper increase to about 60 arrests in 1995 and remains constant until 1997. The number decreases after that to 40 arrests in 1999 but then increases again to a maximum of 70 arrests in 2000. The number remains relatively stable in the last three years and concludes at 40 arrests in 2005. In conclusion, this graph gives an interesting trend.

(APEUni Website / App DI #75)

136. Azerbaijan Map

Map of Azerbaijan

Answer:

The following graph gives information about Azerbaijan Map. Data of different areas are displayed on the map. At the left area, there are some details about Asia. According to this graph, in the north of Azerbaijan is Russia. According to this graph, in the south of Azerbaijan is Iran. you can see from this graph, Armenia is in the west of Azerbaijan. In conclusion, there are five areas shown on the map. (APEUni Website / App DI #64)

137. Solar Composition

Composition of the Sun (% components)

Answer:

The following graph gives information about the proportion of composition of the Sun. The items include hydrogen, helium and carbon. According to this graph, the proportion of hydrogen is around 60%, and that of Helium is lower, which is around 16%. You can see from this graph that the highest proportion is hydrogen, which is around 60%. You can also see from this graph that the lowest proportion is carbon, nitrogen and silicon which are less than 1 %. In conclusion, hydrogen has the highest proportion. (APEUni Website / App DI #62)

138. Sprouting

Answer:

The following graph gives information about the process of how the seeds can grow into a tree. The first step is about a seed, it is buried under the ground. The second step is about a seedling, which means the seed can grow after some time and the roots underground will begin to extend. The next step is about a small tree, which means there is a leave growing out of the seed and the roots underground becoming further extended. Finally, the last step is about the tree, more leaves are grown from the stems and roots underground extend deeper and deeper. In conclusion, the whole process contains 4 steps and it is an easy process to see the mature tree from a small seed.

(APEUni Website / App DI #48)

139. Language Shares

Answer:

The following graph gives information about proportion of languages. The items include Latin, French, Germanic languages, Derived from proper names and so on. According to this graph, the proportion of Latin is around 29%, and that of Germanic languages is lower, which is around 26%. You can see from this graph that the highest proportion are Latin and French, which are around 29%. You can also see from this graph that the lowest proportion is Derived from proper names, which is around 4%. In conclusion, Latin and French have the highest proportion of languages.

(APEUni Website / App DI #46)

140. National Flags

Answer:

The following graph gives information about two national flags. In the first national flag, from the top to the bottom, the colors are green, white and black; there is also a red rectangle on the left-hand side. In the second national flag, the color composition is the same. However, from the top to the bottom; the colors are red, white and black, with a green triangle on the left-hand side. In conclusion, the two national flags are quite similar in color while they are still different in shapes and composition. (APEUni Website / App DI #43)

141. Depression Probability

Answer:

The following graph gives information about depression probability. As we can see from the age of 16 to 45, the depression probability has increased dramatically from 0.002 to 0.02, and people who are middle-aged have the highest probability of depression. Following that the depression rate begins to decline to around 0.007 as the age grows older and ends at around 0.006 when they are 70 years old. In conclusion, as young people are growing older they are more likely to get depression, especially in their middle ages. (APEUni Website / App DI #37)

142. Oxbow Lake

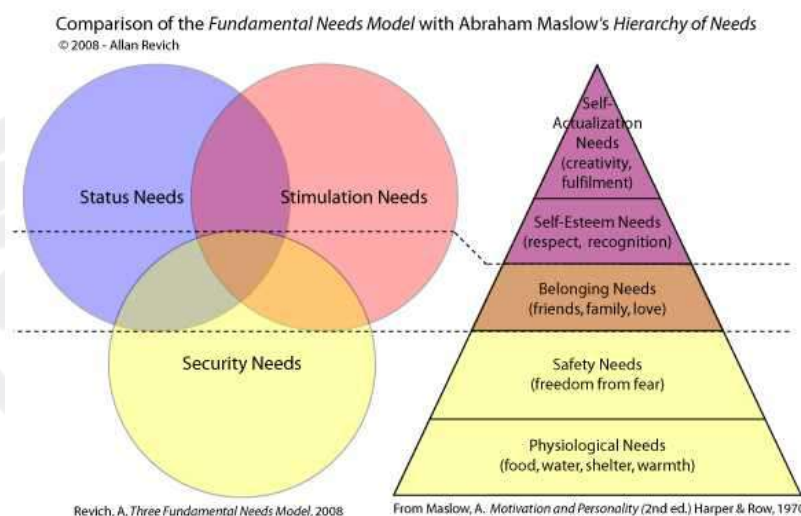

Answer:

The following graph gives information about water channels and how they can be formed. From the first picture, we can see that there is a meander and along the meander, there are lots of trees, there is also a neck in between the meander. However, when we move to the next stage, the sand becomes deposited in the river and finally, it becomes silt around the river neck, therefore there is a new channel formed and a new oxbow lake begins to run in this way. In conclusion, the formation of the oxbow lake requires water and sand forces to shape its channels.

(APEUni Website / App DI #36)

143. Psychological Comparison

Answer:

The following graph gives information about two different kinds of needs models. As we can see from the left-hand side, the needs can be divided into three kinds, which are status needs, stimulation needs and security needs. However on the right-hand side, we can see from the top to the bottom, there are five kinds of needs, which are self-actualization needs, self-esteem needs, belonging needs, safety needs and physiological needs. Specifically, safety needs mean freedom from fear and belonging needs mean friends, family, and love. In conclusion, the two models are similar in showing human's different kinds of needs.

(APEUni Website / App DI #35)

144. Earth Crust (2)

Answer:

The following graph gives information about earth crust. This is a very beautiful picture, and it shows a number of things. According to this graph, the first layer is the atmosphere. Followed by that, the second layer is the crust. You can see from this graph that the third layer is the mantle. You can also see from this graph that the next layer is the outer core. The final layer is the inner core. In conclusion, this graph is very informative.

(APEUni Website / App DI #31)

145. Electricity Generation

Source: EIA International Energy Annual

Answer:

The following graph gives information about electricity generation in China by type from 1994 to 2004. For the conventional thermal, it has increased from 600 in 1994 to 1500 in 2004 gradually. When we look at the hydroelectric, it remained relatively stable at around 100 throughout the period. For the total generation, it has increased dramatically from 900 to 2000 from 1994 to 2004. To sum up, conventional thermal still occupies the largest part of electricity generation in China.

(APEUni Website / App DI #26)

146. Adult Literacy

Answer:

The following graph gives information about adult literacy by region from 2000–2004. As we can see the largest amount can be found in Latin America and the Caribbean, which is 89% in females and 91% in males. Following that Asia has the second largest rate, which is 73% in females and 86% in males. However, we can find the smallest amount in sub-Saharan Africa, which is 53% in females and 79% in males. In conclusion, males have a larger adult literacy rate than males in all the regions. (APEUni Website / App DI #25)

147. Virus Replication

Answer:

The following graph gives information about Virus Replication. It shows how the process is done. The steps include adsorption, entry, replication, assembly, release, According to this graph, the first step is adsorption. According to this graph, the second step is the entry. You can see from this graph that the third step is replication. You can also see from this graph that the next step is assembly. According to this graph, The final step is to release. In conclusion, this graph is very informative. (APEUni Website / App DI #19)

148. Moon&Fish

Answer:

The following graph gives information about lunar and fish. As we can see for the first quarter moon, the fish are located at the bottom of the sea. When entering into the next stage, fish begin to move upwards and are located in the middle part of the sea. Next, when it comes to the full moon, the fish are distributed all over the sea. Finally, for the last quarter moon period, the fish are located near the surface of the sea. In conclusion, the picture shows that lunar and fish are closely related to each other. (APEUni Website / App DI #17)

149. Simple Circuit

Answer:

The following graph gives information about simple circuit with light. This is a very beautiful picture, and it shows a number of things. According to this graph, at the central area, there is a battery; the colour of it is black and yellow. You can see from this graph that, at the left area, there is a bulb; the colour of it is white. You can see from this graph that, there is a line connecting the bulb and the battery. The electricity flows from the negative pole to the positive pole. In conclusion, this picture is very informative. (APEUni Website / App DI #16)

150. Earth Structure

Answer:

The following graph gives information about the core. According to the picture, we can see from the inside to the outside, there is an inner core, which is 800 miles, 1300 kilometers. Following that, it's the outer core, which is 1400 miles, 2250 kilometers. And then it's the mantle, which is 1800 miles, 2900 kilometers. The most outside one is the crust, which is 5–25 miles, 8–40 kilometers. In conclusion, the core has a very complex structure.

(APEUni Website / App DI #8)

151. Height of Tree

Answer:

The following graph gives information about the height of trees. The items include hemlock, cedar, spruce, douglas fir. According to this graph, in Hemlock, the value of height is around 130 feet, and that of Cedar is higher, which is around 200 feet. You can see from this graph that the highest value of height is in Douglas Fir, which is around 280 feet. In conclusion, Douglas Fir has the highest number.

(APEUni Website / App DI #7)

152. BMI

Aim for a healthy weight: BMI chart for adults

Source: Adapted from the Australian Dietary Guidelines (2013).

Answer:

The following graph gives information about Aim for a healthy weight: BMI chart for adults. The graph shows the information about body mass index. The height is between 140 centimeters to 200 centimeters, and the weight is between 30 kilograms to 150 kilograms. It is clear that obese occupies the largest percentage, above BMI 30; followed by overweight, normally occupies the area between BMI 30 and BMI 25; then the heavily weight range, between BMI 25 and BMI 18.5. Finally it is underweight below BMI 18.5. In conclusion, this graph summarizes information about body mass. (APEUni Website / App DI #3)

153. Solar System

Answer:

The following graph gives information about the solar system. This is a very beautiful picture, and it shows a number of things. According to this graph, the largest planet is Jupiter; the colour of it is brown. You can see from this graph that, the second largest planet is Saturn; the colour of it is brown. And the smallest planet is Mercury, followed by Mars, Earth, Venus, Neptune, Uranus. In conclusion, this picture is very informative. (APEUni Website / App DI #1)

154. Typing Hands

Answer:

At the upper left area, there is a keyboard, the color of it is black, and there are hands which parallel with each other, which is right. At the lower left area, there is a hand which parallels with the keyboard. And it is the right gesture. At the upper right area, there are two hands which are twisted against each other.,and it is wrong. The second picture in the right area, 2 hands are the point in the opposite direction, which are wrong. The third picture at the right area, there is a hand forming an angle with the keyboard. At the lower right area, there is a hand whose wrist forming a right angle. In conclusion, this graph is very informative.

(APEUni Website / App DI #2)

155. Apartment Plan

Answer:

The following graph gives information about the housing structure. When we enter the house from the entrance, on the left-hand side we can see a small kitchen with a stove in it and on the right-hand side there is a small toilet and a place for a shower. Going deeper into the house, we can find the main bedroom which is on the left corner with a double bed and a desk in it, and the living room is on the right corner with spacious room, a long lounge, and some sofas. In conclusion, it is a very comfortable house to live in.

(APEUni Website / App DI #45)

156. Apple Life Cycle

LIFE CYCLE OF AN APPLE TREE

**Answer:**

The following graph gives information about how an apple seed can become an apple tree. It shows how the process is done. The steps include apple seeds, an apple tree, a flower, and so on. According to this graph, the first step is apple seeds. According to this graph, the second step is to sprout. You can see from this graph that the third step is the apple tree. Then the next step is the flower. Finally, we can get green and big apples from the apple tree. In conclusion, the process will repeat.

Retell Lecture

Audio Available: There're audio records available for this question. Search by the question number at [APEUni Website / App to listen.](#)

1. Animal Image (Incomplete)

Points: A lecture with a video about how to find images of animals. Six trillion triangles in the video. How to use computers to create images of animals. The more triangles we use, the more details we can see. (APEUni Website / App RL #588)

2. Cosmic Civilization (Incomplete)

Points: About the possibility of existence of other cosmic civilizations. Every year there are seven new born stars but most planets around them are either too hot or too cold to support lives. Only twenty percent of all the planets meet all necessary criteria to have a chance to have lives, and the chance is nearly zero. So it is very hard to find other cosmic civilization. (APEUni Website / App RL #587)

3. Universal Philosophy (Audio Available)

Original:

Okay. So this is the this is the big benefit of a universal philosophy. It says it applies to everybody. Well, looks that doesn't, you know, 205 or 206 countries in the world. And you've got something that applies to everybody. That's a bit strange, isn't it? No, says liberal theory. There are same value structures that apply to all of us. You couldn't have the United Nations without it. It couldn't tell you that the Universal Declaration of Human Rights without this idea of values that apply to all of us just because we are humans. Now, the idea is to test that as well. Why is sport universal? Why does everybody play football? It's because the values are specified at a very thin level at the top. There are these rules and we all have to abide by just these rules. But there are lots of things about football that aren't rules specified. So Brazilian football is different from Italian football, from British football, from German football, from Spanish football. It's culturally specific, but acknowledges that there are these universal general rules to apply to everybody.

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

4. Facial Recognition (Audio Available)

Original:

Last week we talked about how people recognize objects and really how well people recognize objects, given how difficult the problem is, given how objects can be seen in all different sorts of illumination, in different positions, in different angles. And yet we are able to extract that information, we are able to take the visual stuff out there, interpret it in a way that allows us to recognize all the different things that we can see in our environment. Today we're gonna kind of carry on looking at that, but we gonna look at what's really a special class of objects. That's the human face. So we gonna look at how we recognize human faces and how we do it quite as well as we do. We're really expert at recognizing faces. So again we can think about how do we take that visual information and how do we transform it into a form which allows us to put a name to a face, and to do all the other clever things that we can do with faces. So I'm gonna start off again by just pointing out that it's a hard problem. Face recognition is a hard problem, and it's a clever thing we do. If you think about all the different types of faces you can recognize, and all the different types of information you can get from the face, you kind of start to

appreciate how well we can do face recognition.

5. Hurricane (Incomplete)

Points: About massive storms and hurricanes. Thousands of people died. Scientists developed the model for forecasts of them.

(APEUni Website / App RL #497)

6. Automation and Jobs (Incomplete)

Points: A video about automation by a male professor, with a lot of data on the slides, starting and ending with black screens. Lots of data are presented orally by him. With development of scientific technologies, there is a prediction that in future about forty percent of people will not get a job and be replaced by machines. But professionals will enjoy very stable jobs.

(APEUni Website / App RL #423)

7. Leadership Practices (Incomplete)

Points: About leadership practices for students in universities, mainly including five major practices: clear goal, money time, staff improvement, students and staff ... environment. ... learn how to achieve the goal ...

(APEUni Website / App RL #408)

8. City of Rome (Audio Available)

Original:

But you can see from the relatively crooked and narrow streets of the city of Rome as they look from above today, You can see that again, the city grew in a fairly ad hoc way, as I mentioned. It wasn't planned all at once. It just grew up over time, beginning in the eighth century B.C..Now this is interesting. Because what we know about the Romans is when they were left to their own devices and they could build the city from scratch, they didn't let it grow in an ad hoc way. They, they structured it in a, in a very care-, very methodical way. That was basically based on military strategy, military planning. The Romans they couldn't have conquered the world without obviously having a masterful military enterprise. And they everywhere they went on their various campaigns, their various military campaigns .They would build, build camps and those camps were always laid out in a very geometric plan along a grid, usually square or rectangular.

9. Energy Challenge (Audio Available)

Original:

Most Americans take energy for granted. But, for many families, maintaining access to reliable and affordable energy is a persistent challenge and a significant material hardship. This is a problem referred to as energy insecurity, and it affects millions of American households each year. We have found that energy insecurity is a growing and vexing problem among low-income households, and the COVID-19 pandemic has made this problem worse. Our analysis finds that there are disparities in rates of energy insecurity across various socio-demographic groups. Black and Hispanic households, for example, are significantly more likely to experience energy insecurity and face utility disconnection than white

households. So too are households with young children, individuals that require electronic medical devices, and those in dwellings with inefficient or poor conditions. Households that cannot pay for energy are unable to power electronic learning or medical devices, keep perishable, healthy food in the refrigerator, or maintain safe body temperatures. Under conditions of extreme heat or cold, people can suffer from mental and physical health consequences, including the possibility of death. Strategies for coping with uncomfortable temperatures, such as burning trash or sitting in one's car with the heat running, can lead to tragic outcomes as well. Our research underscores the importance of public policy that targets energy insecurity and its underlying causes. Weatherization assistance, incentives for residential solar power, energy bill assistance, and utility disconnection protections are all viable strategies for helping the millions of households across the country that are currently unable to pay their energy bills.

10. Light Pollution (Audio Available)

Original:

Look at any photo of earth's night sight, and you see the planet lit up like a Christmas decoration. As the glowing lights of bustling cities expand, the serenity of natural darkness wanes. But the repercussions are not just the loss of the starry night sky. Light pollution also affects animals who depend on a nighttime environment to survive. Many bird species use the stars to navigate at night. Baby sea turtles use moonlight reflected off the ocean to guide them back to the water. City lights can confuse them, and fear them off course. Humans are not immune, either. Excessive exposure to artificial light at night can increase the risk of sleep disorders and it's also been linked to obesity, depression, diabetes and even cancer.

11. Software (Audio Available)

Original:

The history of software is of course very very new. And the whole IT industry is really only 67 years old which is extraordinary and to be so close to the birth of a major new technology, a major new discipline is quite remarkable given where we got to in those 67 years. And the progression has been not so much a progression as a stampede because Moore's Law, the rapid expansion in the power of computing and the rapid fall of the cost of computing and storage and communications has made it feasible for information technology to move into all sorts of areas of life that were never originally envisaged. What has happened is that there has been as I said a stampede for people to pick the low-hanging fruit. And that is what's guided the development of software and information technology over the past decades and continues to do so with a number of consequences that we will explore.

12. Solar Energy (Incomplete)

Points: About solar energy with a picture of solar energy panel. The advantage of solar energy is that we don't have to worry about the supply. Solar energy is not always available. It will be unavailable after sunset. So it is necessary to store solar energy and turn it into chemical fuels. Scientists are working on

how to use solar energy even at night.

(APEUni Website / App RL #325)

13. Interval Training (Incomplete)

Points: A video about Interval training in HIIT. You work out in a way that alternates periods of high-intensity exercise with periods of low-intensity recovery, which means you do the exercise at 20-meter speed, and then at 30-meter speed. Interval training has been often used for athletes and their sports. It can also accelerate cardio and aerobic exercises.

(APEUni Website / App RL #323)

14. Body Language (Incomplete)

Points: About the importance of body language for actors, who have to learn to understand their body behaviors according to the different emotions and how to express them and interpret real life situations.

(APEUni Website / App RL #320)

15. Dietary Health (Incomplete)

Points: A picture of vegetables including green pepper, eggplant, chili. The lecture is about dietary health. ... from farm to table.

(APEUni Website / App RL #55)

16. Sunrise and Sunset in Space (Incomplete)

Points: When watching the earth from space, the first view is beautiful, phenomenal. A sunrise and a sunset can be seen every 90 minutes, 45 minutes in darkness and 45 minutes in light, so a sunrise every 45 minutes and a sunset every 45 minutes. Orbit is also mentioned.

(APEUni Website / App RL #312)

17. Bilingual Parents (Audio Available)

Original:

Many parents communicate and educate their children with two languages, probably because they both know more than one language, or they come from different countries. Most of these parents think this can benefit their children's language learning. But actually kids will get confused when their parents use different languages from each other to describe the same object. If one parent sticks to one language, and the other one sticks to another language, their children will not be confused any more.

(APEUni Website / App RL #311)

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

18. Food Influence (Incomplete)

Points: A picture with kinds of fruit in it, talking about food's influence on our bodies. We should eat enough or our immune system will get weaker.

(APEUni Website / App RL #302)

19. Amazon (Incomplete)

Points: A picture about the Amazon Company. Two examples are given, with one being that kindles can cancel the wrong orders. The lecture mainly talks about how to be customer centric.

(APEUni Website / App RL #300)

20. Biological Forgetting (Audio Available)

Original:

People forget things every day including experiences, feelings and thoughts. We call this process biological forgetting. Remembering is hard for people, and people try to overcome biological forgetting. Human' memory is not fixed, but it can be reconstructed and shaped by the past. Since ancestors, we have always been trying to improve our memory.

21. IT Department (Explanation) (Audio Available)**Original:**

And our survey, over 100 CEOs who had recently been through an acquisition or merger were asked which areas of their activities needed the most effort. As you can see, the most frequent response to this question was that information technology requires the most integration effort. According to 58 percent of those we surveyed, IT was the most time consuming and needed the most work. This is understandable as many of the IT issues are extremely complex and the consequences of any change in IT can have a significant impact. The key is how quickly and effectively IT integration can be achieved and there has to be a clear understanding of the consequences there maybe of not getting it right. The two other areas requiring significant attention, sales, marketing and business development on the one hand and financial management on the other, both were selected by forty nine percent of the respondents.

(APEUni Website / App RL #295)

22. Graphical Representation (Incomplete)

Points: In a video, a male lecturer is giving his speech on a podium. There is a PPT as the background, whose title is 'graphical representation'. The PPT is about a kind of software for video/audio edition. In the beginning, music can be recorded, modified, and redone. Then the software is introduced, saying it is used on computer. All this is electronic, and this job is very professional. 'graphical representation' and 'software' are mentioned many times.

(APEUni Website / App RL #293)

23. Psychology (Incomplete)

Points: A video with 'Yale University' on the right lower corner. A male, black-haired professor is introducing psychology to students. Psychology is the studying of human mind, how it developed, how humans act in social groups, and mental illness and mental health.

(APEUni Website / App RL #292)

24. Street Stalls (Incomplete)

Points: A picture. Many people are running stalls in a market. There are three rows of stalls and each row has a vacant stall.

(APEUni Website / App RL #290)

25. Edmund Wilson (Explanation) (Audio Available)**Original:**

Wilson came then from a different world and he became the focal point of a broad mainstream American culture that thought that modern literature and wanted modern literature to be able to be read and

appreciated by ordinary people. They were not modernists in an abstract sense and certainly some of them like TS Eliot and Faulkner were too difficult for some of their writings to be read by ordinary people, but this was a world before the division between the brows or between elite or whatever had established itself as part of our consciousness. Wilson was a major player in the successful effort of his generation to establish at the heart of American life and innovative literature that would equal the great cultures of Europe. And he knew that the great cultures of Europe were there he was not a product of a narrow American Studies kind of training at all. He joined a high artistic standard with an openness to all experience and a belief that literature was as much a part of life for everyone as conversation. He thought that Proust and Joyce and Yeats and Eliot could and should be read by ordinary Americans and helped that to happen. Wilson was a very various man over a period of almost 50 years. He was a dedicated a literary journalist, an investigative reporter, a brilliant memoirist and a dedicated journal keeper.

26. Children Obesity (Incomplete)

Points: There are twenty percent of children in the USA today have the obesity problem. As a result, heart diseases have become more and more common among children, the youngest of which is five years old. This situation makes children suffer the heart attack and other health problems earlier and earlier, such as kidney impairment and stroke. The diseases that used to occur to people above fifty or sixty are now happening to people as early as they are five or six years old. Those diseases that used to be uncommon have begun to be common. We have to address the overweight problem.

(APEUni Website / App RL #287)

27. Cloud Formation (Explanation) (Audio Available)

Original:

Absolutely. There's a lot of interest in what forms those clouds. Why are those clouds there, why do they stick around? At the center of every cloud drop is a particle. You can't grow a cloud drop without having a particle there for the water to condense on. The key questions that people have not directly addressed until very recently is what actually forms those clouds. And so the ones that you're looking at over the ocean, it turns out sea salt is a very effective nucleator for forming clouds,, so there's a really good chance that those are loaded with sea salt. But as you go inland you start to have pollution come from all different kinds of sources, and so different sources form clouds more effectively than others. And we're trying to unravel which sources are actually contributing to the clouds. The clouds are incredibly important players in climate change in that they reflect the light back to space, and so they're keeping things much, much cooler than they would be if they weren't there. They also play a huge role in regional weather. So we're actually starting to see shifts where having more pollution input into the clouds is affecting weather patterns, and in particular it's actually reducing the amount of precipitation, so we're starting to see drought in areas with super high levels of air pollution.

(APEUni Website / App RL #249)

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

28. Procedure (Incomplete)

Points: A pale yellow PPT, with the title 'Kumar Case' and three points: justice, procedural fairness, conclusion. Male: What is your concern about the system of law? Anything about independency, procedural fairness, or else? Female: Procedural fairness. It enables one party to see the other's

evidence, and provides opportunities to question the other party. One party hands in evidence, the evidence is questioned by the opposite party, and then new evidence is handed in again. But procedural fairness actually influences substantive fairness. How dose such a procedure guarantee justice.

(APEUni Website / App RL #285)

29. Fatherhood (Incomplete)

Points: A picture in which a pair of hands hold a baby. The lecturer talks with a high speech rate. The role of father in parenting is mentioned. Fatherhood makes children feel safe so they can take risks to develop independence and autonomy. Thus children can grow up into responsible and compassionate citizens.

(APEUni Website / App RL #282)

30. King (Explanation) (Audio Available)

Original:

At the top, you would have a king. Now the king would rule over a kingdom. Now, this is not so easy to govern especially during the Middle Ages. And the king might owe many people, things especially people who help the king come to power, helped him dispose the previous king or to conquer this land. And so in exchange for that and to help govern, he might grant land or feasts to other people. And the key currency in the Middle Ages under the feudal system is land. And land in exchange for loyalty and service. So this whole thing is a kingdom. Now right over here, this is a Duchy. And a Duchy will be controlled by a Duke. I guess I didn't call it duckie because that just doesn't sound as serious. So the king might grant a Duchy, a Duchy to a Duke and in exchange, the Duke would provide loyalty pledged their fealty. If the kingdom is threatened, the Duke will fight alongside. The King would provide their own troops if the king wants to go conquer other territories, same thing, and also provide the king with taxes which might be in the form of coinage depending on what time and region we are in the Middle Ages or it might be in the form of a percentage of the agricultural production from this Duchy.

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

31. Creativity (Explanation) (Audio Available)

Original:

Here are three important factors in creativity: people, process and product. The most important one is the process. First you have to create the right person through education with a creative mind. Second, you have to create the right process to have people engaged in innovation process. Third, you need to find the right problem to work on. Human beings can survive and prosper largely depending on the creativity they have. If you identify and assess the creativity of a finished product, it is taken as a proxy for the creativity of the person who produced such a product. Therefore, a creative product should be surprising, original, beautiful and useful. People should have factors necessary for genius, ability, and right mindset. You should improve to imitate and change insight look from new perspectives, innovatively create something with imagination to expand conceptual spaces.

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

32. Globalization (Explanation) (Audio Available)

Original:

I've been thinking a lot about the world recently and how it's changed over the last 20, 30, 40 years.

Twenty or thirty years ago, if a chicken caught a cold and sneezed and died in a remote village in East Asia, it would have been a tragedy for the chicken and its closest relatives, but I don't think there was much possibility of us fearing a global pandemic and the deaths of millions. Twenty or thirty years ago, if a bank in North America lent too much money to some people who couldn't afford to pay it back and the bank went bust, that was bad for the lender and bad for the borrower, but we didn't imagine it would bring the global economic system to its knees for nearly a decade. This is globalization. This is the miracle that has enabled us to transship our bodies and our minds and our words and our pictures and our ideas and our teaching and our learning around the planet ever faster and ever cheaper. It's brought a lot of bad stuff, like the stuff that I just described, but it's also brought a lot of good stuff. A lot of us are not aware of the extraordinary successes of the Millennium Development Goals, several of which have achieved their targets long before the due date. That proves that this species of humanity is capable of achieving extraordinary progress if it really acts together and it really tries hard.

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

33. Performance of Genders (Explanation) (Audio Available)

Original:

You can see that the two charts, each give quite a different picture of the performance of boys and girls in the two key subjects of Math and English. It shows that in English, girls consistently outperform boys over a period of 6 years, achieving scores about 10% above their male peers. There is quite a different picture when we look at the Math results with no real difference between genders in the results. What is the explanation for these key differences? To answer this question, researchers look at biological and cognitive factors, and a range of social factors. The interaction between these different components in early childhood development are seen as maintained and reinforced in the school context. And this leads to distinct gender patterns of behavior and skills with direct consequences for school performance and achievement. The ultimate uses of this evidence (are) to show that biological factors, such as patterns of cognitive developments are closely linked to social factor, such as learned gender categories. This cognitive skills are learned both pre-school and subsequently at school, supported by the responses of teachers, creating a reinforcement of patterns.

(APEUni Website / App RL #273)

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

34. Animal Behavior (B) (Explanation) (Audio Available)

Original:

Why should we bother studying animal behavior? Well, first and foremost, because we are interested in understanding why animals do what they do. There are lots of other reasons for studying animal behavior. Conservation biologists need to know what animals do if they're going to save them. Are those animals social or solitary? How much space do they need and how many mates do they have? Sometimes you can't predict the outcome of the research. Fernando Nottebohm started out being interested in how birds know what to sing. Yet his research eventually led to a complete overhaul of the entire field of neurobiology, a totally unanticipated yet utterly monumental effect. And this is the course textbook by John Alcock the fact that this is in its ninth edition tells you how fast an afield animal behavior is. There are lots of new developments.

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

35. Overfishing (Audio Available)

Original:

Aquaculture, the farming of fish, shrimp, shellfish and seaweeds, has been the sources of human protein for nearly four thousand years, especially in Asia. In the last decade, however, there is been unprecedented growth in aquaculture production, more than 300% since 1984, which has increased the importance of the modern food supply. It's the world's fastest growing food production activity. And globally, more than 25% of the odd fishing and shellfish production in 1999 was attributable to aquaculture. Yes, this industry's contributions to human diet is actually greater than the numbers imply, whereas 1/3 of the conventional fish catch is used to make fish meal and fish oil. Virtually all farmed fish are used as human food. Today, nearly 1/3 of fish consumed by human is the product of aquaculture, and that percentage will only increase as aquaculture expands the world's conventional fish catch, for the oceans and lakes continues to decline because of overfishing and environmental damage.

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

36. Ageing Population (Incomplete)

Points: As the world population grow, the problem of ageing population has become more serious globally. About nine percent of people are more than sixty–five years old in the world. Ageing percentage in the US is now 13% and is expected to be 23% by 2030. The situation is more severe in Japan and Italy. And Germany follows, whose percentage of people over sixty–five years old is expected to be twenty–five percent by 2030. Ageing problem is related to industrialization.

(APEUni Website / App RL #257)

37. Linguistic Training (Explanation) (Audio Available)

Original:

I think with our linguistic training we also get all this invisible training to be authorities, to be the people who know. It is part of that process that you come out as a world authority on your chosen subject. But when we move into working with communities, we have to recognise that the communities have to be the authority in their language. Actually, a woman in the class I'm teaching at Sydney at the moment, a career woman, expressed this very nicely, although she was talking about something else, she was distinguishing expertise from authority. And certainly linguists, because of our training we do, have expertise in certain very narrow areas of language, but we don't have the authority over what to do with that knowledge or what to do with other knowledge that the community produces. I guess for me the bottom line is languages are lost because of the dominance of one people over another. That's not rocket science, it's not hard to work that out. But then what that means is if in working with language revival we continue to hold the authority, we actually haven't done anything towards undoing how languages are lost in the first place, so in a sense the languages are still lost if the authority is still lost.

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

38. Earth v.s. Mars (Incomplete)

Points: A PPT is given, and you can read it accordingly. This lecture compares the conditions on the earth and Mars, as well as the habitability of Mars. There are some similarities such as polar caps, atmospheres and water climate. But Mars and the earth also have lots of differences. Even the most inhabitable areas on the earth are way different from those on Mars. In preparing for the Phoenix Mission, scientists have done Antarctica trial runs. The lecture also describes different forms of water

(hydrology) on the surface and underground of the earth and Mars.

(APEUni Website / App RL #246)

39. Latin America Reform (Audio Available)

Original:

Due to globalization effect, it is hard for people to hold a positive attitude towards Latin America's economy. Globalization had been widely believed to benefit people globally, including Latin American countries. But people are disappointed about the actual economic growth in that continent. Over the 20 years before globalization, the economy in Latin America developed by eighty percent. People thought taking part in globalization would achieve a higher economic growth rate. But in fact, the growth rate has dropped to ten percent after economic reforms related with globalization happened in Latin America. Accordingly, the poverty rate has increased, and the criterion of 'poverty' is 'earning no more than two dollars per day'. Thus, Latin America's economy has become unsustainable. People are asking why the economic development has been slower than that before reforms. So, globalization is not a perfect economic structure, which possibly has a negative effect.

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

40. Advanced Machine (Audio Available)

Original:

The biotech engineering has undergone three phases. In the first phase, people designed and made some simple machines, which aimed to help people understand ourselves. And first group of people that realized we could learn from ourselves were engineers. And then, based on the studies, people began to make complicated devices, in order to cure wounds, like the practice of suture, and to study physiology. This is the second phase. Later, since we went into the third phase, more complicated machines have been developed, like ECG (electrocardiography), able to have an insight of your internal body without intruding it, which can show the human brain's functions. X-ray is a good example. In an X-ray picture, you can see the bright area is the heart with some vessels around, and the dark area is the lungs. These devices benefit humans greatly in solving health problems, such as diseases.

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

41. Ship (Explanation) (Audio Available)

Original:

Our civilization, which subsumes most of its predecessors, is a great ship steaming at speed into the future. It travels faster, further, and more laden than any before. We may not be able to foresee every reef and hazard, but by reading her compass bearing and headway, by understanding her design, her safety record, and the abilities of her crew, we can, I think, plot a wise course between the narrows and bergs looming ahead. And I believe we must do this without delay, because there are too many shipwrecks behind us. The vessel we are now aboard is not merely the biggest of all time; it is also the only one left. The future of everything we have accomplished since our intelligence evolved will depend on the wisdom of our actions over the next few years. Like all creatures, humans have made their way in the world so far by trial and error; unlike other creatures, we have a presence so colossal that error is a luxury we can no longer afford. The world has grown too small to forgive us any big mistakes.

42. Loggerhead Turtle (Incomplete)

Points: About loggerhead turtle, one of the largest turtles in the world, and almost distinct in the USA. They have big heads and short necks. In September, 1986, scientists put a tracker on a turtle's shell, and used satellites to track and locate the migration route of the turtle. They reached different localities in different time. The migration took three months, from the south Florida to the north. A map of the East Coast of the US is given and the turtle migration route and the year are marked it.
(APEUni Website / App RL #233)

43. CO2 Pollution (Incomplete)

Points: The topic is the correlation between greenhouse gases and temperature. Greenhouse gas has increased during these years. It does not prove one causes the other, but the correlation is true and undeniable. CO2 is a lot worse than we thought, but we don't know how to reduce the amount. Developing sustainable energy resources is important to conserve the energy we have.
(APEUni Website / App RL #226)

44. Motivation (Incomplete)

Points: About two types of motivation, Approach Motivation and Avoidance Motivation. Approach Motivation means moving to things that are positive, such as vocational plans. Avoidance Motivation is driving away things that are negative and whose purpose is to reduce anxiety. Avoidance Motivation is quite intense.
(APEUni Website / App RL #225)

45. Soot Emission (Explanation) (Audio Available)

Original:

Sometimes it's the little things that can make big things happen. Fleas and the plague, atoms and nuclear bombs. Diminutive leaders in world history. Soot is one of these little things. Soot also known as black carbon is released when you burn dung, coal, diesel fuel and wood. From Los Angeles to Mumbai, soot causes respiratory illnesses like lung cancer and asthma and contributes to one point six million premature deaths every year. Mostly among the poor. And it gets worse. Atmospheric currents carry soot thousands of miles from where it is produced, to the Himalayas and the Arctic. Black carbon being black, absorbs sunlight, so even a little soot on snow makes it melt faster. And when snow melts global sea levels rise, threatening our freshwater indigenous communities and polar bears who hunt on the Arctic ice. Climate Change has been a big thing for a while and carbon dioxide has been its main cause. Scientists estimate that soot causes twenty five percent of human-caused global warming. It's the second leading cause of Arctic warming after carbon dioxide. Let's not underestimate the impact of this tiny particle. But there's good news, reducing black carbon may be the fastest way to slow global warming. Buy time for the Arctic. Yes even more so than changing a light bulb. Since black carbon only stays in the atmosphere for a couple of weeks, reducing it will produce results immediately. Of course, reducing soot alone won't solve global warming, but solving our soot problem now will help buy time for the Arctic and allow us to deal with the bigger problem of carbon dioxide. We have the cleaner industries, cook stoves, and diesel now we have to use them. In developed nations, we've significantly reduced our black carbon, but we still have much more to do. We need to tighten our standards at home and invest in cleaner technologies in developing nations. In a world going on seven billion people, you might feel rather little yourself. But if you urge the US government and the European Union to take the lead on black carbon reduction, you can make a big difference.

46. Telescope (Incomplete)

Points: A video with a lady, standing, giving her lecture. About instruments used in space observation. Telescopes should be put as high as possible. Via a telescope installed in higher areas, especially desert and mountainous areas, people can observe distant objects clearer. They can also be placed in space, such as the Hubble telescope, which have many functions, like transferring other planets' images back, and thus helping us understand the earth (or space?). Key words: solar energy, the length of telescope. (APEUni Website / App RL #179)

47. Advertising Standard Authority (Incomplete)

Points: About ASA(Advertising Standard Authority), with HFSS(food high in fat, sugar and salt) mentioned in the very final part. An organization, ASA(Advertising Standard Authority), is introduced, and it helps consumers make healthy decisions in buying food and drinks, also helps consumers identify the food contents in the labeling, like sugar, salt. (APEUni Website / App RL #177)

48. Large Hadron Collider (LHC) (Audio Available)

Original:

Protons are finally transferred to the LHC (both in a clockwise and an anticlockwise direction) where they are accelerated for 20 minutes to 6.5 TeV. Beams circulate for many hours inside the LHC beam pipes under normal operating conditions. For each collision, the physicist's goal is to count, track and characterize all the different particles. The charge of the particle, for instance, is obvious since particles with positive electric charge bend one way and those with negative charge bend the opposite way. Also the momentum of the particle can be determined. Large Hadron Collider (LHC) is the world's largest particle accelerator lies in a tunnel. The LHC is a ring roughly 28km around that accelerates protons almost to the speed of light before colliding them head-on. Protons are particles found in the atomic nucleus, roughly one thousand-million-millionth of a meter in size. The LHC starts with a bottle of hydrogen gas, which is sent through an electric field to strip away the electrons, leaving just the protons. Electric and magnetic fields are the key to a particle accelerator.

49. Human Behavior (Explanation) (Audio Available)

Original:

Determinant, human behavior is affected by internal and external factors. At the end of lecture, the speaker mentioned that psychologists are interested in explaining human behavior. Determinant is influenced by two factors, the personal factors which are internal and the environmental factors which are external. The personal factors include people's belief on certain things and their individual thinking about it, while the environmental factors include temperature, air pressure and the others' thinking about them. In conclusion, one's determinants are affected by both himself and the environment.

50. NGO V2 (Audio Available)

Original:

A non-governmental organization (NGO) is an organization that is neither a part of a government nor a conventional for-profit business. Usually set up by ordinary citizens, NGOs may be funded by governments, foundations, businesses, or private persons. Some avoid formal funding altogether and are run primarily by volunteers. NGOs are highly diverse groups of organizations engaged in a wide range of activities, and take different forms in different parts of the world. Some may have charitable status, while others may be registered for tax exemption based on recognition of social purposes. Others may be fronts for political, religious, or other interests. The number of NGOs in the United States is estimated at 1.5 million. Russia has 277,000 NGOs. India is estimated to have had around 2 million NGOs in 2009, just over one NGO per 600 Indians, and many times the number of primary schools and primary health centres in India. NGOs are difficult to define, and the term 'NGO' is rarely used consistently. As a result, there are many different classifications in use. The most common focus is on "orientation" and "level of operation". An NGO's orientation refers to the type of activities it takes on. These activities might include human rights, environmental, improving health, or development work. An NGO's level of operation indicates the scale at which an organization works, such as local, regional, national, or international.

Sample Answer: This lecture mainly talks about the non-governmental organization. NGOs may be funded by governments, foundations, businesses or private persons. The number of NGOs in the US is 1.5 million and India has around 2 million in 2009. It is difficult to define NGO as the activities are highly diverse, some may have charitable status while others may be registered for tax exemption.

51. Non-Governmental Organization (Audio Available)**Original:**

I marveled at how often powerful Phil powerless but in the face of this sense of disempowerment, there's no decline in involvement in organizations which seek to share wealth and opportunities. We seek to protect one another's rights and work towards the common good. According to the UN, civil society groups have grown 40-fold since the turn of last century, sorry, since the turn of, yes, last century. Internationally, the non-profit sector is worth one trillion dollars, and there are 700,000 non-profitable organizations in Australia alone, 700,000. UN recognizes 37,000 specifically civil society organizations across the globe, working international relief, and gives accreditation to many of them. This profound movement towards harnessing voices and resources from outside the realm of governments and officialdom reflects a growth in trust, "the third sector", NGOs. Putnam discovered in the field of local government in Italy, the best predictor of governmental success was the strength and density of a region's civic associations.

52. Country Transformation (Incomplete)

Points: Version A: A line chart with pre-industrial period on the left and the great transformation on the right. The lecture talks about GDP, and a lot of countries' GDP didn't change for decades. With China and India as examples, some countries are in the begging and the early stage of transformation. Rich and developed world all witness turning points, with extraordinary GDP growth, take-off of economy and science. Developed countries will not have further progress, but early stages of transformation will be improved markedly. There will be bottlenecks after the turning point. Version B: Rich countries have reached the turning point of development. In pre-industrial societies, the increase of

income contributed to human's wellbeing. Countries such as China and those in Africa have developed a lot recently. But for rich countries, it seems that there is no correlation between economic and technological progress and contentment.

53. Australia's Export (Explanation) (Audio Available)

Original:

Thanks for this opportunity to speak about Australia's engagement with Asia from the perspective of trade and in particular to say a few words about what trade is doing in this, in this space. And I'm particularly pleased to be addressing trade and investment not just of course because these two things are inextricably linked but also of course because Australia reports to Australia's first ever Minister for trade and investment. Asia's importance to Australia's economy is growing by the day. It is one of the most important factors to consider. When assessing the International conditions for national prosperity Asian demand for our exports has helped Australia manage the global financial crisis better than most other developed economies. In fact, probably better than all other developed economies. An investment from Asia has added to the productive capacity of the economy and to overall productivity in 2013. Seven of our top ten export markets were in Asia and represented 65 percent of our total exports. Asian markets and Australia's geographic proximity are critical not just for our trade ties and our capacity to access important global supply chains, but also to the level of foreign investment in Australia. FDI has grown markedly in Australia over the past decade. In fact it has more than doubled from about two hundred ninety two billion dollars to 630 billion dollars in 2013.

57. Earthquake and Fault (Audio Available)

Original:

Today, we will discuss the relationship between the fault lines in the Earth's crust and an earthquake. This dislocation of the rock occurs from the Earth's surface, seven kilometers to several hundred

kilometers vertically down to the crust. The earthquake's focus is called epicenter which is vertically beneath the interior of the Earth's crust and the energy releases and transfers through epicenter. The faults are the fracture on the Earth's crust. The position of the epicenters can be identified by the faults' maps, looking down from the center of the Earth. It will result in seismic wave which is decreased as it moved away from the epicenter.

58. Pavlov Experiment (Audio Available)

Original:

During this time my goals are going to be to talk about the phenomenon that we may share impart with other animals, and our language and that is emotion. And also talk about some new technology, brain imaging, functional magnetic imaging. And we try to answer some very old questions about how does motivation and emotion work. I'm going to put you with the scenario first and some of you may be familiar with. This was developed by Pavlov over a century years ago. And in this scenario the dog presented with the sound, the dog waits, and then feeds food powder and this happened repeatedly, things starts to happen in the middle of the experiment there. Interesting things start to happen here. Pavlov's study was on the salivation of the dog, the salivation increases more time to paralyzes. But other things happened here, too. You have a dog move around here more, all kinds of things are going on here. What we trying to capture was the experiment 11m going on to describe today is what is going on in the brain to generate that state which we called it competitive state. But you can also think about state in terms of how the dogs' feeling layer, how you feeling about eating lunch today.

59. Invention (Audio Available)

Original:

All of my research, and, that I conducted was my 60 plus graduate students, was motivated by their need to learn, so that we can teach. Of course, in some inventions happened along the way but I've always considered the end, the result. And I always consider that this invention to be byproduct, byproducts of the learning process. The end product for me was always better understanding or when one really succeeded in unifying theory that can help us in teaching the subject. I've also looked at teaching as a vehicle to try new ideas, of new ways to doing things on an intelligent group of learners. That is as the vehicle for the teaching research results. And in my experience, this kind of teaching is the most stimulating and motivating to students. I'll also uncover many interesting research problems in the course of teaching assumption. It is this unity of research and teaching their close connection and the benefits gathered by exercising and the interplay that to me characterizes the successful professor.

60. Springtime (Audio Available)

Original:

The Earth's temperature is rising. And as it does, springtime phenomena—like the first bloom of flowers—are getting earlier and earlier. But rising temperatures aren't the only factor. Urban light pollution is also quickening the coming of spring. "So temperature and light are really contributing to a double

whammy of making everything earlier.” Richard French–Constant, an entomologist at the University of Exeter. He and his colleagues compiled 13 years of data from citizen scientists in the U.K., who tracked the first bud burst of four common trees. Turns out, light pollution—from streetlights in cities, and along roads—pushed bud burst a full week earlier. Way beyond what rising temperatures could achieve. This disruptive timing can ripple through the ecosystem. “The caterpillars that feed on trees are trying to match the hatching of their eggs to the timing of bud burst. Because the caterpillars want to feed on the juiciest and least chemically protected leaves. And it’s not just the caterpillars, of course, that are important. But the knock–on effect is on nesting birds, which are also trying to hatch their chicks at the same time that there’s the maximum number of caterpillars.” So earlier buds could ultimately affect the survival of birds, and beyond. The findings are in the Proceedings of the Royal Society B. The world’s becoming increasingly urbanized, and light pollution is growing—which French–Constant says could trick trees into budding earlier and earlier. But smarter lighting—like LEDs that dial down certain wavelengths—could help. “Perhaps the exciting thing is, if we understand more about how light affects this bud burst, we might be able to devise smarter sort of street lighting that has less red components, and therefore less early bud burst.” Thus keeping springtime an actual springtime phenomenon.

61. Civilization and Art (Audio Available)

Original:

I have said before that you can’t have a civilization that doesn’t have art. When we think about the great civilizations historically, all of them had great production of culture and art, because a society has to be able to observe itself. And the sophistication of the great civilizations were their ability to look at themselves and what allows a society to do that. Are the producers of Art and Culture mirror back to the core of the society? Exactly what is being produced at that moment? How people are thinking of themselves and how individuals are relating to the social structure at that time? Art is the vehicle through which we understand that. Were you to take away art? What would be that mirror? How would we see what we are about? How would we understand what was going on in Paris at the time of the impressionists when people were learning to see in a completely different way. Pre cinematograph appear all of these things are just emerging and here are people looking at the world in a very different way which was considered so radical at the time.

62. London Taxi Drivers (Audio Available)

Original:

But we can really thank the Great Exhibition of 1851 for giving us the world’s premier taxi service, for it was going to this exhibition, and this fabulous exhibition inventions from all around the four corners of the Empire that the visitors were appalled, dismayed and vexed by their journeys to this exhibition because the cabbies of the day, and their horse–drawn carts were absolutely terrible, could not find their way to this exhibition. And, so, a great public outcry, the London Authority sets up Public Carriage Office, which is an organization that still exists. And you can take a short walk to Penton Street up the road. And this Public Carriage office took on the responsibility of licensing all major taxi drivers in London. All taxi drivers from 1851 onwards had to pass what is now known as the London knowledge, was phenomenal knowledge of London. What is the London knowledge? It’s the ability to remember the 25,000 streets, have it all interconnected and all the main arterial roads in and out of London. Cabbies

need to know all this plus a thousand points of specific interest cafes, bars, public offices. They need to know them all as part of their training.

63. Shy Fish (Audio Available)

Original:

But a new study of fish called sticklebacks shows that shy individuals actually prefer to follow fish that are similarly timid. Researchers had trios of sticklebacks with known personalities play follow the leader. The fish were placed in a tank that had some plastic plants at one end and some food hidden at the other. In some of the groups, a bold fish and a shy fish acted as leaders, while another shy fish followed. And in other groups, it was a bold fish that did the following. The researchers recorded whether the follower sallied forth more frequently with the fish that was behaviorally similar or the one that was different. What they found is that shy fish were more likely to emerge from undercover when an equally wary fellow was already out there. Bold follower fish did not seem to care which leader they followed. Of course, no matter which fish a stickleback chose to stick with, the bold fish did lead more expeditions over the course of the experiment than their more retiring friends. That's because the bold fish initiated more trips, regardless of who might be tailing them. The researchers write that "when offered a choice of leaders, sticklebacks prefer to follow individuals whose personality matches their own, but bolder individuals may, nevertheless, be able to impose their leadership, even among shy followers, simply through greater effort."

64. Happiness (Audio Available)

Original:

As Joanne pointed out, only one country, tiny little Bhutan, wedged between China and India, has adopted the Gross National Happiness as the central index of the government policy, and actually has a good deal of success in education and in health and in economic growth and in environmental preservation. They have a rather sophisticated way of measuring the effects of different policies on people's happiness. They are the only country to go that far. But you are now beginning to get other countries interested enough to do kind of white paper policy analyses of happiness research—what effects would it have if we used it more for public policy? You are beginning to get countries like Australia, France, Great Britain, that are considering publishing regular statistics on happiness. So it is beginning to become a subject of greater interest for policymakers and legislators in different advanced countries.

65. Churchill (Explanation) (Audio Available)

Original:

The Right Honorable Sir Winston Leonard Spencer—Churchill, KG, OM, CH, FRS, PC(November 30, 1874 — January 24, 1965) was a British statesman, best known as prime minister of the United Kingdom during the Second World War. At various times a soldier, journalist, author, and politician, Churchill is generally regarded as one of the most important leaders in British and world history. Considered

reactionary on some issues, such as granting independence to Britain's colonies and at times regarded as a self--promoter who changed political parties to further his career, it was his wartime leadership that earned him iconic status. Some of his peacetime decisions, such as restoring the Gold Standard in 1924, were disastrous as was his World War I decision to land troops on the Dardanelles. However, during 1940, when Britain alone opposed Hitler's Nazi Germany in the free world, his stirring speeches inspired, motivated, and uplifted a whole people during their darkest hour. Churchill saw himself as a champion of democracy against tyranny, and was profoundly aware of his own role and destiny. Indeed, he believed that God had placed him on earth to carry out heroic deeds for the protection of Christian civilization and human progress. A providential under standing of history would concur with Churchill's self--understanding. Considered old--fashioned, even reactionary by some people today, he was actually a visionary whose dream was of a united world, beginning with a union of the English--speaking peoples, then embracing all cultures. In his youth, he cut a dashing figure as a cavalry officer as seen in the 1972 film *Young Winston* (directed by Richard Attenborough), but the images of him that are the most widely remembered are as a rather overweight, determined, even pugnacious looking senior statesman as he is depicted to the right.

66. Night Sky Darkness (Audio Available)

Original:

Our friends at the Highlands Museum and Discovery Center in Ashland, Kentucky, asked a very good question. Why is it dark in space? That question is not as simple as it may sound. You might think that space appears dark at night because that is when our side of Earth faces away from the Sun as our planet rotates on its axis every 24 hours. But what about all those other far away suns that appear as stars in the night sky? Our own Milky Way galaxy contains over 200 billion stars, and the entire universe probably contains over 100 billion galaxies. You might suppose that that many stars would light up the night like daytime! Until the 20th century, astronomers didn't think it was even possible to count all the stars in the universe. They thought the universe went on forever. In other words, they thought the universe was infinite. Besides being very hard to imagine, the trouble with an infinite universe is that no matter where you look in the night sky, you should see a star. Stars should overlap each other in the sky like tree trunks in the middle of a very thick forest. But, if this were the case, the sky would be blazing with light. This problem greatly troubled these astronomers and became known as "Olbers' Paradox." A paradox is a statement that seems to disagree with itself. To try to explain the paradox, some 19th century scientists thought that dust clouds between the stars must be absorbing a lot of the starlight so it wouldn't shine through to us. But later scientists realized that the dust itself would absorb so much energy from the starlight that eventually it would glow as hot and bright as the stars themselves. Astronomers now realize that the universe is not infinite. A finite universe—that is, a universe of limited size—even one with trillions and trillions of stars, just wouldn't have enough stars to light up all of space. Although the idea of a finite universe explains why Earth's sky is dark at night, other causes work to make it even darker.

67. Chest X-Ray (Audio Available)

Original:

This is one picture that you probably you all know what it is when you see it. It's a familiar-looking

image. It's something that probably we all have some personal experience with, right? This is a chest X-ray that would be taken in your doctor's office, for example, or a radiologist's office. And it is a good example of Biomedical Engineering and that it takes a physical principle, that is how do X-rays interact with the tissues of your body, and it uses that physics, that physical principle to develop a picture of what's inside your body, so to look inside and see things that you couldn't see without this device. And you'll recognize some parts of the image, you can see the ribcage here, the bones you can see the heart is the large bright object down here. If you, have good eyesight from the distance, you can see the vessels leading out of the heart and into the lungs, and the lungs are darker spaces within the ribcage. (APEUni Website / App RL #143)

68. Licking and Grooming (Audio Available)

Original:

So the way a mother rat takes care of its pups is by licking and grooming, nipple switching an arch back nursing. So the rats that do a lot of licking and grooming and their last rats that rule very little. But most rats are in between. So that resembles a human human behaviour as well, right, you have mothers that are highly mothering and mothers that couldn't care less and most mothers are somewhere in between. So if you look at these rats. So all you do you observe them and put them in separate cages. So you put the high lickers in one cage not the mothers, but the offspring and the low lickers in another cage and then you let them grow and they're adults now, their mothers are long buried and you look in the brain and you see that those who had high licking mothers express a lot of glucocorticoid receptor, gene and though so our lawmakers express know that reflects a number of factors and that results in a different stress response, but this is not the only difference. We found later on there are hundreds of genes that are differently expressed. So if you get in a mutation, you know polymorphism once in a million. Here, just the motherly laughing just hundreds of genes in one shot and it changes them in a very stable way that you can look at the old rat and you can say whether it was licked or not. But you can also save by behavior. So if you walk to the cages to the room the rats that were poorly lit are highly anxious, hard to handle, aggressive, and , and the rats that were very well handled as as off as little pups. They are much more relaxed much easier to handle. So you know, like every technician in the lab knows looking at the adult rat how it was licked when it was a little tough any question , of course, mechanism , how does this work?

69. Bomb Calorimeter (Audio Available)

Original:

This is a bomb calorimeter; this is the actual piece of equipment that researchers used to calculate the energy content of either biodiesel or maybe even the potato chips that you had for lunch today. When they calculate the amount of energy. They're going to calculate it in heat unites which would either be joules or calories. I want you to look inside the bomb calorimeter inside here, you can see that there's a silver bucket water goes all in here and this is actually the bomb is the smaller silver cylinder what you do is put your fuel sample in there then these two electrodes are connected to the bomb. These provide the spark that will ignite your sample when your sample burns or combust that gives off energy. So how is the energy collected or how did a scientist figure out how much energy is being given off. Well, it's a closed system, there's a lid here that goes on top of this calorimeter and what's in here in the lid is a stirrer. The stir is going to stir the water. That's in this big pool here so that the heat given off from the

sample is going to warm the water in a uniform way. This is the temperature probe, this goes down in the water also and measures the change in temperature because as the sample is burned, it will give off heat and the temperature the water will increase. So the lid goes on the sample is prepared. The last thing that you need to make a combustion reaction happen is oxygen and at some point during the process, some oxygen is added by a tank. That's connected to the calorimeter here. So we are going to burn a sample of the biodiesel that you've prepared and get some feedback on the energy content of it. You'll be able to use this to compare it to petroleum-based fuels like octane.

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

70. Brain_development (Audio Available)

Original:

The key to forming strong brain architecture is what's known as "serve and return" interaction with adults. In this developmental game, new neural connections form in the brain as young children instinctively serve through babbling, facial expressions, and gestures, and adults return the serve, responding in a very directed, meaningful way. It starts very early in life when a baby coos and the adults interacts and directs the baby's attention to a face or hand. This interaction forms the foundation of brain architecture upon which all future development will be built. It helps create neural connections between all the different areas of the brain, building the emotional and cognitive skills children need in life. For example, here's how it works for literacy and language skills. When the baby sees an object, the adult says its name. This makes connections in the baby's brain between particular sounds and their corresponding objects. Later, adults show young children that those objects and sounds can also be represented by marks on a page. With continued support from adults, children then learn how to decipher writing and, eventually, to write themselves. Each stage builds on what came before. Ensuring that children have adult caregivers who consistently engage in serve and return interaction, beginning in infancy, builds the foundation in the brain for all the learning, behavior, and health that follow.

71. Overqualified Worker (Audio Available)

Original:

If your recruiting efforts attract job applicants with too much experience—a near certainty in this weak labor market—you should consider a response that runs counter to most hiring managers' MO: Don't reject those applicants out of hand. Instead, take a closer look. New research shows that overqualified workers tend to perform better than other employees, and they don't quit any sooner. Furthermore, a simple managerial tactic—empowerment—can mitigate any dissatisfaction they may feel. The prejudice against too-good employees is pervasive. Companies tend to prefer an applicant who is a 'perfect fit' over someone who brings more intelligence, education, or experience than needed. On the surface, this bias makes sense: Studies have consistently shown that employees who consider themselves overqualified exhibit higher levels of discontent. For example, overqualification correlated well with job dissatisfaction in a 2008 study of 156 call-center reps by Israeli researchers Saul Fine and Baruch Nevo. And unlike discrimination based on age or gender, declining to hire overqualified workers is perfectly legal. But even before the economic downturn, a surplus of overqualified candidates was a global problem, particularly in developing economies, where rising education levels are giving workers more skills than are needed to supply the growing service sectors. If managers can get beyond the conventional wisdom, the growing pool of too-good applicants is a great opportunity. Berrin Erdogan

and Talya N. Bauer of Portland State University in Oregon found that overqualified workers' feelings of dissatisfaction can be dissipated by giving them autonomy in decision making. At stores where employees didn't feel empowered, 'overeducated' workers expressed greater dissatisfaction than their colleagues did and were more likely to state an intention to quit. But that difference vanished where self-reported autonomy was high.

(APEUni Website / App RL #145)

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

72. Brain (Audio Available)

Original:

The brain is basically built from the bottom up first the brain builds basic circuits that are responsible for basic skills, and then more complex circuits are built on top of those basic circuits as we develop more complex skills. Biologically, the brain is prepared to be shaped by experience. It's expecting the experiences that a young child has to literally influence the formation of its circuitry it's built into our biology. The interaction between genetics and experience that shapes brain architecture is embedded in a reciprocal relationship, the relationships that children have with the adults in their lives. And by that we mean what we refer to as the serve-and-return nature of children's interaction with their adults development. And the impact of experience on development is not a one-way street. It's a back-and-forth interaction. The brain is a highly integrated organ which has multiple sections that specialize in different kind of processes, so we have parts of the brain that are involved more in cognitive function and other parts that are involved in processing of emotion and parts involved in seeing and hearing. So if a child is emotionally kind of...well...put together and socially competent, that will affect more positive and productive learning. And if a child is preoccupied with fears or anxiety or is dealing with considerable stress no matter how intellectually gifted that child might be, his or her learning is going to be impaired by that kind of emotional interference.

73. Wind Turbine (Audio Available)

Original:

Wind turbine is a device that will convert wind into mechanical movement, which we can use to power water pump or electricity generator. Now the power that the turbine creates is obviously depended on the wind speed, it also depended obviously on the number of sails, the area of the sails and the angle of the sails makes to the wind. So you can imagine if the turbine blades flat onto the wind, the wind's going to just bend it, if there is slight angle when the wind hits it, it's going to turn the blades. We can use that for powering things. Now, we're going to have a go, making some of the very, very simple paper windmills, a sort of things that you can make from the bits and pieces lying around home, and use that to drive very small generator to power electronic devices.

74. Infinite Monkey Theorem (Audio Available)

Original:

This illustration often used is the one that the monkeys and the typewriters. Ok, we have a monkey sitting at a typewriter and the claim here is basically if you leave chance in time long enough you will get

life, don't worry about it, yes, it's strange, yes, it's wonderful, but leave enough matter 600 million years on earth and you will have life. So, the monkey sitting at the typewriter the chances are eventually he produces the complete works of Shakespeare so what's the problem. So, there's no problem. There's no issue, right? You just leave it long enough and you'll find. And one key striker seconds, the monkey might well eventually get to you the complete works of Shakespeare but he doesn't manage to do it in 600 million years. So, what I decided to do is to run the numbers. I, instead of saying typing the complete work of Shakespeare, I just run the numbers for how long would it take a monkey typing one key striker a second. To type "to be or not to be that is the question". Right? On average how long is it gonna take my monkey friend one keystroke a second. I don't know how you think it would be. Maybe you could have a guess. Would it be less or more than 600 million years, which is the period life on earth isn't supposed to have emerge within and when I run the numbers" to be or not to be is the question' takes 12.6 trillion trillion trillion years to type just that phrase and a DNA string has got as much as information the encyclopedia Britannica. Are we saying that something of that complexity emerges by chance undirected within 600 million years? Again, it's mathematically possible but it's so incredibly unlikely that it would have that it tilts me in favour of the Christian story in which God creating life, simply a question of saying let that be and there was.

75. Trade-off Triangle (Audio Available)

Original:

Well, it's about whether you can achieve a win-win solution, whether you can achieve economic growth which brings wealth in order to cut poverty without damaging the biodiversity. And the argument is that if you want to protect biodiversity, you have to focus on that as a goal; but if you do that, you have... you run the risk of hurting the poor and you also run the risk of inconveniencing and reducing the economic growth. We use the developed and industrialized countries to see this argument, this axis argued about with, let us say, a government wishing to start drilling for oil in place X which is full of wildlife, and wildlife conservation society is urging them not to on the grounds that it's a wilderness refuge. We use to that debate. What I'm saying is that in the developing world there's a third axis and it's a complex one.

76. Freud (Audio Available)

Original:

For better or worse, we live in a world profoundly affected by Sigmund Freud. If I had to ask you to name a famous psychologist, the answer of most of you would be Freud. He was the most famous psychologist ever and he had a profound influence on the 20th and 21st century. Some biographical information: he was born in the 1850s. He spent most of his life in Vienna, Austria, and, but he died in London and he escaped to London soon after retreating there at the beginning of World War Two as the Nazis began to occupy where he lived. He was one of the most famous scholars ever but he was not known for any single discovery. Instead, he was known for the development of an encompassing theory of mind, one that he developed over the span of many decades. He was in his time extremely well known, a celebrity recognized on the street, and throughout his life. He was a man of extraordinary energy and productivity, in part because he was a very serious cocaine addict, but also just in general. He was just a high-energy sort of person.

Answer: Aqualung (APEUni Website / App ASQ #1658) [\(Audio Available\)](#)

8. What do you call the dark shape your body make on the ground in the sun?

Answer: Shadow (APEUni Website / App ASQ #1657) [\(Audio Available\)](#)

9. What is the conservation of non-renewable energy?

Answer: Reuse / recycling (APEUni Website / App ASQ #1656) [\(Audio Available\)](#)

10. How often does an annual event happen?

Answer: Once a year (APEUni Website / App ASQ #1655) [\(Audio Available\)](#)

11. If a driver drives the car, what does a pilot do to the plane?

Answer: Fly / flies (APEUni Website / App ASQ #1654) [\(Audio Available\)](#)

12. What will happen to a fragile item if it is not handled carefully?

Answer: Smash / break / broken (APEUni Website / App ASQ #1653) [\(Audio Available\)](#)

13. Where does a pilot sit in an airplane?

Answer: Cockpit (APEUni Website / App ASQ #1652) [\(Audio Available\)](#)

14. What type of work is a sabbatical a lengthy time away from?

Answer: Teaching (APEUni Website / App ASQ #1651) [\(Audio Available\)](#)

15. What do we call a statement presented in court by a defendant or a lawyer?

Answer: Plea (APEUni Website / App ASQ #1650) [\(Audio Available\)](#)

16. What is the straight line between the center of a circle and any point on its outer edge?

Answer: Radius (APEUni Website / App ASQ #1649) [\(Audio Available\)](#)

17. Where is a suspect convicted of a crime?

Answer: Court (APEUni Website / App ASQ #1648) [\(Audio Available\)](#)

18. What do we call a slight shaking movement in a part of the body?

Answer: Tremor / quiver / shiver / tremble (APEUni Website / App ASQ #1647) [\(Audio Available\)](#)

19. What do we call the weather conditions like rain, hail, etc.?

Answer: Precipitation (APEUni Website / App ASQ #1646) [\(Audio Available\)](#)

20. What do we call a group of people who sing together?

Answer: Choir / chorus (APEUni Website / App ASQ #1645) [\(Audio Available\)](#)

21. What is the occupational title for a person who composes novels?

Answer: Novelist (APEUni Website / App ASQ #1644) [\(Audio Available\)](#)

22. What do we call a person who trains a team in a particular sport?

Answer: Coach (APEUni Website / App ASQ #1643) [\(Audio Available\)](#)

23. What geometric shape are circumference, diameter and radius related with?

Answer: Circle (APEUni Website / App ASQ #1642) [\(Audio Available\)](#)

24. What is the synonym of 'destiny'?

Answer: Fate / fortune (APEUni Website / App ASQ #1641) [\(Audio Available\)](#)

25. What do we call the machine that provides drinking water in an office?

Answer: Water cooler / water dispenser (APEUni Website / App ASQ #1640) [\(Audio Available\)](#)

26. What do we call a private teacher who gives you lessons outside school hours?

Answer: Tutor (APEUni Website / App ASQ #1639) [\(Audio Available\)](#)

27. What will happen to a balloon if you inflate it beyond its capacity?

Answer: Blast / burst (APEUni Website / App ASQ #1638) [\(Audio Available\)](#)

28. What is the process you do when you are not satisfied with a verdict of your lawsuit?

Answer: Appeal (APEUni Website / App ASQ #1637) [\(Audio Available\)](#)

29. What do we call the industry connected with getting valuable minerals from the ground?

Answer: Mining (APEUni Website / App ASQ #1531) [\(Audio Available\)](#)

30. What do we call a vehicle equipped for carrying the injured or sick?

Answer: Ambulance (APEUni Website / App ASQ #1530) [\(Audio Available\)](#)

31. What do we call apartment, flat and house?

Answer: Properties (APEUni Website / App ASQ #1529) [\(Audio Available\)](#)

32. What object has three legs and can support a camera?

Answer: Tripod (APEUni Website / App ASQ #1526) [\(Audio Available\)](#)

33. What does the color green help for?

Answer: Sight / eyesight (APEUni Website / App ASQ #1524) [\(Audio Available\)](#)

34. What do we call a young dog?

Answer: Puppy (APEUni Website / App ASQ #1523) [\(Audio Available\)](#)

35. Where do we try on a piece of clothing in a cloths shop?

Answer: Fitting room / changing room (APEUni Website / App ASQ #1515) [\(Audio Available\)](#)

36. How many continents are there in the world?

Answer: Seven (APEUni Website / App ASQ #1496) [\(Audio Available\)](#)

37. What do we call a pleasant song used for causing children to sleep?

Answer: Lullaby (APEUni Website / App ASQ #1494) [\(Audio Available\)](#)

38. What do we call a person who tells lies?

Answer: Liar (APEUni Website / App ASQ #1486) [\(Audio Available\)](#)

39. What do we call the state of sharing the same opinion?

Answer: Agreement / consensus (APEUni Website / App ASQ #1479) [\(Audio Available\)](#)

40. What do you call the medicine that is used against headache?

Answer: Pain killer / painkiller (APEUni Website / App ASQ #363) [\(Audio Available\)](#)

41. **Points:**

Answer: (APEUni Website / App ASQ #1460) [\(Incomplete\)](#)

42. What do we call the bags that contain possessions and people take with when traveling?

Answer: Luggage / baggage / suitcase (APEUni Website / App ASQ #1459) [\(Audio Available\)](#)

43. What do you call the brother of your father or mother?

Answer: Uncle (APEUni Website / App ASQ #1458) [\(Audio Available\)](#)

44. What is a text that you send to your friends to invite them to a party?

Answer: Invitation (APEUni Website / App ASQ #1455) [\(Audio Available\)](#)

45. What part of the body propels a flying bird in the air?

Answer: Wing (APEUni Website / App ASQ #1413) [\(Audio Available\)](#)

46. What do we call programs that run on a computer?

Answer: Software (APEUni Website / App ASQ #1393) [\(Audio Available\)](#)

47. What is the top surface inside the room?

Answer: Ceiling (APEUni Website / App ASQ #1359) [\(Audio Available\)](#)

48. Where do marine animals live?

Answer: Sea / ocean (APEUni Website / App ASQ #1332) [\(Audio Available\)](#)

49. What do you call your cousin's father?

Answer: Uncle (APEUni Website / App ASQ #1331) [\(Audio Available\)](#)

50. What do we call drawings or writing on a wall, especially in a public place?

Answer: Graffiti (APEUni Website / App ASQ #1257) [\(Audio Available\)](#)

51. What do we call the people who move from one country to another country, usually for work or a better life?

Answer: Migrants (APEUni Website / App ASQ #1192) [\(Audio Available\)](#)

52. How do we describe the food that is not cooked?

Answer: Raw / uncooked (APEUni Website / App ASQ #1143) [\(Audio Available\)](#)

53. What do we call the one hundredth anniversary of an event?

Answer: Centenary / centennial (APEUni Website / App ASQ #1102) [\(Audio Available\)](#)

54. What do we call the line between a sunset and the sea?

Answer: Sea–sky–line / horizon (APEUni Website / App ASQ #90) [\(Audio Available\)](#)

55. Where do we conduct experiments?

Answer: Laboratory / lab (APEUni Website / App ASQ #992) [\(Audio Available\)](#)

56. Which part of our body is related to the word "optical"?

Answer: Eye (APEUni Website / App ASQ #988) [\(Audio Available\)](#)

57. When we say someone is doing the B.A. in history or literature in the university, what does B.A. stand for?

Answer: Bachelor of arts (APEUni Website / App ASQ #986) [\(Audio Available\)](#)

58. **Points:**

Answer: (APEUni Website / App ASQ #984) [\(Incomplete\)](#)

59. When you bake a cake, what do you put the cake into?

Answer: Oven (APEUni Website / App ASQ #980) [\(Audio Available\)](#)

60. What is the barrier that can prevent floods from damaging our home?

Answer: Dam (APEUni Website / App ASQ #979) [\(Audio Available\)](#)

61. What is the antonym of 'entrance'?

Answer: Exit (APEUni Website / App ASQ #978) [\(Audio Available\)](#)

62. What includes everything in the world such as stars and planets?

Answer: Universe / cosmos (APEUni Website / App ASQ #977) [\(Audio Available\)](#)

63. What does the word 'T V' stand for?

Answer: Television (APEUni Website / App ASQ #974) [\(Audio Available\)](#)

64. Who flies an airplane?

Answer: Pilot (APEUni Website / App ASQ #957) [\(Audio Available\)](#)

65. What's the calendar that follows the movement of the moon?

Answer: Lunar calendar (APEUni Website / App ASQ #956) [\(Audio Available\)](#)

66. What do we call a person who leaves college before finishing the studies?

Answer: Dropout (APEUni Website / App ASQ #952) [\(Audio Available\)](#)

67. What do we call a political institution or body that is responsible for a country?

Answer: Government (APEUni Website / App ASQ #949) [\(Audio Available\)](#)

68. What is 'BA' for, such as history and literature?

Answer: Bachelor of arts (APEUni Website / App ASQ #948) [\(Audio Available\)](#)

69. What part of a room is over your head?

Answer: Ceiling (APEUni Website / App ASQ #944) [\(Audio Available\)](#)

70. What do we call buying and transporting goods from another country?

Answer: Import (APEUni Website / App ASQ #924) [\(Audio Available\)](#)

71. What do we call a short piece of writing containing the main ideas in a document?

Answer: Abstract / summary (APEUni Website / App ASQ #923) [\(Audio Available\)](#)

72. What do we call the head of a court?

Answer: Judge (APEUni Website / App ASQ #921) [\(Audio Available\)](#)

73. What is the room in which you keep things when you don't need them?

Answer: Storeroom (APEUni Website / App ASQ #904) [\(Audio Available\)](#)

74. What do we call a material that helps to insulate fire?

Answer: Fireproof material (APEUni Website / App ASQ #903) [\(Audio Available\)](#)

75. What do we call a set of answers to exercises or problems?

Answer: Key (APEUni Website / App ASQ #902) [\(Audio Available\)](#)

76. What is the verb that describes traveling on boat?

Answer: Cruise / voyage (APEUni Website / App ASQ #901) [\(Audio Available\)](#)

77. Where do passengers stand waiting for a train in the railway station?

Answer: Platform (APEUni Website / App ASQ #229) [\(Audio Available\)](#)

78. What is the process of choosing a person for a position by voting?

Answer: election (APEUni Website / App ASQ #898) [\(Audio Available\)](#)

79. What do we call a person undergoing treatments in hospital?

Answer: patient (APEUni Website / App ASQ #888) [\(Audio Available\)](#)

80. What fruit category includes orange, mandarin and lemon?

Answer: citrus (APEUni Website / App ASQ #879) [\(Audio Available\)](#)

81. What is the shape of the earth's orbit?

Answer: oval / ellipse (APEUni Website / App ASQ #872) [\(Audio Available\)](#)

82. What does the earth revolve around?

Answer: sun (APEUni Website / App ASQ #871) [\(Audio Available\)](#)

83. What do we call a person who pays rent to the landlord?

Answer: lessee / tenant (APEUni Website / App ASQ #866) [\(Audio Available\)](#)

84. What do we call a person who is registered for the election?

Answer: candidate (APEUni Website / App ASQ #858) [\(Audio Available\)](#)

85. What do we call the joint that joins the leg to the rest of the body?

Answer: hip joint (APEUni Website / App ASQ #834) [\(Audio Available\)](#)

86. What do we call someone who studies languages?

Answer: linguist (APEUni Website / App ASQ #833) [\(Audio Available\)](#)

87. What do we call a group of mountains such as the Himalayas?

Answer: range (APEUni Website / App ASQ #832) [\(Audio Available\)](#)

88. We call numbers like one, three, five odd numbers, then what do we call numbers like two, four, six?

Answer: even numbers (APEUni Website / App ASQ #816) [\(Audio Available\)](#)

89. What do we call one thousand years?

Answer: millennium (APEUni Website / App ASQ #815) [\(Audio Available\)](#)

90. What do we call people who help others get insurance?

Answer: insurance agents / insurance brokers (APEUni Website / App ASQ #812) [\(Audio Available\)](#)

91. What do we call one of four equal parts of something?

Answer: quarter (APEUni Website / App ASQ #657) [\(Audio Available\)](#)

92. What do we call a car that needs to be charged?

Answer: electric car (APEUni Website / App ASQ #802) [\(Audio Available\)](#)

93. What is the couple's formal relationship called?

Answer: marriage (APEUni Website / App ASQ #797) [\(Audio Available\)](#)

94. We call a person used to using the right hand a right-hander, and what do we call a person if the left hand?

Answer: left-hander (APEUni Website / App ASQ #791) [\(Audio Available\)](#)

95. What is the second month of the year?

Answer: february (APEUni Website / App ASQ #783) [\(Audio Available\)](#)

96. What do we call the selling and transporting of goods to another country?

Answer: export / exportation (APEUni Website / App ASQ #778) [\(Audio Available\)](#)

97. Where are goods stored before sale?

Answer: warehouse / inventory / stock (APEUni Website / App ASQ #777) [\(Audio Available\)](#)

98. In sport, what do we call the cloths that we wear and end above the knee?

Answer: Shorts (APEUni Website / App ASQ #776) [\(Audio Available\)](#)

99. What do we call a child who will soon be a teenager?

Answer: preteen / tween (APEUni Website / App ASQ #775) [\(Audio Available\)](#)

100. What do we call a sudden shake of the Earth's surface?

Answer: Earthquake (APEUni Website / App ASQ #773) [\(Audio Available\)](#)

101. What do you call a person who lives next to your house?

Answer: neighbor (APEUni Website / App ASQ #768) [\(Audio Available\)](#)

102. If Monday is the first day, what day is the forth day?

Answer: thursday (APEUni Website / App ASQ #139) [\(Audio Available\)](#)

103. What is the study of religion called?

Answer: theology (APEUni Website / App ASQ #760) [\(Audio Available\)](#)

104. What do people usually use to cut food?

Answer: knife (APEUni Website / App ASQ #755) [\(Audio Available\)](#)

105. What do we call a period of 1000 years?

Answer: millennium (APEUni Website / App ASQ #275) [\(Audio Available\)](#)

106. What do you call a person who studies the weather?

Answer: Meteorologist / climatologist (APEUni Website / App ASQ #748) [\(Audio Available\)](#)

107. **Points:** What do we call a long narrow piece of land almost completely surrounded by water?

Answer: peninsula (APEUni Website / App ASQ #746) [\(Incomplete\)](#)

108. What kind of soup utensils do you use at table?

Answer: spoon / spoons (APEUni Website / App ASQ #744) [\(Audio Available\)](#)

109. What do you call a statue or a building that is dedicated in memory of someone?

Answer: Monument / memorial (APEUni Website / App ASQ #740) [\(Audio Available\)](#)

110. What kind of food that vegetarians do not eat?

Answer: meat (APEUni Website / App ASQ #370) [\(Audio Available\)](#)

111. **Points:** There are three eggs, what is the location of the special egg?

Answer: on the right (there is a picture including three eggs: the left two have eggshells while the right one does not (APEUni Website / App ASQ #735) [\(Incomplete\)](#)

112. **Points:** What is this instrument?

Answer: Telescope (APEUni Website / App ASQ #638) [\(Incomplete\)](#)

113. What do pedestrians move by?

Answer: foot / feet (APEUni Website / App ASQ #626) [\(Audio Available\)](#)

114. What is the opposite of north?

Answer: south (APEUni Website / App ASQ #732) [\(Audio Available\)](#)

115. What is the term used to describe a period of seven days?

Answer: week (APEUni Website / App ASQ #730) [\(Audio Available\)](#)

116. Which organ is the blood pumped from?

Answer: heart (APEUni Website / App ASQ #174) [\(Audio Available\)](#)

117. What is the section in the library where books can be read but cannot be borrowed?

Answer: reserve collection (APEUni Website / App ASQ #726) [\(Audio Available\)](#)

118. What organ on your face do you breathe with?

Answer: nose (APEUni Website / App ASQ #723) [\(Audio Available\)](#)

119. How do you describe a line that segments a circle?

Answer: chord (APEUni Website / App ASQ #722) [\(Audio Available\)](#)

120. What do humans and animals need to inhale for survival?

Answer: air / oxygen (APEUni Website / App ASQ #721) [\(Audio Available\)](#)

121. What can bring astronauts to space?

Answer: spacecraft (APEUni Website / App ASQ #720) [\(Audio Available\)](#)

122. What is the opposite direction of sunrise?

Answer: west (APEUni Website / App ASQ #719) [\(Audio Available\)](#)

123. What do we use to launch a space shuttle?

Answer: rocket / booster (APEUni Website / App ASQ #718) [\(Audio Available\)](#)

124. What do we call the treatment in which people use needles to ease others' pain?

Answer: acupuncture (APEUni Website / App ASQ #717) [\(Audio Available\)](#)

125. If a building is one thousand meters high, from where do we measure the height?

Answer: sea level (APEUni Website / App ASQ #228) [\(Audio Available\)](#)

126. If someone tells something funny to you, what is your reaction?

Answer: laugh / laughing (APEUni Website / App ASQ #716) [\(Audio Available\)](#)

127. What is the act of reusing waste materials?

Answer: recycling (APEUni Website / App ASQ #715) [\(Audio Available\)](#)

128. Which part of our body does a gastroscope look into?

Answer: stomach (APEUni Website / App ASQ #714) [\(Audio Available\)](#)

129. What do you call a word formed from the first letters of other words?

Answer: acronym (APEUni Website / App ASQ #708) [\(Audio Available\)](#)

130. How often is a centennial celebrated?

Answer: one hundred years (APEUni Website / App ASQ #698) [\(Audio Available\)](#)

131. What do we call a machine which carries people from one floor to another in a high building?

Answer: lift / lyft / elevator (APEUni Website / App ASQ #251) [\(Audio Available\)](#)

132. What do you call the people who work on boats?

Answer: sailors / mariner (APEUni Website / App ASQ #697) [\(Audio Available\)](#)

133. What does 'subterranean' mean?

Answer: underground (APEUni Website / App ASQ #696) [\(Audio Available\)](#)

134. What is the boat that carries people from one side of a river to the other?

Answer: ferry (APEUni Website / App ASQ #692) [\(Audio Available\)](#)

135. What do you call the people who visit sightseeing locations?

Answer: tourists (APEUni Website / App ASQ #691) [\(Audio Available\)](#)

136. What do you call the buildings of a university or college and the land around them?

Answer: campus (APEUni Website / App ASQ #689) [\(Audio Available\)](#)

137. What do you call the persons who study religions?

Answer: theologians / theologists (APEUni Website / App ASQ #686) [\(Audio Available\)](#)

138. If an event happens annually, how often does it happen?

Answer: once a year (APEUni Website / App ASQ #685) [\(Audio Available\)](#)

139. What is the line where the sky meets the land?

Answer: horizon / skyline (APEUni Website / App ASQ #682) [\(Audio Available\)](#)

140. What clothing do people wear, such as students or nurses, to show that they belong to the same organizations?

Answer: uniform (APEUni Website / App ASQ #679) [\(Audio Available\)](#)

141. In what room do scientists usually do experiments?

Answer: laboratory (APEUni Website / App ASQ #678) [\(Audio Available\)](#)

142. What do we call the subject that studies weather and temperature?

Answer: meteorology / climatology (APEUni Website / App ASQ #669) [\(Audio Available\)](#)

143. What will you hear after a flash of lightning?

Answer: thunder (APEUni Website / App ASQ #654) [\(Audio Available\)](#)

144. What do we call a baby cat?

Answer: Kitten / kitty (APEUni Website / App ASQ #645) [\(Audio Available\)](#)

145. What is the horizontal line that separates the globe into two halves?

Answer: equator (APEUni Website / App ASQ #642) [\(Audio Available\)](#)

146. What is the nominal form of the wide?

Answer: width (APEUni Website / App ASQ #641) [\(Audio Available\)](#)

147. Which day of the week starts with 'th'?

Answer: thursday (APEUni Website / App ASQ #84) [\(Audio Available\)](#)

148. When trains or cars need to go through a mountain, where do they enter the mountain?

Answer: tunnel (APEUni Website / App ASQ #629) [\(Audio Available\)](#)

149. What does ASAP mean?

Answer: as soon as possible (APEUni Website / App ASQ #609) [\(Audio Available\)](#)

150. What do you call the document that tells your qualification and work experience?

Answer: cv / curriculum vitae / resume (APEUni Website / App ASQ #606) [\(Audio Available\)](#)

151. What device do you type on when you use a computer?

Answer: keyboard (APEUni Website / App ASQ #280) [\(Audio Available\)](#)

152. Where is a criminal kept as punishment?

Answer: prison / jail (APEUni Website / App ASQ #605) [\(Audio Available\)](#)

153. What do we call a person's move to a more important job or rank in a company?

Answer: promotion (APEUni Website / App ASQ #603) [\(Audio Available\)](#)

154. Which one in the four seasons has the lowest temperature?

Answer: winter (APEUni Website / App ASQ #602) [\(Audio Available\)](#)

155. What does sub-Mediterranean refer to?

Answer: Climate (APEUni Website / App ASQ #592) [\(Audio Available\)](#)

156. Whose job is making and repairing wooden objects and structures?

Answer: carpenter (APEUni Website / App ASQ #587) [\(Audio Available\)](#)

157. What do you call students in universities who have not yet graduated?

Answer: undergraduates (APEUni Website / App ASQ #586) [\(Audio Available\)](#)

158. What do we call people who work on ship or plane?

Answer: crew (APEUni Website / App ASQ #583) [\(Audio Available\)](#)

159. Jack is having a presentation on Wednesday. Today is Tuesday. When will Jack have his speech, today, tomorrow or next week?

Answer: tomorrow (APEUni Website / App ASQ #580) [\(Audio Available\)](#)

160. What is the frozen type of water called?

Answer: ice (APEUni Website / App ASQ #579) [\(Audio Available\)](#)

161. Who is the Swiss greatest scientist in physics?

Answer: einstein (APEUni Website / App ASQ #423) [\(Audio Available\)](#)

162. What do we call famous people?

Answer: celebrity (APEUni Website / App ASQ #577) [\(Audio Available\)](#)

163. What is the highest position in the embassy?

Answer: ambassador (APEUni Website / App ASQ #576) [\(Audio Available\)](#)

164. What device is used to measure the height of mountains?

Answer: altimeter (APEUni Website / App ASQ #575) [\(Audio Available\)](#)

165. In the solar system, which heavenly body produces sunshine?

Answer: sun (APEUni Website / App ASQ #506) [\(Audio Available\)](#)

166. What is the long speech that is spoken by only one actor in a film or play?

Answer: Monologue (APEUni Website / App ASQ #574) [\(Audio Available\)](#)

167. If you have a toothache, who will you go to?

Answer: dentist (APEUni Website / App ASQ #573) [\(Audio Available\)](#)

168. What is the legal document protecting someone's intellectual property?

Answer: patent (APEUni Website / App ASQ #565) [\(Audio Available\)](#)

169. What thing do postgraduate students have that undergraduate students don't?

Answer: bachelor degree (APEUni Website / App ASQ #563) [\(Audio Available\)](#)

170. What do people hold overhead when it is raining?

Answer: umbrella (APEUni Website / App ASQ #562) [\(Audio Available\)](#)

171. What is the process where the color becomes lighter and lighter when exposed to sunlight for a long

time?

Answer: fade (APEUni Website / App ASQ #559) [\(Audio Available\)](#)

172. How do you call some one with no hair?

Answer: bald (APEUni Website / App ASQ #558) [\(Audio Available\)](#)

173. What is the thing used for sun protection in summer?

Answer: Sunscreen / sunblock / suncream / suntan lotion (APEUni Website / App ASQ #556) [\(Audio Available\)](#)

174. What is the act of jumping into the water?

Answer: diving (APEUni Website / App ASQ #553) [\(Audio Available\)](#)

175. What is a word or expression that has the same or nearly the same meaning as another in the same language?

Answer: synonym (APEUni Website / App ASQ #364) [\(Audio Available\)](#)

176. What do we call the pen that receive its ink from its reservoir?

Answer: fountain pen (APEUni Website / App ASQ #552) [\(Audio Available\)](#)

177. Apart from coffee and hot chocolate, what beverages also contain caffeine?

Answer: Tea / coke / cocoa (APEUni Website / App ASQ #547) [\(Audio Available\)](#)

178. What is the musical instrument which has both pedals and strings?

Answer: harp / piano (APEUni Website / App ASQ #546) [\(Audio Available\)](#)

179. Where can we find the page numbers of books?

Answer: footer (APEUni Website / App ASQ #545) [\(Audio Available\)](#)

180. Which part of our bodies do we use nasal spray in?

Answer: nose / nostril (APEUni Website / App ASQ #356) [\(Audio Available\)](#)

181. What is the occupation that transfers one language to another language?

Answer: translator (APEUni Website / App ASQ #543) [\(Audio Available\)](#)

182. What do you throw underwater to keep ships staying on rivers or oceans without drifting away?

Answer: anchor (APEUni Website / App ASQ #542) [\(Audio Available\)](#)

183. How do you call the movements that the babies move by using hands and legs?

Answer: Crawling / crawl (APEUni Website / App ASQ #541) [\(Audio Available\)](#)

184. What is the opposite of division in mathematics?

Answer: multiplication (APEUni Website / App ASQ #320) [\(Audio Available\)](#)

185. What force makes humans stay on the earth?

Answer: gravity (APEUni Website / App ASQ #537) [\(Audio Available\)](#)

186. What instrument would scientists use to examine very small life forms?

Answer: microscope (APEUni Website / App ASQ #532) [\(Audio Available\)](#)

187. What is the habitat of camels?

Answer: desert (APEUni Website / App ASQ #531) [\(Audio Available\)](#)

188. How many sides are there in a pentagon?

Answer: five (APEUni Website / App ASQ #529) [\(Audio Available\)](#)

189. What do we call the person who plays musical instruments as a job?

Answer: musician (APEUni Website / App ASQ #527) [\(Audio Available\)](#)

190. Where do people go to watch plays?

Answer: theatre / theater (APEUni Website / App ASQ #526) [\(Audio Available\)](#)

191. What do we call the ship that runs underwater?

Answer: submarine (APEUni Website / App ASQ #521) [\(Audio Available\)](#)

192. What subject involves the study of the Periodic Table?

Answer: chemistry (APEUni Website / App ASQ #520) [\(Audio Available\)](#)

193. What is the magazine that is dedicated to academic news?

Answer: journal / academic journal (APEUni Website / App ASQ #519) [\(Audio Available\)](#)

194. How many years are there in a bicentennial?

Answer: two hundred (APEUni Website / App ASQ #516) [\(Audio Available\)](#)

195. What do we call the thing we use to put into the lock and open it?

Answer: key (APEUni Website / App ASQ #515) [\(Audio Available\)](#)

196. What is the device that shows the time of the day according to the shadow of sunlight?

Answer: sundial (APEUni Website / App ASQ #513) [\(Audio Available\)](#)

197. Tomorrow's lecture has been cancelled. If today is Tuesday, then on which day is the lecture cancelled?

Answer: wednesday (APEUni Website / App ASQ #512) [\(Audio Available\)](#)

198. How do you call the doctor who treats sick animals?

Answer: vet / veterinarian (APEUni Website / App ASQ #508) [\(Audio Available\)](#)

199. What do we call the legal document that states how people's property should be allocated after their deaths?

Answer: testament / will (APEUni Website / App ASQ #505) [\(Audio Available\)](#)

200. What do we call the extra performance that actors give?

Answer: encore (APEUni Website / App ASQ #383) [\(Audio Available\)](#)

201. What do you call the government where the power is concentrated in the hands of one person?

Answer: autocracy / dictatorship (APEUni Website / App ASQ #503) [\(Audio Available\)](#)

202. What is the place you share bedroom with your classmates?

Answer: dormitory (APEUni Website / App ASQ #494) [\(Audio Available\)](#)

203. What is the room that is under the ground floor?

Answer: basement (APEUni Website / App ASQ #491) [\(Audio Available\)](#)

204. What do you need to submit for completing a degree in the university?

Answer: dissertation / thesis (APEUni Website / App ASQ #234) [\(Audio Available\)](#)

205. When a person's blood alcohol level is higher than the standard range, what activity can't the person do?

Answer: driving (APEUni Website / App ASQ #490) [\(Audio Available\)](#)

206. How do we call the car that uses two types of fuels?

Answer: hybrid (APEUni Website / App ASQ #298) [\(Audio Available\)](#)

207. If there are 8 black balls and 1 white ball, and I randomly pick one, which color is mostly likely to be picked?

Answer: black (APEUni Website / App ASQ #489) [\(Audio Available\)](#)

208. Where do people go for watching sports or games?

Answer: stadium (APEUni Website / App ASQ #487) [\(Audio Available\)](#)

209. What material are windows made of?

Answer: glass (APEUni Website / App ASQ #486) [\(Audio Available\)](#)

210. What do birds use to fly?

Answer: wings (APEUni Website / App ASQ #485) [\(Audio Available\)](#)

211. What's the color of the medal that a champion gets?

Answer: Golden / gold (APEUni Website / App ASQ #32) [\(Audio Available\)](#)

212. What do we call the northernmost and southernmost parts of the earth?

Answer: Pole / poles (APEUni Website / App ASQ #482) [\(Audio Available\)](#)

213. How many wheels does a bicycle have?

Answer: two (APEUni Website / App ASQ #481) [\(Audio Available\)](#)

214. How do you call the two siblings born by a mother at the same time?

Answer: twins (APEUni Website / App ASQ #291) [\(Audio Available\)](#)

215. What is the opposite of ending in a film or movie?

Answer: prologue (APEUni Website / App ASQ #479) [\(Audio Available\)](#)

216. If you want to read tragedies or comedies, what kind of book do you read?

Answer: fiction books / novels (APEUni Website / App ASQ #477) [\(Audio Available\)](#)

217. What do you use to test the body temperature?

Answer: thermometer (APEUni Website / App ASQ #474) [\(Audio Available\)](#)

218. How do we call that animals and plants preserved in the rocks?

Answer: fossil (APEUni Website / App ASQ #469) [\(Audio Available\)](#)

219. Which one is more widespread, Korean, Thai or Hindi?

Answer: hindi (APEUni Website / App ASQ #464) [\(Audio Available\)](#)

220. How do you describe the money that citizens must contribute to the government for public use?

Answer: tax / taxes (APEUni Website / App ASQ #452) [\(Audio Available\)](#)

221. Correlation is the relationship between cause and what?

Answer: effect (APEUni Website / App ASQ #652) [\(Audio Available\)](#)

222. What device do you use to measure your weight?

Answer: scale / weighing machine (APEUni Website / App ASQ #651) [\(Audio Available\)](#)

223. What are the people who study history and historical evidence?

Answer: historian (APEUni Website / App ASQ #649) [\(Audio Available\)](#)

224. What is the force that happens between the relative motion when objects are rubbed against each other?

Answer: friction (APEUni Website / App ASQ #620) [\(Audio Available\)](#)

225. What is the opposite of artificial?

Answer: natural (APEUni Website / App ASQ #465) [\(Audio Available\)](#)

226. What is the hardest part of your hand?

Answer: Nails (APEUni Website / App ASQ #467) [\(Audio Available\)](#)

227. In mathematics and arithmetic, there are addition, multiplication, division. What's the other one?

Answer: subtraction (APEUni Website / App ASQ #462) [\(Audio Available\)](#)

228. What do bees collect from flowers?

Answer: pollen / nectar (APEUni Website / App ASQ #458) [\(Audio Available\)](#)

229. Which literary genre describes all details of a famous person's life?

Answer: Biography / autobiography (APEUni Website / App ASQ #457) [\(Audio Available\)](#)

230. What material is the tire made of?

Answer: rubber (APEUni Website / App ASQ #456) [\(Audio Available\)](#)

231. What are the people who study ancient bones or plants in rocks?

Answer: paleontologists / paleontologist / archaeologists / archaeologist (APEUni Website / App ASQ #646) [\(Audio Available\)](#)

232. How many eggs are there in a dozen?

Answer: twelve (APEUni Website / App ASQ #607) [\(Audio Available\)](#)

233. If you want to find the map of U.S., what type of book should you use?

Answer: atlas (APEUni Website / App ASQ #451) [\(Audio Available\)](#)

234. What do the following belong to: roses, daisies, tulip, etc?

Answer: flower (APEUni Website / App ASQ #446) [\(Audio Available\)](#)

235. What is the color that refers to environmental protection?

Answer: Green (APEUni Website / App ASQ #442) [\(Audio Available\)](#)

236. Which color do we make by blending black and white?

Answer: grey (APEUni Website / App ASQ #441) [\(Audio Available\)](#)

237. What do we call the liquid which is in a car?

Answer: gasoline / petrol / gas / fuel (APEUni Website / App ASQ #312) [\(Audio Available\)](#)

238. Which continent do China, India, Korea and Japan locate in?

Answer: Asia (APEUni Website / App ASQ #440) [\(Audio Available\)](#)

239. Before airplanes were invented, how did people travel from America to Europe?

Answer: by ship (APEUni Website / App ASQ #438) [\(Audio Available\)](#)

240. Who is a physician who performs surgical operations?

Answer: surgeon (APEUni Website / App ASQ #437) [\(Audio Available\)](#)

241. In the word 'postgraduate', what does the 'post' mean?

Answer: after (APEUni Website / App ASQ #436) [\(Audio Available\)](#)

242. What natural resource is used by a carpenter?

Answer: wood / timber (APEUni Website / App ASQ #435) [\(Audio Available\)](#)

243. If you invented something, what can you apply for to prevent others copying your invention?

Answer: patent (APEUni Website / App ASQ #434) [\(Explanation\)](#) [\(Audio Available\)](#)

244. How do you describe the type of magazine that is published four times a year?

Answer: quarterly (APEUni Website / App ASQ #289) [\(Audio Available\)](#)

245. When something has increased by triple, how many times does it increase?

Answer: three times (APEUni Website / App ASQ #432) [\(Audio Available\)](#)

246. Who sits in the cockpit of an airplane?

Answer: pilot (APEUni Website / App ASQ #431) [\(Audio Available\)](#)

247. What will snow become after it melts?

Answer: Water (APEUni Website / App ASQ #427) [\(Audio Available\)](#)

248. Which part of your leg can make it possible to bend?

Answer: knee (APEUni Website / App ASQ #425) [\(Audio Available\)](#)

249. Oral English is different from academic English. Which is the best term to describe academic English: tolerant or rigorous?

Answer: rigorous (APEUni Website / App ASQ #424) [\(Audio Available\)](#)

250. What is the opposite of convex?

Answer: concave (APEUni Website / App ASQ #422) [\(Audio Available\)](#)

251. What do we call the first paragraph of a report?

Answer: introduction (APEUni Website / App ASQ #418) [\(Audio Available\)](#)

252. What do we call a doctor who can sell prescribed medicines?

Answer: pharmacist / chemist (APEUni Website / App ASQ #415) [\(Audio Available\)](#)

253. What kind of drugs are used for killing bacteria?

Answer: Antibiotics (APEUni Website / App ASQ #412) [\(Audio Available\)](#)

254. What is a thermometer used to measure?

Answer: Temperature (APEUni Website / App ASQ #406) [\(Audio Available\)](#)

255. How would you describe the process in which ice becomes water?

Answer: melting / thawing (APEUni Website / App ASQ #405) [\(Audio Available\)](#)

256. How many hemispheres does the equator divide earth into?

Answer: Two (APEUni Website / App ASQ #404) [\(Audio Available\)](#)

257. What is the collection of pictures called?

Answer: album (APEUni Website / App ASQ #321) [\(Audio Available\)](#)

258. How many extra days in February in a leap year?

Answer: One (APEUni Website / App ASQ #282) [\(Audio Available\)](#)

259. In statistics, what is a circle divided into many parts called?

Answer: pie chart (APEUni Website / App ASQ #315) [\(Audio Available\)](#)

260. How do you call a student that has finished his first year?

Answer: sophomore (APEUni Website / App ASQ #145) [\(Audio Available\)](#)

261. Which one is quicker? Running, jogging or walking?

Answer: running (APEUni Website / App ASQ #401) [\(Audio Available\)](#)

262. What does the sun do during dawn?

Answer: sunrise (APEUni Website / App ASQ #400) [\(Audio Available\)](#)

263. What do we call a festival which is held every four years gathering people together as a sporting event?

Answer: the olympic games (APEUni Website / App ASQ #396) [\(Audio Available\)](#)

264. What is the feature that guitars and violins have in common?

Answer: string / strings (APEUni Website / App ASQ #393) [\(Audio Available\)](#)

265. What do we call a person who can speak two languages?

Answer: Bilingual / bilinguist (APEUni Website / App ASQ #388) [\(Audio Available\)](#)

266. What type of shape has four right corners, four lines that are equal in length?

Answer: square (APEUni Website / App ASQ #384) [\(Audio Available\)](#)

267. If a couple have a pair of children, how many children do they have?

Answer: two (APEUni Website / App ASQ #378) [\(Audio Available\)](#)

268. Which is easier to be recycled, plastic or paper?

Answer: paper (APEUni Website / App ASQ #377) [\(Audio Available\)](#)

269. What is the opposite word of "stale"?

Answer: fresh (APEUni Website / App ASQ #376) [\(Audio Available\)](#)

270. What do we call the "Times New Roman" in word?

Answer: typeface / font (APEUni Website / App ASQ #374) [\(Audio Available\)](#)

271. Which kind of mountain can erupt?

Answer: volcano / volcanos (APEUni Website / App ASQ #373) [\(Audio Available\)](#)

272. The instructions that tell you how to cook food?

Answer: recipe / recipes (APEUni Website / App ASQ #371) [\(Audio Available\)](#)

273. What is one half of 100% ?

Answer: fifty (APEUni Website / App ASQ #365) [\(Audio Available\)](#)

274. What is the opposite of positive?

Answer: negative (APEUni Website / App ASQ #362) [\(Audio Available\)](#)

275. What are the strings on shoes?

Answer: shoelace / shoelaces (APEUni Website / App ASQ #361) [\(Audio Available\)](#)

276. What is the name of the student who has not completed his course?

Answer: undergraduate student (APEUni Website / App ASQ #350) [\(Audio Available\)](#)

277. A dozen is a grouping of which number?

Answer: twelve (APEUni Website / App ASQ #349) [\(Audio Available\)](#)

278. What material is used for most of vehicles and craft?

Answer: metal / plastic / glass (APEUni Website / App ASQ #348) [\(Audio Available\)](#)

279. In the library, which books we are not allowed to bring them out with ourselves?

Answer: closed reserve book / closed reserve books (APEUni Website / App ASQ #347) [\(Audio Available\)](#)

280. What kind of dictionary provides synonyms, antonyms and related words?

Answer: thesaurus (APEUni Website / App ASQ #344) [\(Audio Available\)](#)

281. What is the opposite to “predecessor”?

Answer: successor (APEUni Website / App ASQ #335) [\(Audio Available\)](#)

282. What do we call the thread in the center of the candle?

Answer: wick (APEUni Website / App ASQ #332) [\(Audio Available\)](#)

283. What is the thing you touch when you play the guitar?

Answer: strings / string (APEUni Website / App ASQ #329) [\(Audio Available\)](#)

284. Which one is past tense: has gone, went or going?

Answer: went (APEUni Website / App ASQ #327) [\(Audio Available\)](#)

285. What do we call the animals with white ivory and long trunk?

Answer: elephant / elephants (APEUni Website / App ASQ #325) [\(Audio Available\)](#)

286. Which kind of book can we find Africa maps?

Answer: atlas (APEUni Website / App ASQ #324) [\(Audio Available\)](#)

287. What does a sundial measure?

Answer: Time (APEUni Website / App ASQ #336) [\(Audio Available\)](#)

288. What is the ceremony called for marriage?

Answer: wedding (APEUni Website / App ASQ #318) [\(Audio Available\)](#)

289. How many times a year is a quarterly journal published?

Answer: four (APEUni Website / App ASQ #306) [\(Audio Available\)](#)

290. What do you call a piece of equipment we use to look at stars?

Answer: telescope / astronomical telescope (APEUni Website / App ASQ #295) [\(Audio Available\)](#)

291. How many years are there in a decade?

Answer: ten years (APEUni Website / App ASQ #283) [\(Audio Available\)](#)

292. What kind of liquid do mammals feed their babies?

Answer: milk (APEUni Website / App ASQ #279) [\(Audio Available\)](#)

293. What is the economic sector that deals with farming?

Answer: agriculture (APEUni Website / App ASQ #273) [\(Audio Available\)](#)

294. Some calendars begin the week on Sunday, what is the other day which commonly starts a week?

Answer: monday (APEUni Website / App ASQ #270) [\(Audio Available\)](#)

295. What do we call the piece of paper that proves you have bought an item?

Answer: Receipt (APEUni Website / App ASQ #304) [\(Audio Available\)](#)

296. In a recession, does economic activity increase or slow down?

Answer: slow down (APEUni Website / App ASQ #265) [\(Audio Available\)](#)

297. What is the name of the field of study that studies the human mind and behavior?

Answer: psychology (APEUni Website / App ASQ #262) [\(Audio Available\)](#)

298. Where would you expect to find equipment like microscopes, a Bunsen burner, beaker and petri dish?

Answer: laboratory (APEUni Website / App ASQ #243) [\(Audio Available\)](#)

299. What is the name of the instrument used to measure variations in temperature?

Answer: thermometer (APEUni Website / App ASQ #220) [\(Audio Available\)](#)

300. What is the joint called where your hand is connected to your arm?

Answer: wrist / wrists (APEUni Website / App ASQ #212) [\(Audio Available\)](#)

301. What is the behavior when an animal changes its color to match the environment for protection?

Answer: Camouflage (APEUni Website / App ASQ #226) [\(Audio Available\)](#)

302. What is the most important document you would have to show if you would to hire a car?

Answer: driver's license / driving license (APEUni Website / App ASQ #205) [\(Audio Available\)](#)

303. What do you call a specialist who repairs leaking water pipes?

Answer: plumber (APEUni Website / App ASQ #204) [\(Audio Available\)](#)

304. What do we call a period of ten years?

Answer: decade (APEUni Website / App ASQ #203) [\(Audio Available\)](#)

305. What do we call a period of 100 years?

Answer: century (APEUni Website / App ASQ #195) [\(Audio Available\)](#)

306. What is the job of someone that looks after your teeth and gums?

Answer: dentist / surgeon dentist (APEUni Website / App ASQ #171) [\(Audio Available\)](#)

307. Who is a person that makes bread, cakes and pastries?

Answer: baker (APEUni Website / App ASQ #157) [\(Audio Available\)](#)

308. What is the red liquid that flows through a body?

Answer: blood (APEUni Website / App ASQ #153) [\(Audio Available\)](#)

309. What kind of book is written by a person about their own life?

Answer: autobiography (APEUni Website / App ASQ #152) [\(Audio Available\)](#)

310. On what geographical location would someone be living if their country is surrounded by water on all sides?

Answer: Island (APEUni Website / App ASQ #191) [\(Audio Available\)](#)

311. What key mineral makes sea water different from fresh water?

Answer: Salt (APEUni Website / App ASQ #235) [\(Audio Available\)](#)

312. What is the meeting point of sea and sky called?

Answer: Horizon (APEUni Website / App ASQ #286) [\(Audio Available\)](#)

313. What does ophthalmologist specialize in?

Answer: eye operations / eye (APEUni Website / App ASQ #368) [\(Audio Available\)](#)

314. In addition to the A, E, what are the other three vowels?

Answer: U / I / O (APEUni Website / App ASQ #338) [\(Audio Available\)](#)

315. What is the term used for a person who cannot read or write?

Answer: illiterate / illiteracy (APEUni Website / App ASQ #142) [\(Audio Available\)](#)

316. Who would you consult to treat a fear of crowded places, a philosopher or a psychologist?

Answer: psychologist (APEUni Website / App ASQ #140) [\(Audio Available\)](#)

317. How many days are in a leap year?

Answer: three hundred and sixty six (APEUni Website / App ASQ #136) [\(Audio Available\)](#)

318. In the animal kingdom, is the purpose of camouflage to attract a mate, to find food or to hide?

Answer: hide (APEUni Website / App ASQ #131) [\(Audio Available\)](#)

319. What special document do most people need to carry when they travel between countries?

Answer: passport (APEUni Website / App ASQ #130) [\(Audio Available\)](#)

320. What do we call the first meal of the day?

Answer: breakfast (APEUni Website / App ASQ #125) [\(Audio Available\)](#)

321. What do we call the date that a piece of work must be finished by?

Answer: deadline / due date (APEUni Website / App ASQ #115) [\(Audio Available\)](#)

322. A business doesn't want to make a loss – what does it want to make?

Answer: profit / profits (APEUni Website / App ASQ #107) [\(Audio Available\)](#)

323. What do we call a place where airplanes land and take off?

Answer: airport / airfield / airdrome (APEUni Website / App ASQ #92) [\(Audio Available\)](#)

324. What kind of equipment is used to protect motorbike riders' brains from injury?

Answer: helmet (APEUni Website / App ASQ #89) [\(Audio Available\)](#)

325. Which one word is used for a brother or sister?

Answer: sibling (APEUni Website / App ASQ #55) [\(Audio Available\)](#)

326. What type of food is an apple?

Answer: fruit (APEUni Website / App ASQ #47) [\(Audio Available\)](#)

327. If something such as fabric or medicine is artificially made, not natural, what do we say it is?

Answer: Synthetic / artificial (APEUni Website / App ASQ #28) [\(Audio Available\)](#)

328. What do you call the alphabetical list at the end of a textbook that tells you where to find specific information?

Answer: index / reference (APEUni Website / App ASQ #25) [\(Audio Available\)](#)

329. What is the word for a building or room where art exhibitions are held?

Answer: art gallery / art museum (APEUni Website / App ASQ #14) [\(Audio Available\)](#)

330. At what ceremony do students receive their degree or diploma at the end of their period of study?

Answer: graduation / commencement (APEUni Website / App ASQ #8) [\(Audio Available\)](#)

331. How many languages can a monolingual person speak?

Answer: one (APEUni Website / App ASQ #105) [\(Audio Available\)](#)

332. If telescopes are used to locate distant objects, what instrument is employed to magnify minuscule objects?

Answer: Microscope / microscopes (APEUni Website / App ASQ #111) [\(Audio Available\)](#)

333. What are winter, spring, summer and autumn?

Answer: Seasons (APEUni Website / App ASQ #134) [\(Audio Available\)](#)

334. How many years does a millennium have?

Answer: One thousand (APEUni Website / App ASQ #122) [\(Audio Available\)](#)

335. What is the job title of someone who designs buildings?

Answer: Architect (APEUni Website / App ASQ #38) [\(Audio Available\)](#)

336. Where can people go to borrow books?

Answer: Library / bibliotheca (APEUni Website / App ASQ #52) [\(Audio Available\)](#)

337. What is the word for the place where a river starts?

Answer: Source / birthplace / origin (APEUni Website / App ASQ #1) [\(Audio Available\)](#)

338. What is the word for a period of one hundred years?

Answer: Century (APEUni Website / App ASQ #12) [\(Audio Available\)](#)

339. Which sweet food is produced by bees?

Answer: Honey (APEUni Website / App ASQ #51) [\(Audio Available\)](#)

1. Women in University

Original:

If women are so far ahead of men, why are they so far behind? Reports from both sides of the Atlantic show that female students dominate university courses, yet women still do not make it to the top. A report on inequality in the UK said last week that girls had better educational results than boys at 16, went to university in greater numbers and achieved better degrees once they got there. "More women now have higher education qualifications than men in every age group up to age 44," the report said. In the US, 57 per cent of college graduates in 2006–07 were women. Women form the majority of all graduates under 45. Yet few women make it to the boards of companies in either country. In the UK, the proportion of women on FTSE 100 boards rose fractionally from 11.7 per cent to 12.2 per cent last year, according to the Cranfield University School of Management, but that was only because of a fall in the size of the boards. In the US, women accounted for 15.2 per cent of board seats on Fortune 500 companies, according to Catalyst, the research organisation, which said the numbers had barely budged for five years. The hopeful way of looking at this is that the rising generation of female graduates has yet to reach director age. Give it 10 years and they will dominate boards as they do universities. If that were true, however, we would surely see the number of women director numbers moving up by now. The first year that women college graduates outnumbered men in the US was 1982. These graduates must be entering their 50s — prime director age. There is evidence that the younger generation of women is thriving in the workplace. A recent report from the Pew Research Center found that the earnings of US-born 30- to 44-year old women grew 44 per cent between 1970 and 2007, compared with a rise of only 6 per cent for men. In this age group, 22 per cent of wives earned more than their husbands in 2007, compared with 4 per cent in 1970. Yet, even for this cohort, there was still a large pay gap, the Pew research found, with women earning on average only 71 per cent of what men earned.

Answer:

More women now have higher education qualifications than men in every age group up to age 44, and women form the majority of all graduates under 45, which means that we would surely see the number of women director numbers moving up by now, so the younger generation of women is thriving in the workplace; there was still a large pay gap.

2. Levels of Crime

Original:

The British Crime Survey (BCS) provides an important source of information about levels of crime, public attitudes to crime and other related issues. The results play an important role in informing Home Office policy. The BCS measures the amount of crime in England and Wales by asking people about crimes they have experienced in the last year. This includes crimes not reported to the police, so it is an important alternative to police records. Victims do not report crime for various reasons, and without the BCS there would be no official source of information on these unreported crimes. Because members of the public are asked directly about their experiences, the survey also provides a consistent measure of crime that is unaffected by the extent to which crimes are reported to the police, or by changes in the criteria used by the police when recording crime. The survey also helps to identify those most at risk of different types of crime, and this helps in the planning of crime prevention programs. The BCS also examines people's attitudes to crime, such as how much they fear crime and what measures they take

to avoid it. The survey also covers attitudes to the Criminal Justice System (CJS), including the police and the courts, and has also been successful at developing special measures to estimate the extent of domestic violence, stalking and sexual victimization, which are probably the least reported to the police, but among the most serious of crimes in their impact on victims.

Answer:

The British Crime Survey provides an important source of information, and the survey also provides a consistent measure of crime that is unaffected, which means that the survey also helps to identify those most at risk of different types of crime, so the BCS also examines people's attitudes to crime; the survey also covers attitudes to the Criminal Justice System.

3. Human Traits

Original:

The age-old question of whether human traits are determined by nature or nurture has been answered, a team of researchers say. Their conclusion? It's a draw. By collating almost every twin study across the world from the past 50 years, researchers determined that the average variation for human traits and disease is 49 percent due to genetic factors and 51 percent due to environmental factors. University of Queensland researcher Beben Benyamin from the Queensland Brain Institute collaborated with researchers at VU University of Amsterdam to collate 2,748 studies involving more than 14.5 million pairs of twins. "Twin studies have been conducted for more than 50 years but there is still some debate in terms of how much the variation is due to genetic or environmental factors," Benyamin said. He said the study showed the conversation should move away from nature versus nature, instead looking at how the two work together. "Both are important sources of variation between individuals," he said. While the studies averaged an almost even split between nature and nurture, there was wide variation within the 17,800 separate traits and diseases examined by the studies. For example, the risk for bipolar disorder was found to be 68 percent due to genetics and only 32 percent due to environmental factors. Weight maintenance was 63 percent due to genetics and 37 percent due to environmental factors. In contrast, risk for eating disorders was found to be 40 percent genetic and 60 percent environmental, whereas the risk for mental and behavioral disorders due to use of alcohol was 41 percent genetic and 59 percent environmental. Benyamin said in psychiatric, ophthalmological and skeletal traits, genetic factors were a larger influence than environmental factors. But for social values and attitudes it was the other way around.

Answer:

The average variation for human traits and disease is 49 percent due to genetic factors and 51 percent due to environmental factors, and both are important sources of variation between individuals, which means that in psychiatric, ophthalmological and skeletal traits, genetic factors were a larger influence than environmental factors, but for social values and attitudes it was the other way around.

4. Fiber

Original:

Currently, Americans only eat about 16 grams of fiber — the parts of plants that can't be digested — per day. That's way less than the 25 to 30 grams that's recommended. There are so many reasons why, from fast-food marketing to agriculture subsidies, but one contributing factor is the slow death of cooking, and the rise of the restaurant meal. Americans now spend more on food at restaurants than they do at grocery stores, but restaurant food tends to have even less fiber than the food we would otherwise eat at home. One problem seems to be that restaurant meals aren't typically loaded with two

of the best sources of fiber, unprocessed fruits and vegetables. A revealing study from 2007, in which researchers interviewed 41 restaurant executives, showed that restaurants think fruits and vegetables are too expensive to feature prominently on the menu, and “61 percent said profits drive menu selections.” They also opposed labeling certain menu items as healthier choices, saying that would be “the kiss of death.” So people like to eat out, and when they do, they prefer mushy, fiber-free comfort foods, but that’s a pretty dangerous road to go down.

Answer:

One contributing factor is the slow death of cooking, and the rise of restaurant meals, and restaurant food tends to have even less fiber than the food we would otherwise eat at home, which means that restaurants think fruits and vegetables are too expensive to feature prominently on the menu; they also opposed labeling certain menu items as healthier choices, so people like to eat out, and they prefer mushy, fiber-free comfort foods.

5. Importance of Water

Original:

Water is at the core of sustainable development. Water resources, and the range of services they provide, underpin poverty reduction, economic growth and environmental sustainability. From food and energy security to human and environmental health, water contributes to improvements in social well-being and inclusive growth, affecting the livelihoods of billions. In a sustainable world that is achievable in the near future, water and related resources are managed in support of human well-being and ecosystem integrity in a robust economy. Sufficient and safe water is made available to meet every person’s basic needs, with healthy lifestyles and behaviors easily upheld through reliable and affordable water supply and sanitation services, in turn supported by equitably extended and efficiently managed infrastructure. Water resources management, infrastructure and service delivery are sustainably financed. Water is duly valued in all its forms, with wastewater treated as a resource that avails energy, nutrients and freshwater for reuse. Human settlements develop in harmony with the natural water cycle and the ecosystems that support it, with measures in place that reduce vulnerability and improve resilience to water-related disasters. Integrated approaches to water resources development, management and use and to human rights are the norm. Water is governed in a participatory way that draws on the full potential of women and men as professionals and citizens, guided by a number of able and knowledgeable organizations, within a just and transparent institutional framework.

Answer:

Water is at the core of sustainable development, and water contributes to improvements in social well-being and inclusive growth, affecting the livelihoods of billions, which means that in a sustainable world that is achievable in the near future, water and related resources are managed in support of human well-being and ecosystem integrity in a robust economy, so water is duly valued in all its forms.

8. Product Life Cycle

Original:

His product life cycle has 4 very clearly defined stages, each with its characteristics that mean different things for businesses that are trying to manage the life cycle of their particular products. Introduction Stage – This stage of the cycle could be the most expensive for a company launching a new product. The size of the market for the product is small, which means sales are low, although they will be increasing. On the other hand, the cost of things like research and development, consumer testing, and the marketing needed to launch the product can be very high, especially if it's a competitive sector. Growth Stage – The growth stage is typically characterized by strong growth in sales and profits, and because the company can start to benefit from economies of scale in production, the profit margins, as well as the overall amount of profit, will increase. This makes it possible for businesses to invest more money in promotional activity to maximize the potential of this growth stage. Maturity Stage – During the maturity stage, the product is established and the aim for the manufacturer is now to maintain the market share they have built up. This is probably the most competitive time for most products and businesses need to invest wisely in any marketing they undertake. They also need to consider any product modifications or improvements to the production process which might give them a competitive advantage. Decline Stage – Eventually, the market for a product will start to shrink, and this is what's known as the decline stage. This shrinkage could be due to the market becoming saturated (i.e. all the customers who will buy the product have already purchased it), or because the consumers are switching to a different type of product. While this decline may be inevitable, it may still be possible for companies to make some profit by switching to less-expensive production methods and cheaper markets.

Answer:

The product life cycle has 4 very clearly defined stages, including the Introduction Stage, the Growth Stage, the Maturity Stage and the Decline Stage, each with its characteristics that mean different things for businesses that are trying to manage the life cycle of their particular products.

9. South Africa (Explanation)

Original:

The area that is now South Africa has been inhabited by humans for millennia. The San, the original inhabitants of this land, were migratory people who lived in small groups of about 15 to 20 people. They survived by fishing and hunting and by gathering roots and other wild foods. They did not build permanent dwellings but used rock shelters as temporary dwellings. Around 2,000 years ago Khoikhoi pastoralists migrated to the coast. In the eastern part of present-day South Africa, iron-working societies date from about 300 AD. The Sotho-Tswana and Nguni peoples arrived in this region around 1,200 AD. They lived by agriculture and stock farming, mined gold, copper and tin and hunted for ivory and built stone-walled towns. Over the centuries, these societies had diverse contacts with the Khoisan. Strife between the San and the Khoikhoi developed over competition for game; eventually the Khoikhoi became dominant. These peoples lived in the western part of present-day South Africa and are known collectively as the Khoisan.

Answer:

The area that is now South Africa has been inhabited by humans for millennia, as the San, the original inhabitants of this land, were migratory people and around 2,000 years ago Khoikhoi pastoralists migrated to the coast; the Sotho-Tswana and Nguni people arrived in this region around 1,200 AD, but eventually the Khoikhoi became dominant, and these people lived in the western part of present-day South Africa and are known as the Khoisan.

10. Deep-sea Mineral Resources (Explanation)

Original:

The National Oceanography Center (NOC) is engaged in research into the potential risks and benefits of exploiting deep-sea mineral resources, some of which are essential for low-carbon technology, as well as using ocean robots to estimate the environmental impact of these potential deep-sea mining activities. Late last year the NOC led an expedition on the RRS James Cook that found enough of the scarce element Tellurium present in the crust of a submerged volcano that, if it were all to be used in the production of solar PV panels, could provide two-thirds of the UK's annual electricity supply. Recently, the NOC also led an international study demonstrating deep-sea nodule mining will cause long-lasting damage to deep-sea life, lasting at least for decades. These nodules are potato-sized rocks containing high levels of metals, including copper, manganese and nickel. They grow very slowly on the sea-bed, over millions of years. Although no commercial operations exist to extract these resources, many are planned. Professor Edward Hill, Executive Director at the NOC commented, "By 2050 there will be nine billion people on earth and attention is increasingly turning to the ocean, particularly the deep ocean, for food, clean supplies of energy and strategic minerals. The NOC is undertaking research related to many aspects and perspectives involved in exploiting ocean resources. This research is aimed at informing with sound scientific evidence the decisions that will need to be taken in the future, as people increasingly turn to the oceans to address some of society's greatest challenges."

Answer:

The National Oceanography Center (NOC) is engaged in research into the potential risks and benefits of exploiting deep-sea mineral resources, and NOC also led an international study demonstrating deep-sea nodule mining will cause long-lasting damage to deep-sea life, so it aimed at informing that decisions need to be taken as people increasingly turn to the oceans to address some of society's greatest challenges.

11. Bank Overdraft (Explanation)

Original:

Banks provide short-term finance to companies in the form of an overdraft on a current account. The advantage of an overdraft is its flexibility. When the cash needs of the company increase with seasonal factors, the company can continue to write cheques and watch the overdraft increase. When the goods and services are sold and cash begins to flow in, the company should be able to watch the overdraft decrease again. The most obvious example of a business which operates in this pattern is farming. The farmer uses the overdraft to finance the acquisition of seed for arable farming, or feed through the winter for stock farming and to cover the period when the crops or animals are growing and maturing. The overdraft is reduced when the crops or the animals are sold. The main disadvantage of an overdraft is that it is repayable on demand. The farmer whose crop fails because of bad weather knows the problem of being unable to repay the overdraft. Having overdraft financing increases the worries of those who manage the company. The other disadvantage is that the interest payable on overdrafts is variable. When interest rates increase, the cost of the overdraft increases. Furthermore, for small companies there are often complaints that the rate of interest charged is high compared with that available to larger companies. The banks answer that the rates charged reflect relative risk and it is their experience that small companies are more risky.

Answer:

Banks provide short-term finance to companies in the form of an overdraft, with the advantage of

flexibility, and the most obvious example is farming, but the main disadvantages of an overdraft are that it is repayable on demand and the interest payable on overdrafts is variable because when interest rates increase, the cost of the overdraft increases.

13. Complaints (Explanation)

Original:

Humans love to complain to each other. It helps us feel less alone. Think about what happens when a family member or friend is going through a tough time; they call up someone who will listen to their tale of woe. Unfortunately, negative bonding is the default for many groups. In some families, complaining is the only way to get attention. When one person says, I had a bad day; the other person has to top it, "You think you had a tough day. I had to do three TPS reports!" The same thing happens at work and social settings. "Your child didn't sleep through the night until 6 months? Mine was a full year old before she went over six hours." It's a race to the bottom, and the worst situation wins. In *Bitching is Bonding, A Guide To Mutual Complaint*, Irene S. Levine, Ph.D., a professor of psychiatry at the NYU Langone School of Medicine says, "The reason why these conversations feel good is because we feel understood." People raised in negative environments learn early on. Being positive gets you thrown out of the club. When family dinner is a complaint fest, you're not going to risk alienation saying, "Wow, I had an awesome day. Don't you just love life?" Translate this into a work setting: people, often unconsciously, believe being positive keeps you out of the cool club. When negativity provides bonding, humans are reluctant to abandon the behavior that brings them comfort.

Answer:

With complaining to each other helping us feel less alone and understood and in some families being the only way to get attention, negative bonding is the default for many groups, because people believe being positive keeps you out of the cool club, while they are reluctant to abandon the behavior that brings them comfort.

(APEUni Website / App SWT #80)

14. Importance of Soil (Explanation)

Original:

It's very easy to forget about what's in the ground beneath our feet and why it's so important to protect it. One tablespoon of soil contains more organisms than there are people on Earth; billions of bacteria, fungi and other microorganisms combine with minerals, water, air and organic matter to create a living system that supports plants and, in turn, all life. Healthy soil can store as much as 3,750 tons of water per hectare, reducing the risk of flooding, and the International Panel on Climate Change (IPCC) has said that 89% of all agricultural emissions could be mitigated if we improved the health of our soil. Good soil management also increases disease resistance in livestock and ultimately drives profits for farmers – yet soil and its impact on the health of our animals has, over recent decades, been one of the most neglected links in UK agriculture. Over the last 50 years' agriculture has become increasingly dependent on chemical fertilizers, with applications today around 10 times higher than in the 1950s. Farmers often think the chemical fertilizer NPK (nitrogen, phosphorous and potassium) provides all the nutrition a plant requires, but it also has a detrimental effect on the long-term health of the land: research suggests there are fewer than 100 harvests left in many of the world's soils.

Answer:

Soil, containing so many organisms, combine with minerals, water, air and organic matter to create a living system for all life, which reduces the risk of flooding, mitigates agricultural emissions, increases disease resistance in livestock and ultimately drives profits for farmers, but soil and its impact on the health of our animals has been one of the most neglected links in UK agriculture because they use fertilizers, which has a detrimental effect on the land.

15. Independent Work (Explanation)**Original:**

Working nine to five for a single employer bears little resemblance to the way a substantial share of the workforce makes a living today. Millions of people assemble various income streams and work independently, rather than in structured payroll jobs. This is hardly a new phenomenon, yet it has never been well measured in official statistics and the resulting data gaps prevent a clear view of a large share of labor–market activity. To better understand the independent workforce and what motivates the people who participate in it, the McKinsey Global Institute surveyed some 8,000 respondents across Europe and the United States. We asked about their income in the past 12 months–encompassing primary work, as well as any other income–generating activities, and about their professional satisfaction and aspirations for work in the future. The resulting report, *Independent work: Choice, necessity, and the gig economy*, finds that up to 162 million people in Europe and the United States–or 20 to 30 percent of the working–age population – engage in some form of independent work. While demographically diverse, independent workers largely fit into four segments (exhibit): free agents, who actively choose independent work and derive their primary income from it; casual earners, who use independent work for supplemental income and do so by choice; reluctants, who make their primary living from independent work but would prefer traditional jobs; and the financially strapped, who do supplemental independent work out of necessity.

Answer:

To better understand the independent workforce and what motivates millions of people who assemble various income streams and work independently, researchers surveyed respondents across Europe and the United States, about their income, professional satisfaction and aspirations for work in the future, finding up to 162 million people there engage in some form of independent work, and they largely fit into four segments: free agents, casual earners, reluctants, and the financially strapped.

16. Tax on Meat (Explanation)**Original:**

"A day would come", Percy Shelley predicted in 1813, "when the monopolizing eater of animal flesh would no longer destroy his constitution by eating an acre at a meal." He explained: "The quantity of nutritious vegetable matter consumed in fattening the carcass of an ox would afford 10 times the sustenance if gathered immediately from the bosom of the earth." Two hundred years later, mainstream agronomists and dietitians have caught up with the poet. A growing scientific consensus agrees that feeding cereals and beans to animals is an inefficient and extravagant way to produce human food, that there is a limited amount of grazing land, that the world will be hard–pressed to supply a predicted population of 9 billion people with a diet as rich in meat as the industrialized world currently enjoys, and that it's not a very healthy diet anyway. On top of this, livestock contribute significantly towards global warming, generating 14.5% of all manmade greenhouse gas emissions, according to one much–quoted estimate from the United Nations. Now that the problem has been identified, the challenge is to persuade people in wealthy countries to eat less meat. That might seem a tall order, but governments have successfully

persuaded people to quit smoking through a combination of public information, regulation and taxation.

Answer:

A scientific consensus agrees feeding cereals and beans to animals is an inefficient and extravagant way to produce human food as a very healthy diet, with a limited amount of grazing land, the world hard-pressed to supply a predicted population of 9 billion with a meat-rich diet, livestock contributing significantly towards global warming, and now the challenge is to persuade people to eat less meat, as governments have persuaded people to quit smoking through taxation.

(APEUni Website / App SWT #107)

17. Ecology and Climatology (Explanation)

Original:

Ecology is the study of interactions of organisms among themselves and with their environment. It seeks to understand patterns in nature (e.g., the spatial and temporal distribution of organisms) and the processes governing those patterns. Climatology is the study of the physical state of the atmosphere — its instantaneous state or weather, its seasonal-to-interannual variability, its long-term average condition or climate, and how climate changes over time. These two fields of scientific study are distinctly different. Ecology is a discipline within the biological sciences and has as its core the principle of natural selection. Climatology is a discipline within the geophysical sciences based on applied physics and fluid dynamics. Both, however, share a common history. The origin of these sciences is attributed to Aristotle and Theophrastus and their books *Meteorological* and *Enquiry into Plants*, respectively, but their modern beginnings trace back to natural history and plant geography. Seventeenth, eighteenth, and nineteenth century naturalists and geographers saw changes in vegetation as they explored new regions and laid the foundation for the development of ecology and climatology as they sought explanations for these geographic patterns. Alexander von Humboldt, in the early 1800s, observed that widely separated regions have structurally and functionally similar vegetation if their climates are similar. Alphonse de Candolle hypothesized that latitudinal zones of tropical, temperate, and arctic vegetation are caused by temperature and in 1874 proposed formal vegetation zones with associated temperature limits.

Answer:

The origin of ecology, the study of interactions of organisms among themselves and with their environment, and climatology, the study of the physical state of the atmosphere, is attributed to Aristotle and Theophrastus, but their modern beginnings trace back to natural history and plant geography, with naturalists and geographers saw changes in vegetation while exploring new regions and laying the foundation for ecology and climatology as they sought explanations for these geographic patterns.

(APEUni Website / App SWT #99)

18. Language Teaching Approaches (Explanation)

Original:

Over the years, language teachers have alternated between favoring teaching approaches that focus primarily on language use and those that focus on language forms or analysis. The alternation has been due to a fundamental disagreement concerning whether one learns to communicate in a second language by communicating in that language (such as in an immersion experience) or whether one learns to communicate in a second language by learning the lexicogrammar — the words and grammatical structures — of the target language. In other words, the argument has been about two different means of achieving the same end. As with any enduring controversy, the matter is not easily resolved. For one thing, there is evidence to support both points of view. It is not uncommon to find learners who, for whatever reason, find themselves in a new country or a new region of their own country, who need to learn a new language, and who do so without the benefit of formal instruction. If they are postpubescent,

they may well retain an accent of some kind, but they can pick up enough language to satisfy their communicative needs. In fact, some are natural acquirers who become highly proficient in this manner. In contrast, there are learners whose entire exposure to the new language comes in the form of classroom instruction in lexicogrammar. Yet they too achieve a measure of communicative proficiency, and certain of these learners become highly proficient as well. What we can infer from this is that humans are amazingly versatile learners and that some people have a natural aptitude for acquiring languages and will succeed no matter what the circumstances.

Answer:

A fundamental disagreement, concerning whether one learns to communicate in a second language by an immersion experience or learning the lexicogrammar, is not easily resolved, as it is common to find learners in a new country who learn a new language without the benefit of formal instruction, as well as learners whose entire exposure to the new language comes in the form of classroom instruction in lexicogrammar, which means that humans are versatile learners.

19. Alphabet (Explanation)

Original:

Their trade networks made the Phoenicians rich but also enabled cultural exchange and transfer between East and West in an unprecedented way: the most significant was the spread of the alphabetic script which was adopted all over the Mediterranean. The Phoenician alphabet is a writing system consisting of only 22 signs representing exactly one sound (phoneme) each. The term "alphabet" derives from the names of the first two signs in the sequence, aleph ("cattle") and beit("house"): these names also reflect the letters' shapes, each derived from the picture of an object whose name starts with the relevant sound. The alphabetic script is simple enough to learn quickly, without the years of dedicated training required to master writing systems such as cuneiform or Egyptian hieroglyphs. Specialised schooling was unnecessary, and literacy was therefore disengaged from the institutional context of palaces and temples where the traditional scripts continued to be used. The alphabet suited the needs of long-distance merchants who needed to be able to record their business affairs on the go and who, for reasons of confidentiality and money, often preferred to write themselves rather than employ a specialist scribe. As the script could easily be used to record any language, it was, in the course of the first millennium BC, adapted for Aramaic, Hebrew, Greek, Phrygian, Lydian, Etruscan and Latin, to name but a few.

Answer:

Their trade networks made the Phoenicians rich but also enabled cultural exchange, and the most significant was the spread of a writing system called alphabetic script adopted in Mediterranean or other countries, which is simple enough to learn quickly without years of training and specialized schooling; the system could also be easily used to record business affairs in any language, which met the long-distance merchant's needs of confidentiality.

(APEUni Website / App SWT #156)

20. Skipping Breakfast (B) (Explanation)

Original:

Skipping Breakfast Has Drawbacks – It's no mystery why so many people routinely skip breakfast: bad timing. It comes at a time when folks can be more occupied with matters of grooming, attire and otherwise making themselves presentable for a new day. However, studies conducted both in the United States and internationally have shown that skipping breakfast can affect learning, memory and physical well-being. Students who skip breakfast are not as efficient at selecting critical information for

problem-solving as their peers who have had breakfast. For school children, skipping breakfast diminishes the ability to recall and use newly acquired information, verbal fluency, and control of attention, according to Ernesto Pollitt, a UC Davis professor of pediatrics whose research focuses on the influence of breakfast on mental and physical performance. Skipping breakfast can impair thinking in adults, also. For both children and adults, a simple bowl of cereal with milk goes a long way toward providing a sufficiently nutritious start to the day. Green-Burgeson recommends choosing a cereal that's low in sugar — less than five grams per serving — and using nonfat or one percent milk. Frederick Hirshburg, a pediatrician at UC Davis Medical Group, Carmichael, says that babies and other preschoolers rarely skip breakfast because they're usually the hungriest at the beginning of the day. Breakfast then becomes more of a "learned experience" than a response to a biological need, Hirshburg says.

Answer:

Skipping breakfast has drawbacks for both children and adults, for whom a simple bowl of cereal milk can provide a nutritious start to the day, but babies and other preschoolers rarely skip breakfast because they are usually the hungriest at the beginning of the day, so breakfast then becomes more of a "learned experience" than a response to a biological need.

(APEUni Website / App SWT #167)

21. Negotiation (Explanation)

Original:

Negotiation is a common process in business to mainly solve business conflicts between both parties. Compromise is a basic negotiation state in which both parties give up something that they want in order to get something else they want more. Compromise usually occur in unfair parties when there is a fixed pie to be divided up, and whatever on one side gets, the other side loses. In compromise situations, neither side gets all of what they really want, but they each make concessions in order to reach an agreement that is acceptable to both. Both parties usually can reach win-win concept through compromise. However, negotiation cannot resolve all the conflict if one party is unwilling to resolve the problem.

Answer:

In the process of negotiation, compromise is a basic negotiation state in which both parties give up something and get something else in order to reach an agreement that is acceptable to both, but negotiation cannot resolve all the conflict if one party is unwilling to resolve the problem.

(APEUni Website / App SWT #162)

22. Fraught Times (Explanation)

Original:

Times are fraught, and overstretched executives are constantly on the lookout for a way to clear their minds so they can work in a calmer, more effective, and more responsive way. Cultivating a special state of consciousness called 'mindfulness' — an intense awareness of the here and now — is proving attractive to a growing number of senior managers, both in the US and elsewhere. Mindfulness is achieved by meditation techniques, often involving sitting on a cushion, eyes closed, concentrating on the inflow and outflow of your breath. Or you might spend 10 minutes studying, sniffing, tasting and finally eating a piece of fruit. That might make it sound like a remnant of the navel-gazing 1960s and 1970s, but the evidence for mindfulness's effectiveness is good enough to have impressed hard-nosed companies such as Google (which has invited mindfulness gurus to speak at the Googleplex), General Mills, PricewaterhouseCoopers, Deutsche Bank, Procter & Gamble, AstraZeneca, Apple, Credit Suisse, KPMG, Innocent, Reuters and many more. According to Don McCormick, assistant professor of

management at California State University and a dedicated meditator, it 'can help individuals to manage workplace stress, perform tasks more effectively, enhance self-awareness and self-regulation, experience work as more meaningful, improve workplace relationships, increase ethical behavior, and make perception more accurate'. It is said to pay dividends for leaders and managers, by improving the quality of their listening and communicating.

Answer:

Mindfulness, a kind of consciousness, is achieved by meditation techniques involving sitting on a cushion, eyes closed, concentrating on the inflow and outflow of your breath, and have impressed large companies as it can release stress and help employees work effectively with better workplace relationships and ethical behavior.

(APEUni Website / App SWT #138)

23. Energy Demand (Incomplete)

Points: With the population growth, the demand for resources has been growing as well. There is an expected increase in demand for various alternative resources, raw materials, timber for paper using, (... energy... materials...). The increase of demand also happen in the non-renewable resource field, such as metal. The demand for petrol, diesel and crude oil is also huge to cope with the demand for manufacturing plastics. People should ensure natural world can still work well to earn the future well-being because the world population rises.

Answer:

There is an expected increase in demand for various alternative resources, but people should ensure natural world can still work well to earn the future well-being because the world population rises.

(APEUni Website / App SWT #123)

24. Benefit of Honey (Explanation)**Original:**

In order to have a competitive edge, athletes often use drugs with high athletic performance. The National Honey Board recently found that honey has the same functions but less negative impact. This clinical trial is the third in a series of studies focusing on the use of honey by athletes. The first study (involving 71 subjects) determined that honey has a milder effect on blood sugar than other popular forms of carbohydrate gel. The second study in the series (with 39 weight trained subjects) investigated the combination of honey with a protein supplement and suggested that honey speeds muscle recovery after a workout.

Answer:

Honey, with the same functions as drugs used by athletes for high athletic performance and less negative impact, has a milder effect on blood sugar than other popular forms of carbohydrate gel, and speeds muscle recovery after a workout.

25. Pre-service teachers (Incomplete)

Points: 1) Each course has a specific syllabus that highlights specific technologies required. 2) Some teachers know how to integrate technologies while some others don't. 3) There will be instructors helping pre-service teachers learn how to integrate technology and experiences in class, and to encourage pre-service teachers to think about the integration, which always allows them to learn online anytime.

Answer:

While each course has a specific syllabus to highlight specific technologies required, some teachers know how to integrate technologies while some others don't, but there will be instructors helping pre-service teachers learn how to integrate technology and experiences in class, which allows them to learn online anytime.

(APEUni Website / App SWT #113)

26. Early Adopters (Explanation)

Original:

Disabled people were among the early adopters of personal computers. They were quick to appreciate that word processing programs and printers gave them freedom from dependence on others to read and write for them. Some of these disabled early adopters became very knowledgeable about what could be achieved and used their knowledge to become independent students at a high level. They also gained the confidence to ask that providers of education make adjustments so that disabled students could make better use of course software and the web, rather than just word processing. For some disability groups, information in electronic format (whether computer-based or web-based) can be more accessible than printed information. For example, people who have limited mobility or limited manual skills can find it difficult to obtain or hold printed material; visually impaired people can find it difficult or impossible to read print, but both these groups can be enabled to use a computer and, therefore, access the information electronically. Online communication can enable disabled students to communicate with their peers on an equal basis. For example, a deaf student or a student with Asperger's syndrome may find it difficult to interact in a face-to-face tutorial, but may have less difficulty interacting when using a text conferencing system in which everyone types and reads text. In addition, people's disabilities are not necessarily visible in online communication systems; so disabled people do not have to declare their disability and are not perceived as being different.

Answer:

Disabled people were among the early adopters of personal computers, for some of which, information in electronic format can be more accessible than printed information, and online communication can enable disabled students to communicate with their peers on an equal basis, so people's disabilities are not necessarily visible in online communication systems and disabled people do not have to declare their disability and are not perceived as being different.

(APEUni Website / App SWT #106)

27. Asda (Explanation)

Original:

Asda has become the first food retailer in the country to measure how much customers can save by cutting back on food waste, thanks to a Knowledge Transfer Partnership (KTP) with the University of Leeds. The idea behind the KTP was for the University, using Asda's customer insight data, to apply its research to identify, investigate and implement ways of helping customers to reduce their food waste. This was one of the first times that a major retailer had tried to deliver large-scale sustainability changes, with the two year project seen as a way for Asda to position themselves as true innovators in this area. The campaign focused on providing customers with advice on everything from food storage and labelling, to creative recipes for leftovers. Meanwhile, in-store events encouraged customers to make changes in their own. They will make changes to how they deal with food waste in their own homes, leading to an average saving of 57 pounds per customer, as well as a reduction in waste. A key aspect of a KTP is that an associate is employed by the University to work in the firm and help deliver the desired outcomes of the KTP. As a part of the collaboration with Asda, Laura Babbs was given the task of driving forward the sustainability changes in the retailer. As a result of the success of her work,

Laura eventually became a permanent member of the team at Asda.

Answer:

Asda has become the first food retailer in the country to measure how much customers can save by cutting back on food waste, with a campaign focusing on providing customers with advice on everything from food storage and labelling, to creative recipes for leftovers, and with in-store events encouraging customers to make changes in their own, and an associate is employed by the University to work in the firm.

(APEUni Website / App SWT #101)

28. Written Language (Explanation)

Original:

The world engages in improving literacy of reading and writing, but it is not that important now. What are text/written language anyway? It's an ancient IT for storing and retrieving information. We store information by writing it, and we retrieve it by reading it. Six thousand to 10,000 years ago, many of our ancestors' hunter -- gatherer societies settled on the land and began what's known as the agricultural revolution. That new land settlement led to private property and increased production and trade of goods, generating a huge new influx of information. Unable to keep all this information in their memories, our ancestors created systems of written records that evolved over millennia into today's written language. But this ancient IT is already becoming obsolete. Text has run its historic course and is now rapidly getting replaced in every area of our lives by the ever -- increasing array of emerging ITs driven by voice, video, and body movement rather than the written word. In my view, this is a positive step forward in the evolution of human technology, and it carries great potential for a total positive redesign of education.

Answer:

Although written language, which is an ancient IT for storing and retrieving information has engaged in improving literacy of reading and writing, it is already becoming obsolete, which indicates a positive step in the evolution of human technology and it carries great potential for a total positive redesign of education.

(APEUni Website / App SWT #84)

29. Wright Brothers (Explanation)

Original:

Orville and Wilbur Wright were brothers living in Dayton, Ohio. The two had started making bicycles during the 1890s and had a successful small business selling their Wright Specials for \$18 each (\$475 in today's green). This experience with building light, strong machines would prove valuable in the coming years after the brothers' interest turned to flight. Others in the United States were also developing aircraft at the time the Wright brothers started turning their curiosity skyward. Samuel Langley had flown an unmanned steam-powered aircraft in 1896. Octave Chanute and others were flying gliders near Chicago late in the decade as well. But it wasn't until the Wright brothers started working on the matter that the "flying problem" would finally be solved. Beginning in 1899, the brothers designed and built a series of gliders to test their various ideas on a flying machine. They constructed a wind tunnel that allowed them to test designs without having to build a full-size model. They even built their own gasoline-powered motor for their aircraft. But it was the idea of controlled flight that the Wright brothers recognized as the biggest challenge. The Wright brothers realized the problem wasn't getting into the air, it was what to do once the pilot was airborne. One of the key features of the Wright brothers' design is something they learned from watching birds.

Answer:

Despite others in the United States developing aircraft at the time, it wasn't until the Wright brothers, with experience of building light, strong machines, started working on the matter that the "flying problem" would finally be solved, and the brothers designed and built a series of gliders to test their various ideas on a flying machine with constructing a wind tunnel that allowed them to test designs without having to build a full-size model.

(APEUni Website / App SWT #81)

30. Wine Industry (Explanation)**Original:**

In 1920, the eighteenth Amendment to the United States Constitution created yet another setback for the American wine industry. The National Prohibition Act, also known as the Volstead Act, prohibited the manufacture, sale, transportation, importation, delivery, or possession of intoxicating liquors for beverage purposes. Prohibition, which continued for thirteen years, nearly destroyed what had become a thriving and national industry. One of the loopholes in the Volstead Act allowed for the manufacture and sale of sacramental wine, medicinal wines for sale by pharmacists with a doctor's prescription, and medicinal wine tonics (fortified wines) sold without prescription. Perhaps more important, prohibition allowed anyone to produce up to two hundred gallons yearly of fruit juice or cider. The fruit juice, which was sometimes made into concentrate, was ideal for making wine. People would buy grape concentrate from California and have it shipped to the East Coast. The top of the container was stamped in big bold letters: caution: do not add sugar or yeast or else fermentation will take place! Some of this yield found its way to bootleggers throughout America who did just that. But not for long, because the government stepped in and banned the sale of grape juice, preventing illegal wine production. Vineyards stopped being planted, and the American wine industry came to a halt.

Answer:

While the National Prohibition Act prohibited the manufacture, sale, transportation, importation, delivery, or possession of intoxicating liquors for beverage purposes, Americans still found a loophole that they could make wine from fruit juice or cider, but this was banned by the government eventually, with the American wine industry coming to a halt.

(APEUni Website / App SWT #79)

31. Voting Rights in UK (Explanation)**Original:**

Compulsory voting is often suggested as a solution to the problem of declining turnout. But how are individuals and countries affected by compulsory voting beyond boosting electoral participation? Shane Singh investigates the social, economic, and political consequences of compelling citizens to vote. There has been a lot of discussion about compulsory voting these days. In the United Kingdom, in particular, as voter turnout rates have declined, many commentators and politicians have begun advocating for mandatory electoral participation. Those in favor of compulsory voting often adduce the importance of participation among all segments of society. Citizens of democracies are forced to do many things in the interest of the public good, they maintain, including serving on juries and educating their children, and full participation serves the country as a whole. Those opposed to compulsory voting often argue that, from a democratic theory perspective, the right to vote implicitly includes a right not to vote. Such a right of abstention, they argue, is more important than any societal good that might accompany high turnout. In fact, opponents of compulsory voting often contend that the country may be better off if those who are disinclined to vote are not pushed to participate in public affairs. Regardless of whether one of these sets of arguments is more persuasive than the other, compulsory voting is commonly used

around the world. Several European democracies mandate voting, as do Australia and most of the countries in Latin America. By evaluating results from these countries, it is possible to assess the mechanics and effects of compulsory voting.

Answer:

Despite discussion about compulsory voting, in which proponents advocate the importance of participation across all societal segments and opponents argue a right of abstention is more important, compulsory voting is commonly used around the world, including several European democracies, Australia, and most Latin American countries, and the mechanics and effects can be assessed by evaluating results from these countries.

(APEUni Website / App SWT #75)

32. Vividity of TV and Newspaper (Explanation)

Original:

To understand the final reason why the news marketplace of ideas dominated by television is so different from the one that emerged in the world dominated by the printing press, it is important to distinguish the quality of vividness experienced by television viewers from the “vividness” experienced by readers. I believe that the vividness experienced in the reading of words is automatically modulated by the constant activation of the reasoning centers of the brain that are used in the process of concreting the representation of reality the author has intended. By contrast, the visceral vividness portrayed on television has the capacity to trigger instinctual responses similar to those triggered by reality itself—and without being modulated by logic, reason, and reflective thought. The simulation of reality accomplished in the television medium is so astonishingly vivid and compelling compared with the representations of reality conveyed by printed words that it signifies much more than an incremental change in the way people consume information. Books also convey compelling and vivid representations of reality, of course. But the reader actively participates in the conjuring of the reality the book’s author is attempting to depict. Moreover, the parts of the human brain that are central to the reasoning process are continually activated by the very act of reading printed words: Words are composed of abstract symbols—letters—that have no intrinsic meaning themselves until they are strung together into recognizable sequences. Television, by contrast, presents to its viewers a much more fully formed representation of reality—without requiring the creative collaboration that words have always demanded.

Answer:

The news marketplace of ideas dominated by television is so different from the one that emerged in the world dominated by the printing press, because the quality of vividness experienced by television viewers is different from that by readers, and the simulation of reality accomplished in the television medium is much more compelling and vivid compared with the representation of reality conveyed by printed words.

(APEUni Website / App SWT #74)

33. Rosetta Stone (Explanation)

Original:

When the Rosetta Stone was discovered in 1799, the carved characters that covered its surface were quickly copied. Printer’s ink was applied to the Stone and white paper laid over it. When the paper was removed, it revealed an exact copy of the text—but in reverse. Since then, many copies or “facsimiles” have been made using a variety of materials. Inevitably, the surface of the Stone accumulated many layers of material left over from these activities, despite attempts to remove any residue. Once on display, the grease from many thousands of human hands eager to touch the Stone added to the problem. An opportunity for investigation and cleaning the Rosetta Stone arose when this famous object was made the centerpiece of the Cracking Codes exhibition at The British Museum in 1999. When work

commenced to remove all but the original, ancient material, the stone was black with white lettering. As treatment progressed, the different substances uncovered were analyzed. Grease from human handling, a coating of carnauba wax from the early 1800s and printer's ink from 1799 were cleaned away using cotton wool swabs and liniment of soap, white spirit, acetone and purified water. Finally, white paint in the text, applied in 1981, which had been left in place until now as a protective coating, was removed with cotton swabs and purified water. A small square at the bottom left corner of the face of the Stone was left untouched to show the darkened wax and the white infill.

Answer:

Since the Rosetta Stone was discovered in 1799, the carved characters that covered its surface were quickly copied, which leaves the surface of the Stone accumulated many layers of material left over from these activities, despite attempts to remove any residue, so when the work of the Cracking Codes exhibition at The British Museum in 1999 commenced to remove all but the original, ancient material the stone was black with white lettering.

(APEUni Website / App SWT #69)

34. Technology Prediction (Explanation)

Original:

As far as prediction is concerned, remember that the chairman of IBM predicted in the fifties that the world would need a maximum of around half a dozen computers, that the British Department for Education seemed to think in the eighties that we would all need to be able to code in BASIC and that in the nineties Microsoft failed to foresee the rapid growth of the Internet. Who could have predicted that one major effect of the automobile would be to bankrupt small shops across the nation? Could the early developers of the telephone have foreseen its development as a medium for person to person communication, rather than as a form of broadcasting medium? We all, including the 'experts', seem to be peculiarly inept at predicting the likely development of our technologies, even as far as the next year. We can, of course, try to extrapolate from experience of previous technologies, as I do below by comparing the technology of the Internet with the development of other information and communication technologies and by examining the earlier development of radio and print. But how justified I might be in doing so remains an open question. You might conceivably find the history of the British and French videotext systems, Prestel and Minitel, instructive. However, I am not entirely convinced that they are very relevant, nor do I know where you can find information about them online, so, rather than take up space here, I've briefly described them in a separate article.

Answer:

We all, seem to be peculiarly inept at predicting the likely development of our technologies, like the world needing a maximum of around half a dozen computers in the fifties, our inability to code in BASIC in the eighties, and Microsoft's failure to foresee the rapid growth of the Internet, by trying to extrapolate from the experience of previous technologies, with how justified we might be in doing so remaining an open question.

35. Plug-in Vehicle (Explanation)

Original:

Here's a term you're going to hear much more often: plug-in vehicle, and the acronym PEV. It's what you and many other people will drive to work in ten years and more from now. At that time, before you drive off in the morning you will first unplug your car – your plugin vehicle. Its big on board batteries will have been fully charged overnight, with enough power for you to drive 50–100 kilometers through city traffic. When you arrive at work you'll plug in your car once again, this time into a socket that allows power to

flow from your car's batteries to the electricity grid. One of the things you did when you bought your car was to sign a contract with your favorite electricity supplier, allowing them to draw a limited amount of power from your car's batteries should they need to, perhaps because of a blackout, or very high wholesale spot power prices. The price you get for the power the distributor buys from your car would not only be most attractive to you, it would be a good deal for them too, their alternative being very expensive power from peaking stations. If, driving home or for some other reason your batteries looked like running flat, a relatively small, but quiet and efficient engine running on petrol, diesel or compressed natural gas, even bio-fuel, would automatically cut in, driving a generator that supplied the batteries so you could complete your journey. Concerns over 'peak oil', increasing greenhouse gas emissions, and the likelihood that by the middle of this century there could be five times as many motor vehicles registered worldwide as there are now, mean that the world's almost total dependence on petroleum-based fuels for transport is, in every sense of the word, unsustainable.

Answer:

While people can charge their plug-in vehicles overnight before driving, they can plug vehicles into sockets allowing the power to flow from your car's batteries to the electricity grid, and an engine driving a generator will supply alternative power, which means more people will drive plug-in vehicles in the future because the world's almost total dependence on petroleum-based fuels for transport is unsustainable.

(APEUni Website / App SWT #56)

36. Online Teaching & Learning (Explanation)

Original:

What makes teaching online unique is that it uses the internet, especially the World Wide Web, as the primary means of communication. Thus, when you teach online, you don't have to be someplace to teach. You don't have to lug your briefcase full of paper or your laptop to a classroom, stand at a lectern, scribble on a chalkboard (or even use your high-tech, interactive classroom "smart" whiteboard), or grade papers in a stuffy room while your students take a test. You don't even have to sit in your office waiting for students to show up for conferences. You can hold "office hours" on weekends or at night after dinner. You can do all this while living in a small town in Wyoming or a big city like Bangkok, even if you are working for a college whose administrative office is located in Florida or Dubai. You can attend an important conference in Hawaii on the same day you teach your class in New Jersey, logging on from your laptop via the local café's wireless hotspot or your hotel room's high-speed network. Or you may simply pull out your smartphone to quickly check on the latest postings, email, or text messages from students. Online learning offers more freedom for students as well. They can search for courses using the Web, scouring their institution or even the world for programs, classes, and instructors that fit their needs. Having found an appropriate course, they can enroll and register, shop for their books, read articles, listen to lectures, submit their homework assignments, confer with their instructors, and receive their final grades—all online.

Answer:

Because teaching online uses the internet as the primary means of communication, teachers don't have to be someplace to teach and they can hold "office hours" on weekends or at night after dinner; online learning offers more freedom for students as they can search for courses using the Web, scouring their institution or even the world for programs, classes, and instructors that fit their needs.

(APEUni Website / App SWT #48)

37. Oil Price Decline (Explanation)

Original:

A plunging oil price has dragged UK inflation to zero over recent months. But analysts say the fall in retail prices cannot solely be attributed to oil. Discount retailers continue to steal market share from established industry giants, taking an increased chunk of both food and non-food markets. And, as retail analyst Nick Bubb notes, “the big supermarkets have had to respond to this by bringing down their own ‘rip off’ prices”. The result is a sector-wide fall in prices paid at the till. The growth of online retailers has also brought prices down, in part due to the ease with which customers can compare prices and purchase goods elsewhere if they find an item cheaper on a competitor’s site. Retailers are also reluctant to offer different prices in their physical and online stores, according to retail analyst Richard Hyman, which means shops are forced to cut prices on the high street. An ever-expanding range of shops is also to blame, according to Mr. Hyman. “Overcapacity is the biggest of the issues affecting prices,” he says. “In the last 10 years, online alone has added the equivalent of 110m square feet of trading space — that’s roughly equal to 65 additional Westfield London shopping malls. An increase in supply of retailers, with no increase in demand, has left the industry massively oversupplied.”

Answer:

While analysts say the fall in retail prices cannot just be attributed to the plunging oil price, discount retailers continue to steal market share from established industry giants, and the growth of online retailers and the increase in supply of retailers are both to blame.

(APEUni Website / App SWT #47)

38. Office Environment (Explanation)

Original:

The notion that office space has a role in promoting or inhibiting performance is backed up by solid research. A recent study conducted by Harvard University and Massachusetts General Hospital showed that improvements to the physical surroundings of workers impacted on productivity not just because the working environment was more attractive, but because the changes made employees feel cared for. A Swedish research paper revealed a strong link between the type of office an employee worked in and their overall job satisfaction and health. Various findings have emerged as a result of studies such as this. Pot plants and greenery can apparently have a real impact on psychological well-being. Those who work in a private room tend to be in better health than workers based in open-plan offices. Sufficient light can reduce sickness among workers and increase productivity, and an attractive office can make workers feel more cared for and therefore more loyal to their company. Most of these points make good rational sense. But some companies aren’t content simply to increase the health, productivity and contentment of their employees. Pioneers such as Google, Walt Disney and Dyson have tried to create offices that will do everything from promoting collaboration between workers to stimulating their creative juices. “Environment, both physical and cultural, can make or break creativity.” says Kursty Groves, author of *I Wish I Worked There! A look inside the most creative spaces in business*. Stimulating spaces expose the mind to a variety of stimuli – planned or random – in order to encourage people to think differently. Reflective spaces promote the filtering of information into the brain slowing it to make connections. An environment which encourages a team to build trust and to play freely is an essential ingredient for innovation.

Answer:

While the notion that office space has a role in promoting or inhibiting performance is backed up by solid research, including, improvements to the physical surroundings of workers impacted on productivity, some companies aren’t content simply to increase the health, productivity and contentment of their employees because some have tried to create offices that will do everything from promoting collaboration between workers to stimulating their creative juices.

(APEUni Website / App SWT #46)

39. Museology (Explanation)

Original:

What is museology? A simple definition might be that it is the study of museums, their history and underlying philosophy, the various ways in which they have, in the course of time, been established and developed, their avowed or unspoken aims and policies, their educative or political or social role. More broadly conceived, such a study might also embrace the bewildering variety of audiences — visitors, scholars, art lovers, children — at whom the efforts of museum staff are supposedly directed, as well as related topics such as the legal duties and responsibilities placed upon (or incurred by) museums, perhaps even some thought as to their future. Seen in this light, museology might appear at first sight a subject so specialized as to concern only museum professionals, who by virtue of their occupation are more or less obliged to take an interest in it. In reality, since museums are almost, if not quite as old as civilization itself, and since the plethora of present-day museums embraces virtually every field of human endeavor — not just art, or craft, or science, but entertainment, agriculture, rural life, childhood, fisheries, antiquities, automobiles: the list is endless — it is a field of enquiry so broad as to be a matter of concern to almost everybody.

Answer:

Museology, a study of museums, their history and underlying philosophy, not only embraces the bewildering variety of audiences and different topics but also specializes as to concern museum professionals, and it is a field of enquiry so broad as to be a matter of concern to almost everybody since it embraces every field of human endeavor.

(APEUni Website / App SWT #42)

40. Back to Countryside (Explanation)

Original:

Half a lifetime ago I made a lifestyle choice to exchange a city terrace for a farm cottage. I knew it was a good idea because I had been there before. Born and reared on a farm I had been seduced for a few years by the idea of being a big shot that lived and worked in a city rather than only going for the day to wave at the buses. True, I was familiar with some of the minor disadvantages of country living such as an iffy private water supply sometimes infiltrated by a range of flora and fauna (including, on one memorable occasion, a dead lamb), the absence of central heating in farm houses and cottages, and a single track farm road easily blocked by snow, broken down machinery or escaped livestock. But there were many advantages as I told my wife back in the mid Seventies. Town born and bred, eight months pregnant and exchanging a warm, substantial Corstorphine terrace for a windswept farm cottage on a much lower income, persuading her that country had it over town might have been difficult.

Answer:

While living in the country had some minor disadvantages including an iffy water supply and the absence of central heating, the author still thought it was a good idea to move back because he had been there before and had been seduced for a few years, but persuading my wife back to the country might be hard because she wouldn't exchange a warm terrace for a windswept farm cottage on a much lower income.

(APEUni Website / App SWT #41)

41. Malaysia Tourism (Explanation)

Original:

Malaysia is one of the most pleasant, hassle-free countries to visit in Southeast Asia. Aside from its gleaming 21st century glass towers, it boasts some of the most superb beaches, mountains and national parks in the region. Malaysia is also launching its biggest-ever tourism campaign in effort to lure 20 million visitors here this year. Any tourist itinerary would have to begin in the capital, Kuala Lumpur,

where you will find the Petronas Twin Towers, which once comprised the world tallest buildings and now hold the title of second-tallest. Both the 88-story towers soar 1,480 feet high and are connected by a sky-bridge on the 41st floor. The limestone temple Batu Caves, located 9 miles north of the city, have a 328-foot-high ceiling and feature ornate Hindu shrines, including a 141-foot-tall gold-painted statue of a Hindu deity. To reach the caves, visitors have to climb a steep flight of 272 steps. In Sabah state on Borneo island not to be confused with Indonesias Borneo you'll find the small mushroom-shaped Sipadan island, off the coast of Sabah, rated as one of the top five diving sites in the world. Sipadan is the only oceanic island in Malaysia, rising from a 2,300-foot abyss in the Celebes Sea. You can also climb Mount Kinabalu, the tallest peak in Southeast Asia, visit the Sepilok Orang Utan Sanctuary, go white-water rafting and catch a glimpse of the bizarre Proboscis monkey, a primate found only in Borneo with a huge pendulous nose, a characteristic pot belly and strange honking sounds. While you're in Malaysia, consider a trip to Malacca. In its heyday, this southern state was a powerful Malay sultanate and a booming trading port in the region. Facing the Straits of Malacca, this historical state is now a place of intriguing Chinese streets, antique shops, old temples and reminders of European colonial powers. Another interesting destination is Penang, known as the Pearl of the Orient. This island off the northwest coast of Malaysia boasts of a rich Chinese cultural heritage, good food and beautiful beaches.

Answer:

While Malaysia is one of the most pleasant countries to visit in Southeast Asia, it is also launching its biggest-ever tourism campaign to lure more visitors this year, and people can visit lots of places, such as the Petronas Twin Tower in Kuala Lumpur, the limestone temple Batu Caves, the Sipadan island in Sabah, the Mount Kinabalu as well as Malacca.

(APEUni Website / App SWT #39)

42. Human Remains (Explanation)**Original:**

Human remains are a fundamental part of the archaeological record, offering unique insights into the lives of individuals and populations in the past. Like many archaeological materials, human remains require distinctive and specialized methods of recovery, analysis, and interpretation, while technological innovations and the accumulation of expertise have enabled archaeologists to extract ever greater amounts of information from assemblages of skeletal material. Alongside analyses of new finds, these advances have consistently thrown new light on existing collections of human remains in museums, universities and other institutions. Given the powerful emotional, social and religious meanings attached to the dead body, it is perhaps unsurprising that human remains pose a distinctive set of ethical questions for archaeologists. With the rise of indigenous rights movements and the emergence of post-colonial nations, the acquisition and ownership of human remains became a divisive and politically loaded issue. It became increasingly clear that many human remains in museum collections around the world represented the traces of colonial exploitation and discredited pseudo-scientific theories of race. In the light of these debates and changing attitudes, some human remains were returned or repatriated to their communities of origin, a process which continues to this day. Recently a new set of challenges to the study of human remains has emerged from a rather unexpected direction: the British government revised its interpretation of nineteenth-century burial legislation in a way that would drastically curtail the ability of archaeologists to study human remains of any age excavated in England and Wales. This paper examines these extraordinary events and the legal, political and ethical questions that they raise.

Answer:

Technological advances have consistently thrown new light on existing collections of human remains in museums, universities and other institutions, with human remains posing a distinctive set of ethical questions for archaeologists, because many human remains in museum collections around the world

represented the traces of colonial exploitation and discredited pseudo-scientific theories of race, with some human remains being returned or repatriated to their communities of origin.

(APEUni Website / App SWT #36)

43. House Mice (Explanation)

Original:

According to new research, house mice (*Mus musculus*) are ideal biomarkers of human settlement as they tend to stow away in crates or on ships that end up going where people go. Using mice as a proxy for human movement can add to what is already known through archaeological data and answer important questions in areas where there is a lack of artifacts, Searle said. Where people go, so do mice, often stowing away in carts of hay or on ships. Despite a natural range of just 100 meters (109 yards) and an evolutionary base near Pakistan, the house mouse has managed to colonize every continent, which makes it a useful tool for researchers like Searle. Previous research conducted by Searle at the University of York supported the theory that Australian mice originated in the British Isles and probably came over with convicts shipped there to colonize the continent in the late 18th and 19th centuries. In the Viking study, he and his fellow researchers in Iceland, Denmark and Sweden took it a step further, using ancient mouse DNA collected from archaeological sites dating from the 10th to 12th centuries, as well as modern mice. He is hoping to do just that in his next project, which involves tracking the migration of mice and other species, including plants, across the Indian Ocean, from South Asia to East Africa.

Answer:

House mice can be used as ideal biomarkers of human settlement to add to what is already known through archaeological data and answer important questions where there is a lack of artifacts, which has been supported by the research conducted by Searle of Australian mice and the DNA matching of ancient mouse and modern mouse in the Viking study.

(APEUni Website / App SWT #35)

44. Greenhouse Gases (Explanation)

Original:

When an individual drives a car, heats a house, or uses an aerosol hair spray, greenhouse gases are produced. In economic terms, this creates a classic negative externality. Most of the cost (in this case, those arising from global warming) are borne by individuals other than the one making the decision about how many miles to drive or how much hair spray to use. Because the driver (or sprayer) enjoys all the benefits of the activities but suffers only part of the cost, that individual engages in more than the economically efficient amount of the activity. In this sense, the problem of greenhouse gases parallels the problem that occurs when someone smokes a cigarette in an enclosed space or litters the countryside with fast-food wrappers. If we are to get individuals to reduce production of greenhouse gases to the efficient rate, we must somehow induce them to act as though they bear all the costs of their actions. The two most widely accepted means of doing this are government regulation and taxation, both of which have been proposed to deal with greenhouse gases.

Answer:

While an individual's behaviours produced greenhouse gases, he enjoys all the benefits but suffers only part of the costs, so we must induce individuals to act as though they bear all the costs of their actions if we want individuals to reduce production of greenhouse gases to the efficient rate, and the two most widely accepted means to deal with greenhouse gases are government regulations and taxation.

45. Frog Amber (Explanation)

Original:

A miner in the state of Chiapas found a tiny tree frog that has been preserved in amber for 25 million years, a researcher said. If authenticated, the preserved frog would be the first of its kind found in Mexico, according to David Grimaldi, a biologist and curator at the American Museum of Natural History, who was not involved in the find. The chunk of amber containing the frog, less than half an inch long, was uncovered by a miner in Mexico's southern Chiapas state in 2005 and was bought by a private collector, who loaned it to scientists for study. A few other preserved frogs have been found in chunks of amber — a stone formed by ancient tree sap — mostly in the Dominican Republic. Like those, the frog found in Chiapas appears to be of the genus *Craugastor*, whose descendants still inhabit the region, said biologist Gerardo Carbot of the Chiapas Natural History and Ecology Institute. Carbot announced the discovery this week. The scientist said the frog lived about 25 million years ago, based on the geological strata where the amber was found. Carbot would like to extract a sample from the frog's remains in hopes of finding DNA that could identify the particular species but doubts the owner would let him drill into the stone.

Answer:

A miner in Mexico found a tiny tree frog preserved in amber for 25 million years, which would be the first of its kind found in Mexico, with a few other preserved frogs found in chunks of amber, and Carbot would like to extract a sample from the frog's remains to find DNA that could identify the particular species but the owner may not allow.

46. Double Blind (Explanation)

Original:

The feature of being “double blind”, where neither patients nor physicians are aware of who receives the experimental treatment, is almost universally trumpeted as being a virtue of clinical trials. Hence, trials that fail to remain successfully double blind are regarded as providing inferior evidential support. The rationale for this view is unobjectionable: double blinding rules out the potential confounding influences of patient and physician beliefs. Nonetheless, viewing double blind trial as necessarily superior is problematic. For one, it leads to the paradox that very effective experimental treatments will not be supportable by best evidence. If a new drug were to make even the most severe symptoms of the common cold disappear within seconds, most participants and investigators would correctly identify it as the latest wonder drug and not the control (i.e. placebo) treatment. Any trial testing the effectiveness of this wonder drug will therefore fail to remain double blind. Similar problems arise for treatments, such as exercise and most surgical techniques, whose nature makes them resistant to being tested in double blind conditions. It seems strange that an account of evidence should make priori judgments that certain claims can never be supported by ‘best evidence’. It would be different if the claims at issue were pseudoscientific — untestable. But so far as treatments with large effects go, the claim that they are effective is highly testable and intuitively they should receive greater support from the evidence than do claims about treatments with moderate effects.

Answer:

While double blind is a virtue of clinical trials because it rules out the potential confounding influences of patients and physician beliefs, viewing double blind trial as necessarily superior is problematic because it leads to the paradox that effective experimental treatments will not be supportable by the best evidence, but claims treatments are effective is highly testable and intuitively they should receive greater support from the evidence than do claims about treatments with moderate effects.

(APEUni Website / App SWT #24)

47. America and India IT (Explanation)

Original:

Consider the current situation: like their counterparts in the United States, engineers and technicians in India have the capacity to provide both computer programming and innovative new technologies. Indian programmers and high-tech engineers earn one-quarter of what their counterparts earn in the United States; Consequently, India is able to do both jobs at a lower dollar cost than the United States: India has absolute advantage in both. In other words, it can produce a unit of programming for fewer dollars than the United States, and it can also produce a unit of technology innovation for fewer dollars. Does that mean that the United States will lose not only programming jobs but innovative technology jobs, too? Does that mean that our standard of living will fall if the United States and India engage in the international trade? David Ricardo would have answered no to both questions – as we do today. While India may have an absolute advantage in both activities, that fact is irrelevant in determining what India or the United States will produce. India has a comparative advantage in doing programming in part because of such activity requires little physical capital. The flip side is that the United States has a comparative advantage in technology innovation partly because it is relatively easy to obtain capital in this country to undertake such long-run projects. The result is that Indian programmers will do more and more of what U.S. programmers have been doing in the past. In contrast, American firms will shift to more and more innovation.

Answer:

While India might have absolute advantage in providing both computer programming and innovative new technologies because of the low cost, the United States has a comparative advantage in technology innovation because of easier capital obtaining, which suggests that Indian programmers will do more and more of what U.S. programmers have been doing in the past and American firms will shift to more and more innovation.

(APEUni Website / App SWT #20)

48. Compulsory Reburial (Explanation)

Original:

Human remains are a fundamental part of the archaeological record, offering unique insights into the lives of individuals and populations in the past. Recently a new set of challenges to the study of human remains has emerged from a rather unexpected direction: the British government revised its interpretation of nineteenth-century burial legislation in a way that would drastically curtail the ability of archaeologists to study human remains of any age excavated in England and Wales. This paper examines these extraordinary events and the legal, political and ethical questions that they raise. In April 2008 the British government announced that, henceforth, all human remains archaeologically excavated in England and Wales should be reburied after a two-year period of scientific analysis. Not only would internationally important prehistoric remains have to be returned to the ground, removing them from public view, but also there would no longer be any possibility of long-term scientific investigation as new techniques and methods emerged and developed in the future. Thus, while faunal remains, potsherds, artifacts and environmental samples could be analyzed and re-analyzed in future years, human remains were to be effectively removed from the curation process. Archaeologists and other scientists were also concerned that this might be the first step towards a policy of reburying all human remains held in museum collections in England and Wales including prehistoric, Roman, Saxon, Viking and Medieval as well as more recent remains.

Answer:

While human remains are the fundamental part for analysis and interpretation of any archaeological records, they still need to be reburied after a two-year scientific period because of the appearance and development of new technologies and methods, so human remains should be removed from the curation process with scientists concerned that this might be the first step towards a policy of reburying all human remains.

(APEUni Website / App SWT #19)

49. Columbus (Explanation)

Original:

When Christopher Columbus arrived at Hispaniola during his first transatlantic voyage in the year A.D. 1492, the island had already been settled by Native Americans for about 5,000 years. The occupants in Columbus's time were a group of Arawak Indians called Tainos who lived by farming, were organized into five chiefdoms, and numbered around half a million (the estimates range from 100,000 to 2,000,000). Columbus initially found them peaceful and friendly, until he and his Spaniards began mistreating them. Unfortunately for the Tainos, they had gold, which the Spanish coveted but didn't want to go to the work of mining themselves. Hence the conquerors divided up the island and its Indian population among individual Spaniards, who put the Indians to work as virtual slaves, accidentally infected them with Eurasian diseases, and murdered them. By the year 1519, 27 years after Columbus's arrival, that original population of half a million had been reduced to about 11,000, most of whom died that year of smallpox to bring the population down to 3,000.

Answer:

A group of Arawak Indians called Tainos, the occupants of Hispaniola, initially found peaceful and friendly by Columbus, unfortunately had gold coveted by the Spanish, so the conquerors divided up the island and the Indian population, and put the Indians to work as slaves, with them accidentally infected with Eurasian diseases and murdered, which made the original population reduced by the year 1519.

(APEUni Website / App SWT #17)

50. Children Allowance (Explanation)

Original:

Many people who have written on the subject of allowances say it is not a good idea to pay your child for work around the home. These jobs are a normal part of family life. Paying children to do extra work around the house, however, can be useful. It can even provide an understanding of how a business works. Allowances give children a chance to experience the things they can do with money. They can share it in the form of gifts or giving to a good cause. They can spend it by buying things they want. Or they can save and maybe even invest it. Saving helps children understand that costly goals require sacrifice: you have to cut costs and plan for the future. Requiring children to save part of their allowance can also open the door to future saving and investing. Many banks offer services to help children and teenagers learn about personal finance. A savings account is an excellent way to learn about the power of compound interest. Compounding works by paying interest on interest. So, for example, one dollar invested at two percent interest for two years will earn two cents in the first year. The second year, the money will earn two percent of one dollar and two cents, and so on. That may not seem like a lot. But over time it adds up.

Answer:

Although many people say it is not a good idea to pay your child for work around the home, it can provide an understanding of how a business works and give them a chance to experience the things they can do with money because children can spend the money or understand saving and investing, so that they can learn about the power of compound interest.

(APEUni Website / App SWT #15)

51. Australian Indigenous Food (Explanation)

Original:

In its periodic quest for culinary identity, Australia automatically looks to its indigenous ingredients, the foods that are native to this country. 'There can be little doubt that using an indigenous product must qualify a dish as Australian notes Stephanie Alexander. Similarly, and without qualification, states that 'A uniquely Australian food culture can only be based upon foods indigenous to this country, although, as Craw remarks, proposing Australian native foods as national symbols relies more upon their association with 'nature' and geographic origin than on common usage. Notwithstanding the lack of justification for the premise that national dishes are, of necessity, founded on ingredients native to the country—after all, Italy's gastronomic identity is tied to the non-indigenous tomato, Thailand's to the non-indigenous chili—the reality is that Australians do not eat indigenous foods in significant quantities. The exceptions are fish, crustaceans and shellfish from oceans, rivers and lakes, most of which are unarguably unique to this country. Despite valiant and well-intentioned efforts today at promoting and encouraging the consumption of native resources, bush foods are not harvested or produced in sufficient quantities for them to be a standard component of Australian diets, nor are they generally accessible. Indigenous foods are less relevant to Australian identity today than lamb and passionfruit, both initially imported and now naturalized.

Answer:

In its periodic quest for culinary identity, Australia automatically looks to its indigenous ingredients, the foods that are native to this country, notwithstanding the lack of justification for the premise that national dishes are founded on ingredients native to the country and the reality that Australians do not eat indigenous foods in significant quantities, and indigenous foods are less relevant to Australian identity today than lamb and passionfruit, both initially imported and now naturalized.

52. 2014 Olympics (Explanation)

Original:

11 February 2009 — Major athletic events around the globe — from the 2014 Sochi Olympics to an annual powerboat race in Norwegian fjords — are striving to neutralize their carbon footprint as part of a world-wide climate network, the United Nations Environment Programme (UNEP) said today. The sporting events are the latest participants to join the network, and are particularly important for inspiring further global action on the environment, said Achim Steiner, UNEP Executive Director. "Whether carried out on track and field or on ice and snow, sporting events ignite the spirit of achievement in thousands of competitors and billions of spectators worldwide," Mr. Steiner said. "It is, therefore, heartening that this passion for excellence increasingly encompasses environmental performance, with sporting organizations raising the bar ever higher at each and every tournament," he added. Organizers of the 2014 Sochi Olympic and Paralympic Winter Games — to be held in a unique natural setting between the shores of the Black Sea and the soaring snow-capped Caucasus Mountains — say they will put an estimated \$1.75 billion into energy conservation and renewable energy. That investment will be dedicated to improving transport infrastructure, offsetting greenhouse gas emissions from the use of electricity, air travel and ground transportation, the reforestation of Sochi National Park and the development of green belts in the city.

Answer:

While major athletic events are striving to neutralize their carbon footprint as part of a world-wide climate network, they are also the latest participants to join the network and are particularly important

for inspiring further global action on the environment; organizers will put an estimated \$1.75 billion into energy conservation and renewable energy, which will be dedicated to improving transport infrastructure and offsetting greenhouse gas emissions.

(APEUni Website / App SWT #1)

53. Hookham (Explanation)

Original:

The Booksellers of Hookham and Carpenter (hereafter referred to only as Hookham) were located on New Bond Street in London, and their records span the most politically turbulent decade of the eighteenth-century the 1790's. Clients who frequented Hookham were primarily from the aristocratic or gentry classes. In fact, of Hookham's total buyers, 22% were aristocracy, and 35% of the aristocracy purchased novels. We can also confidently assume that untitled female customers were of gentry income because their addresses were primarily in London's fashionable West End. Hookham's ledgers not only reveal a dramatic increase in the proportion of female purchasers of novels by comparison to earlier studies of provincial women, but they also reveal a remarkable increase in the proportion of female purchases of novels authored by females. Such a marked increase illustrates that Hookham's leisured female customers were able to buy more novels. Furthermore, the fact that these female aristocrats and gentry have accounts under their own name, not their husbands, demonstrates the greater degree of agency and independence that these urban, moneyed women had relative to provincial women. However, because our study does not include an examination of male customers, we are very limited in what claims we can make about whether or not these women behaved according to the cliché that women were the predominant consumers of novels in the eighteenth-century. Moreover, while more disposable income and leisure time certainly accounts for the significant increase in female purchases of novels authored by women in the 1790s, this increase also strongly suggests a desire on the part of women readers to engage in this politically charged decade. Thus, novel-reading provided women readers with the means through which they were able to participate in the male-dominated world of politics. The latter part of our paper will more fully explore this hypothesis in the context of certain recent literary scholars claims that both Gothic and sentimental novels are actively engaged in political debate and discussion.

Answer:

According to the Hookham's found, there is a dramatic increase in the proportion of female purchasers of novels and purchases of novels authored by females, and also, these female aristocrats and gentry have accounts under their own names, and more disposal income and leisure time certainly account for the significant increase, thus more female were able to participate in the male-dominated world of politics.

54. Primary Carers (Explanation)

Original:

Slightly less than one in five carers (19%) were primary carers (475,000 people). That is, they were the main carer of a person who was limited in carrying out the core everyday activities of mobility, communication or self-care. Both primary carers and the larger group of other carers (close to 2 million) contribute to the wellbeing of older people and people with disabilities. However, because they care for people who otherwise would have difficulty carrying out basic everyday activities, there is particular interest in primary carers: in the contribution they make, their wellbeing, labor force experiences, motivations and the support they receive in caring. Primary carers were more likely than other carers to be assisting someone who lived in the same household (81% compared with 76%). As with caring as a

whole, the likelihood of being a primary carer increased with age to peak at age 55–64 years, where one in twenty people were primary carers. However, rather than then declining, the likelihood of being a primary carer remained at around this level among the older age groups. Consequently, primary carers had a somewhat older age profile than other carers. The median age of primary carers was 52 years, compared with 47 years for other carers. Primary carers were more likely than other carers to be female (71% compared with 50%) and less likely to be in the labor force (39% compared with 60%). Women not in the labor force were by far the largest single group among primary carers (44%). In contrast, men employed full-time were the largest single group among other carers (25%).

Answer:

While primary carers, the main carer of a person who would otherwise have difficulty carrying out basic everyday activities, have a somehow older age profile, they are more likely to be females who are less likely in the labor force, and men employed full-time were the largest single group among other carers. (APEUni Website / App SWT #57)

55. American English (Explanation)**Original:**

American English is, without doubt, the most influential and powerful variety of English in the world today. There are many reasons for this. First, the United States is, at present, the most powerful nation on earth and such power always brings with it influence. Indeed, the distinction between a dialect and a language has frequently been made by reference to power. As has been said, a language is a dialect with an army. Second, America's political influence is extended through American popular culture, in particular through the international reach of American films (movies, of course) and music. As Kahane has pointed out, the internationally dominant position of a culture results in a forceful expansion of its language... the expansion of language contributes... to the prestige of the culture behind it. Third, the international prominence of American English is closely associated with the extraordinarily quick development of communications technology. Microsoft is owned by an American, Bill Gates. This means a computer's default setting for language is American English, although of course this can be changed to suit one's own circumstances. In short, the increased influence of American English is caused by political power and the resultant diffusion of American culture and media, technological advance, and the rapid development of communications technology.

Answer:

While American English is a dialect with an army because the United States is the most powerful nation on the earth and such power brings with it influence, America's political influence is extended through American popular culture which also results in an expansion of its language, and the international prominence of American English is associated with the quick development of communications technology, which suggests American English is the most influential and powerful variety of English. (APEUni Website / App SWT #6)

56. Orbital Debris (Explanation)**Original:**

For decades, space experts have worried that a speeding bit of orbital debris might one day smash a large spacecraft into hundreds of pieces and start a chain reaction, a slow cascade of collisions that would expand for centuries, spreading chaos through the heavens. In the last decade or so, as scientists came to agree that the number of objects in orbit had surpassed a critical mass — or, in their terms, the critical spatial density, the point at which a chain reaction becomes inevitable — they grew more anxious. Early this year, after a half-century of growth, the federal list of detectable objects (four inches wide or larger) reached 10,000, including dead satellites, spent rocket stages, a camera, a hand tool and

junkyards of whirling debris left over from chance explosions and destructive tests. So our billions of dollars of satellites are at risk.

Answer:

As space experts have worried that orbital debris might one day smash a large spacecraft into pieces and start a chain reaction, scientist recently came to agree that the amount of orbital debris had surpassed the critical spatial density, which will inevitably lead to a chain reaction that puts our billions of dollars of satellites at risk.

(APEUni Website / App SWT #49)

57. Paleolithic People (Explanation)

Original:

The ways of life Upper Paleolithic people are known through the remains of meals scattered around their hearths, together with many tools and weapons and the debris left over from their making. The people were hunter-gathers who lived exclusively from what they could find in nature without practicing either agriculture or herding. They hunted the bigger herbivores, while berries, leaves, roots, wild fruit and mushrooms probably played a major role in their diet. Their hunting was indiscriminate; perhaps because so many animals were about they did not need to spare pregnant females or the young. In the cave of Enlène, for example, many bones of reindeer and bison fetuses were found. Apparently, upper Paleolithic people hunted like other predators and killed the weakest prey first. They did, however, sometimes concentrate on salmon runs and migrating herds of reindeer. Contrary to popular beliefs about cave man, upper Paleolithic people did not live deep inside caves. They rather close the foot of cliffs, especially when an overhang provided good shelter. On the plains and in the valleys, they used tents made from hides of the animals they killed. At time, on the great Russian plains, they built huts with huge bones and tusks collected from skeletons of mammals. Men hunted mostly with spears, the bow and arrow were probably not invented until the Magdalenian period that came at the end of the Upper Paleolithic.

Answer:

While Upper Paleolithic people were hunter-gathers who lived exclusively from what they could find in nature without practicing either agriculture or herding, they did not live deep inside caves but rather close to the foot of cliffs and hunted with spears, the bow and arrow, which suggest their living ways are known through the remains of meals scattered around their hearths, with many tools and weapons and the debris left over from their making.

(APEUni Website / App SWT #51)

58. Crime Rate (Explanation)

Original:

The Home Office's periodic British Crime Survey estimates that the true level of crime (the sorts, anyway, which inform the official figures) is about four times than which is registered in the annual statistics. Quite often, especially in the financial services sector, businesses do not report crimes against themselves for fear of lowering their public image. Many citizens today are not insured against car theft or property loss (because they cannot afford the premiums) so they have no incentive to tell the police if they become victims. A steep statistical rise in crime can sometimes arise not from a real growth in a particular type of conduct but from a new policing policy – offences of "lewd dancing" rose by about 300 per cent during 12 months in the 1980s in Manchester, but only because the zealous Chief Constable James Anderton had deployed a great many officers in gay night clubs. Sometimes the enactment of a new range of offences or the possibility of committing old offences in a new way (like computer offences involving fraud and deception) can cause an upward jolt in crime levels. The figures

just released show a startling jump in street robbery but much of this seems to be a very particular crime: the theft of the now ubiquitous mobile phones. Conversely, if crimes like joyriding and some assaults are kept out of the categories measured in the annual statistics, as is the case, the official figures do not reflect even what is reported to the police as criminal. The way that criminal statistics are compiled by the Home Office is also relevant. From April 1998, police forces started to count crime in a way which, according to the government, will give "a more robust statistical measure".

Answer:

There are several reasons that contribute to a rise in crime rate including that businesses do not report crimes against themselves for fear of lowering their public image, that citizens have no incentive to tell police if they become victims, a new policing policy, the enactment of a new range of offenses or the possibility of committing old offenses in a new way, and the way that criminal statistics are compiled by the Home Office.

Write Essay

1. Success

Question:

Some people feel that success lies in achieving professional and economic targets, while others say that success lies in spending quality time with family and friends. What is your opinion?

(APEUni Website / App WE #363)

2. Travel for Education

Question:

Some believe travel is overrated. People argue whether travel is or is not a component of a quality education. To what extent do you agree with it?

(APEUni Website / App WE #261)

3. Television (Explanation)

Question:

Television serves many useful functions. It helps people to relax. Besides, it can also be seen as a companion for lonely people. To what extent do you agree with this? Explain it with your own experience.

(APEUni Website / App WE #160)

4. Inventions (Explanation)

Question:

In our technological world, the number of new inventions has been evolving on a daily basis. Please describe a new invention, and determine whether it will bring advantages or disadvantages.

(APEUni Website / App WE #159)

5. Dangerous Activities (Explanation)

Question:

Nowadays, more and more people engage in dangerous activities, such as skydiving, skiing and extreme motorcycling. Are you in favor of such activities or not? Why?

(APEUni Website / App WE #158)

6. Tourism's Pros and Cons (Explanation)

Question:

The disadvantages of tourism in less developed countries are as great as the advantages. What is your opinion?

(APEUni Website / App WE #156)

7. Law Effect (Explanation)

Question:

Some people think human behavior can be limited by laws, while others think laws have little effect. What is your opinion?

(APEUni Website / App WE #149)

8. Marketing in Companies (Explanation)

Question:

Should marketing in companies which produce consumer goods like food and clothing, place emphasis on reputation of the company or short-term strategies like discount and special offers? Why?

(APEUni Website / App WE #195)

9. Studying Climate Change (Explanation)

Question:

Imagine you have been assigned on the study of climate change. Which area of climate change will you choose and why? Use examples.

(APEUni Website / App WE #155)

10. Studying Abroad (Explanation)

Question:

It is often argued that studying overseas is overrated. There are many scholars who study locally. To what extent do you agree with this?

(APEUni Website / App WE #124)

11. Distraction (Explanation)

Question:

Effective study requires time, comfort and peace. It is impossible to combine learning with employment. To what extent do you think the statements are realistic? Give your opinion with examples.

(APEUni Website / App WE #106)

12. Life Experience (Explanation)

Question:

Experience is the best teacher. Some people think life experiences teach people more efficiently than books or formal education can. How far do you agree with this statement? Give your reason or provide your personal experience.

(APEUni Website / App WE #102)

13. Credit Cards (Explanation)

Question:

In a cashless society, people use more credit cards instead of cash. Cashless society seems to be a reality. How realistic do you think it might be? What are the benefits or problems of this phenomenon?

(APEUni Website / App WE #95)

14. Tourism (Explanation)

Question:

Tourism is good for some less developed countries, but also has some disadvantages. Discuss.

(APEUni Website / App WE #79)

15. Digital Materials (Explanation)

Question:

With the increase of digital information available online, the role of the library has become obsolete. Universities should only procure digital materials rather than constantly update textbooks. Discuss both the advantages and disadvantages of this position and give your own point of view.

(APEUni Website / App WE #86)

16. Building Effects (Explanation)

Question:

Do you think the design of buildings affects positively or negatively where people live and work?

(APEUni Website / App WE #72)

17. Experiential Learning (Explanation)

Question:

Some people point that experiential learning (i.e. learning by doing it) can work well in formal education. However, others think a traditional form of teaching is the best. Do you think experiential learning can work well in high schools or colleges?

(APEUni Website / App WE #56)

18. Senior Executives (Explanation)

Question:

Employers should get their employees involved in the decision making process. What are the pros and cons of such a policy about products and services?

(APEUni Website / App WE #46)

19. Personal Life (Explanation)

Question:

Nowadays, people spend too much time at work to the extent that they hardly have time for their personal life. How widespread do you think it is? Discuss the problems caused by the shortage of time.

(APEUni Website / App WE #40)

20. Television

Question:

Nowadays television has become an essential part of life. It is a medium for disseminating news and information, and for some it acts as a companion. What is your opinion about this?

(APEUni Website / App WE #38)

21. Getting Married (Explanation)

Question:

It is argued that getting married before finishing your study or getting established in a good job is foolish. To what extent do you agree or disagree?

(APEUni Website / App WE #27)

22. Extreme Sports

Question:

In your opinion, what are the advantages and disadvantages of extreme or adventure sports?

(APEUni Website / App WE #23)

23. Formal Written Examination (Explanation)

Question:

Many education systems assess students using formal written examinations. Those kinds of exams are a valid method. To what extent do you agree or disagree? Give examples with your own experience.

(APEUni Website / App WE #17)

24. Global Issue (Explanation)

Question:

Climate change is a concerning global issue. Who should take the responsibilities, governments, big companies or individuals?

(APEUni Website / App WE #9)

25. Facing Issues (Explanation)

Question:

The world's governments and organizations confront a multitude of global problems. Which do you think is the most pressing problem for the inhabitants of our planet and give the solution?

(APEUni Website / App WE #76)

26. Transportation Networks (Explanation)

Question:

As cities expand, some people claim governments should try to create better networks of public transportation available for everyone rather than building more roads for vehicle owning population. What's your opinion? Give some examples or experience to support your opinion.

(APEUni Website / App WE #5)

27. Extending Life Expectancy (Explanation)

Question:

Medical technology is responsible for increasing the average life expectancy. Do you think it is a blessing or a curse?

(APEUni Website / App WE #71)

28. Right Balance (Explanation)

Question:

Nowadays, it is increasingly more difficult to maintain the right balance between work and other aspects of one's life, such as leisure pursuits with family members. How important do you think this balance is? What are the reasons that make some people think that this is hard to achieve?

(APEUni Website / App WE #39)

29. Shopping Malls (Explanation)

Question:

In many towns and cities, large shopping malls are replacing small local shops. Do you think this is a positive development? Use your own experiences.

(APEUni Website / App WE #30)

30. Marks Deduction (Explanation)

Question:

Some universities deduct marks from students' works if they are given in late. What is your opinion? Suggest some alternative actions.

(APEUni Website / App WE #63)

31. Legal Responsibility (Explanation)

Question:

Should parents be held legally responsible for the actions of their children? Support your opinion with personal examples.

(APEUni Website / App WE #43)

32. Inventions (Explanation)

Question:

In the past 100 years, there have been many inventions such as antibiotics, airplanes and computers.

Which do you think is the most important one? Why?

(APEUni Website / App WE #22)

33. Personal Life (Explanation)

Question:

Nowadays, people devote too much time to their job. This leaves very little time for their personal life.

How widespread is the problem? What problem will this shortage of time cause?

(APEUni Website / App WE #75)

34. Studying Theater (Explanation)

Question:

There are both problems and benefits for high school students to study plays and works of theater that were written centuries ago. Use your own experience to discuss it.

(APEUni Website / App WE #77)

35. Reputation or Short Term Strategies (Explanation)

Question:

Should marketing for consumer goods companies like clothing and food emphasize reputation or short term strategies like discounts and special offers?

(APEUni Website / App WE #48)

36. Information Revolution (Explanation)

Question:

The information revolution brought about by modern mass media has both positive and negative consequences to individuals and society. To what extent do you agree with this statement? Discuss with your own experience.

(APEUni Website / App WE #24)

37. Mass Media (Explanation)

Question:

Mass media, such as TV, radio and newspapers, has an influence on people, particularly on younger generations. It plays a pivotal role on shaping the opinions of people, especially teenagers and young people. Do you agree with this? Please give examples.

(APEUni Website / App WE #35)

C. Reading

Fill in the Blanks (Reading & Writing)

1. Roommates (Incomplete)

Points: About roommates. ... (share / take) responsibility (worth / worthy / worthwhile) it (divide) bills ...

(APEUni Website / App FIBRW #870)

2. Alcohol Consumption (Incomplete)

Points: ... economic (cost) of alcohol consumption by employees and ... economic (impact).

(APEUni Website / App FIBRW #863)

3. Light Pollution

The widespread use of artificial light in modern societies means that light pollution is an increasingly common feature of the environments humans inhabit. This type of pollution is **exceptionally** high in coastal regions of tropic and temperate zones, as these are areas of high rates of human population growth and settlement. Light pollution is a threat for many species that inhabit these locations, particularly those whose ecology or behavior depends , **in some way** , on natural cycles of light and dark. Artificial light is known to have detrimental effects on the ecology of sea turtles, particularly at the hatchling stage when they emerge from nests on natal beaches and head towards the sea. Under natural conditions, turtles hatch predominantly at night (although some early morning and late afternoon emergences occur) and show an innate and well-directed orientation to the water, **relying** mostly on light cues that attract them toward the brighter horizon above the sea surface. Artificial lighting on beaches is strongly attractive to hatchlings and can cause them **to move** away from the sea and interfere with their ability to orient in a constant direction. Ultimately, this disorientation due to light pollution can lead to death of hatchlings from exhaustion, dehydration and predation .

Options:

- 1) exceptionally, absolutely, nearly, rarely
- 2) in no way, in some way, by the way, in some ways
- 3) imposing, figuring, relying, pouring
- 4) to move, moving, moved, move

(APEUni Website / App FIBRW #869)

4. Novelist (Incomplete)

Points: A novelist wrote a novel, ... (translated) into French and other languages, ... (fame) go down ...

(APEUni Website / App FIBRW #868)

5. Video Game (Incomplete)

Points: IBM arranged a video game match between a super computer and human gamers. The fact that the computer has (fought / challenge) on humans make people worry if scientific technologies would threaten us. But the computer can just perform programs set by us. Even machine-learning has not (still / yet) deduced well ...

(APEUni Website / App FIBRW #867)

6. Kathryn Mewes

Kathryn Mewes does not meet bohemian, hippy parents in her line of work. Typically one, or both, of the

parents she sees work in the City of London. "Professionals seek professionals," she says. Originally a nanny, Mewes is now a parenting consultant, advising couples privately on changing their child's behavior, **as well as** doing corporate seminars for working parents. Her clients find they are unprepared for the chaos and unpredictability that having a child can entail. "Parents are getting older, they have been in control their **whole** lives and been successful. Suddenly a baby turns up and life turns on its head." Nicknamed the "Three-Day Nanny" **because of** her pledge to fix behavioral problems in children under the age of 12 within three days, she is filming a new Channel 4 television series demonstrating her techniques. The **role** of the parenting consultant – distinct from that of a nanny – has developed, she says, as people are used to buying in expertise, such as personal trainers or, in her case, parenting advice .

Options:

- 1) as long as, in order to, in spite of, as well as
 - 2) whole, all, full, every
 - 3) related with, together with, because of, according to
 - 4) percentage, performance, role, belief
- (APEUni Website / App FIBRW #866)

7. Rugby Matches (Incomplete)

Points: Rugby matches draw attention. Athletes should have ... qualities. About how they should arrange their muscle training so that they can recover soon after the match.

(APEUni Website / App FIBRW #865)

8. Bhutan

Bhutan is the last standing Buddhist Kingdom in the World and, until recently, has preserved much **of** their culture since the 17th century by avoiding globalization and staying isolated from the world. Internet, television, and western dress were **banned** from the country up until ten years ago. But over the past ten years globalization has begun to change in Bhutan, but things remain perfectly balanced. Bhutan is the only country in the world that has a 'GNH.' You may think GNH is just another **statistically** based term with no real-life application, but it refers to "Gross National Happiness." The process of measuring GNH began when Bhutan opened to globalization. It measures people's quality of life, and makes sure that "material and spiritual development happen together." Bhutan has done an amazing Job of finding this balance. Bhutan has continually been ranked as the happiest country in all of Asia, and the eighth Happiest Country in the world according to Business Week. In 2007 Bhutan had the second fastest growing GDP in the world, at the same time as **maintaining** their environment and cultural identity.

Options:

- 1) of, about, to, for
 - 2) summoned, observed, displayed, banned
 - 3) statistically, barely, overwhelmingly, roughly
 - 4) demeaning, intruding, maintaining, mourning
- (APEUni Website / App FIBRW #864)

9. Dance

Dance has played an important role in many musicals. In some **cases** , dance numbers are included as an excuse to add to the color and spectacle of the show, but dance is more effective when it forms an integral part of the **plot** . An early example is Richard Rodgers On Your Toes(1936) in which the story about classical ballet meeting the world of jazz enabled dance to be introduced in a way that **enhances** ,

rather than interrupts the drama .

Options:

- 1) dimensions, cases, brief, extent
 - 2) prowess, plot, phenomenon, roundabout
 - 3) encumbers, enhances, levels, crumples
- (APEUni Website / App FIBRW #862)

10. Teenage Daughter

Your teenage daughter gets top marks in school, captains the debate team, and volunteers at a shelter for homeless people. But while driving the family car, she text-messages her best friend and rear-ends another vehicle. How can teens be so clever, accomplished, and responsible—and reckless at the same time? Easily, according to two physicians at Children’s Hospital Boston and Harvard Medical School (HMS) who have been **exploring** the unique structure and chemistry of the **adolescent** brain .”The teenage brain is not just an adult brain with fewer miles on it,” says Frances E. Jensen, a professor of neurology. ”It’s a paradoxical time of **development** . These are people with very sharp brains, but they’re not quite sure what to do with them.” Research during the past 10 years, powered by technology such as functional magnetic resonance imaging, has revealed that young brains have **both** fast-growing synapses and sections that remain unconnected . This leaves teens easily influenced by their environment and more prone to impulsive behavior, even without the **impact** of souped-up hormones and any genetic or family predispositions.

Options:

- 1) exposing, exploring, enumerating, explaining
 - 2) ample, adolescent, adulthood, abundant
 - 3) enrichment, development, adornment, adoration
 - 4) both, few, whole, either
 - 5) impact, impress, impair, impose
- (APEUni Website / App FIBRW #861)

11. Digital Media

Digital media and the internet have made the sharing of texts, music and images easier than ever, and the **enforcement** of copyright restriction harder. This situation has encouraged the growth of IP law, and **prompted** increased industrial concentration on extending and ‘policing’ IP protection, while also leading to the growth of an ‘open access’, or ‘creative commons’ movement which **challenges** such control of knowledge and **creativity** .

Options:

- 1) detriment, solstice, enforcement, commissary
 - 2) straggled, prompted, equated, grappled
 - 3) challenges, hankered, allows, compelled
 - 4) comparison, penmanship, quotient, creativity
- (APEUni Website / App FIBRW #514)

12. Lionfish (Incomplete)

Points: Lionfish were originally from the water of Pacific and Indian Ocean. Five blanks: (sight\views\ ...) ... (recently), (being released\release\being released) from their home aquariums.

(APEUni Website / App FIBRW #447)

13. Class Participation

Because the instructional methods, expected class participation and the nature of the courses vary, no fixed number of absences is **applicable** to all situations. Each instructor is **responsible** for making clear to the class at the beginning of the semester his or her **policies** and procedures in **regard** to class attendance and the reasons for them.

Options:

- 1) applicable, exceptional, ubiquitous, exempt
 - 2) respectful, sensitive, responsible, negligible
 - 3) stereotypes, policies, features, tempers
 - 4) addition, regard, proportion, correspondence
- (APEUni Website / App FIBRW #446)

14. Age Groups (Incomplete)

Points: 50 or 60 years of age group ... grown more (sharply/greatly/normally/commonly) than other aged groups. ...They can't get/find a job (because/if/while / ...) they don't have one.
(APEUni Website / App FIBRW #445)

15. Sound Speed

The speed of sound (otherwise known as Mach 1) varies with temperature. At sea level on a 'standard day', the temperature is 59°F, and Mach 1 is approximately 761 mph. As the altitude increases, the temperature and speed of sound **both** decrease until about 36,000 feet, after which the temperature **remains** steady until about 60,000 feet. Within that 36,000 — 60,000 foot range, Mach 1 is about 661 mph. Because of the **variation**, it is possible for an airplane flying supersonic at high altitude to be slower than a subsonic flight at sea level. The transonic band (the 'sound barrier') extends **from** around Mach 0.8 — when the first supersonic shock waves **form on** the wing — to Mach 1.2, when the entire wing has gone supersonic .

Options:

- 1) not, yet, none, both
 - 2) opposes, remains, plots, mutates
 - 3) variety, variation, ventilation, vibration
 - 4) near, from, with, for
 - 5) diverge from, add to, prevent from, form on
- (APEUni Website / App FIBRW #444)

16. Evolution

A creature may have fine physical defenses such as hard armor or sharp spines. It may have powerful chemical defenses such as an **appalling** smell or a foul taste but non of these defenses is much used in the **struggle** for survival unless the animal also has the right behavior to go with it. Evolution shapes a living creature's size and color, and it also **shapes** an animal's actions and behavioral patterns. The most **automatic** behaviors are instinctive or in-built. In other words, the creatures can perform the actions without having to learn what to do it by **trial** and error.

Options:

- 1) agreeable, enchanting, ordinary, appalling
- 2) struggle, march, game, campaign
- 3) shapes, pieces, features, aspects
- 4) dangerous, automatic, difficult, ascetic
- 5) attempt, doing, trial, tasting

(APEUni Website / App FIBRW #442)

17. Facial Appearance

Research demonstrates that facial appearance affects social perceptions. The current research investigates the reverse **possibility** : Can social perceptions influence facial appearance? We examine a social tag that is associated with us early in life — our given name. The hypothesis is that name stereotypes can be manifested in facial appearance, producing a face–name matching effect, **whereby** both a social perceiver and a computer are able to accurately match a person’s name to his or her face. In 8 studies we demonstrate the **existence** of this effect, as participants examining an unfamiliar face accurately select the person’s true name from a list of several names, significantly above chance level. We replicate the effect in 2 countries and find that it extends **beyond** the limits of socioeconomic cues. We also find the effect using a computer–based paradigm and 94,000 faces. In our exploration of the underlying mechanism, we show that existing name stereotypes produce the effect, as its occurrence is culture–dependent. A self–fulfilling **prophecy** seems to be at work, as initial evidence shows that facial appearance regions that are controlled by the individual (e.g., hairstyle) are **sufficient** to produce the effect, and socially using one’s given name is necessary to generate the effect. Together, these studies suggest that facial appearance represents social expectations of how a person with a specific name should look. In this way a social tag may influence one’s facial appearance.

Options:

- 1) link, possibility, oddness, polarity
- 2) notwithstanding, ever, whereby, despite
- 3) indolence, evanescence, existence, transience
- 4) into, beyond, within, by
- 5) prophecy, observation, preference, stipulation
- 6) sufficient, proficient, efficient, scant

(APEUni Website / App FIBRW #158)

18. Powerless Creatures

Individual human beings are relatively powerless creatures, no match for lions or bears. It’s what they can do as groups that has **enabled** them to take over the planet. These groupings — corporations, religions, states — are now part of a vast network of **interconnected** information flows. Finding points of resistance, where smaller units can **stand** up to the waves of information washing around the globe, is becoming harder all the time.

Options:

- 1) enabled, contented, embodied, conjured
- 2) interconnected, overlapping, fastened, exploited
- 3) stand, raise, hail, pump

(APEUni Website / App FIBRW #440)

19. Panic–stricken Climate

First, the scientific community that studies climate change is quietly panic–stricken, because things are

moving much faster than they expected. Greenhouse gas emissions are going up faster than **predicted** both from industrializing countries in Asia and from melting permafrost in Siberia and Canada. The Arctic Sea ice is melting so fast that the whole ocean may be ice-free in late summer in five years' time. Most climate scientists now see last year's report of the Intergovernmental Panel on Climate Change, whose forecasts are used by most governments for planning purposes, as a **purely** historical document. Second, the biggest early impact of global warming will be on the food supply, both locally and globally. When the global average temperature hits one and a half degrees hotter – and it will; the carbon dioxide already in the atmosphere **commits** us to that much warming – some countries will no longer be able to feed their people. Others, further from the equator, will still have enough food for themselves, but none to **spare** .

Options:

- 1) credited, formed, predicted, ordered
 - 2) purely, evenly, disproportionately, seemingly
 - 3) commits, commit, committing, committed
 - 4) spare, end, apply, span
- (APEUni Website / App FIBRW #438)

20. Iphone

All of this suggests that our relationship to our phones might not be sufficiently intellectualized, which is why Brian Merchant's book comes as a **relief** . Like the best historians, Merchant, an American journalist and editor of Vice Media's technology blog, Motherboard, **unpacks** the history of the iPhone in a way that makes it seem both inevitable in its outline and **surprising** in its details.

Options:

- 1) privilege, relief, demotion, flash
 - 2) enriches, unpacks, detours, contorts
 - 3) surprises, surprised, surprising, surprise
- (APEUni Website / App FIBRW #436)

21. Hand Art (Incomplete)

Points: South Asian thread ... handloom ... Malaysian ... The last line is something like: ... machines replaced hand art & young generations are not interested in the traditional craft.
(APEUni Website / App FIBRW #434)

22. STM

Short-term memory (STM) can hold information anywhere between 15–30 seconds. According to Miller's Magical Number Seven (1956), short-term memory has a limited capacity, **being able** to store 5 to 9 items simultaneously . **However** , if we hear concepts or ideas repeatedly in an audio form we can acoustically encode the information. It is a process referred to as "rehearsal", thereby **committing** it to our long-term memories .

Options:

- 1) being able, is able, unable, be able
 - 2) Somewhere, Moreover, However, So
 - 3) commit, committing, committed, commits
- (APEUni Website / App FIBRW #433)

23. Early Childhood Disadvantage

Disadvantage in early childhood poses multiple risks to children's development. Factors such as low socioeconomic status, long-term unemployment of parents, and social isolation may have lasting **impacts** on a child's chance of reaching their full potential. Whilst not eliminating disadvantage, preschool education can help to **lessen** the effects of these risk factors and can provide children with a better start to school. However, some of these factors may also be **barriers** to preschool attendance for groups that would benefit most from preschool education. In Australia, the early years of children's education is the responsibility of many government and non-government agencies and it occurs in a range of settings. Preschool is aimed at children around four years of age to **prepare** them for compulsory schooling from the age of six years. In most states and territories, children can start full-time schooling at five years of age, when they enrol in a kindergarten or preparatory year. In 2001, just over half of five-year olds (57%) were at school with about a third (34%) attending preschool. While in some states and territories children can **commence** preschool before they turn four, participation rates for three-year olds are much lower than four-year olds (24% compared with 56% for four-year olds in 2001). The preschool participation rate of four-year olds in 2001 (56%) was similar to the rate in 1991 (58%).

Options:

- 1) impressions, impacts, affects, variations
 - 2) lessen, hold, hoist, enlarge
 - 3) barriers, roundabouts, accesses, assessments
 - 4) undo, fix, tie, prepare
 - 5) commence, alter, lead, raise
- (APEUni Website / App FIBRW #429)

24. Shakespeare Congress

Over 800 Shakespeare scholars from almost fifty countries will gather at King's College London next week as the university co-hosts the 10th World Shakespeare Congress to explore and honor the Bard's life and work. Organized by the International Shakespeare Association, the World Congress **is** held every five years and 2016 is the first time it will be co-hosted in two locations that were integral to both the personal and working life of William Shakespeare. Delegates will arrive **in** London on Thursday following the start of the Congress on Sunday in Stratford-upon-Avon. **With** a main theme of 'Creating and Recreating Shakespeare', the Congress will look **at** the continuing global relevance of Shakespeare's work through a varied program of plenaries, panels, seminars and workshops .

Options:

- 1) are, is, have, has
 - 2) in, at, on, to
 - 3) Above, With, To, Beyond
 - 4) in, at, over, to
- (APEUni Website / App FIBRW #428)

25. Tokyo Skytree

Team Lab's digital mural at the entrance to Tokyo's Skytree, one of the world's monster skyscrapers, is 40 meters long and immensely detailed. But **however** massive this form of digital art becomes — and it's a form **subject to** rampant inflation — Inoko's theories about seeing are based on more modest and often pre-digital sources. An early devotee of comic books and cartoons (no surprises there), then computer games, he recognized when he started to look at traditional Japanese art that all those forms had something **in common** : something about the way they captured space. In his discipline of physics, Inoko had been taught that photographic lenses , **along with** the conventions of western art, were the

logical way of transforming three dimensions into two, conveying the real world onto a flat surface . **But** Japanese traditions employed 'a different spatial logic', as he said in an interview last year with j-collabo.org, that is 'uniquely Japanese'.

Options:

- 1) however, whatever, whenever, wherever
 - 2) subject to, related with, apart from, based on
 - 3) in fact, as whole, in common, of course
 - 4) apart from, further afield, along with, out of
 - 5) Thus, So, Therefore, But
- (APEUni Website / App FIBRW #421)

26. Academic Writing (B)

Academic writing is an **expression** of logic that is the product of thinking. This **means** that the writing that you produce is a **reflection** of your intellectual abilities. It **puts** into words your knowledge and your conceptual understanding and shows **evidence** of your ability to think critically.

Options:

- 1) expectation, entitlement, expression, exchange
 - 2) means, questions, stipulates, answers
 - 3) redundancy, mission, credit, reflection
 - 4) enriches, shows, allows, puts
 - 5) hassle, excuse, capacity, evidence
- (APEUni Website / App FIBRW #407)

27. Heart Functions

The heart functions as a pump at the centre of the circulatory system. In humans it is located in the chest cavity, between the lungs, **a bit** to the left. The heart consists of four chambers surrounded by a very strong muscular wall, the myocardium. The upper chambers, the right and left atria, **receive** blood entering the heart, and the lower chambers, the right and left ventricles pump the blood out of the heart, via the pulmonary and the systemic circulatory systems. The two systems work as **follows** . Blood from the body enters the right atrium, **is** passed into the right ventricle and from there is propelled through the pulmonary artery to the lungs. In the lungs the blood releases carbon dioxide and absorbs oxygen and is then **transported** back to the heart into the left atrium. From here it passes into the left ventricle, which pumps the oxygenated blood around the body.

Options:

- 1) compared, rather than, a bit, less than
 - 2) lower, receive, repel, transfer
 - 3) well, followed, follows, follow
 - 4) being, is, has, had
 - 5) transporting, transported, transport, having transported
- (APEUni Website / App FIBRW #404)

28. Scientific Method

The logic of the scientific method was set out by John Stuart Mill in 1843 and was **named** the method of difference. A simple example of what he **meant** by this is to take two glasses of water which are identical in every **respect** . Introduce a few drops of ink into one of these glasses. The water changes color! **According** to Mill's method of difference it is safe to **assume** that the change in the color of the

water is due to the **introduction** of a new factor — the independent variable — in this case, the ink.

Options:

- 1) pointed, claimed, demanded, named
 - 2) capped, charged, found, meant
 - 3) measure, thought, identity, respect
 - 4) Compared, According, Contrary, Sorted
 - 5) assume, discuss, prefer, acclaim
 - 6) introduction, magnitude, preparation, purification
- (APEUni Website / App FIBRW #403)

29. European Culture

Many people today think of culture in the way that it was thought of in Europe during the 18th and early 19th centuries. This **concept** of culture reflected inequalities within European societies and their colonies around the world. This understanding of culture equates culture with civilization and contrasts both with nature or non-civilization. According to this understanding of culture, some countries are more civilized than others, and some people are more cultured than others. Anything that doesn't **fit** into this category is labeled as chaos or anarchy. From this perspective, culture is closely tied to cultivation, which is the progressive refinement of human **behavior**. In practice, culture referred to elite goods and activities such as haute cuisine, high fashion or haute couture, museum-caliber art and classical music. The word cultured referred to people who knew about and took part in these activities. For example, someone who used culture in this sense might **argue** that classical music is more refined than music by working-class people, such as jazz or the indigenous music traditions of aboriginal peoples.

Options:

- 1) classification, concept, renovation, identity
 - 2) cut, dismiss, fit, solve
 - 3) blessing, curse, habit, behavior
 - 4) argue, doubt, pretend, reveal
- (APEUni Website / App FIBRW #402)

30. HongKong APP (Incomplete)

Points: An organization, HKUST, created an APP to help people learn sign language interpretation because many people in HongKong have a hearing problem. ... (however / therefore / consequently / although) ... (as well as / in spite of / for example / ...) ... to the general public ... skills (developed / had developed / are developed) in the university. ... at the last ... now they (will face / facing / faced / to face) issue ...

(APEUni Website / App FIBRW #401)

31. Sand Battery

Finnish researchers have installed the world's first fully working "sand battery", which can store green power for months at a time. The developers say this could solve the problem of year-round supply, a major issue for green energy. Using low-grade sand, the device **is charged up with** heat made from cheap electricity from solar or wind. The sand stores the heat at around 500C, **which** can then warm homes in winter when energy is more expensive. Because of climate change and now thanks to the rapidly rising price of fossil fuels, there's a surge of investment in new renewable energy production. But **while** new solar panels and wind turbines can be quickly added to national grids, these extra sources also present huge challenges. **Right now**, most batteries are made with lithium and are expensive with a large, physical footprint, and can only cope with a limited amount of excess power. One of the big

challenges now is whether the technology can be scaled up to really make a difference — and will the developers be able to use it to get electricity out **as well as** heat? The efficiency falls dramatically when the sand is used to just return power to the electricity grid.

Options:

- 1) substitutes for, is caught up with, lives up to, is charged up with
 - 2) which, however, what, that
 - 3) except, therefore, while, then
 - 4) Of course, Besides, Apart from, Right now
 - 5) as well as, inside, despite, along
- (APEUni Website / App FIBRW #399)

32. Flowers and Bees

Most people assume, correctly, that flowers look the way they do to attract insects that pollinate them. But that's not the whole story. Scientists have now discovered that plants have another 'trick up their leaves' to make themselves **irresistible** to even the most choosy insect. Cambridge University's Beverley Glover and her **colleagues** recently set up some fake flowers filled with a sugar solution, which they kept at different temperatures. Unleashing a team of bumblebees on their floral **offerings**, they watched as the insects visited the flowers to drink the surrogate nectar. Very quickly, it became obvious that the bees were concentrating on the flowers with the warmest nectar. Just in case it was something to **do** with the color of the fake flowers, the scientists also tried a different color **combination** and got the same result.

Options:

- 1) irresistible, expensive, explicit, false
 - 2) friends, counterparts, researchers, colleagues
 - 3) contours, shapes, organisms, offerings
 - 4) make, do, have, go
 - 5) consequence, tone, combination, appearance
- (APEUni Website / App FIBRW #397)

33. Food Waste (Incomplete)

Points: It was 50 percent of food wasted before () because of () transport and marketing.
(APEUni Website / App FIBRW #394)

34. Selfies

To better understand selfies and how people form their identities online, the researchers combed through 2.5 million selfie posts **on** Instagram to determine what kinds of identity statements people make by taking and sharing the photos. Nearly 52 percent of all selfies **fell** into the appearance category: pictures of people showing off their make-up, clothes, lips, etc. Pics about looks were two times more popular than the other 14 categories **combined**. **After** appearances, social selfies with friends, loved ones, and pets were the most common (14 percent). Then **came** ethnicity pics (13 percent), travel (7 percent), and health and fitness (5 percent). The researchers noted that the prevalence of ethnicity selfies (selfies about a person's ethnicity, nationality or country of origin) is an indication that people are proud of their backgrounds. They also found that most selfies are solo pictures, **rather than** taken with a group. **Overall**, an overwhelming 57 percent of selfies on Instagram were posted by the 18–35-year-old crowd, something the researchers say isn't too surprising **considering** the demographics of the social media platform. The under-18 age group posted about 30 percent of selfies.

Options:

- 1) of, in, above, on
 - 2) fall, fallen, fell, falls
 - 3) constrained, confined, combined, unconfined
 - 4) Regarding, Unless, After, Against
 - 5) let, were, came, come
 - 6) less than, other from, rather than, most of
 - 7) Along with, Although, Overall, Moreover
 - 8) consider, considered, considering, to consider
- (APEUni Website / App FIBRW #389)

35. Green Spaces

Green spaces contribute significantly to a **reduction** in soil and aerial temperatures during spells of hot weather, so contributing to human wellbeing. In the garden **context**, there is, however, little information as to what extent various types of plants **differ** in their cooling potential and how certain planting combinations may maximize cooling under a scenario of **low** rainfall and minimal water inputs.

Options:

- 1) genesis, conclusion, purification, reduction
 - 2) extent, level, context, volume
 - 3) confer, differ, coincide, defer
 - 4) total, low, parallel, partial
- (APEUni Website / App FIBRW #387)

36. Product Selling

Once an organization has its product to sell, it must then **determine** the appropriate price to sell it at. The price is set by **balancing** many factors including supply–and–demand, cost, desired profit competition, perceived value, and market behavior. Ultimately, the final price is determined by what the market is willing to **exchange** for the product. Pricing theory can be quite complex because so many factors influence what the purchaser decides is a fair **value**. It also should be **noted** that, in addition to monetary exchange, price can be the exchange of goods or services as in a barter agreement, or an exchange of specific behavior, such as a vote in a political campaign.

Options:

- 1) tolerate, determine, fabricate, fancy
 - 2) comparing, begetting, balancing, offsetting
 - 3) consign, design, exchange, prepare
 - 4) addition, shape, content, value
 - 5) pointed, enlarged, overrated, noted
- (APEUni Website / App FIBRW #386)

37. Facial Appearance (Incomplete)

Points: facial appearance is the (chance/opportunity/.../...) and it is (insufficient/relative/sufficient) to ...

(APEUni Website / App FIBRW #385)

38. Plants and Animals

From the earliest civilisations, plants and animals have been portrayed as a means of understanding and recording the potential uses, such as their economic and healing properties. From the first

illustrated **catalogue** of medicinal plants, De Materia Medica by Dioscorides, in the first century through to the late fourteenth century the illustration of plants and animals changed very little. Woodcuts in instructional manuals and herbals were often repeatedly copied over the centuries, resulting in a loss of definition and accuracy so that they became little more than stylized decoration. With the growing **popularity** of copperplate engravings, the traditional use of woodcuts declined and the representation of plants and animals became more accurate. Then, with the **emergence** of artists such as Albrecht Durer and Leonardo Da Vinci, naturalists such as Otto Brunfels, Leonhard Fuchs in botany and Conrad Gesner and Ulisse Aldrovandi in zoology, nature began to be depicted in a more realistic style. Individual living plants or animals **were observed** directly and their likeness rendered onto paper or vellum

Options:

- 1) catalogue, calculation, formation, figuration
- 2) popularity, popular, singularity, resilience
- 3) emergence, descent, havoc, omniscience
- 4) observed, observe, had observed, were observed

(APEUni Website / App FIBRW #363)

39. Philosophy (Incomplete)

Points: Philosophy is the study of (). The teacher showed the scenario through a video to students after silence of some time. Before, ... (splits/ is splitting/ has splitter) the class into groups. Student provoke discussion with (philosopher/philosophy) potential....

(APEUni Website / App FIBRW #362)

40. Chanan Tigay

Don't expect a straightforward answer from Chanan Tigay about the **authenticity** or even the existence of what was promoted as the earliest version of the fifth and final book of the Jewish Torah, known to Christians as the Book of Deuteronomy in the Old Testament. As an author who spent years trying to **unravel** a juicy mystery and get it down on paper, Tigay wants you to read his book, "The Lost Book of Moses: The Hunt for the World's Oldest Bible," to find the answer. But at a talk on Wednesday, the writer, journalist, and fellow offered listeners an enticing peek, describing how he landed on the story of the mysterious manuscript and about his years trying to track **down** the document. From the author's description, it was a wild, Indiana Jones-type ride that included a competition to find the relic, false starts, dead ends, trips to faraway places, and an ultimate breakthrough close to home.

Options:

- 1) authenticity, area, imagination, scale
- 2) unravel, build, cross, envisage
- 3) down, against, out, of

(APEUni Website / App FIBRW #304)

41. Mini Helicopter

A mini helicopter modelled on flying tree seeds could soon be flying overhead. Evan Ulrich and colleagues at the University of Maryland in College Park **turned to** the biological world for inspiration to build a scaled-down helicopter that could mimic the properties of full-size aircraft. The complex **design** of full-size helicopters gets less efficient when shrunk, meaning that standard mini helicopters expend most of their power simply fighting to stay stable in the air. The researchers realized that a simpler aircraft designed to stay stable passively would use much less power and reduce manufacturing costs to boot. It turns out that nature **had beaten** them to it. The seeds of trees such as

the maple have a single-blade structure that **allows** them to fly far away and drift safely to the ground. These seeds, known as samaras, need no engine to **spin** through the air, thanks to a process called autorotation. By analyzing the behavior of the samara with high-speed cameras, Ulrich and his team were able to copy its design.

Options:

- 1) turned to, turned for, turned in, turned off
 - 2) overhaul, gauge, imagination, design
 - 3) is beating, was beaten, had beaten, beaten
 - 4) had allowed, allowed, allows, allowing
 - 5) spin, fluctuate, drift, bob
- (APEUni Website / App FIBRW #70)

42. Intelligence Comparison

Comparing the intelligence of animals of different species is difficult, how do you compare a dolphin and a horse? Psychologists have a technique for looking at intelligence that **does** not require the cooperation of the animal involved. The relative size of an individual's brain is a reasonable indication of intelligence. Comparing **across** species is not as simple as generally expected. An elephant will have a larger brain than a human has simply because it is a large beast. **Instead** , we use the Cephalization index, which compares the size of an animal's brain with the size of its body. Based on the Cephalization index, the brightest animals on the planet are humans, **followed** by great apes, porpoises and elephants. As a general **rule** , animals that hunt for a living (like canines) are smarter than strict vegetarians (you don't need much intelligence to outsmart a leaf of lettuce). Animals that live in social groups are always smarter and have larger EQ's than solitary animals.

Options:

- 1) can, do, did, does
 - 2) across, to, through, with
 - 3) Then, Instead, Because, Otherwise
 - 4) followed, follows, follow, following
 - 5) theory, principal, rule, principle
- (APEUni Website / App FIBRW #3)

43. Managers (Incomplete)

Points: Managers ... with themselves (as) bosses they improve people's (performance) ... Other option: (capabilities) what they wrongly believe their employers ...

(APEUni Website / App FIBRW #293)

44. Eco-friendly Smoothies

Students at the University of Leicester have recently whizzed up a storm of eco-friendly smoothies. This comes as part of a week of events aimed at promoting environmental initiatives **on** campus. A range of events and activities were organized by the University Environment Team and the Students Union to encourage students to waste less, recycle **more** , travel sustainably and save energy to contribute to the University's target of cutting its carbon footprint **by** 60% by the year 2020. The highlight of the week was a cycle-powered smoothie maker. Students rescued fruit from Leicester market which would **otherwise** have been thrown away and salvaged it to create delicious smoothies.' **No** electricity was used as the fruit was whizzed up in a blender attached to the back of a bike pedaled by enthusiastic student volunteers.

Options:

- 1) off, on, in, at
 - 2) few, many, more, less
 - 3) throughout, by, through, about
 - 4) ever, also, otherwise, never
 - 5) No, A little, None, Nonetheless
- (APEUni Website / App FIBRW #289)

45. Different Attainments

In many areas of expertise ranging from music, dance, art and literature to sports, chess, mathematics, science and foreign–language acquisition, there is abundant evidence that young people differ from one another in their attainments and in the apparent ease with which they achieve them. **Even** within a family there may be marked differences. For example, a child who struggles at a musical instrument without **much** success may be overtaken by a younger sibling. It is widely believed that the likelihood of **becoming** exceptionally competent in certain fields depends on the presence or absence of inborn attributes variously labelled 'talents' or 'gifts' or less often 'natural aptitudes'. According to an informal British survey, more than three–quarters of music educators who decide **which** young people are to receive instruction believe that children cannot do well, unless they have special innate gifts (Davis 1994). The judgement that someone is talented is believed **to help** explain (as distinct from merely describing) that person's success. It is also widely believed that the innate talent that makes it possible for an individual to excel can be detected in early childhood.

Options:

- 1) If, Unless, Though, Even
 - 2) much, many, few, so
 - 3) become, of becoming, of become, to becoming
 - 4) that, which, whether, this
 - 5) ever help, to help, helping, help
- (APEUni Website / App FIBRW #288)

46. Research Ship

The modern research ship takes its origins from the early exploration voyages such as HMS Endeavour and HMS Challenger, both of which were converted vessels, fitted with a range of research facilities to sample and measure across a range of disciplines in extreme environments. Early research vessels were fairly basic and simplistic compared to the state–of–the–art ships we see being developed today. Gradually, the trend of converting other vessels into research ships **was challenged** by the challenging demands of investigating increasingly complex areas of oceanographic research, such as physical, biological and chemical oceanography; marine geology and geophysics; ocean engineering and atmospheric science in one expedition. In order to carry **out** multi–disciplinary research in extreme environments, specially designed research vessels became a requirement. Research ships are the primary source of oceanographic observations and **will remain** so for the foreseeable future. As time **goes on**, science is likely to be conducted in increasingly remote and environmentally challenging areas, including the polar seas, so the ability to operate with minimal interruptions from the natural elements remains unchanged from the days of the Challenger Expedition.

Options:

- 1) was challenged, was a challenge, were challenged, will have been challenged
 - 2) over, out, of, through
 - 3) will have remained, remaining, remains, will remain
 - 4) flies away, goes on, disappears, moves
- (APEUni Website / App FIBRW #274)

47. Speech of Alchemy

To learn the speech of alchemy, an early form of chemistry in which people attempted to turn metals into gold, it helps to think back to a time when there was no science: no atomic number or weight, no periodic chart, no list of elements. To the alchemists the **universe** was not made of leptons, bosons, gluons, and quarks. Instead it was made of substances, and one substance—say, walnut oil—could be just as **pure** as another—say, silver—even though modern **scientists** would say one is heterogeneous and the other homogeneous. Without knowledge of atomic structures, how would it be **possible** to tell elements from compounds?

Options:

- 1) universe, metallurgy, material, spirit
 - 2) all, completed, pure, wholesome
 - 3) affidavits, laws, scientists, medicines
 - 4) proper, necessary, capable, possible
- (APEUni Website / App FIBRW #115)

48. Genius

Genius, in the popular conception, is inextricably tied up with precocity – doing something truly creative, we're inclined to think, requires the freshness and exuberance and energy of youth. Orson Welles made his masterpiece, "Citizen Kane," at twenty-five. Herman Melville wrote a book a year **through** his late twenties, culminating, at the **age** of thirty-two, with "Moby-Dick." Mozart wrote his breakthrough Piano Concerto No. 9 in E-Flat-Major at the age of twenty-one. In some creative forms, like lyric poetry, the **importance** of precocity has hardened into an iron law. How old was T. S. Eliot when he wrote "The Love Song of J. Alfred Prufrock" ("I grow old ... I grow old")? Twenty-three. "Poets peak young," the creativity researcher James Kaufman maintains. Mihály Csikszentmihályi, the author of "Flow," agrees: "The most creative lyric verse is believed to be that written by the young." According to the Harvard psychologist Howard Gardner, a leading **authority** on creativity, "Lyric poetry is a domain where **talent** is discovered early, burns brightly, and then peters out at an early age."

Options:

- 1) at, without, through, over
 - 2) proportion, rate, age, cost
 - 3) junction, inferiority, importance, structure
 - 4) syntax, supremacy, authority, atheist
 - 5) chief, clerk, offender, talent
- (APEUni Website / App FIBRW #259)

49. Cheating

Although not written about extensively, a few individuals have considered the concept and act of cheating in **history** as well as contemporary culture. J. Barton Bowyer writes that cheating 'is the advantageous distortion of perceived reality. The advantage falls to the cheater because the cheated person **misperceives** what is assumed to be the real world'. The cheater is taking advantage of a person,

a situation, or **both** . Cheating also involves 'distortion of perceived reality' or what others call 'deception'. Deception can involve hiding the 'true' reality or 'showing' reality in a way intended to deceive others.

Options:

- 1) journal, tale, life, history
- 2) misperceives, deceives, perceives, receives
- 3) none, both, neither, either

(APEUni Website / App FIBRW #258)

50. Stressors

Research has suggested that major stressors in our lives are life **changes** , for example, moving house, marriage or relationship breakdown. Work-related factors, **including** unemployment and boredom, are also common **causes** of stress. Differences in personality may also **play** a part.

Options:

- 1) collections, expectations, appearances, changes
- 2) have included, including, include, included
- 3) conferences, courses, causes, pressure
- 4) act, play, list, give

(APEUni Website / App FIBRW #251)

51. Distance Learning

If you are interested in studying but have other **commitments** , our online and distance learning courses offer an alternative flexible **mode** of study. Teaching is conducted through a mixture of audio-visual, written and interactive materials. There are also **opportunities** for online discussion and collaborative projects with tutors and other students. Some programs include residential **modules** taught on campus, giving you the chance to meet and work alongside your tutors and fellow students face-to-face. Our Graduate School provides comprehensive support for distance and part-time researchers, many of whom study for up to six years or more.

Options:

- 1) options, decisions, commitments, barriers
- 2) mode, venue, tariff, rate
- 3) displacements, opportunities, exaggerations, impressions
- 4) modules, disclaimers, belongs, exercises

(APEUni Website / App FIBRW #232)

52. Families

Families provide emotional, physical and financial care and support to their members and are often the basis on which government assistance is determined and administered. Australians have **traditionally** experienced three main living arrangements over a lifecycle: living with parents, living with a partner (for some of this period with children) and living alone in old age if that partner died. Now and into the future, living arrangements **throughout** a lifecycle may also include living alone or in a group household before perhaps forming a long-term partnership, or living as a **lone** parent or alone after divorce or separation. These changes in living arrangements and family **characteristics** are the outcome of various demographic and social trends, such as declining fertility, increased rates of divorce and longer life **expectancy** .

Options:

- 1) traditionally, traditional, tradition, traditionary
 - 2) thought, throughout, thorough, though
 - 3) lonely, lone, alone, full
 - 4) devotions, commitments, characters, characteristics
 - 5) quality, expectancy, donation, expiration
- (APEUni Website / App FIBRW #231)

53. Health and Fitness

A renewed interest in well-being, especially among baby boomers, as well as rising personal incomes, led to more spending on health and fitness in 2005. This prompted an **expansion** in the number of fitness and recreation centres across the country. Golf courses also **enjoyed** renewed success, as the sport increased in popularity, possibly the result of retiring baby boomers heading to the links. In 2005, **households** spent an average \$3,918 on recreation, up slightly from \$3,678 in 2004. Items included in the 2005 figure are: an average \$166 on sports and athletic equipment; \$665 to buy and **operate** recreational vehicles such as snowmobiles, bicycles and trailers; and \$299 for the use of sports and recreation facilities.

Options:

- 1) expectation, exception, erosion, expansion
 - 2) allowed, enjoyed, portioned, confiscated
 - 3) households, countries, companies, immigrants
 - 4) demount, operate, duplicate, fund
- (APEUni Website / App FIBRW #230)

54. Manga (Incomplete)

Points: What West Is It? Anime and Manga according to Candy and Goldorak If Japan's rise to economic superpower dominated U.S. academic discussions in the 1980s, the last 15 years or so have been marked by an intense fascination, both in academic and popular discourse, with the country's perceived increase in global cultural influence (see, for example, Faiola, 2003; Talbot, 2002). As Pokémon and Hello Kitty invaded U.S. TV screens and supermarket aisles at a time when, paradoxically, Japanese economic influence was on the decline, U.S. scholars (and a good number of Japanese officials) started to point to the emergence of a new kind of Japanese superpower. The discussion shifted from Japan's Gross National Product to its "Gross National Cool" (McGray, 2002). The characters in Japanese animated cartoon series (animation or anime) and in the related genre of manga (Japanese-style comic books or graphic novels), along with their videogame cousins, came to symbolize a new order in millennial capitalism characterized by a decline in U.S. cultural hegemony and the fragmentation of global powers (Allison, 2006). Thus, Japanese animation provides a logical starting point to an analysis aimed at decentralizing the role of the United States as the world's most significant global cultural producer. This chapter will demonstrate, however, that while intending to point to Japan's growing influence and to a concomitant relative decline in U.S. power, the academic and popular discourse about Japanese animation's "global" popularity has paradoxically resulted in the re-centralizing of the United States as both a global cultural producer and a consumer of globalized cultural forms. Turning a translocal lens to the genre's transnational spread, this chapter illustrates the multiple ways in which this discourse is problematic. Throughout the chapter, the names of a few scholars will frequently reappear. These scholars are most assertively critiqued here not because their work is particularly problematic but, on the contrary, because they have produced the most comprehensive and sophisticated studies of Japanese animation and/or comics. Their works have become seminal texts in the academic study of Japanese

popular culture in general and have greatly contributed to our understanding of its influence in the U.S. context. The chapter's deconstruction of these scholars' characterization of global processes is offered in an effort to illustrate the productive potential of a more translocal approach. It does not invalidate their otherwise positive contributions to the field of Japanese studies.

(APEUni Website / App FIBRW #228)

55. Chemicals

Chemicals used to control weeds in crops such as corn and soybeans may sometimes run off farmland and enter surface water bodies such as lakes and streams. If a surface water body that is used as a **drinking** water supply receives excess amounts of these herbicides, then the municipal water treatment plant must **filter** them out in order for the water to be safe to drink. This added filtration process can be expensive. Farmers can help control excess herbicides in runoff by choosing chemicals that bind with **soil** more readily, are less toxic, or degrade more quickly. Additionally, selecting the best tillage practice can help minimize herbicide **pollution**.

Options:

- 1) drinking, dimming, stingy, lacquering
- 2) fill, fulfil, filter, fancy
- 3) air, crops, solid, soil
- 4) connectivity, weight, pollution, latitude

(APEUni Website / App FIBRW #227)

56. Economic Depression

An economic depression is a period of sustained, long-term **downturn** in economic activity in one or more economies. It is more severe than a recession, which is a slowdown in economic activity over **the course** of a normal business cycle. Economic depressions are characterized by their length, and by abnormally large increases in unemployment **rate**.

Options:

- 1) variation, promotion, downturn, reduction
- 2) an era, the course, a phase, the year
- 3) calculation, bias, ratio, rate

(APEUni Website / App FIBRW #226)

57. Marketing (Incomplete)

Points: Marketing is a (professional/flexible) job such as (financial) service and consumer goods to resolve less (balance) problem to remain economy.

(APEUni Website / App FIBRW #223)

58. Feature Films

The universality of story feature films are narratives – they tell stories. Even films based on **true** events will fictionalize them in order to produce drama, to telescope time, to avoid being filled up with too many **minor** characters, or simply to be more entertaining. Even in the current welter of special-effect movies, feature films are usually summarized by their plots – in their first 'treatment' (or outline of the script idea), in the advance publicity, in the TV guide, in reviews, and in conversations. Films may differ from other **kinds** of narrative – literary fiction or television drama, for instance – in the medium used and the representational conventions. They do, however, **share** with literary fiction and television drama the basic structure and functions of narrative. Much work has been done by researchers in the field known as 'narratology' on exactly what constitutes the structures and functions of the narrative. Their

conclusions are of great use to students of the feature film.

Options:

- 1) prehistoric, common, true, harsh
 - 2) minor, objective, sheer, marginalized
 - 3) amounts, kinds, properties, qualities
 - 4) spare, share, abide, conform
- (APEUni Website / App FIBRW #222)

59. Dark–silvery Rock

People in parts of western Africa and southwestern Asia were the first to realize that the dark–silvery rocks poking out of the earth could be worked into tools and weapons, sometime around 1500 B.C., evidence shows. The metal was probably discovered there **by** accident when some ore was dropped into a fire and cooled into wrought iron, historians think. The eureka moment didn't reach Europe for **another** 500 years, traveling slowly north and west through Greece, Italy, central Europe and finally to the British Isles **with** the spread of the famous Celtic tribes. The Celts diffused iron technology over much of the continent through warfare, where their victory was assured due to the strength of iron weapons. Perhaps not the most peaceful of cultural exchanges, but where the technology did travel, it caught on fast. Iron **made** life a lot easier in those days, when just living to the age of 45 was a feat. By that time, much of Europe had **settled** into small village life, toiling the soil with bronze and stone tools.

Options:

- 1) at, for, in, by
 - 2) few, another, further, less
 - 3) along, with, without, for
 - 4) make, made, makes, making
 - 5) turned, settled, assigned, pressed
- (APEUni Website / App FIBRW #220)

60. Marshmallow Test

Mischel is the creator of the marshmallow test, one of the most famous experiments in the history of psychology, which is often cited as evidence of the importance of self–control. In the original test, which was administered at the Bing Nursery School, at Stanford, in the nineteen–sixties, Mischel's team would present a child with a treat (marshmallows were just one option) and tell her that she could either eat the one treat **immediately** or wait alone in the room for several minutes until the researcher returned, at which point she could have two treats. The promised treats were always visible and the child knew that all she had to do to stop the agonizing **wait** was ring a bell to call the experimenter back—although in that **case**, she wouldn't get the second treat. The longer a child delayed gratification, Mischel found—that is, the longer she was able to wait—the better she would fare later in life at numerous measures of what we now call executive function. She would **perform** better academically, earn more money, and be healthier and happier. She would also be more likely to avoid a number of negative outcomes, including jail time, obesity, and drug use.

Options:

- 1) ironically, impressively, immediately, imaginatively
 - 2) sleep, wait, walk, time
 - 3) quantity, case, span, consumption
 - 4) slump, heave, slumber, perform
- (APEUni Website / App FIBRW #215)

61. Democracy

Democracy is a system of government in which laws, policies, leadership, and major **undertakings** of a state or other polity are directly or indirectly decided by the 'people', a group historically constituted by only a minority of the population (e.g., all free adult males in ancient Athens or all sufficiently propertied adult males in 19th-century Britain) but generally understood **since** the mid-20th century to include all (or nearly all) adult citizens. By and large, states with democratic governments prevent rule by autocrats, **guarantee** fundamental individual rights, allow **for** a relatively high level of political equality, and rarely make war on each other. As compared with nondemocratic states, they also better foster human development as **measured** by indicators such as health and education, provide more prosperity for their citizens, and ensure a **broader** range of personal freedoms.

Options:

- 1) undertakings, vicissitudes, populations, landscapes
 - 2) within, since, by, until
 - 3) envision, engage, exempt, guarantee
 - 4) upon, for, about, with
 - 5) anticipated, measured, excluded, composed
 - 6) numerous, few, limited, broader
- (APEUni Website / App FIBRW #214)

62. Drones

Antarctic plants can be important indicators of subtle changes in environmental conditions, including climate change. Traditional ground-based assessments of vegetation health are, however, not ideal in Antarctica, as they can destroy the vegetation and are physically **demanding** in the harsh weather conditions. Co-author Professor Sharon Robinson from UOW's School of Biological Sciences said the study found drone-based monitoring of vegetation health produced similar results to traditional techniques, but with much greater efficiency and with no damage to the vegetation. "Drones are a powerful tool for monitoring fragile Antarctic vegetation," Professor Robinson said. "They could be used to provide timely warnings about specific environmental stress events, **as well as** monitoring the longer-term impacts of climate change. "These methods could also be adapted to monitor the health of other small-stature, patchy plant communities, including in alpine or desert regions." The researchers found that drones **equipped** with sensors were able to detect vegetation health indicators more accurately than satellite imagery. Mosses are one of the key Antarctic vegetation types that need to be monitored. However, they tend to occur in patches among rocks, ice and soil, **making** it important that the imagery used to assess their health is as accurate and spatially detailed as possible.

Options:

- 1) demanding, demand, demanded, having demanded
 - 2) except, as well as, despite, as long as
 - 3) toppled, equipped, assessed, dealt
 - 4) made, to make, making, make
- (APEUni Website / App FIBRW #213)

63. Life Science

The Life Science Institute at the University of Michigan achieves excellence in biomedical research by bringing together the world's **leading** scientists from a variety of life science disciplines to accelerate **breakthroughs** and discoveries that will improve human health. With close to 400 scientific staff members, the LSI is exploiting the power of a collaborative and interdisciplinary **approach** to biomedical research in an open-laboratory **facility** .

Options:

- 1) exciting, considerate, leading, notorious
 - 2) investments, inventories, revenues, breakthroughs
 - 3) delusion, demarcation, matrix, approach
 - 4) facility, engagement, budget, enclosure
- (APEUni Website / App FIBRW #210)

64. Harvard Library (Incomplete)

Points: The Harvard's library is a world-class library as well as a (university) library.
(APEUni Website / App FIBRW #209)

65. Human Brain

We now know through the work of neuroscientists that the human brain is wired to mimic other people, and this mimicry involves actual involuntary physiological **experience** in the observer. Human beings tend to **imitate** actions that they see. Physiologically, our brains include mirror neurons, which **react** to actions that are seen as if we are doing the action ourselves. It is largely an unconscious and automatic experience. When we hear people speak, observe their vocal **nuances**, watch their posture, gestures, and facial expressions, etc, neural networks in our brains are stimulated by the 'shared representations' generating feelings within us that **reflect** the experience of those we are observing.

Options:

- 1) emotion, experience, expression, expectation
 - 2) prevent, imitate, limit, discipline
 - 3) recover, refer, react, reflect
 - 4) cords, nuances, volumes, shapes
 - 5) circle, multiply, reflect, subscribe
- (APEUni Website / App FIBRW #205)

66. Sandra Lousada

London's National Portrait Gallery is currently celebrating the fifty-year **career** of photographer Sandra Lousada. The twenty one portraits on display depict key **figures** in literature, film and fashion from the early 1960s. Subsequent to the acquisition of forty portraits by Lousada, the display at The National Portrait Gallery highlights shots taken between 1960 and 1964, many of which feature in Lousada's book Public Faces Private Places (2008). Formal commissioned portraits are shown alongside behind-the-scenes photographs taken on films **sets** and unguarded portraits of sitters captured at home.

Options:

- 1) invitation, promotion, training, career
 - 2) figures, gadgets, fashions, genres
 - 3) gists, sets, tickets, aisles
- (APEUni Website / App FIBRW #203)

67. Behaviorists

Another way of looking at personality is the behaviorist approach. According to the behaviorists, the inner **facts** of the consciousness are not important. Instead they believed that our behaviors, and therefore our **personalities** are learned primarily through our experiences. The theories of behaviorism arose through **experiments** largely on animals in which behaviors were learned through carefully controlled **stimuli**.

Options:

- 1) assumptions, matters, missions, facts
 - 2) implications, personalities, durations, appearances
 - 3) experiments, imaginations, transitions, epitomes
 - 4) stimuli, judgements, discriminations, conclusions
- (APEUni Website / App FIBRW #200)

68. Repeated Syllables

Assessments of language learning in 18-month-olds suggest that children are better at grasping the names of objects with repeated syllables, over words with non-identical syllables. Researchers say the study may help explain **why** some words or phrases, such as 'train' and 'good night', have given rise to versions with repeated syllables, such as choo-choo and night-night. The researchers say such words are easier for infants to learn, and may provide them **with** a starter point for vocabulary learning. A team from the University of Edinburgh assessed the infants' language learning behavior in a series of visual and attention tests **using** pictures on a computer screen of two unfamiliar objects. The two objects were named with made-up words which were **communicated** to the infants by a recorded voice – one with two identical syllables, for example neenee, and the other without repeated syllables, such as bolay. The infants were then tested for their recognition of **each** word. Recordings of their eye movements showed they looked more reliably at the object labeled with repeated syllables, than the other object. Researchers validated their results with a control test, in which the infants responded to pictures of familiar objects – such as a dog or an apple.

Options:

- 1) that, whether, however, why
 - 2) as, for, in, with
 - 3) depleting, making, applying, using
 - 4) communicated, expressed, accommodated, accelerated
 - 5) another, dual, each, one
- (APEUni Website / App FIBRW #195)

69. Novel Device

A novel invention for helping farmers to dry out hay more quickly has won a University of Glasgow graduate a prestigious design award. Gavin Armstrong, 23, from Kippen, Stirlingshire **scooped** the Glasgow 1999 Design Medal for his design for a swath inverter— a **device** for flipping over a hay crop to help dry out the damp underside. Dry hay is an essential farmyard food source for sheep and cows. Gavin came up with the design as part of his Product Design Engineering degree course, run in **conjunction** with Glasgow School of Art. He built a working prototype of the device which is powered and towed by a tractor and uses a pair of parallel belts to invert the swath. The rollers are driven from one hydraulic motor and are geared so as to spin at the same speed and in opposite directions **ensuring** that the touching inner two faces of the belt that perform the inversion move rearwards at the same speed.

Options:

- 1) forged, consigned, renewed, scooped
 - 2) suggestion, prediction, situation, device
 - 3) comparison, accordance, conjunction, contrast
 - 4) denying, supposing, imposing, ensuring
- (APEUni Website / App FIBRW #194)

70. Physical Activity

Participating regularly in physical activity has been shown to benefit an individual's health and **wellbeing**. Regular physical activity is important in reducing the risk of **chronic** diseases, such as heart disease and stroke, obesity, diabetes and some forms of cancer. The National Physical Activity Guidelines for Adults **recommends** at least 30 minutes of moderate–intensity physical activity, **preferably** every day of the week, to **obtain** health benefits.

Options:

- 1) values, immortality, expectation, wellbeing
 - 2) chronic, contraindicated, untouched, detectable
 - 3) excludes, recommends, denotes, defies
 - 4) relatively, absolutely, preferably, namely
 - 5) charge, obtain, weigh, estimate
- (APEUni Website / App FIBRW #190)

71. Kashmiri

Two decades ago, Kashmiri houseboat–owners rubbed their hands every spring at the prospect of the annual influx of **tourists**. From May to October, the hyacinth–choked **waters** of Dal Lake saw flotillas of vividly painted Shikaras carrying Indian families, boho westerners, young travellers and wide–eyed Japanese. Carpet–sellers **honed** their skills, as did purveyors of anything remotely embroidered while the house boats initiated by the British Raj provided unusual accommodation. Then, in 1989, separatist and Islamist militancy **attacked** and everything changed. Hindus and countless Kashmiri business people bolted, at least 35,000 people were killed in a decade, the lake stagnated, and the houseboats rotted. Any foreigners venturing there risked their **lives**, proved in 1995 when five young Europeans were kidnapped and murdered.

Options:

- 1) volunteers, watchdogs, employees, tourists
 - 2) waters, connection, atmosphere, volume
 - 3) enacted, registered, honed, wasted
 - 4) fell, enacted, followed, attacked
 - 5) credits, insurances, lives, contributions
- (APEUni Website / App FIBRW #187)

72. Ozone

Clones of an Eastern cottonwood (*Populus deltoides*) in the Bronx and other city spots grew to double the biomass of clones **planted** outside small towns upstate or on Long Island, says Jillian Gregg, now of the Environmental Protection Agency's western–ecology division in Corvallis, Ore. The growth gap comes from ozone damage, she and her New York colleagues report. Ozone chemists have known that concentrations may spike skyscraper high in city air, but during a full 24 hours, rural trees actually get a higher cumulative ozone exposure from urban pollution that **blows** in and lingers. A series of new experiments now shows that this hang–around ozone is the **overwhelming** factor in tree growth, the researchers say in the July 10 *Nature*. "This study has profound importance in showing us most vividly that rural areas **pay** the price for urban pollution," says Stephen P. Long of the University of Illinois at Urbana–Champaign. "This work should be a wake–up call," he adds.

Options:

- 1) implanted, supplanted, fused, planted
 - 2) climbs, stays, blows, strikes
 - 3) overwhelming, overrated, overacting, overestimated
 - 4) quote, pay, refund, copy
- (APEUni Website / App FIBRW #179)

73. Ikebana

More than simply putting flowers in a **container**, Ikebana is a **disciplined** art form in which nature and humanity are brought together. Contrary to the idea of a particolored or multicolored **arrangement** of blossoms, Ikebana often emphasizes other areas of the **plant**, such as its stems and leaves, and puts emphasis on shape, line, and form. Though Ikebana is an expression of creativity, certain rules govern its form. The artist's intention is shown through a piece's color combinations, natural shapes, graceful lines, and the implied meaning of the arrangement.

Options:

- 1) shape, way, container, fashion
 - 2) restricted, random, disciplined, fleeting
 - 3) garden, arrangement, duplication, augmentation
 - 4) flora, plant, organism, fauna
- (APEUni Website / App FIBRW #178)

74. Colonial Era

At the end of the colonial era, as many new nations gained independence, relative levels of economic development became an important criterion by which to distinguish between countries. The former colonial powers and **wealthier** parts of the world generally became known as advanced industrial, or developed countries, **while** former colonies and poorer nations became known as less developed, or more positively, developing countries. Critics of the **uneven** distribution of wealth across the globe highlighted the role which wealth creation in some places had played in impoverishing poorer nations and, rather, described them as actively underdeveloped. The question as to **whether** economic change is developing or underdeveloping countries remains a vital issue, as the debate over sweatshops highlights.

Options:

- 1) wealthier, older, healthier, bigger
 - 2) while, although, so, because
 - 3) odd, uneven, ubiquitous, sporadic
 - 4) whether, which, what, when
- (APEUni Website / App FIBRW #172)

75. Colour Preference

Many tests have shown that, in a very broad way, peoples in most parts of the world have similar color preferences. Blue is the most preferred and popular hue, followed in order by red, green, purple, yellow and orange. Overlaying this basic order of color preference, **however**, are the responses of individuals, which of course vary **widely** and may also be very powerful. Children are likely to have strong **preferences** for some colors and aversions to others, but sometimes will not admit to them, since outside **factors** may be influential in determining both color preferences and the way that they are expressed or suppressed. Current fashions in clothes and accessories, gender-stereotyping and peer-group pressure may all play a significant part. Boys in particular may be reluctant to admit to any strong preferences for colors **other than** those of favorite football teams, because color awareness may be

regarded by their peer–group as feminine.

Options:

- 1) however, thus, therefore, nevertheless
- 2) widely, slightly, badly, strongly
- 3) preferences, similarities, divergences, comparisons
- 4) pressures, factors, appearances, reasons
- 5) instead of, rather than, together with, other than

(APEUni Website / App FIBRW #171)

76. Sun and Moon

In these distant times the sun was seen to make its daily **journey** across the sky. At night the moon appeared. Every new night the moon waxed or waned a little and on a few nights it did not appear at all. At night the great dome of the heavens was dotted with tiny specks of light. They **became** known as the stars. It was thought that every star in the heavens had its own purpose and that the **secrets** of the universe could be discovered by making a study of them. It was well known that there were wandering stars, they appeared in different nightly positions against their neighbours and they became known as planets. It took centuries, in fact it took millennia, for man to **determine** the true nature of these wandering stars and to evolve a model of the world to accommodate them and to **predict** their positions in the sky.

Options:

- 1) plan, level, journey, line
- 2) are, have, become, became
- 3) tales, secrets, views, imaginations
- 4) distort, discuss, charge, determine
- 5) draw, predict, dictate, save

(APEUni Website / App FIBRW #170)

77. Ice Storm (Incomplete)

Points: Ice storm is a type of (weather, condition, climate) cold rainfall down into the cold air.... From water into ice... When rain drops cool down they will turn into ice, on flat surface, creating an ice storm. It can be so heavy, and shut down the entire city (or a previous ice storm has shut down an entire city). The ice is formed by icy/cold rain. What is the surface of cold? Then, for example, there is a very serious ice storm. More than ... residents have no electricity after/during the storm hail, because the hail has broken the cable.

(APEUni Website / App FIBRW #169)

78. Fossil Fuels

But look beyond fossil fuels for the most intriguing trends. One is that the energy intensity of the world economy – the amount of energy it takes to produce one dollar’s **worth** of income – keeps falling, at a rate of about 2 percent. What this means is that even without any change in the **relative** shares of fossil–based and fossil–free sources in the world’s energy mix, we could have 2 percent annual economic growth without increasing carbon emissions from energy use. Of course that is not enough to **address** climate change and we need more economic growth than that. It is **nonetheless** a stunning number, which refutes the claim by some environmentalists that permanent economic growth is fundamentally incompatible **with** finite physical resources.

Options:

- 1) plenty, money, value, worth
- 2) relevant, related, communal, relative
- 3) outline, address, point, highlight
- 4) thus, thereby, also, nonetheless
- 5) over, with, within, by

(APEUni Website / App FIBRW #168)

79. Marshmallow

They call it the "marshmallow test." A four- to-six-year-old-child sits alone in a room at a table facing a marshmallow on a plate. The child is told: "If you don't eat this **treat** for 15 minutes you can have both it and a second one." Kids on average wait for five or six minutes before eating the marshmallow.

The **longer** a child can resist the temptation has been correlated with higher general competency later in life. Now a study shows that ability to resist temptation isn't strictly **innate** --- it's also highly influenced by environment.

Options:

- 1) fun, joy, recipe, treat
- 2) longest, longer, long, longing
- 3) artificial, innate, intimate, disguised

(APEUni Website / App FIBRW #167)

80. Omniscience

Omniscience may be a foible of men, but it is not so of books. Knowledge, as Johnson said, is of two **kinds**, you may know a thing yourself, and you may know where to find it. Now the amount which you may actually know yourself must, at its best, be limited, but what you may know of the **sources** of information may, with proper training, become almost boundless. And here come the **value** and use of reference books--the working of one book in connection with another--and applying your own **intelligence** to both. By this means we get as near to that omniscient volume which tells everything as ever we shall get, and although the single volume or work which tells everything does not exist, there is a vast number of reference books in existence, a knowledge and proper use of which is essential to every intelligent person. Necessary as I believe reference books to be, they can easily be made to be **contributory** to idleness, and too mechanical a use should not be made of them.

Options:

- 1) identifications, kinds, stages, platforms
- 2) resources, sources, fabrications, ends
- 3) proportions, validity, values, value
- 4) intelligence, interest, memory, mind
- 5) contribute, contributed, contribution, contributory

(APEUni Website / App FIBRW #165)

81. A Letter (Incomplete)

Points: A letter written to a company's contact person whose name is Mary Pearson, talking about the arrangement of a conference, including accommodation. Blank: ...explain how (you can/ can you/...)

(APEUni Website / App FIBRW #163)

82. Paraphrasing

Paraphrasing is often defined as putting a passage from an author into your own words. However, what

are your own words? How different must your paraphrase be from the original? The answer is it should be **considerably** different. The whole point of paraphrasing is to show you have read and understood another person's ideas, and can summarize them in your own writing style rather than borrowing their phrases. If you just change a few words, or add some bits **of** your own to an otherwise reproduced passage, you will probably **be penalized** for plagiarism. You should aim to condense and simplify a writer's ideas and describe them using different sentence structures and expressions. **It is** also important to credit the original writer by referencing.

Options:

- 1) considerable, considerate, considering, considerably
 - 2) despite, of, on, off
 - 3) be penalizing, be penalized, have penalized, penalize
 - 4) That has, It is, There is, That is
- (APEUni Website / App FIBRW #155)

83. Psychology

Psychology as a subject of study has largely developed in the West since the late nineteenth century. During this period there has been an **emphasis** on scientific thinking. Because of this, there have been many scientific studies in psychology which **explore** different aspects of human nature. These include studies into how biology (physical factors) influences human experience, how people use their **senses** (touch, taste, smell, sight and hearing) to get to know the world, how people develop, why people behave in certain ways, how memory works, how people develop language, how people understand and think about the world, what motivates people, why people have emotions and how personality develops. These scientific **investigations** all contribute to an understanding of human nature. What do we mean by the practical applications of these studies? An **understanding** of psychology is useful in many different areas in life, such as education, the workplace, social services and medicine. This means that people who have knowledge of psychology can **use** or apply that knowledge in areas such as the ones listed above.

Options:

- 1) emphasis, attention, example, extension
 - 2) exclude, summon, separate, explore
 - 3) brains, skins, minds, senses
 - 4) assumptions, correlations, investigations, stimulations
 - 5) ideology, empowerment, understanding, equivalence
 - 6) register, classify, use, prepare
- (APEUni Website / App FIBRW #152)

84. School-skipping

Children who skip school are increasingly on family holidays, government figures revealed today. **Fewer** children played truant this spring term compared with the spring term last year. Children missed 3m unauthorised days of school last term, compared with 3.7m days of school in the same period last year. But a **hardcore** group of truants – 6% of the school population – who account for more than three-quarters of all those on unauthorised absence, are more likely to be on a family holiday than they were in the same **period** last year. Some 1.2% of all absence was for family holidays not **agreed** by their school last term, compared with 0.9% for the same term last year. More than 60% of all absences were for illness, the same figure as last year.

Options:

- 1) Same, More, Fewer, Less
 - 2) mere, hardcore, residual, flimsy
 - 3) slot, span, period, duration
 - 4) consent, recommended, agreed, contradicted
- (APEUni Website / App FIBRW #150)

85. Australia's Dwellings

The stock of Australia's dwellings is **evolving**, with current homes having more bedrooms on average than homes ten years ago. At the same time, households are getting smaller on average with decreasing **proportions** of couple families with children and **increasing** couple only and lone person households. This **article** examines the changes in household size and number of bedrooms from 1994–95 to 2003–04.

Options:

- 1) evanescent, eternal, erupting, evolving
 - 2) interests, proportions, appearances, durations
 - 3) flopping, increasing, fluctuating, declining
 - 4) statistic, suggestion, article, index
- (APEUni Website / App FIBRW #148)

86. Noisy Studying

Some students say that they need complete quiet to read and study. Others study best in a crowded, noisy room because the noise actually **helps** them concentrate. Some students like quiet music playing; others **do** not. The point is, you should know the level of noise that is optimal for your own studying. However, one general rule for all students is that the television seems to be more of a distraction than music or other background noise, so **leave** the TV off when you are reading or studying. **Also**, don't let yourself become distracted by computer games, email, or Internet surfing.

Options:

- 1) helps, stops, aids, gives
 - 2) have, doing, do, are
 - 3) make, put, leave, cut
 - 4) Thus, However, Yet, Also
- (APEUni Website / App FIBRW #145)

87. Mechanical Engineering

Mechanical engineering was at the heart of Taylor's theorizing, providing the context for its development, the world view by which it was sustained and, finally, the justification for its widespread application. Scientific management aimed to analyse and control the activities of people **in the same way that** engineers analysed and controlled machines. Central **to** Taylor's system was the desire **to rationalize** and standardize production techniques in the interests of economy, efficiency and mutual prosperity. His primary point of interest was the individual worker **pursuing** individual goals and motivated by incentive payments. **Undoubtedly** Taylor's view of human motivation was somewhat simplistic and his apprehension of the significance of groups was limited and generally negative.

Options:

- 1) in the same way which, in similar ways to those, in similar ways that, in the same way that
 - 2) on, in, to, of
 - 3) of rationalized, on rationalized, for rationalizing, to rationalize
 - 4) pursued, pursue, pursuing, is pursuing
 - 5) Consequently, Undoubtedly, Subsequently, Conversely
- (APEUni Website / App FIBRW #144)

88. Noble Gas

Uniquely stable, they **seemed** to participate in no chemical reactions. But by understanding the stability of the noble gases, physicists discovered the key to chemical bonding **itself**. Dmitri Mendeleev added the noble gases to his periodic table in 1902, where he arranged the elements in rows and columns **according** to their atomic weight. Mendeleev was able to see repeating (or periodic) patterns in their properties. The noble gases appeared **regularly** in the periodic table, occurring in every eighth position, at least amongst the lighter elements.

Options:

- 1) seemed, refused, insisted, cared
 - 2) itself, only, well, proper
 - 3) disproportionate, opposite, additional, according
 - 4) unevenly, regularly, vagariously, vaguely
- (APEUni Website / App FIBRW #143)

89. Small Lakes

Small lakes with a surface area of less than 100 square meters represent the majority of global freshwater ecosystems. Many of these lakes **are found** in remote, often mountainous areas with no inflow and outflow. Yet in most of these lakes, there are fish. So **how** do fish reach lakes and ponds that are not connected to other bodies of water? This question **was already** addressed by some of the leading natural scientists of the 19th century such as Charles Darwin, Alfred Russel Wallace and Charles Lyell, who all came to the same conclusion—water birds must be **responsible for** fish dispersal. And they had a plausible explanation for this: fish eggs of some species are sticky and can survive for some time out of water. The theory is thus that the fish eggs **stick** to water birds' feathers or feet; the birds then fly from one body of water to the next, where the fish hatch from their eggs.

Options:

- 1) had found, are found, were found, have found
 - 2) how, why, whether, where
 - 3) has already, has yet, is also, was already
 - 4) responsibility to, responding to, responsible to, responsible for
 - 5) stick, were stuck, stuck, sticking
- (APEUni Website / App FIBRW #130)

90. Cultural Studies

Cultural studies is a new way of engaging in the study of culture. In the past, many academic subjects including anthropology, history, literary studies, human geography and sociology have brought their own disciplinary concerns to the study of culture. **However**, in recent decades there has been a **renewed** interest in the study of culture that has crossed disciplinary **boundaries**. The **resulting** activities and cultural studies have emerged as an intriguing and exciting area of intellectual inquiry which has already shed important new life on the character of human cultures and

which **promises** to continue to do so. While there is a little doubt that cultural studies are coming to **be widely recognized** as an important and distinctive field of study, it does seem to encompass a potentially enormous area. This is because the term 'culture' has a complex history and range of usages, which have provided a legitimate **focus** of inquiry for several academic disciplines.

Options:

- 1) However, Then, Subsequently, Consistently
 - 2) renewed, refunded, renowned, irresistible
 - 3) discriminations, similarities, boundaries, differentiations
 - 4) simultaneous, spontaneous, resulting, derivative
 - 5) have promised, promising, promises, would have promised
 - 6) phase out, pull together, be widely recognized, be narrowly reduced
 - 7) dispersion, focus, heart, center
- (APEUni Website / App FIBRW #125)

91. Bones

Bones are extremely strong. One of their **main** functions is to protect organs. For example, the skull protects the brain; ribs protect **the** heart and lungs. There are **three** types of joints, including fixed joints, slightly moveable joints, and freely moving joints.

Options:

- 1) main, individual, auxiliary, nominal
 - 2) a, the, these, their
 - 3) countless, few, any, three
- (APEUni Website / App FIBRW #124)

92. Daniel Harris

Daniel Harris, a scholar of consumption and style, has observed that until photography did finally **supplant** illustration as the "primary means of **advertising** clothing" in the 1950s, glamour inhered **less** in the face of the drawing, which was by necessity schematic and generalized, than in the sketch's **attitude**, posture, and gestures, especially in the strangely dainty positions of the hands. Glamour once resided so emphatically in the stance of the model that the faces in the illustrations cannot really be said to have **expressions** at all, but angles or tilts. The chin raised upwards in a haughty look; the eyes lowered in an attitude of introspection; the head cocked at an inquisitive or coquettish angle: or the profile presented in sharp outline, emanating power of the severity like an emperor's bust **embossed** on a Roman coin.

Options:

- 1) surmount, deplete, supplant, overestimate
 - 2) everlasting, enduring, luminous, advertising
 - 3) least, few, yet, less
 - 4) attitude, altitude, magnitude, analogue
 - 5) expressions, exceptions, expectations, experiences
 - 6) encircled, embodied, embossed, encrypted
- (APEUni Website / App FIBRW #119)

93. Wrinkle Cure

Barrie Finning's, a professor at Monash University's college of pharmacy in Melbourne, and PhD student Anita Schneider, recently tested a new wrinkle cure. Twice daily, 20 male and female volunteers applied a

liquid containing Myoxinol, a patented **extract** of okra (*Hibiscus esculentus*) seed, to one side of their faces. On the other side they applied a similar liquid without Myoxinol. Every week for a month their wrinkles were tested by self–assessment, photography and the size of depressions made in silicon moulds. The results were impressive. After a month the **depth** and number of wrinkles on the Myoxinol–treated side were reduced by approximately 27 per cent. But Finnin’s research, commissioned by a cosmetics company, is unlikely to be published in a scientific **publication** . It’s hard to even find studies that show the active ingredients in cosmetics penetrate the skin, let alone more comprehensive research on their effects. Even when **rigorous** studies are commissioned, companies usually control whether the work is published in the traditional scientific literature.

Options:

- 1) example, exertion, explanation, extract
 - 2) concentration, depth, prowess, strength
 - 3) encyclopedia, publicity, publication, enclosure
 - 4) ritual, erratic, rough, rigorous
- (APEUni Website / App FIBRW #113)

94. Constitutional Interpretation

One of the Supreme Court’s most important **responsibilities** is to decide cases that raise questions of constitutional interpretation. The Court decides if a law or government **action** violates the Constitution. This is known as judicial review and enables the Court to invalidate both federal and state laws when they **conflict** with the Constitution. Since the Supreme Court stands as the ultimate authority in constitutional interpretation, its decisions can be **changed** only by another Supreme Court decision or by a constitutional amendment.

Options:

- 1) legislations, purviews, permissions, responsibilities
 - 2) auction, action, state, speculation
 - 3) tally, conflict, accord, amend
 - 4) charged, changed, followed, altered
- (APEUni Website / App FIBRW #105)

95. Trinity Sport and Fitness

Whether you want to exercise and stay **healthy** , train professionally with like–minded people, or indulge your competitive streak, Trinity Sport and Fitness **has it covered** . We’ve got a dedicated support development team on campus to support every student **taking** part in sports. You might want to participate in sports competitions volunteer with a local sports class or simply play for **fun** with our social sport program. Trinity fitness members of our public–facing sports facility will also **entitle** you to discounts when you are booking a sports facility and fitness class. You will also get an opportunity to **benefit** from tailored personal training, free activities events, and lots more.

Options:

- 1) healthy, wealthy, humble, hungry
 - 2) has it covered, makes covering, have covered, does it covering
 - 3) taking, having, getting, doing
 - 4) idle, fun, kidding, exchange
 - 5) enact, encourage, entitle, allow
 - 6) result, upgrade, benefit, proceed
- (APEUni Website / App FIBRW #91)

96. Kiwi

A Massey ecologist has teamed up with a leading wildlife photographer to produce the definitive book on New Zealand's national bird, the kiwi. *Kiwi: A Natural History* was written by Dr Isabel Castro and **features** photographs by Rod Morris. Dr Castro has been working with kiwi **since** 1999, with a focus on their behaviour. 'I've specifically been looking at the sense of smell that kiwi uses when foraging, but **also** in their interactions with their environment and other kiwi,' she says. The book covers all aspects of kiwi, from their evolution, prehistory and closest relatives to their feeding and breeding behaviour and current conservation issues, **making** this the perfect introduction for anyone with an interest in these fascinating birds. The book is the second title in a new **series** on New Zealand's wildlife, targeted at a family readership.

Options:

- 1) featuring, featured, features, feature
 - 2) within, through, since, until
 - 3) also, yet, either, never
 - 4) assuming, making, defying, meaning
 - 5) revision, derivation, series, means
- (APEUni Website / App FIBRW #77)

97. National Responsibility

The principal and most consistently **articulated** recommendation of the world conferences was that countries must take full responsibility for their own development. National responsibility for national development is the necessary consequence of **sovereignty**. The Monterrey Consensus states that 'Each country has primary responsibility for its own economic and social development, and the role of national policies and development strategies cannot be **overemphasized**. National development strategies and policies are therefore critically important. This was reflected most recently at the 2005 Summit when Member States agreed on a target date of 2006 for all developing countries to adopt and start implementation of these strategies to achieve the internationally agreed development goals and objectives, including the MDGs (Millennium Development Goals). The automatic **corollary** of that principle is that each country must be free to determine its own development strategy. It is essential that all donors and lenders accept the principle of country ownership of national development strategies. This implies the acceptance of the principle that development strategies should not only be **attuned** to country circumstances, but also be prepared and implemented under the leadership of the governments of the countries themselves. The 2005 World Summit also acknowledged, in this regard, that all countries must recognize the need for developing countries to **strike** a balance between their national policy priorities and their international commitments.

Options:

- 1) dismissed, articulated, anticipated, ridiculed
 - 2) diplomacy, sovereignty, bureaucracy, authority
 - 3) overlapped, overemphasized, overwhelmed, overcharged
 - 4) collage, correlation, corollary, assortment
 - 5) atoned, attuned, affixed, attached
 - 6) exchange, stage, strike, bridge
- (APEUni Website / App FIBRW #58)

98. Most Respected Companies

Look at the recent "Most Respected Companies" survey by the Financial Times. Who are the most respected companies and business leaders at the **current** time? Rather predictably, they are Jack Welch

and General Electric, and Bill Gates, and Microsoft. **Neither** has achieved their world-class status through playing nice. Welch is still remembered for the brutal downsizing he led his business **through** , and for the environmental pollution incidents and prosecutions. Microsoft has had one of the **highest** profile cases of bullying market dominance of recent times – and Gates has been able to **achieve** the financial status where he can choose to give lots of money away by being ruthless in business.

Options:

- 1) past, before, last, current
 - 2) Also, Both, Neither, All
 - 3) through, out, by, along
 - 4) largest, highest, biggest, most
 - 5) archive, acquaint, receive, achieve
- (APEUni Website / App FIBRW #53)

99. Home Appliances

In the developed world, home appliances have greatly reduced the need for physical labour. **Fewer** people need to be involved in tasks that once left them little time to do much else. For example, the word processor and email have, to a great **extent** , replaced the dedicated secretarial staff that briefly flourished with the rise of the typewriter. At **one** time all copies were made with manual scribes, carefully duplicating what they read. Then we had carbon paper. Then photocopiers. Then printers. Then the requirement for physical copy reduced. An entire stream of labour appeared and disappeared as technology advanced. We freed ourselves of one kind of work; we just replaced it **with** another.

Options:

- 1) Fewer, More, Less, Many
 - 2) extension, possibility, range, extent
 - 3) once, some, one, a
 - 4) with, as, for, by
- (APEUni Website / App FIBRW #51)

100. Melting Ice

At the end of the last ice age, the melting ice disrupted the ocean currents in the North Atlantic and **caused** a drop in temperature of almost 5 degrees. **Even though** the rest of the planet was warming **up** , the North Atlantic region remained in a cold period for 1300 years. The same thing happened **around** 8000 years ago, when the cooling lasted about a hundred years, and it **could** happen again today. Even a short period of cooling in the North Atlantic could have a dramatic effect on the wildlife, and the human populations, living there.

Options:

- 1) featured, denied, reflected, caused
 - 2) Contrasting to, Even though, As if, Now that
 - 3) in, off, up, back
 - 4) on, before, after, around
 - 5) could, can, should, could have
- (APEUni Website / App FIBRW #30)

101. Dictionary

The famous dictionary of Samuel Johnson, published in London in 1755; its principles dominated English **lexicography** for more than a century. This two-volume work surpassed earlier dictionaries not in **bulk** but in the precision of definition. Its strength lay in two features: the original carefully divided and ordered, elegantly formulated definitions of the main word stock of the language; and the copious citation of quotations from the entire range of English literature, which served in support and illustration and which **exemplified** the different shades of meaning of a particular word. A Dictionary of the English Language included a history of the language, a grammar, and an extensive list of words representing basic general vocabulary, based on the best conversation of **contemporary** London and the normal usage of respected writers. The original was followed in 1756 by an abbreviated one-volume version that was widely used far into the 20th century. Johnson's accomplishment was to provide for the English language a dictionary that incorporated with skill and intellectual power the **prevailing** ideals and resources and the best available techniques of European lexicography. It was the standard English dictionary until Noah Webster's.

Options:

- 1) hieroglyph, lexicography, hierarchy, taxonomy
 - 2) busk, barn, bask, bulk
 - 3) classified, exemplified, signified, simplified
 - 4) contemptuous, contemplative, contemporary, contemptible
 - 5) prevailing, condescending, dignifying, demeaning
- (APEUni Website / App FIBRW #29)

102. Pop Mega-stars

A music student at the University of Salford who wrote a song in two weeks is celebrating **after** being featured on a compilation album produced by Metropolis Studios. Pop mega-stars including Adele, Michael Jackson and Sir Elton John have all recorded music at the world-famous Metropolis Studios. Last year, the recording studios set **about** compiling an album called 'Lost Songs', which features songs from relatively unknown musicians. First-year student Zak Taylor Fray decided to submit his song demo to be included in Volume Two of the Lost Songs album which was released this year, after he saw **how** successful Volume One had been. Zak 24, said: 'I found this competition when simply **searching** the internet for songwriting competitions one day, and was lucky that there was still **time** to enter. It amazes me that people who have worked with huge pop stars thought my song was good and worth something.'

Options:

- 1) except, without, before, after
 - 2) off, on, up, about
 - 3) how, that, which, if
 - 4) search, searching, have searched, searched
 - 5) expiry, chance, opportunity, time
- (APEUni Website / App FIBRW #20)

103. Linda Finch

Over sixty years after Amelia Earhart vanished mysteriously in the Pacific during her attempt to become the first person to circumnavigate the world along the equator, Linda Finch, a San Antonio businesswoman, accomplished pilot, and aviation historian, recreated and completed her idol's last flight as a **tribute** to the aviation pioneer's spirit and vision. On March 17, 1997, Ms. Finch and a navigator took off from Oakland International Airport, California, in a restored Lockheed Electra 10E, the same make and model **aircraft** that Earhart used on her last journey. The mission to fulfill Amelia Earhart's dream

was called ' World Flight 1997.' Although Ms. Finch was not the first to **attempt** Earhart's around-the-world journey, she was the first to do it in a historic airplane. Linda Finch closely followed the same route that Earhart flew, stopping in 18 countries before finishing the trip two and a half months later when she **landed** back at the Oakland Airport on May 28. Over a million school children and others were able to follow the flight **daily** through an **interactive** web site part of a free multimedia **educational** program called ' You Can Soar', provided by the project's sponsor.

Options:

- 1) tribute, retribution, contribution, turbulence
 - 2) shuttle, aircraft, vessel, rocket
 - 3) acquire, claim, obtain, attempt
 - 4) ditched, settled, landed, detoured
 - 5) inadvertently, gradually, daily, likely
 - 6) inherent, inactive, interactive, intractable
 - 7) improvisational, compositional, educational, additional
- (APEUni Website / App FIBRW #19)

104. Good Information

One of the characteristics of 'good' information identified earlier was that it should be 'balanced'. In an ideal world, 'objective' or 'balanced' information would present all the **evidence** for and against, and leave you to weigh this up and draw conclusions. In the real world, however, we recognize that all information presents a position of **interest**, although this may not necessarily be intentional. Objectivity may therefore be an unachievable ideal. This means that the onus is on you as the reader and user of the information to **develop** a critical awareness of the positions represented in what you read, and to take account of this when you interpret the information. In some cases, authors may explicitly express a particular viewpoint — this is perfectly valid as long as they are open about the perspective they represent. Hidden bias, whether or not it is **deliberate**, can be misleading. This could be particularly important in a subject area where there is controversy.

Options:

- 1) information, content, evidence, cause
 - 2) interest, interested, internship, hobby
 - 3) develop, yield, exert, throw
 - 4) deliberate, delicate, deductive, delicious
- (APEUni Website / App FIBRW #16)

105. Computational Thinking

Developing computational thinking helps students to better understand the world around them. Many of us happily drive a car without understanding what **goes on** under the bonnet. So is it necessary for children to learn how to program computers? **After all**, some experts say coding is one of the human skills that will become obsolete as artificial intelligence grows. Nevertheless, governments believe coding is an essential skill. Since 2014, the principles of computer programming **have featured** on England's curriculum for children from the age of five or six, when they start primary school. While not all children will become programmers, Mark Martin, a computing teacher at Sydenham High School, London, argues that they should learn to understand what **makes** computers work and try to solve problems as a computer might.

Options:

- 1) leads in, raises up, sets off, goes on
 - 2) Till now, Nevertheless, However, After all
 - 3) have featured, has featured, featuring, features
 - 4) endows, makes, glosses, sheers
- (APEUni Website / App FIBRW #111)

106. When to Revise?

Timing is important for revision. Have you noticed that during the school day you get times when you just don't care any longer? I don't mean the lessons you don't like, but the ones you usually find OK, but on some occasions, you just can't be bothered with it. You **may** have other things on your mind, be tired, restless or looking forward to what comes next. Whatever the reason, that particular lesson doesn't get 100 percent **effort** from you. The same is true of revision. Your mental and physical **attitudes** are important. If you try to revise when you are tired or totally occupied with something else, your revision will be inefficient and just about worthless. If you approach it feeling fresh, alert and happy, it will be so much easier, and you will learn more, faster. However, if you make no plans and just slip in a little bit of revision when you feel like it, you probably won't do much revision! You need a revision timetable, so you don't keep **putting it off** .

Options:

- 1) may, never, do, hardly
 - 2) effort, afford, affect, effect
 - 3) shortcomings, concerns, attitudes, health
 - 4) stopping, putting it off, giving it up, putting out
- (APEUni Website / App FIBRW #110)

107. Petrified Forest

The Petrified Forest is home to some of the most impressive fossils ever found and more are being discovered each year as erosion **exposes** new evidence. Fossils found here show the Forest was once a tropical region, **filled with** towering trees and extraordinary creatures we can only imagine. **While** more than 150 different species of fossilized plants have been discovered by paleontologists, species of reptiles, such as Desmotosuchus, similar to the armadillo, have also been discovered. Archaeologists have found **much** evidence to indicate that ancient native people inhabited this region about 10,000 years ago. Petroglyph drawings on rock surfaces, gives a glimpse of the past and you can see the marks of a solar calendar at Puerco Pueblo near the time of the summer solstice.

Options:

- 1) exposes, makes, distributes, forges
 - 2) connected to, filled with, restored with, treated by
 - 3) While, Thus, However, Once
 - 4) full, entire, much, somewhat
- (APEUni Website / App FIBRW #114)

108. Wind Moving

Wind is air moving around. Some winds can move **as** fast as a racing car, over 100 miles an **hour** Winds can travel around the world. Wind can make you feel cold because you lose heat from your body **faster** when it is windy. Weather forecasters need to **know** the speed and direction of the wind. The strength of wind is measured using the Beaufort scale from wind force when there is no wind, to wind force 12 which can damage houses and buildings and is called hurricane force.

Options:

- 1) to, for, in, as
 - 2) hour, second, minute, micro second
 - 3) faster, slower, higher, lower
 - 4) overshoot, know, check, fix
- (APEUni Website / App FIBRW #101)

109. Seminars

Seminars are not designed to be mini–lectures. Their educational **role** is to provide an opportunity for you to discuss interesting and/or difficult aspects of the course. This is founded on the **assumption** that it is only by actively trying to use the knowledge that you have acquired from lectures and texts that you can achieve an adequate understanding of the subject. If you do not understand a point it is highly **unlikely** that you will be the only person in the group in that position; you will invariably be undertaking a **service** for the entire group if you come to the seminar equipped with questions on matters which you feel you did not fully understand. The seminar is to **provoke** discussion.

Options:

- 1) result, team, role, regulation
 - 2) awareness, information, consolation, assumption
 - 3) similarly, likely, possible, unlikely
 - 4) service, bearing, reservation, education
 - 5) stir, provoke, rinse, commit
- (APEUni Website / App FIBRW #103)

110. Global Textile Industry

The environmental impact of the global textile industry is hard to overstate. One–third of the water used worldwide is spent fashioning fabrics. For every ton of cloth **produced**, 200 tons of water is polluted with chemicals and heavy metals. An estimated 1 trillion kilowatt–hours of electricity powers the factories that card and comb, spin and weave, and cut and stitch materials into everything from T–shirts to towels, **leaving** behind mountains of solid waste and a massive carbon footprint. 'Where the industry is today is not really sustainable for the long term,' says Shreyaskar Chaudhary, chief executive of Pratibha Syntex, a textile manufacturer based outside Indore, India. With something of an "if you build it, they will come" attitude, Mr.Chaudhary has steered Pratibha **toward** the leading edge of eco–friendly textile production. Under his direction, Pratibha began making clothes with organic cotton in 1999. Initially, the company couldn't find enough organic farms growing cotton in central India **to supply** its factories. To meet production demands, Chaudhary's team had to convince conventional cotton farmers to change their growing methods. Pratibha provided seeds, cultivation instruction, and a guarantee of fair–trade prices for **their** crops. Today, Pratibha has a network of 28,000 organic cotton growers across the central states of Madhya Pradesh, Maharashtra, and Orissa.

Options:

- 1) produced, has produced, producing, is produced
 - 2) moving, leaving, processing, looking into
 - 3) against, onto, toward, behind
 - 4) have supplied, supply, to supply, is supplied
 - 5) their, some, mine, them
- (APEUni Website / App FIBRW #87)

111. Music in Ancient Egypt

Music was as important to the ancient Egyptians as it is in our modern society. Although it is thought that music played a **role** throughout the history of Egypt, those that **study** the Egyptian writings have discovered that music **seemed** to become more important in what is called the ‘pharaonic’ **period** of their history. This was the **time** when the Egyptian dynasties of the pharaohs were **established** (around 3100 BCE) and music was **found in** many parts of every day Egyptian life.

Options:

- 1) role, game, response, situation
 - 2) need, require, confirm, study
 - 3) predicted, seemed, like, thought
 - 4) period, people, place, race
 - 5) result, range, time, group
 - 6) contributed, established, constructed, raised
 - 7) found at, found, found from, found in
- (APEUni Website / App FIBRW #98)

112. Modify Cultural Ideas

People modify cultural ideas in their minds, and sometimes they pass on the modified versions. Inevitably, there are unintentional modifications as well, partly because of straightforward error, and partly because inexplicit ideas are hard to **convey** accurately: there is no way to download them directly from one brain to another like computer programs. **Even** native speakers of a language will not give identical definitions of every word. So it can be only rarely, if **ever** , that two people hold precisely the same cultural idea in their minds. That is why, when the founder of a philosophical movement or a religion dies, or **even before** , schisms typically happen. The movements’ most devoted followers are often shocked to **discover** that they disagree about what its doctrines—really are.

Options:

- 1) convey, pass, deliver, transmit
 - 2) Even, Although, If, Ever
 - 3) ever, that, this, does
 - 4) even before, even later, if not, for example
 - 5) indicate, discover, deny, agree
- (APEUni Website / App FIBRW #88)

113. Very Old Paris

Paris is very old—there has been a settlement there for at least 6000 years and its shape has been determined in part by the River Seine, and in part by the edicts of France’s rulers. But the great boulevards we admire today are relatively new, and were constructed to prevent any more barricades **being created** by the rebellious population; that work was carried out in the middle 19th century. The earlier Paris had been **in part** a maze of narrow streets and alleyways. But you can imagine that the work was not only highly expensive, but caused great distress among the half a million or so residents whose houses were **simply** razed, and whose neighbourhoods disappeared. What is done cannot usually be undone, especially when buildings are torn **down** .

Options:

- 1) being created, that created, creating, was created
- 2) as if, in part, even though, as
- 3) merely, largely, simply, equally
- 4) up, from, on, down

(APEUni Website / App FIBRW #80)

114. Native Species in North America

Of the more than 1,000 bat species worldwide, 22 are **native** to North America. And while there are no pollinator bats in our area, gardeners should **champion** those that do live here, because they're insectivorous. These bats **consume** moths, beetles and mosquitoes, and can eat up to 500 mosquito-sized insects per hour. They also protect gardens and crops from such **pests** as cucumber beetles, cutworms and leafhoppers.

Options:

- 1) local, national, native, residential
 - 2) suppose, champion, breed, fight
 - 3) spend, consume, provide, deplete
 - 4) species, pests, objects, animals
- (APEUni Website / App FIBRW #78)

115. Pidgins

Pidgins are languages that are born after contact between at least two languages. As many pidgins developed during the period of empire and international trade, one of the language parents was frequently a European language such as French or English, and the other language parent was the language of the people with whom the Europeans were **trading** or whom they were colonising. Usually one of the languages provided the majority of **vocabulary** items and the other provided the grammatical structure. When pidgins become learned as a mother tongue, they become **known** as creoles. I am not going to discuss pidgins and creoles and contact languages as such in this book in **any depth** .

Options:

- 1) trading, connecting, speaking, talking
 - 2) grammar, vocabulary, knowledge, verbal
 - 3) regarded, considered, known, recommended
 - 4) any width, any depth, further, next time
- (APEUni Website / App FIBRW #72)

116. MBA Programmes

Deciding to go to business school is perhaps the simplest part of what can be a complicated process. With nearly 600 accredited MBA programmes on **offer** around the world, the choice of where to study can be overwhelming. Here we explain how to **choose** the right school and course for you and unravel the application and funding process. "Probably the **majority** of people applying to business school are at a point in their careers where they know they **want** to shake things up, but they don't know exactly what they would like to do with their professional lives," says Stacy Blackman, an MBA admissions consultant based in Los Angeles. "If that's the case with you, look at other **criteria** : culture, teaching method, location, and then pick a place that's a good fit for you with a strong general management programme. Super-defined career goals don't have to be a part of this process."

Options:

- 1) offer, provide, give, take
- 2) elect, choose, identify, recognize
- 3) few, many, majority, minority
- 4) enjoy, hesitate, want, choose
- 5) standards, factors, rules, criteria

(APEUni Website / App FIBRW #68)

117. The Origin of Species

In *The Origin of Species*, Darwin provided abundant evidence that life on Earth has evolved over time, and he proposed natural selection as the primary mechanism for that change. He observed that individuals **differed** in their inherited traits and that selection acts on such differences, leading to **evolutionary** change. Although Darwin realized that variation in heritable traits is a prerequisite for **evolution**, he did not know precisely how organisms pass heritable traits to their offspring. Just a few years after Darwin published *The Origin of Species*, Gregor Mendel wrote a groundbreaking paper on inheritance in pea plants. **In** that paper, Mendel proposed a model of inheritance in which organisms transmit discrete heritable units (now called genes) to their offspring. Although Darwin did not know about genes, Mendel's paper set the stage **for** understanding the genetic differences on which evolution is based.

Options:

- 1) differed, difference, different, same
- 2) tremendous, evolutionary, unrivaled, enormous
- 3) evolution, development, growth, maturity
- 4) On, In, For, With
- 5) for, as, in, at

(APEUni Website / App FIBRW #84)

118. Women's Participation in Labour Force

With the increase in women's **participation** in the labour force, many mothers have less time **available** to undertake domestic activities. At the same time, there has been increasing **recognition** that the father's role and **relationship** with a child is important. A father can have many roles in the family, ranging from income provider to teacher, carer, playmate and role model. Therefore, balancing paid work and family responsibilities can be an important issue for both fathers and mothers in families.

Options:

- 1) anticipation, substitution, participation, definition
- 2) available, related, consumable, useful
- 3) recognition, discrimination, resolution, recreation
- 4) scholarship, relationship, worship, employment

(APEUni Website / App FIBRW #99)

119. Standard Language

At the beginning of the twenty-first century, the relationship between standard and nonstandard language is, evidently, still an uncertain one. We are at a **transitional** point between two eras. We seem to be leaving an era when the rules of Standard English, as elected and defined by prescriptive grammarians, totally conditioned our sense of **acceptable** usage, so that all other usages and varieties were considered to be inferior or corrupt, and **excluded** from serious consideration. And we seem to be **approaching** an era when nonstandard usages and varieties, previously denigrated or ignored, are achieving a new presence and **respectability** within society, reminiscent of that found in Middle English, when dialect variation in literature was widespread and uncontentious. But we are not there yet. The rise of Standard English has resulted in a confrontation between the standard and nonstandard dimensions of the language which has lasted for over 200 years, and this has had traumatic **consequences** which will take some years to eliminate. Once people have been given an inferiority complex about the way they speak or write, they find it difficult to shake off.

Options:

- 1) transcendent, compositional, evanescent, transitional
 - 2) notable, irreversible, acceptable, preferential
 - 3) isolated, suffered, excluded, concerned
 - 4) assessing, approaching, changing, directing
 - 5) stagnation, respectability, overestimation, discrimination
 - 6) concatenations, consequences, successions, sequences
- (APEUni Website / App FIBRW #737)

120. Conservancy

To qualify as a conservancy, a committee must define the conservancy's boundary, elect a **representative** conservancy committee, negotiate a legal constitution, prove the committee's ability to **manage** funds, and produce an acceptable plan for **equitable** distribution of wildlife-related benefits. Once approved, registered conservancies acquire the **rights** to a sustainable wildlife **quota**, set by the ministry.

Options:

- 1) information, representative, parliamentary, management
 - 2) attract, freeze, borrow, manage
 - 3) moral, equitable, equal, stable
 - 4) integrity, agreement, rights, tools
 - 5) limit, segment, quota, quotation
- (APEUni Website / App FIBRW #739)

121. Amazon Basin

Colorful poison frogs in the Amazon owe their great **diversity** to ancestors that leapt into the region from the Andes Mountains several times during the last 10 million years, a new study from The University of Texas at Austin suggests. This is the first study to show that the Andes have been a **major source** of diversity for the Amazon basin, one of the largest **reservoirs** of biological diversity on Earth. The finding runs **counter** to the **idea** that Amazonian diversity is the **result** of evolution only within the tropical forest itself. "Basically, the Amazon basin is 'melting pot' for South American frogs," says graduate student Juan Santos, lead author of the study. "Poison frogs there have come from multiple places of **origin**, notably the Andes Mountains, over many millions of years. We have shown that you cannot understand Amazonian biodiversity by looking only in the basin. Adjacent regions have played a major role."

Options:

- 1) division, diversity, diversification, diversify
 - 2) important, major, essential, special
 - 3) gap, source, stem, dump
 - 4) pool, reservoirs, tank, territories
 - 5) along, counter, through, thoroughly
 - 6) myth, idea, situation, condition
 - 7) link, result, trigger, usher
 - 8) living, result, origin, species
- (APEUni Website / App FIBRW #736)

122. Transportation System

A sustainable transportation system is one in which people's needs and desires for access to jobs, commerce, recreation, culture and home are accommodated using a minimum of resources. Applying

principles of **sustainability** to transportation will reduce pollution generated by gasoline-powered engines, noise, traffic congestion, land devaluation, urban sprawl, economic segregation, and injury to drivers, pedestrians and cyclists. In addition, the costs of commuting, shipping, housing and goods will be **reduced**. Ultimately in a sustainable San Francisco, almost all trips to and **within** the City will be on public transit, foot or bicycle—as will a good part of trips to the larger Bay Region. Walking through streets designed for pedestrians and bicycles will be more pleasant than walking through those designed for the automobile. Street-front retail and commercial establishments will **prosper** from the large volume of foot traffic drawn to an environment enhanced by trees, appropriately designed 'street furniture' (street lights, bicycle racks, benches, and the like) and other people. Rents and property costs will be lowered as land for off-street parking is no **longer** required or needed.

Options:

- 1) reliability, sustainability, sustain, sustainable
- 2) reduced, enhance, seduced, reducing
- 3) apart, within, among, away
- 4) origins, inject, control, prosper
- 5) smaller, longer, most, best

(APEUni Website / App FIBRW #733)

123. Mass-communications

Traditionally, mass-communications research has conceptualized the process of communication in terms of a circulation circuit or loop. This **model** has been criticized for its linearity — sender/message/receiver — for its concentration on the level of message exchange and for the absence of a structured conception of the different moments as a complex structure of relations. But it is also **useful** to think of this process in terms of a structure produced and sustained through the articulation of linked **but** distinctive moments production, circulation, distribution/consumption, reproduction. This would be to think of the **process** as a 'complex structure in dominance', sustained through the articulation of connected practices, each of which, however, retains its distinctiveness and has its own **specific** modality, its own forms and conditions of existence.

Options:

- 1) medal, modal, model, moral
- 2) useful, unbelievable, impossible, meaningless
- 3) if, and, but, or
- 4) works, practice, production, process
- 5) general, real, common, specific

(APEUni Website / App FIBRW #731)

124. APS

The APS supports the development of an Australian curriculum for psychological science. The APS Division of Psychological Research, Education and Training, in **consultation** with teacher and curriculum representatives from every State and Territory in Australia, **develops** a proposed framework for senior secondary school studies in psychological science. This framework **is modeled** on the current senior science curricula that were developed and published by the Australian Curriculum, Assessment and Reporting Authority. The APS hopes that this framework will **facilitate** a dialogue between educators and their local curriculum authority, with the aim of working towards a more **consistent** approach to the teaching of psychological science at secondary school level and optimizing the preparation for students going on to undergraduate psychology studies at university, as well as the effective use of psychological principles in everyday life.

Options:

- 1) criticism, consultation, consolation, condolence
 - 2) is developed, develops, had been developing, developed
 - 3) has modeled, to model, is modeled, modeled
 - 4) fertilize, facilitate, fascinate, fabricate
 - 5) conjunctive, constituent, consistent, consequent
- (APEUni Website / App FIBRW #730)

125. Bad Title

A good story may be given a bad title by its author, and so started toward failure. Novices are peculiarly **liable** to this fault, usually through **allowing** themselves to be too easily satisfied. They go to **infinite** pains to make the story itself fresh and individual, and then cap it with a **commonplace** phrase that is worse than no title at all. A good title is apt, specific, attractive, new, and short. A title is apt if it is an outgrowth of the plot — a text, as I have said. It stands definitely for that particular story, and gives a suggestion of what is to come — but only a suggestion, lest it should anticipate the denouement and so **satisfy** the curiosity of the reader too soon.

Options:

- 1) able, responsible, liable, possible
 - 2) allowed, allows, allow, allowing
 - 3) stagnant, faint, vague, infinite
 - 4) misleading, invisible, distinctive, commonplace
 - 5) confuse, encourage, satisfy, notify
- (APEUni Website / App FIBRW #729)

126. Population Change

Populations can change through three processes: fertility, mortality and migration. Fertility **involves** the number of children that women have and differs from fecundity (a woman's childbearing potential). Mortality is the study of the causes, consequences and measurement of processes affecting death in a population. Demographers most commonly study mortality using the Life Table, a statistical **device** which provides information about the mortality conditions (most notably the life expectancy) in the population. Migration refers to the movement of persons from an origin place to a destination place across some pre-defined political boundary. Migration researchers do not designate movements as migrations, **unless** they are somewhat permanent. Thus demographers do not consider tourists and travelers to be migrating. While demographers who study migration typically do so through census data on place of **residence**, indirect sources of data including tax forms and labor force surveys are also important. Demography is today widely taught in many universities across the world, **attracting** students with initial training in social sciences, statistics or health studies.

Options:

- 1) contributes, rotates, involves, encapsulates
 - 2) ingredient, room, factor, device
 - 3) but, though, unless, therefore
 - 4) commute, residence, life, health
 - 5) researching, attracting, analyzing, discriminating
- (APEUni Website / App FIBRW #724)

127. Bones

Bones also protect the organs in our bodies. The skull protects the brain and forms the shape of the

face. The spinal cord, a pathway for messages between the brain and the body, is protected by the backbone, or spinal column. The ribs form a cage that **shelters** the heart and lungs, and the pelvis helps protect the bladder, part of the intestines, and in women, the reproductive organs. Bones are made up of a framework of a protein called collagen, with a mineral called calcium phosphate that makes the framework hard and strong. Bones store calcium and release some into the bloodstream when it's needed by other parts of the body. The amounts of certain vitamins and minerals that you eat, especially vitamin D and calcium, directly affect how much calcium is stored in the bones. Joints are where **two** bones meet. They make the skeleton flexible — without them, movement would be impossible. Joints allow our bodies to move in many ways. Some joints open and close like a hinge (such as knees and elbows), whereas others allow for more complicated movement — a shoulder or hip joint, for example, allows for backward, forward, sideways, and rotating movement. Joints are classified by their range of movement: Immovable, or fibrous, joints don't move. The dome of the skull, for example, is made of bony plates, which move slightly during birth and then fuse together as the skull finishes growing. Between the edges of these plates are links, or joints, of fibrous tissue. Fibrous joints also hold the teeth in the jawbone. Partially movable, or cartilaginous, joints move a little. They are linked by cartilage, as in the spine. Each of the vertebrae in the spine moves in relation to the one above and below it, and together these movements give the spine its flexibility. Freely movable, or synovial (pronounced: sih-NO-vee-ul), joints move in many directions. The **main** joints of the body — such as those found at the hip, shoulders, elbows, knees, wrists, and ankles — are freely movable. They are filled with synovial fluid, which acts as a lubricant to help the joints move easily. **Three** kinds of freely movable joints play a big part in voluntary movement: Hinge joints allow movement in one direction, as seen in the knees and elbows. Pivot joints allow a rotating or twisting motion, like that of the head moving from side to side. Ball-and-socket joints allow the greatest freedom **of** movement. The hips and shoulders have this type of joint, in which the round end of a long bone fits into the hollow of another bone.

Options:

- 1) alleviates, incurs, moves, shelters
 - 2) that, which, one, two
 - 3) whole, entire, individual, main
 - 4) All, Two, One, Three
 - 5) within, except, against, of
- (APEUni Website / App FIBRW #723)

128. Interdisciplinary Centre

A new interdisciplinary centre for the study of the frontiers of the universe, from the tiniest subatomic particle to the largest chain of galaxies, has been formed at The University of Texas at Austin. The Texas Cosmology Centre will be a way for the university's departments of Astronomy and Physics to **collaborate** on research that concerns them both. 'This centre will bring the two departments together in an area where they **overlap** — in the physics of the very early universe,' said Dr. Neal Evans, Astronomy Department chair. Astronomical observations have **revealed** the presence of dark matter and dark energy, discoveries that challenge our knowledge of fundamental physics. And today's leading theories in physics involve energies so high that no Earth-bound particle accelerator can test them. They need the universe as their **laboratory**. Steven Weinberg, Nobel laureate and professor of physics at the university, called the Centre's **advent** a very exciting development for that department.

Options:

- 1) separate, collaborate, participate, cooperative
 - 2) overlapped, overload, overlap, folded
 - 3) enhanced, released, revealed, deluded
 - 4) workshop, library, laboratory, basement
 - 5) adventure, movement, advent, approach
- (APEUni Website / App FIBRW #722)

129. Debt, Poverty and Development

Books and articles highlighting intractable debt, poverty and development abound in both the academic and popular literature. This addition to the debate is both timely and interesting **as** it subsumes the economic debate to the broader social, political, environmental and institutional context of debt in developing countries. Debt-for-Development Exchanges: History and New Applications **is intended** for a wide audience including: academics from a range of disciplines (including accounting and finance); non-Government organizations (NGOs); civil society groups; and, both debtor and creditor governments and public sector organization. Professor Ross Buckley, author and editor, **has developed** an international profile in the area of debt relief and this book is the outcome of an Australian Research Council (ARC) Discovery grant to explore debt-for development mechanisms that relieve debt, improve development outcomes **from** aid, are practically and politically attractive to creditors and **contribute** to regional security.

Options:

- 1) due to, as, so, for
 - 2) has intended, intends, is intending, is intended
 - 3) develops, has developed, have developed, developed
 - 4) to, in, from, at
 - 5) contribution, contributed, contributing, contribute
- (APEUni Website / App FIBRW #720)

130. Learning Process

Learning is a process by which behavior or knowledge changes as a result of experience. Learning from experience plays a major role **in** enabling us to do many things that we clearly were not born to do, from the simplest tasks, such as flipping a light switch, to the more **complex**, such as playing a musical instrument. To many people, the term 'learning' signifies the **activities** that students do reading, listening, and taking tests in order to acquire new information. This process, which is known as cognitive learning, is just **one** type of learning, however. Another way that we learn is by associative learning, which is the focus of this module. You probably associate **certain** holidays with specific sights, sounds, and smells, or foods with specific flavors and textures. We are not the only **species** with this skill even the simplest animals such as the earthworm can learn by association.

Options:

- 1) for, above, in, despite
 - 2) composite, compound, complex, manifold
 - 3) activities, matters, actions, routines
 - 4) one, the, any, each
 - 5) certain, few, uncountable, dependent
 - 6) species, class, types, categories
- (APEUni Website / App FIBRW #717)

131. Progressive Enhancement

Progressive enhancement is a design practice based on the idea that instead of **designing for** the least capable browser, or mangling our code to make a site look the same in every browser, we should provide a core set of functionality and information to all users, and then **progressively enhance** the appearance and behavior of the site for users of more capable browsers. It's very productive development practice. **Instead of spending** hours working out how to add drop shadows to the borders of an element in every browser, we simply use the standards-based approach for browsers that support it and don't even attempt to implement it in browsers that don't. After all, the users of older and less capable browsers won't know what they are missing. The **biggest challenge** to progressive enhancement is the belief among developers and clients that websites should look the same in every browser. As a developer, you can simplify your life and dedicate your time to more interesting challenges if you let go of this outdated notion and embrace progressive enhancement.

Options:

- 1) conflicting with, designing for, comparing with, confining within
 - 2) progressive enhance, progressively enhance, progressively enhancing, progressive enhancement
 - 3) In addition to taking, With respect to assuming, Instead of spending, Thanks to conserving
 - 4) biggest challenge, finest opportunity, easiest issue, least assurance
- (APEUni Website / App FIBRW #645)

132. Maya

The Classic era of Mayan **civilisation** came to an end around 900 AD. Why this happened is unclear; the cities were probably over-farming the land, so that a **period** of drought led to famine. Recent geological **research** supports this, as there appears to have been a 200-year drought around this time.

Options:

- 1) community, society, civilisation, class
 - 2) time, period, range, phase
 - 3) research, test, examination, exploitation
- (APEUni Website / App FIBRW #716)

133. Snails

Snails are not traditionally known for quick thinking, but new research shows they can make complex decisions using just two brain cells in **findings** that could help engineers design more efficient robots. Scientists at the University of Sussex attached electrodes to the heads of freshwater snails **as** they searched for lettuce. They found that just one cell was used by the mollusc to tell **if** it was hungry or not, while another let it know when food was present. Foodsearching is an example of goal-directed behavior, **during** which an animal must integrate information about both its external environment and internal state while using as little energy as possible. Lead researcher Professor George Kemenes, say "This will eventually help us design the 'brain' of robots based on the principle of using the **fewest** possible components necessary to perform complex tasks." What goes on in our brains when we make complex behavioral decisions and carry them out is poorly understood." Our study reveals for the first time how just two neurons **can** create a mechanism in an animal's brain which drives and optimizes complex decision-making tasks.

Options:

- 1) findings, results, recommendations, decisions
 - 2) after, with, but, as
 - 3) that, if, neither, how
 - 4) through, about, during, to
 - 5) least, less, fewest, fewer
 - 6) shall, should, can, ought
- (APEUni Website / App FIBRW #715)

134. English in Change

English has been changing throughout its lifetime and it's still changing today. For most of us, these changes are fine as long as they're well and truly in the past. Paradoxically, we can be **curious** about word origins and the stories behind the **structures** we find in our language, but we **experience** a queasy distaste for any change that might be happening right under our noses. There are even language critics who are **convinced** that English is dying, or if not dying at least being progressively **crippled** through long years of mistreatment.

Options:

- 1) scared, cranky, worried, curious
 - 2) ruptures, indications, values, structures
 - 3) enlarge, expect, deal, experience
 - 4) satisfied, persuaded, reassured, convinced
 - 5) crippled, lost, disabled, dented
- (APEUni Website / App FIBRW #714)

135. SpaceX

SpaceX's Falcon 9 rocket lifted off from Cape Canaveral, Florida, on Friday at 1845 GMT (1445 EDT), reaching orbit 9 minutes later. The rocket lofted an uncrewed **mockup** of SpaceX's Dragon capsule, which is designed to one-day carry both crew and cargo to orbit. 'This has been a good day for SpaceX and a **promising** development for the US human space flight program,' said Robyn Ringuette of SpaceX in a webcast of the launch. In a teleconference with the media on Thursday, SpaceX's CEO, Paypal co-founder Elon Musk, said he would consider the flight 100 percent successful if it reached **orbit**. 'Even if we prove out just that the first stage functions correctly, I'd still say that's a good day for a test,' he said. 'It's a great day if both stages work correctly.' SpaceX hopes to win a NASA **contract** to launch astronauts to the International Space Station using the Falcon 9. US government space shuttles, which currently make these trips, are scheduled to **retire** for safety reasons at the end of 2010.

Options:

- 1) replication, mockup, setting, base
 - 2) promising, hopefully, rapid, encouraging
 - 3) track, orbit, circulation, trajectory
 - 4) award, contract, case, bid
 - 5) cease, launch, resign, retire
- (APEUni Website / App FIBRW #713)

136. Plants

Plants serve as the conduit of energy into the biosphere, provide food and materials used by humans, and they **shape** our environment. According to Ehrhardt and Frommer, the three major challenges facing humanity in our time are food, energy, and environmental **degradation**. All three are plant related. All of

our food is produced by plants, either directly or indirectly via animals that eat them. Plants are a **source** of energy production. And they are intimately involved in climate change and a major factor in a variety of environmental concerns, including agricultural expansion and its impact on habitat destruction and waterway pollution. What's more, none of these issues is independent of each other. Climate change places additional stresses on the food supply and on various habitats. So, plant research is instrumental in addressing all of these problems and moving into the future. For plant research to move significantly forward, Ehrhardt and Former say technological development is critical, both to test existing hypotheses and to gain new information and generate fresh hypotheses. If we are to make headway in understanding how these essential organisms function and build the foundation for a sustainable future, then we need to apply the most advanced technologies available to the study of plant life, they say.

Options:

- 1) shape, overarch, disembark, constitute
 - 2) demotion, discredit, declaration, degradation
 - 3) source, cause, root, outcome
- (APEUni Website / App FIBRW #712)

137. History Books

What history books tell us about the past is not everything that happened, but what historians **have selected**. They cannot put in everything: choices have to be made. Choices must similarly be made about which aspects of the past should be formally taught to the next generation in the shape of school history lessons. So, **for example**, when a national school curriculum for England and Wales was first discussed at the end of the 1980s, the history curriculum was the subject of considerable public and media **interest**. Politicians argued about it; people wrote letters to the press about it; the Prime Minister of the time, Margaret Thatcher, **intervened** in the debate. Let us think first about the question of content. There were two main camps on this issue: those who thought the history of Britain should take pride of **place**, and those who favored what was referred to as 'world history'.

Options:

- 1) be selected, have selected, been selected, select
 - 2) as a result, in respect to, for example, subjectively
 - 3) preference, tracks, interest, tastes
 - 4) had intervened, intervened, was intervened, was intervening
 - 5) location, place, culture, opportunity
- (APEUni Website / App FIBRW #708)

138. United Nations

The United Nations is an international organization founded in 1945. Due to its unique international character, and the powers vested in its founding Charter, the organization can take **action** on a wide range of issues and provide a forum for its 193 Member States to **express** their views, through the General Assembly, the Security Council, the Economic and Social Council and other bodies and committees. The work of the United Nations reaches every **corner** of the globe. Although best known for peacekeeping, peacebuilding, conflict **prevention** and humanitarian assistance, there are many other ways the United Nations and its System (specialized agencies, funds and programs) affect our lives and make the world a better place.

Options:

- 1) advantage, recognition, action, promotion
 - 2) reveal, release, contradict, express
 - 3) war, corner, meeting, time
 - 4) prediction, renovation, invention, prevention
- (APEUni Website / App FIBRW #700)

139. Sleep Patterns

Children have **sound** sleep patterns. They can **successfully** sleep for 8–9 hours and get up at a fixed time. But teenagers don't. Their need of an early start to schools or other schedules can **influence** their sleep patterns. **Despite** these **factors**, they actually need longer sleep. So, parents should try and speak to their children, who are **suitable** to help them understand that a night of sound sleep is always helpful.

Options:

- 1) sound, expressive, erratic, soundly
 - 2) periodically, successfully, hardly, barely
 - 3) effect, influence, gained, diverge
 - 4) Regardless, Despite, As, Unless
 - 5) probabilities, factors, particles, forms
 - 6) reinforced, suitable, lucky, linking
- (APEUni Website / App FIBRW #699)

140. Politics Disciplines

This course provides students with an in–depth understanding of the exciting disciplines of politics and international relations and commerce. Students will learn about the **workings** of political institutions in countries around the world and explore the complex field of relations between nations. Topics in governance, public policy, public administration, national security, border control and commerce ensure that students receive a **broad** and current education in the range of issues which are covered under the label of politics and international relations and commerce. In **addition** to acquiring specialist **knowledge** and competencies in Politics and International Relations and Commerce, students will graduate with a range of generic skills such as critical thinking, enhanced communication abilities, problem solving and strong capacities to work with others. They will also develop ethically based and socially **responsible** attitudes and behaviors.

Options:

- 1) workings, understanding, handing, agency
 - 2) whole, confined, narrow, broad
 - 3) order, according, addition, term
 - 4) information, experience, knowledge, intelligence
 - 5) responsible, accountability, responsibility, liable
- (APEUni Website / App FIBRW #642)

141. Australian Women Novelists

In the literary world, it was an accepted assumption that the 1970s was a time of unprecedented growth in homegrown Australian fiction. And everybody was reading and talking about books by young Australian women. But it was **not until** recently that a researcher was able to measure just how many novels were published in that decade, and she found that there had been a decline in novels by Australian writers overall, but confirmed an increase in women's novels. It is this sort of research – testing ideas about literary history – that **is becoming** possible with the spread of 'Digital Humanities.' The intersection of

Humanities and digital technologies **is opening up** opportunities in the fields of literature, linguistics, history and language that **were not possible** without computational methods and digitized resources to **bring** information together in an accessible way. Transcription software is being developed for turning scans of books and documents into text, as the field of digital humanities really takes **off** .

Options:

- 1) not until, until, impossible, till
 - 2) should become, must become, is becoming, will become
 - 3) is opened to, is opening up, is opened up, is opening to
 - 4) were not possible, was not possible, could be possible, can be possible
 - 5) squeeze, bring, muddle, stow
 - 6) in, off, on, over
- (APEUni Website / App FIBRW #698)

142. Sociology

Sociology is, in very basic terms, the study of human societies. In this respect, it is usually **classed** as one of the social sciences (along with subjects like psychology) and was **established** as a subject in the late 18th century (through the work of people like the French writer Auguste Comte). However, the subject has only really gained **acceptance** as an academic subject in the 20th century through the work of writers such as Emile Durkheim, Max Weber and Talcott Parsons (names that will be visited throughout this course). One name that you may have heard of—Karl Marx (the founder of modern Communism)—has probably done more to stimulate people’s interest in the subject than anyone else, even though he lived and wrote (1818–1884) in a period before sociology became fully established as an academic discipline. Sociology, therefore, has a reasonably long history of development (150–200 years), **although** in Britain it has only been in the last 30– 40 years that sociology as an examined subject in the education system has achieved a level of importance equivalent to, or above, most of the other subjects it is possible to study.

Options:

- 1) classes, classed, identified, remembered
 - 2) studied, confirmed, established, designed
 - 3) acceptance, satisfaction, plurality, knowledge
 - 4) although, however, despite, because
- (APEUni Website / App FIBRW #697)

143. Bizarre Universe

It seems we live in a bizarre universe. One of the greatest mysteries in the whole of science is the prospect that 75% of the Universe is made up from a mysterious **substance** known as ‘Dark Energy’, which causes an acceleration of the cosmic expansion. Since a further 21% of the Universe is made up from invisible ‘Cold Dark Matter’ that can only be **detected** through its gravitational effects, the ordinary atomic matter making up the rest is apparently only 4% of the total cosmic budget.

These **discoveries** require a shift in our perception as great as that made after Copernicus’ **revelation** that the Earth moves around the Sun. This lecture will start by reviewing the chequered history of Dark Energy, not only since Einstein’s proposal for a similar entity in 1917, but by tracing the concept back to Newton’s ideas. This lecture will **summarize** the current evidence for Dark Energy and future surveys in which UCL is heavily involved: the ‘Dark Energy Survey’, the Hubble Space Telescope and the proposed Euclid space mission.

Options:

- 1) stuff, matter, substance, material
 - 2) deducted, observed, seen, detected
 - 3) innovations, studies, discoveries, theories
 - 4) revelation, suspicion, conviction, revolution
 - 5) overthrow, admit, summarize, focus
- (APEUni Website / App FIBRW #696)

144. Investment Choice

Men and women are making different choices about their retirement savings, which could lead to very different investment outcomes, according to Dr Claire Matthews, Director of Financial Planning at Massey University's Centre for Banking Studies. Speaking at the 2012 New Zealand Finance Colloquium, held at Massey University's Albany campus last week, Dr Matthews said demographic characteristics had a substantial impact on the choices people made about KiwiSaver funds and retirement savings more generally. **When it came to** fund selection, she found there were significant differences based on gender. Men are more likely to invest in aggressive and growth funds, while women are more likely to choose conservative funds. "Males are risk takers, **whether** it's in their choice of car or their investment fund," she says. "But when it comes to long-term savings, risk taking can actually be an advantage." Dr Matthews also found that men are more likely than women to have prior savings when joining KiwiSaver. Just over half of male respondents said they had savings already, while only 38% of women did. "These figures reflect and confirm, quite disappointingly, the difference between males and females and the level of interest they take in financial planning," Dr Matthews says. "It's important for all New Zealanders to be better educated about their personal finances, but this is particularly so for women." Other demographic factors, including age, ethnicity, education, and income, can also influence the choices **being** made about retirement savings. Dr Matthews found that those with bachelor and higher degrees, and those in households with a pre-tax income of \$100,000 or more, were more likely to choose aggressive and **growth** funds. **On the other hand**, both the youngest and oldest age groups were more likely to be invested in **conservative** funds. While this might be appropriate for the life-cycle stage of older investors, it might not be so appropriate for younger, longer-term investors.

Options:

- 1) Apart from, In spite of, As far as, When it came to
 - 2) if, only, unless, whether
 - 3) being, been, have, were
 - 4) retrogressive, steady, challenging, growth
 - 5) To be honest, Last but not least, For example, On the other hand
 - 6) constructive, compensative, consecutive, conservative
- (APEUni Website / App FIBRW #691)

145. Delegation

The process of delegation comprises the decision to delegate, the briefing, and the follow-up. At each of these points, **anticipate** the potential problems. When you delegate, you are not delegating the right to perform an **action**, you are delegating the right to make decisions. It is important to be **flexible**, as the person to whom you delegate may have a better and faster way of completing a job than you. **Overall** responsibility for a delegated task remains with you. It is helpful to others if you can provide **constructive** feedback on their performance.

Options:

- 1) account, answer, arise, anticipate
 - 2) aspiration, action, activity, articulation
 - 3) fluid, feasible, flexible, fixed
 - 4) Overlapping, Overestimated, Overall, Overarching
 - 5) credential, conclusive, constructive, effusive
- (APEUni Website / App FIBRW #690)

146. Crime

Crime is an integral part of everyday life. It is a prominent **feature** in the news and is a popular subject for fictional portrayal. Most students commencing legal studies will have some experience of crime, whether directly, as a victim of crime or indirectly through exposure to media coverage. This means that most offenses **covered** on the syllabus, such as murder, theft and rape will be familiar terms. This tends to give students the impression that they know more about criminal law than they do about other subjects on the syllabus. This can be a real disadvantage **in terms of** the academic study of criminal law because it tends to lead students to rely on preconceived notion of the nature and scope of the offenses and to reach instinctive, but often legally inaccurate, conclusions. It is absolutely **essential** to success in criminal law that you put aside any prior knowledge of the offenses and focus on the principles of law derived from statutes and cases. **By** doing this, you will soon appreciate just how much difference there is between everyday conceptions of crime and its actuality.

Options:

- 1) feature, point, aspect, fuss
 - 2) covering, covered, are covered, has covered
 - 3) in spite of, in front of, in terms of, by comparison with
 - 4) inevitable, responsible, essential, important
 - 5) For, Despite, By, Without
- (APEUni Website / App FIBRW #689)

147. Distance Learning

Distance learning can be highly beneficial to a large variety of people from young students wanting to expand their horizons to adults looking for more job security. With programs that allow learners of all ages to take courses for fun, personal advancement and **degrees**, distance learning can **meet** the needs of a diverse population. Perhaps one of the most notable and often talked about **advantages** of distance learning is the flexibility. The majority of programs allow students to learn when and where it's convenient for them. For **those** who are struggling to balance their distance learning goals with working a fulltime job and taking care of a family this kind of flexibility can allow many people to **pursue** education who would not otherwise be able to do so. **Since** there are no on-campus courses to attend, students can learn from their own homes, at work on their lunch breaks and from virtually anywhere with internet access. For some it can even be a big source of savings on the fuel costs and time required to commute to classes.

Options:

- 1) conformations, discriminations, abhorrences, degrees
- 2) claim, achieve, devise, meet
- 3) definitions, factors, advantages, defaults
- 4) employers, them, those, teachers
- 5) obey, accelerate, test, pursue
- 6) Although, Thus, Besides, Since

(APEUni Website / App FIBRW #687)

148. Film

Film is where art meets commerce. As Orson Welles said: "A painter just needs a brush and the writer just needs a pen, but the producer needs an army." And an army needs money. A producer is just like an entrepreneur, and we raise money to make films. First, we need to find an original idea or a book or a play and purchase the rights, then we need money to develop that idea, often not a reasonably small sum. Besides, to commission a writer for the screenplay isn't something you would want to gamble your own money on, so you find a partner. We are lucky here in the UK, as we have Film 4, BBC Films and the UK Film Council, all of which are good places to develop an idea. Producing in Britain is very different to producing in America or even Europe because the economic dynamic is different.

Options:

- 1) As, Likely, Unlike, Despite
- 2) raise, arise, rise, raze
- 3) Nevertheless, Or, Besides, Thus
- 4) them, that, those, which
- 5) until, even, unless, ever

(APEUni Website / App FIBRW #683)

149. Foreign Policy

The foreign policy of a state, it is often argued, begins and ends with the border. No doubt an exaggeration, this aphorism nevertheless has an element of truth. A state's relation with its neighbors, at least in the formative years, are greatly influenced by its frontier policy, especially when there are no settled borders. Empire builders in the past sought to extend imperial frontiers for a variety of reasons; subjugation of kings and princes to gain their allegiance (as well as handsome tributes or the coffers of the state), and, security of the core of the empire from external attacks by establishing a string of buffer states in areas adjoining the frontiers. The history of British empire in India was no different. It is important to note in this connection that the concept of international boundaries (between two sovereign states), demarcated and delineated, was yet to emerge in India under Mughal rule.

Options:

- 1) element, exertion, evidence, explanation
- 2) cultivating, early, formative, established
- 3) disputed, irregular, nether, settled
- 4) fame, credit, allegiance, prestige
- 5) delineated, divided, circled, deposited

(APEUni Website / App FIBRW #682)

150. Allergies

What are allergies? Allergies are abnormal immune system reactions to things that are typically harmless to most people. When you're allergic to something, your immune system mistakenly believes that this substance is harmful to your body. (Substances that cause allergic reactions— such as certain foods, dust, plant pollen, or medicines— are known as allergens.) In an attempt to protect the body, the immune system produces IgE antibodies to that allergen. Those antibodies then cause certain cells in the body to release chemicals into the bloodstream, one of which is histamine (pronounced: HIS-tuh-meen). The histamine then acts on the eyes, nose, throat, lungs, skin, or gastrointestinal tract and causes the symptoms of the allergic reaction. Future exposure to that same allergen will trigger this antibody response again. This means that every time you come into contact with that allergen, you'll

have some form of allergy symptoms.

Options:

- 1) mistakenly, misleadingly, involuntarily, unprovokedly
 - 2) protect, strengthen, equip, hedge
 - 3) dissolve, thicken, release, crystallize
 - 4) focuses, offends, reacts, acts
 - 5) antigen, counter, antibody, psychological
- (APEUni Website / App FIBRW #680)

151. Classic

One of the most important things to remember is that "classic" does not necessarily translate to "favorite" or "bestselling". Literature is instead considered classic when it has stood the test of time and it stands the test of time when the artistic quality it expresses – be it an **expression** of life, truth, beauty, or anything about the universal human condition – continues to be relevant and continues to inspire emotional responses, no matter the period in which the work was written. Indeed, classic literature is considered as such **regardless** of book sales or public popularity. That said, classic literature **usually** merits lasting recognition – from critics and other people in a position to influence such decisions – and has a universal appeal. And, while effective use of language as well as technical excellence – is a must, not everything that is well-written or is characterized by technical achievement or critical acclaim will automatically be considered a classic. Conversely, works that have not been acknowledged or received **positively** by the writer's contemporaries or critics can still be considered as classics.

Options:

- 1) expression, iconization, imagination, exaggeration
 - 2) regardless, lacking, devoid, careless
 - 3) exclusively, usually, merely, consequently
 - 4) imposingly, positively, efficiently, arguably
- (APEUni Website / App FIBRW #679)

152. Leadership

Leadership is all about being granted permission by others to lead their thinking. It is a bestowed moral authority that gives the right to organize and direct the efforts of others. But moral authority does not come from simply managing people effectively or communicating better or being able to motivate. It comes from many **sources**, including being authentic and genuine, having integrity, and showing a real and deep understanding of the business in question. All these **factors** build confidence. Leaders lose moral authority for three reasons: they behave **unethically**, they become plagued by self-doubt and lose their conviction, or they are blinded by power, lose self-awareness and thus lose **connection** with those they lead as the context around them changes. Having said all this, it has to be assumed that if someone becomes a leader, at some point they understood the difference between right and wrong. It is up to them to **abide** by a moral code and up to us to ensure that the moment we suspect they do not, we fire them or vote them out.

Options:

- 1) foundations, derivatives, outcomes, sources
 - 2) origins, functions, elements, factors
 - 3) falsely, outrageously, eternally, unethically
 - 4) contempt, confirmation, connection, convection
 - 5) abide, coincide, stand, conform
- (APEUni Website / App FIBRW #678)

153. Dairy Farm

A few summers ago I visited two dairy farms, Huls Farm and Gardar Farm, which despite being located thousands of miles apart were still remarkably similar in their strengths and vulnerabilities. Both were by far the largest, most prosperous, most technologically advanced farms in their respective districts. In particular, each was centered around a magnificent state-of-the-art barn for **sheltering** and milking cows. Those structures, both neatly **divided** into opposite-facing rows of cow stalls, dwarfed all other barns in the district. Both farms let their cows **graze** outdoors in lush pastures during the summer, produced their hay to harvest in the late summer for feeding the cows through the winter, and **increased** their production of summer fodder and winter hay by irrigating their fields. The two farms were similar in an area (a few square miles) and barn size, Huls barn holding somewhat more cows than Gardar barn (200 vs 165 cows, respectively). The owners of both farms were viewed as leaders of their **respective** societies. Both owners were deeply religious. Both farms were located in gorgeous natural settings that attract tourists from afar, with backdrops of high snow-capped mountains drained by streams teeming with fish, and sloping down to a famous river (below Huls Farm) or fjord (below Gardar Farm).

Options:

- 1) protecting, sheltering, shading, housing
 - 2) divided, mapped, registered, portioned
 - 3) wander, eat, dine, graze
 - 4) rose, plateau, increased, doubled
 - 5) perspective, prospective, respective, retrospective
- (APEUni Website / App FIBRW #677)

154. Credibility and Pride

Moreover, for Professor David Phoenix, the dean of the faculty of science and technology, the return of single-honors chemistry is a **matter** of credibility and pride. "If you say you're a science faculty, you have to have all the core sciences, and this course will mean we attract a new supply of potential Masters and PhD students in chemistry." Phoenix is adamant that the new course will teach solid chemistry, but he thinks that an attraction for students will be a teaching approach that **differs** significantly from his days as an undergraduate. This takes real-life issues as the starting point of lectures and modules, such as how drugs are made or the science behind green issues. Out of this study, he says, students will be exposed to the same core chemistry unchanged over decades, but they will be doing it in a way that is more **engaging** and more likely to lead to more fundamental learning. It is an approach that **symbolizes** chemistry's recent success story: moving with the times, while holding fast to the subject's essential role as a building block of science and technological advance.

Options:

- 1) matter, sum, degree, pinch
 - 2) divides, diversify, differs, deviates
 - 3) conventional, engaging, courageous, pretentious
 - 4) challenges, depicts, mobilizes, symbolizes
- (APEUni Website / App FIBRW #675)

155. Oxford Course

When I enrolled in my master's course at Oxford last year, I had come straight from medical school with the decision to leave clinical science for good. Thinking back, I realize that I didn't put very much **weight** on this decision at the time. But today, I more clearly understand the **consequences** of leaving my original profession. When I meet old friends who are now physicians and surgeons, I sense how our views on medical problems have **diverged**. They scrutinize the effects of disease and try to eliminate or alleviate them; I try to understand how they come about in the first place. I feel happier working on this side of the problem, although I do occasionally miss clinical work and seeing patients. However, when I think about the rate at which my medical skills and knowledge have **dissipated**, the years spent reading weighty medical textbooks, the hours spent at the bedside, I sometimes wonder if these years were partly a **waste** of time now that I am pursuing a research career. Nonetheless, I know the value of my medical education. It is easy to forget the importance of the biosciences when working with model organisms in basic research that seem to have nothing to do with a sick child or a suffering elderly person. Yet, I still have vivid memories of the cruel kaleidoscope of severe diseases and of how they can **strike** a human being. I hope to retain these memories as a guide in my current occupation.

Options:

- 1) attention, weight, accumulation, denotation
 - 2) subsequences, consequences, successors, successions
 - 3) apart, diverged, converged, diversified
 - 4) disappeared, disclosed, dipped, dissipated
 - 5) consumption, waste, misuse, splash
 - 6) strike, jar, pounce, simulate
- (APEUni Website / App FIBRW #674)

156. Student-run Restaurant

The rest of Taylor's restaurant is student-run. Students in quantity food production and service management **classes** make the articulate and detailed dishes. "We teach students to understand where a product comes from and to respect that product," Garmy said. Skeptics might doubt the **quality** of a student-run restaurant, but one visit to Taylor's will immediately change their outlook. Dishes such as orecchiette and butternut squash, pappardelle with duck and bistro chicken will please any appetite while imparting the need to **return** for a second taste. Students are taught to use ratios and proportions rather than recipes when creating dishes. "Understanding ratios and proportions when creating dishes instead of recipes makes students think and **actually** teaches them how to cook, rather than just reading a recipe and not learning from it," Garmy said. Garmy said he believes in using all aspects of a product, which Taylor's **menu** reflects.

Options:

- 1) standings, classes, credits, ratification
 - 2) quantity, qualification, quality, quantification
 - 3) redo, boil, return, review
 - 4) surprisingly, grudgingly, actually, factually
 - 5) manner, cuisine, menu, utensil
- (APEUni Website / App FIBRW #670)

157. Emerald

Emerald is defined by its green color. To be an emerald, a specimen must have a **distinctly** green color that falls in the range from bluish green to green to slightly yellowish green. To be an emerald, the specimen must also have a rich color. Stones with weak saturation or light tone should be called "green beryl." **If** the beryl's color is greenish blue then it is an "aquamarine." If it is greenish yellow it is "heliodor." This color definition is a source of **confusion**. Which hue, tone, and saturation combinations are the dividing lines between "green beryl" and "emerald"? Professionals in the gem and jewelry trade can disagree on where the lines should be **drawn**. Some believe that the name "emerald" should be used when chromium is the cause of the green color, and that stones colored by vanadium should be called "green beryl." Calling a gem an "emerald" instead of a "green beryl" can have a significant **impact** upon its price and marketability. This "color confusion" exists within the United States. In some other countries, any beryl with a green color – no matter how faint – is called an "emerald."

Options:

- 1) usually, succinctly, distinctly, undoubtedly
 - 2) Since, That, Although, If
 - 3) expression, fusion, condition, confusion
 - 4) kept, let, drawn, taken
 - 5) result, error, impact, change
- (APEUni Website / App FIBRW #667)

158. Zika

Zika is more pernicious than public health officials anticipated. At present, it is circulating in more than 50 countries. And as of mid-May, seven countries or territories have reported cases of microcephaly or other serious birth defects linked to the virus, which **is transmitted** by mosquito bite, blood transfusion or sexual contact with an infected human. It can also be passed from mother to fetus during pregnancy. Despite Zika's vast **range** over almost 70 years, there is little genetic difference among the various strains, according to an analysis by researchers at the University of Texas Medical Branch at Galveston. For example, the strain currently in the Americas and another previously detected in French Polynesia are practically **indistinguishable** from each other (group in white box). If the virus has changed so little over time, why is it rearing its ugly head now? Scientists are not sure yet, but new experimental work in mosquitoes suggests that the virus was capable of **causing** detrimental health effects and outbreaks all along. Therefore, it is unlikely mutations enabled new abilities. Instead, public health officials probably did not understand Zika's potential because the virus **circulated** mostly in remote locations until recently.

Options:

- 1) transmits, have been transmitted, was transmitted, is transmitted
- 2) range, extent, series, making
- 3) identical, indistinguishable, odd, different
- 4) shaping, pressing, causing, doing
- 5) is circulated, circulate, are circulated, circulated

(APEUni Website / App FIBRW #666)

159. Ironbridge Gorge

The Ironbridge Gorge World Heritage property covers an area of 5.5 km² (550ha) and is located in Telford, Shropshire, approximately 50km north–west of Birmingham. The Industrial Revolution **had its 18th century roots** in the Ironbridge Gorge before spreading across the world, bringing with it some of the most far–reaching changes in human history. The site **incorporates a 5km length of** the steep–sided, mineral–rich Severn Valley from a point immediately west of Ironbridge downstream to Coalport, together with two smaller river valleys extending northwards to Coalbrookdale and Madeley. The Ironbridge Gorge **offers a powerful insight** into the origins of the Industrial Revolution and also contains extensive remains of that period when the area was the focus of international attention from artists, engineers, and writers. The site contains substantial remains of mines, foundries, factories, workshops, warehouses, ironmasters' and workers' housing, public buildings, infrastructure, and transport systems, together with **traditional landscape and forests** of the Severn Gorge. In addition, there also remain **extensive collections** of artifacts and archives relating to the individuals, processes, and products that made the area so important.

Options:

- 1) overturned the fascinating image, have its modern impression, had its 18th century roots, came to an abrupt halt
- 2) fuses a 5km width of, incorporates a 5km length of, expands a lot of, adds a finishing touch to
- 3) gives a useful understanding, afford some information, allows a good understanding, offers a powerful insight
- 4) conventional woods and stuff, outdated roadside scenery, traditional landscape and forests, old–fashioned countryside
- 5) big crowds, large communities, extensive collections, customized groups

(APEUni Website / App FIBRW #665)

160. Divorce in Australia

In 2005, 109,000 new marriages were registered in Australia. This was equivalent to 5.4 marriages for every 1,000 people in the population. This rate has been in an overall **decrease** since 1986 when there were 7.2 marriages per 1,000 people. Over the same period, the **crude** divorce rate has remained relatively unchanged with 2.6 divorces for every 1,000 people in 2005 and 2.5 divorces per 1,000 people in 1986. The **greatest** annual number of divorces occurred in 2001 when there were 55,300 divorces recorded. This peak has been followed by recent declines, with 52,400 divorces in 2005. As well as marrying less, Australians are **tending** to marry later than in the past. In 1986, the median age at first marriage for men was 25.6 years, increasing to 30.0 years in 2005. For women, the median age at first marriage increased from 23.5 years in 1986 to 28.0 years in 2005. People are also divorcing at older ages. In 2005, the median age of divorcing men was 43.5 years, compared with 37.5 years in 1986, while for women the median age in 2005 was 40.8 compared with 34.7 years in 1986. The decline in marriage rates and increase in divorce rates has led to a decrease in the **level** of the population that is formally married. In 1986, 60% of the population aged 15 years and over were married; by 2001 this proportion had decreased to 55%. **Conversely**, the proportion of the population aged 15 years and over who were never married increased from 29% in 1986 to 32% in 2001.

Options:

- 1) reduce, decrease, increase, degrade
 - 2) crude, moderate, singular, sporadic
 - 3) greatest, minimal, excessive, counterfeit
 - 4) unlikely, tending, yet, pretending
 - 5) discussion, level, comparison, stage
 - 6) Uniquely, Conversely, Consequently, Obviously
- (APEUni Website / App FIBRW #664)

161. DNA

DNA is a molecule that does two things. First, it acts as the **hereditary** material, which is passed down from generation to generation. Second, it directs, to a considerable extent, the construction of our bodies, telling our cells what kinds of molecules to make and **guiding** our development from a single-celled zygote to a fully formed adult. These two things are of course **connected**. The DNA sequences that construct the best bodies are more likely to get passed down to the next generation because well-constructed bodies are more likely to survive and **thus** to reproduce. This is Darwin's theory of natural selection stated in the language of DNA.

Options:

- 1) acquired, hereditary, nutritional, metabolic
 - 2) establishing, guiding, pushing, determining
 - 3) supplanted, connected, paralleled, required
 - 4) thus, yet, namely, nevertheless
- (APEUni Website / App FIBRW #662)

162. Language Deficit

This is a challenging time for UK students, and we should be making their transition from university to the globalized world easier, not harder. The British Academy has voiced its **concern** over the growing language deficit for some years, and the gloomy statistics speak for themselves. We need **decisive** action if we are remedying this worsening situation. The **roots** of the problem lie within schools, but Vice-Chancellors have the power to drive change and help their students recognize the importance of learning languages, and about the countries where they are spoken and the cultures they sustain. We **urge** them to act and protect this country's long term economic, social and cultural standing.

Options:

- 1) opinion, concern, criticism, expectation
 - 2) inclusive, decisive, perfunctory, exclusive
 - 3) roots, scourges, links, grounds
 - 4) suppress, appeal, persuade, urge
- (APEUni Website / App FIBRW #661)

163. Human Remains

In 1959, the partial skeletal remains of an ancient woman estimated to be 10,000 years old were unearthed in Arlington Springs on Santa Rosa Island, one of the eight Channel Islands off the southern California coast. They were discovered by Phil C. Orr, curator of anthropology and natural history at the Santa Barbara Museum of Natural History. The remains of the so-called Arlington Springs woman were recently reanalyzed by the **latest** radiocarbon dating techniques and were found to be approximately 13,000 years old. The new date makes her remains older than any other known human skeleton found **so**

far in North America. The discovery **challenges** the popular belief that the first colonists to North America arrived at the end of the last ice age about 11,500 years ago **by crossing** a Bering land bridge that connected Siberia to Alaska and northwestern Canada. The earlier date and the location of the woman's remains on the island adds weight to an alternative theory that some early settlers may have constructed boats and migrated from Asia by sailing down the Pacific coast.

Options:

- 1) latest, modern, new, last
 - 2) so far, up until now, from now on, by now
 - 3) challenges, district, distinction, defies
 - 4) by crossing, crossed, to cross, cross
- (APEUni Website / App FIBRW #656)

164. Granular Material

Part of the fun of experimenting with granular materials, says Stephen W. Morris, is the showmanship. In one stunt that he has demonstrated in settings ranging from high school classrooms to television studios, the University of Toronto **physicist** loads clear plastic tubes with white table salt and black sand and starts them rotating. What transpires in the tubes usually knocks the socks off of any **unsuspecting** bystander. Instead of mixing into a drab gray sameness, the sand particles slowly separate into crisp black bands cutting across a long, narrow field of salt. As the spinning continues, some bands disappear and new ones arise. "It's a parlor trick," Morris says. Not to deny its entertainment value, this **demonstration** of how strangely granular materials can behave is also an authentic experiment in a field both rich in fundamental physics and major practical consequences. Yet granular mixing today remains more of an art than a **science**, says chemical engineer Fernando J.

Options:

- 1) psychologist, physicist, pharmacists, physicians
 - 2) uncomfortable, unsuspecting, representing, suspecting
 - 3) theory, demonstration, exhibition, notion
 - 4) tradition, science, hobby, computation
- (APEUni Website / App FIBRW #655)

165. Cardona Salt Mountain

Formed two million years ago when low-density salt was pushed up through the much harder materials surrounding it, the Cardona Salt Mountain is one of the largest domes of its kind in the world, and unique in Europe. While small amounts of other minerals pervade the savory hill, the salt pile **would have** a near translucent quality if not for the thin layer of reddish clay coating the exterior. The **significance** of the mountain was recognized as early as the middle ages when Romans began exploiting the mountain for its salt, which began to bolster the young Cardonian **economy**. With the invention of industrial mining techniques, a mine was built into the side of the mountain and a thriving facility formed at its base as excavators dragged enormous amounts of potash (water-soluble) salt from the innards of the hill. In **addition** to the mineral export, the locals of Cardona began making salt sculptures to sell and invented a number of hard, salty pastries unique to the area.

Options:

- 1) would have, have had, has, has had
- 2) performance, significance, vibration, maintenance
- 3) correspondence, economy, accordance, economist
- 4) ratio, addition, interest, adaption

(APEUni Website / App FIBRW #647)

166. Tutankhamun

The last tourists may have been leaving the Valley of the Kings on the West Bank in Luxor but the area in front of the tomb of Tutankhamun remained far from deserted. Instead of the **tranquillity** that usually descends on the area in the evening it was a hive of activity. TV crews trailed masses of equipment, journalists milled and photographers held their cameras at the ready. The reason? For the first time since Howard Carter **discovered** the tomb in 1922 the mummy of Tutankhamun was being prepared for public display. Inside the subterranean burial chamber Egypt's archaeology supremo Zahi Hawass, **accompanied** by four Egyptologists, two restorers and three workmen, were slowly lifting the mummy from the golden sarcophagus where it has been rested -- mostly undisturbed -- for more than 3,000 years. The body was then placed on a wooden stretcher and **transported** to its new home, a high-tech, climate-controlled plexi-glass showcase located in the outer chamber of the tomb where, covered in linen, with only the face and feet exposed, it now greets visitors.

Options:

- 1) chaos, permanence, ecstasy, tranquillity
- 2) showed, founded, discovered, dismantled
- 3) accomplished, complimented, accompanied, affected
- 4) commuted, transmitted, transported, convoy

(APEUni Website / App FIBRW #639)

167. Corn People

Descendants of the Maya living in Mexico still sometimes refer to themselves as "the corn people." The phrase is not intended as metaphor. Rather, it's meant to **acknowledge** their abiding dependence on this miraculous grass, the **staple** of their diet for almost 9,000 years. Forty percent of the calories a Mexican eats in a day comes directly from corn, most of it in the form of tortillas. So when a Mexican says I am maize or corn walking, it is simply a statement of fact: The very substance of the Mexicans body is to a considerable extent a **manifestation** of this plant.

Options:

- 1) remember, renown, acknowledge, knowledge
- 2) staple, fix, range, variety
- 3) manifestation, display, show, exhibition

(APEUni Website / App FIBRW #629)

168. Jury

Serving on a jury is normally compulsory for individuals who are **qualified** for jury service. A jury is **intended** to be an impartial panel capable of reaching a verdict. There are often **procedures** and requirements, including a fluent understanding of the language and the opportunity to test juror's neutrality or otherwise exclude jurors who are perceived as likely to be less than **neutral** or partial to one side.

Options:

- 1) equalled, qualified, able, capable
- 2) intended, failed, used, likely
- 3) procedures, processes, necessities, steps
- 4) neutral, natural, central, supportive

(APEUni Website / App FIBRW #625)

169. Fluid Behavior

If you see a movie, or a TV advertisement, that involves a fluid behaving in an unusual way, it was probably made using technology based on the work of a Monash researcher. Professor Joseph Monaghan who **pioneered** an influential method for interpreting the behavior of liquids that underlies most special effects involving water has been **honored** with election to the Australian Academy of Sciences. Professor Monaghan, one of only 17 members elected in 2011, was recognized for developing the **method** of Smoothed Particle Hydrodynamics (SPH) which has applications in the fields of astrophysics, engineering and physiology, as well as movie special effects. His research started in 1977 when he tried to use computer **simulation** to describe the formation of stars and stellar systems. The algorithms available at the time were **incapable** of describing the complicated systems that evolve out of chaotic clouds of gas in the galaxy. Professor Monaghan, and his colleague Bob Gingold, took the novel and effective approach of replacing the fluid or gas in the simulation with large numbers of particles with properties that **mimicked** those of the fluid. SPH has become a central tool in astrophysics, where it is currently used to simulate the evolution of the universe after the Big Bang, the formation of stars, and the processes of planet building.

Options:

- 1) pioneered, proceed, opened, disclose
 - 2) gifted, credited, presented, honored
 - 3) platform, method, system, medium
 - 4) action, stimulation, equation, simulation
 - 5) impossible, incapable, capable, inapplicable
 - 6) presented, showed, liked, mimicked
- (APEUni Website / App FIBRW #621)

170. Reading

Reading is an active process, not a **passive** one. We always read within a **specific** context and this affects what we notice and what seems to matter. We always have a purpose in reading a text, and this will shape how we **approach** it. Our purpose and background knowledge will also **determine** the strategies we use to read the text.

Options:

- 1) passive, positive, objective, proactive
 - 2) explicit, implicit, specific, general
 - 3) approach, close, preempt, nettle
 - 4) conclude, determine, undermined, detect
- (APEUni Website / App FIBRW #623)

171. Trip (Incomplete)

Points: It's a (trip) to Germany not for leisure but for Germany exchange. This is the worst flight I have ever been on ...in my life, I have (before)... We were originally from Amsterdam, I arrived half an hour later than the due time when that plane took off, but our plane was late, we took another plane and flew somewhere, and the result was still wrong, landed at another airport, a few one a hundred kilometers away from my destination. We could only wait for the next (connecting) flight to continue the journey, for which I had waited for (another) one and half hour. No wonder we all hoped to go home straight away.

(APEUni Website / App FIBRW #617)

172. Business Emission

An American retail giant is set to ask its suppliers to measure and report their greenhouse gas emissions. There is a need to **disclose** business emission. The **data** of emission can be used to test which company causes climate change, and **conflate** the government campaigners and environmental **invigilators** .

Options:

- 1) disclose, discontinue, disable, dismiss
 - 2) image, scenario, projection, data
 - 3) repeat, conflate, discipline, maintain
 - 4) inventors, invigilators, obligators, campaigners
- (APEUni Website / App FIBRW #615)

173. Folklore

Folklore, a modern term for the **body** of traditional customs, superstitions, stories, dances, and songs that have been adopted and maintained within a given **community** by processes of repetition is not reliant on the written word. Along with folk songs and folktales, this broad **category** of cultural forms embraces all kinds of legends, riddles, jokes, proverbs, games, charms, omens, spells, and rituals, especially those of pre-literate societies or social classes. Those forms of verbal expression that are handed on from one generation or locality to the next by **word** of mouth are said to constitute an oral **tradition** .

Options:

- 1) activity, achievement, symbol, body
 - 2) family, community, organization, immunity
 - 3) experience, category, experiment, use
 - 4) development, transmission, word, transition
 - 5) tone, condition, prediction, tradition
- (APEUni Website / App FIBRW #601)

174. Zero-gravity

Researchers already know that spending long periods of time in a zero-gravity **environment** —such as that inside the International Space Station (ISS) — results in loss of bone density and **damage** to the body's **muscles** . That's partly why stays aboard the ISS are **restricted** at six months. And now, a number of NASA astronauts are reporting that their 20/20 **vision faded** after spending time in space, with many needing glasses once they returned to Earth.

Options:

- 1) planet, weather, climate, environment
 - 2) enhancement, damage, gain, recovery
 - 3) muscles, flexibility, development, action
 - 4) allowed, excessive, timed, restricted
 - 5) voices, smelling, vision, hearing
 - 6) disappeared, fatigued, faded, strengthened
- (APEUni Website / App FIBRW #606)

175. Darkness

The increasing darkness in the Northern Hemisphere this time of year indicates to the plant that **fall** is coming on. So it starts recouping materials from the **leaves** before they drop off. Evergreens protect their needle-like foliage from freezing with **waxy** coatings and natural "antifreezes." But broadleaf plants,

like sugar maples, birches, and sumacs, have no such protections. As a result, they **shed** their leaves. But before they do, the plants first try to **salvage** important nutrients such as nitrogen and phosphorus.

Options:

- 1) fall, summer, spring, winter
 - 2) trunks, leaves, roots, branches
 - 3) booty, sticky, waxy, watery
 - 4) shed, collected, brought, beat
 - 5) deliver, call, convene, salvage
- (APEUni Website / App FIBRW #592)

176. Farms

Both farms were by far the largest, most prosperous, most technologically advanced farms in their **respective** districts. In particular, each was centered around a magnificent state-of-the-art barn for **sheltering** and milking cows. Those structures, both neatly **divided** into opposite facing rows of cow stalls, dwarfed all other barns in the district. Both farms let their cows **graze** outdoors in lush pastures during the summer, produced their own hay to harvest in the late summer for feeding the cows through the winter, and **increased** their production of summer fodder and winter hay by irrigating their fields.

Options:

- 1) restrictive, respective, relevant, responsible
 - 2) sheltering, scattering, gathering, hiding
 - 3) gathered, separated, cut, divided
 - 4) eat, move, graze, live
 - 5) sharpened, narrowed, widened, increased
- (APEUni Website / App FIBRW #588)

177. Anesthetics

Before effective anaesthetics, surgery was very crude and very painful. Before 1800, alcohol and opium had **little** success in easing pain during operations. Laughing gas was used in 1844 in dentistry in the USA, but failed to ease all pain and patients **remained** conscious. Ether (used from 1846) made patients totally unconscious and lasted a long time. However, it could make patients cough during operations and sick afterwards. It was highly flammable and **was transported** in heavy glass bottles. Chloroform (used from 1847) was very effective with few side effects. However, it was difficult to get the dose right and could kill some people **because of** the effect on their heart. An inhaler helped to regulate the dosage.

Options:

- 1) little, title, much, great
 - 2) contained, retained, remained, released
 - 3) has transported, was transported, had transported, have transported
 - 4) rather than, because of, but, due
- (APEUni Website / App FIBRW #612)

178. Hairstyles

With their punk hairstyles and bright colors, marmosets and tamarins are among the most attractive primates on earth. These fast-moving, lightweight animals live in the rainforests of South America. Their small size **makes** it easy for them to dart about the trees, catching insects and small animals such as lizards, frogs, and snails. Marmosets have another unusual food **source** – they use their chisel-like incisor teeth to dig into tree bark and lap up the gummy sap that seeps out, leaving telltale, oval-shaped

holes in the **branches** when they have finished. But as vast tracts of rainforest are cleared for plantations and cattle ranches, marmosets and tamarins are in serious **danger** of extinction.

Options:

- 1) brings, makes, takes, claims
 - 2) originality, provenience, source, origin
 - 3) grasses, branches, trees, roots
 - 4) fatal, endangered, safe, danger
- (APEUni Website / App FIBRW #630)

179. Sales Jobs

Sales jobs allow for a great deal of discretionary time and effort on the part of the sales representatives – especially when compared with managerial, manufacturing, and service jobs. Most sales representatives work independently and outside the immediate presence of their sales managers. Therefore, some form of goals needs to be in place **to help motivate and guide** their performance. Sales personnel are not the only professionals with performance goals or quotas. Health care professionals operating in clinics have daily, weekly, and monthly goals in terms of patient visits. Service personnel are assigned a number of service calls they **must perform** during a set time period. Production workers in manufacturing have output goals. So, why are achieving sales goals or quotas such a big deal? The answer to this question can be found by examining how a firm’s other departments are affected by how well the company’s salespeople achieve their performance goals. The success of the business **hinges on** the successful sales of its products and services. Consider all the planning, the financial, production and marketing efforts that go into **producing what** the sales force sells. Everyone depends on the sales force to sell the company’s products and services and they eagerly anticipate knowing things are going.

Options:

- 1) helping confuse and mislead, to help motivate and guide, help motivating and guiding, help confuse and mislead
 - 2) have displayed, must perform, are reforming, can take
 - 3) leads to, hinges on, contributes to, results in
 - 4) producing what, consuming as, protecting that, purchasing which
- (APEUni Website / App FIBRW #618)

180. EE and AVG

Currently, there is concern about the increasing amount of time children spend in **sedentary** activities, the number of children who fail to achieve **minimum** daily physical activity guidelines (i.e. 60 min of moderate-to-vigorous intensity activities every day), and the apparent increase in obesity prevalence as a result of such sedentary **behaviors**. Screen-based activities, including television viewing and playing computer games are among the most frequently observed sedentary activities that children partake with children spending 2.5–4 h per day participating in such activities. The introduction of “active video games” (AVGs) into the gaming market presents an opportunity to convert traditional, sedentary screen-time into active screen-time and thus increases total daily energy expenditure (EE). Modern AVGs utilize cameras and motion sensors to allow the gamer to physically perform a variety of actions, **dependent** on the console, such as swinging a tennis racquet or running. The most demanding AVGs provided similar responses to walking and, based on international standards, should be classified as low-intensity activities. Whilst AVGs may provide children with a better alternative to sedentary gaming, they are not a sufficient **replacement** for normal physical activity, e.g. sports and outdoor play.

Options:

- 1) real, separate, sedentary, wasting
 - 2) maximum, mini, minimum, enough
 - 3) connectivity, position, behaviors, stuff
 - 4) agreed, remaining, dependent, shaped
 - 5) consumption, employment, replacement, engagement
- (APEUni Website / App FIBRW #613)

181. Herbal

A herbal is a book of plants, describing their appearance, their properties and how they may be used for preparing ointments and medicines. The medical use of plants is **recorded** on fragments of papyrus and clay tablets from ancient Egypt, Samaria and China that date back 5,000 years but document traditions far older still. Over 700 herbal remedies were detailed in the Papyrus Ebers, an Egyptian text written in 1500 BC. Around 65 BC, a Greek physician called Dioscorides wrote a herbal that was **translated** into Latin and Arabic. Known as 'De materia medica', it became the most influential work on medicinal plants in both Christian and Islamic worlds until the late 17th century. An illustrated manuscript copy of the text made in Constantinople (modern-day Istanbul) **survives** from the sixth century. The first printed herbals date from the dawn of European printing in the 1480s. They provided valuable information for apothecaries, whose job was to make the pills and potions **prescribed** by physicians. In the next century, landmark herbals were produced in England by William Turner, considered to be the father of British botany, and John Gerard, whose illustrations would inspire the floral fabric, wallpaper and tile designs of William Morris four centuries later.

Options:

- 1) registered, recorded, memorized, kept
 - 2) moved, interpreted, translated, removed
 - 3) leaves, duplicates, suffers, survives
 - 4) instructed, pointed, prescribed, determined
- (APEUni Website / App FIBRW #622)

182. Crime

A crime is generally a deliberate act that results in harm, physical or otherwise, toward one or more people, in a manner **prohibited** by law. The determination of which acts are to be considered criminal has varied **historically**, and continues to do so among cultures and nations. When a crime is committed, a process of **discovery**, trial by judge or jury, conviction, and punishment occurs. Just as what is considered criminal varies between **jurisdictions**, so does the punishment, but elements of restitution and **deterrence** are common.

Options:

- 1) prohibited, offended, obeyed, protected
 - 2) exceptionally, historically, disproportionately, inappropriately
 - 3) discovery, finding, creation, invention
 - 4) rights, regulations, jurisdictions, obligation
 - 5) endorsement, discipline, preventer, deterrence
- (APEUni Website / App FIBRW #620)

183. Dog

A DOG may be man's best friend. But man is not always a dog's. Over the centuries **selective** breeding has pulled at the canine body shape to produce what is often a grotesque distortion of the underlying

wolf. Indeed, some of these distortions are, when found in people, regarded as **pathologies**. Dog breeding does, though, offer a chance to those who would like to understand how body shape is controlled. The ancestry of pedigree pooches is well recorded, their generation time is short and their **litter** size reasonably large, so there is plenty of material to work with. **Moreover**, breeds are, by definition, inbred, and this simplifies genetic analysis. Those such as Elaine Ostrander, of America's National Human Genome Research Institute, who wish to identify the genetic basis of the features of particular pedigrees thus have an **ideal** experimental animal.

Options:

- 1) sequential, excessive, selective, genetic
 - 2) dismissed, disabled, pathologies, diseases
 - 3) little, offspring, puppy, litter
 - 4) Hence, Moreover, Although, However
 - 5) expected, comprehensive, optimal, ideal
- (APEUni Website / App FIBRW #585)

184. Essay

Essays are used as an assessment tool to **evaluate** your ability to research a topic and construct an **argument**, as well as your understanding of subject content. This does not mean that essays are a 'regurgitation' of everything your lecturer has said **throughout** the course. Essays are your opportunity to explore in greater **depth** of the course – theories, issues, texts, etc. and in some cases relate these aspects to a **particular** context. It is your opportunity to articulate your ideas, but in a **certain** way: using formal academic style.

Options:

- 1) equal, escalate, estimate, evaluate
 - 2) assignment, essay, argument, idea
 - 3) throughout, all, whole, through
 - 4) deep, depth, length, strength
 - 5) assigned, special, interesting, particular
 - 6) same, good, usually, certain
- (APEUni Website / App FIBRW #593)

185. Sales Activities

Organizations need to integrate their sales activities more both internally and with customers' needs according to a new book co-authored by an academic at the University of East Anglia. The book **addresses** how sales can help organizations to become more customer-oriented and considers how they are responding to challenges such as increasing competition, more **demanding** customers and a more complex selling environment. Many organizations are facing escalating costs and a growth in customer power, **which** makes it necessary to allocate resources more strategically. The sales function can provide critical customer and market knowledge to help inform both innovation and marketing. However, the authors say that within the industry **there** is still uncertainty about the shape a future sales team should take, how it should be managed, and how it **fits** into their organization's business model.

Options:

- 1) predicts, stipulates, addresses, circumscribes
 - 2) demanding, aggressive, friendly, needy
 - 3) which, this, that, where
 - 4) that, there, which, this
 - 5) applies, segregates, fits, develops
- (APEUni Website / App FIBRW #581)

186. Enough Exercise

One thing is certain. Most people do not get enough exercise in their **daily** routines. All of the advances of modern technology — from **electric** can openers to power steering have made life easier, more comfortable and much less physically **demanding**. Yet our bodies need activities, especially if they are carrying around too **much** fat. Satisfying this need requires a sustainable plan, and a commitment. There are two **main** ways to increase the number of calories you spend: start a regular exercise program if you do not have one already. Increase the amount of physical activity in your daily routine.

Options:

- 1) daily, simple, common, usual
 - 2) vibrational, electronic, synthetic, electric
 - 3) need, demanding, pushing, supplying
 - 4) few, many, much, several
 - 5) opposite, odd, main, fair
- (APEUni Website / App FIBRW #577)

187. Teen Writing

Teens write for a variety of reasons—as part of a school assignment, to **get** a good grade, to stay in touch with friends, to share their artistic creations with others or simply to put their thoughts to paper (whether virtual or otherwise). In our focus groups, teens said they are motivated to write when they can **select** topics that are relevant to their lives and interests, and report greater enjoyment of school writing when they have the opportunity to write creatively. Having teachers or other adults who challenge them, **present** them with interesting curricula and give them detailed feedback also serves as a motivator for teens. Teens also **report** writing for an audience motivates them to write and write well.

Options:

- 1) get, skip, maintain, avoid
 - 2) debate, communicate, use, select
 - 3) meet, educate, present, introduce
 - 4) regard, learn, report, provide
- (APEUni Website / App FIBRW #576)

188. Good Schools

A big rise in state schools rated among the best institutions in the country is revealed in the latest edition of the Good Schools Guide. Middle-class parents facing financial pressures in the **downturn** are increasingly looking beyond the private sector to educate their children. The 23 year-old Good Schools Guide — a **popular** reference book for fee-paying families set on the best private school — has increased the number of state schools in this year's edition to 251, pushing the figure to more than a quarter of its 1,000 entries for the first time. **Explaining** why the guide has more than doubled the number of schools it features outside the private sector in only five years, Sue Fieldman, regional editor, told the Financial Times: "The parents we speak to want more information on the state **sector** and the

best it has to offer. ”

Options:

- 1) period, upturn, downtown, downturn
 - 2) diverse, ubiquitous, complete, popular
 - 3) Demonstrating, Asking, Complaining, Explaining
 - 4) part, branch, division, sector
- (APEUni Website / App FIBRW #578)

189. Medalists

In an often-cited study about counterfactuals, Medvec, Madey, and Gilovich (1995) found that bronze medalists appeared happier than silver medalists in television coverage of the 1992 Summer Olympics. Medvec et al. **argued** that bronze medalists compared themselves to 4th place finishers, **whereas** silver medalists compared themselves to gold medalists. These counterfactuals were the most **salient** because they were either qualitatively different (gold vs. silver) or categorically different (medal vs. no medal) from what **actually** occurred. Drawing on archival data and experimental studies, we show that Olympic athletes (among others) are more likely to make counterfactual comparisons based on their **prior** expectations, consistent with decision affect theory. Silver medalists are more likely to be disappointed because their personal expectations are higher than **those** of bronze medalists.

Options:

- 1) argued, questioned, persuaded, flighted
 - 2) whereabouts, wherever, whatsoever, whereas
 - 3) advantaged, outperformed, salient, worried
 - 4) playfully, finally, actually, totally
 - 5) after, last, before, prior
 - 6) that, these, those, this
- (APEUni Website / App FIBRW #573)

190. Edible Insects

More than 1000 species of insects are **served up** around the world. For example, “kungu cakes” — made from midges — are a **delicacy** in parts of Africa. Mexico is an insect-eating — or entomophagous — hotspot, where more than 200 insect species are consumed. **Demand** is so high that 40 species are now under **threat**, including white agave worms. These caterpillars of the tequila giant-skipper butterfly **fetch** around \$250 a kilogram.

Options:

- 1) taken off, served up, caught on, piled upon
 - 2) folk, desert, dedication, delicacy
 - 3) Demand, Usage, Reputation, Supply
 - 4) stress, regulation, operation, threat
 - 5) catch, fetch, weigh, count
- (APEUni Website / App FIBRW #553)

191. Ocean Floor

The ocean floor is home to many unique communities of plants and animals. Most of these marine ecosystems are near the water surface, such as the Great Barrier Reef, a 2,000-km long coral **formation** off the northeastern coast of Australia. Coral reefs, like nearly all complex living communities, depend on solar energy for growth (photosynthesis). The sun’s energy, however, penetrates

at most only about 300 m below the surface of the water. The relatively shallow penetration of solar energy and the sinking of cold, subpolar water combine to make most of the deep ocean floor a **frigid** environment with few life forms. In 1977, scientists discovered hot springs at a depth of 2.5 km, on the Galapagos Rift (spreading ridge) off the coast of Ecuador. This exciting discovery was not really a **surprise**. Since the early 1970s, scientists had predicted that hot springs (geothermal vents) should be found at the active spreading centers along the mid-oceanic ridges, where magma, at temperatures over 1,000° Presumably was being erupted to form new oceanic crust. More exciting, because it was totally **unexpected**, was the discovery of abundant and unusual sea life – giant tube worms, huge clams, and mussels – that **thrived** around the hot springs.

Options:

- 1) system, reality, structure, formation
 - 2) versatile, frigid, warm, perfect
 - 3) a surprise, any chance, some sign, climax
 - 4) no expectation, undermined, unexpected, predictable
 - 5) struggling, died, thrived, exists
- (APEUni Website / App FIBRW #552)

192. Edison

Thomas Alva Edison was both a scientist and an inventor. Born in 1847, Edison would see **tremendous** changes take place in his lifetime. He was also to be responsible for making many of those changes occur. When Edison was born, society still thought of electricity as a **novelty**, a fad. By the time he died, entire cities were lit by electricity. Much of the credit for that progress goes to Edison. In his lifetime, Edison patented 1,093 inventions, earning him the nickname “The Wizard of Menlo Park.” The most famous of his inventions was the incandescent light bulb. Besides the light bulb, Edison developed the phonograph and the “kinetoscope,” a small box for viewing moving films. Thomas Edison is also the first person in the US to make his own filmstrips. He also **improved** upon the original design of the stock ticker, the telegraph, and Alexander Graham Bell’s telephone. He believed in hard work, sometimes working twenty hours a day. Edison was quoted as saying, “Genius is one percent inspiration and 99 percent perspiration.” In **tribute** to this important American, electric lights in the United States were dimmed for one minute on October 21, 1931, a few days after his death.

Options:

- 1) experimental, moderate, tremendous, trenchant
 - 2) news, miracle, tradition, novelty
 - 3) looked, imposed, depended, improved
 - 4) honor, tribute, addition, memory
- (APEUni Website / App FIBRW #546)

193. Pinker

In a sequence of bestsellers, including *The Language Instinct* and *How the Mind Works*, Pinker has argued the swathes of our mental, social and emotional lives may have **originated** as evolutionary adaptations, well suited to the lives our ancestors eked out on the Pleistocene savannah. Sometimes it seems as if nothing is **immune** from being explained this way. Road rage, adultery, marriage, altruism, our tendency to reward senior executives with corner offices on the top floor, and the smaller number of women who become mechanical engineers—all may have their **roots** in natural selection, Pinker claims. The controversial implications are obvious: that men and women might **differ** in their inborn abilities at performing certain tasks, for example, or that parenting may have **little** influence on personality.

Options:

- 1) originating, originate, origin, originated
- 2) prohibited, convinced, immune, protected
- 3) needs, roots, demands, values
- 4) differ, complicate, indulge, interested
- 5) more, some, small, little

(APEUni Website / App FIBRW #544)

194. Push and Pull

People move to a new region for many different reasons. The **motivation** for moving can come from a combination of what researchers sometimes call 'push and pull **factors**' — those that encourage people to leave a region, and those that attract people to a region. Some of the factors that motivate people to move **include** seeking a better climate, finding more affordable housing, looking for work or retiring from work, leaving the **congestion** of city living, wanting a more pleasant environment, and wanting to be near to family and friends. In reality, many complex factors and personal reasons may **interact** to motivate a person or family to move.

Options:

- 1) accommodation, combination, abbreviation, motivation
- 2) factors, generators, fallacies, settings
- 3) include, including, includes, included
- 4) congestion, configuration, concoction, conjunction
- 5) intercept, intercede, interact, intersperse

(APEUni Website / App FIBRW #5)

195. Ants

Ants are known for working together, operating as a unit for the good of the colony. But not so fast, say researchers from the Universities of Leeds and Copenhagen. It turns out that ants can scheme like a stage mom. **Scientists** say that some ants hide out to ensure that their offspring become child-bearing queens instead of barren workers. The **accepted** hypothesis had been that random ants were fed certain foods that would allow them to develop into queens. But DNA tests on five **colonies** of leaf-cutting ants **revealed** that certain males have a better genetic chance of producing royal progeny. Scientists believe these rare males stay anonymous, and thus avoid any problems with other ants that might otherwise lose their "one-for-all, all-for-one" attitude. In fact, the number of males **carrying** royal genes to those who aren't may have settled at a low ratio through **evolution** —which cobbled together the best way for the ant gene pool to expand, while at the same time keeping the lucky males hidden from their possibly jealous rivals.

Options:

- 1) Elephantiasis, Contrivances, Retroviruses, Scientists
- 2) preexisted, chairlift, accepted, intermarriage
- 3) anthologies, colonies, velocities, aristocracies
- 4) critiqued, teed, kneeled, revealed
- 5) carrying, birdying, disembodiment, lobbying
- 6) ablution, occlusion, prosecution, evolution

(APEUni Website / App FIBRW #239)

196. Babies

How can you tell the difference between a French baby and a German baby? No, it's not that one is

wearing a saucy little beret while the other is tucked into tiny pair of lederhosen. Well, maybe that's part of it. But a new study in the journal *Current Biology* shows that the babies actually sound different. Because the melody of an infant's cry matches its mother tongue. We all know that babies start **eavesdropping** while they're still in the womb. So when they come out, they know their mother's voice. When they're older, they start to imitate the sounds they hear. Eventually they babble, and then start to speak, and then you never hear the end of it. But long before that first burble or coo, babies are learning the **elements** of language. A team of scientists recorded the cries of 60 **newborns** : 30 born into **French-speaking** families and 30 that heard German. And they found that French infants wail on a rising note while the Germans favor a falling melody . Those **patterns** match the rhythms of their native languages. So next time you hear a baby cry, listen closely. He could be telling you where he's from.

Options:

- 1) cantilevering, eavesdropping, reasoning, peopling
- 2) portentousness, relentlessness, hydrocephalus, elements
- 3) roomfuls, goofballs, newborns, dessertspoonfuls
- 4) Mechanizing, Surceasing, French-speaking, Grieving
- 5) patterns, sponges, assassins, actions

(APEUni Website / App FIBRW #238)

197. Clown Fish

Clown fish became famous thanks to the movie *Finding Nemo*. In real life, their social hierarchy is simple: larger fish dominate their smaller **counterparts** . Now we know that to reinforce this social structure, the fish communicate with aggressive and submissive audio signals. The new info is in the journal *PLoS ONE*. Researchers **recorded** clown fish calls, **capturing** this noise as one chased a smaller fish. [Aggressive audio] These popping sounds function as an aggression signal. When a clown fish has been chased and wishes to submit, it shakes its head in a submissive gesture and produces clicking noises like these. The researchers **compared** the aggressive and submissive calls, and found that the sound pulses in a submissive signal were shorter and more high-pitched. Unlike many animals that use sound to draw in **potential** mates, clown fish appear to use their calls only as labels of social status. When a little fish makes submissive sounds to a larger one, neither has to invest in a physical confrontation. Which is good news for small-fry like Nemo.

Options:

- 1) palms, prompts, traps, counterparts
- 2) unfolded, deported, recorded, dialed
- 3) cluttering, profiting, capturing, padlocking
- 4) pared, compared, guided, treaded
- 5) exponential, potential, nimble, ventral

(APEUni Website / App FIBRW #33)

198. Guide Stick

Foldable white canes help the **visually** impaired navigate their surroundings. But the guide stick's tactile nature offers only so much information. The cane's user must manually find and avoid obstructions. But new high-tech canes are on the horizon. Last year researchers in India tried to fill in some of the missing info with their experimental SmartCane. The device uses an attached ultrasonic transmitter and a sensor that vibrates the cane to warn its users when an obstacle is within three meters. Students at the U.K.'s Birmingham City University are developing a cane that can even identify acquaintances as they **approach** . Called the 'XploR' mobility cane, it includes an **embedded** digital camera that analyzes the faces of people walking by and compares their images against a database stored on a memory card

in the cane's handle. If there's a facial recognition match, the cane alerts the user's **smartphone** via Bluetooth. The phone then identifies the approaching person to the user via its speaker or earbuds. The **students** are building a prototype they'll test later this year. The hurdles are significant: facial recognition is a tough problem, especially outdoors. But if the XploR works, it could actually give the visually impaired a leg up on everyone else—especially those of us who never remember people's names.

Options:

- 1) felicity, insensitivity, visually, malleability
 - 2) likelihood, throat, northernmost, approach
 - 3) untested, embedded, deadest, skinhead
 - 4) waterborne, alone, smartphone, postpone
 - 5) jurisprudence, bootless, students, jukebox
- (APEUni Website / App FIBRW #28)

199. Australia and New Zealand

Australia and New Zealand have many common links. Both countries were recently settled by Europeans, are predominantly English speaking and in that sense, share a common cultural **heritage**. Although in close proximity to one another, both countries are geographically isolated and have small populations by world **standards**. They have similar histories and enjoy close relations on many fronts. In terms of population **characteristics**, Australia and New Zealand have much in common. Both countries have minority indigenous populations, and during the latter half of the 20th century have seen a steady stream of migrants from a variety of regions throughout the world. Both countries have **experienced** similar declines in fertility since the high levels recorded during the baby boom, and alongside this have enjoyed the benefits of continually improving life expectancy. One consequence of these trends is that both countries are faced with an ageing population, and the **associated** challenge of providing appropriate care and support for this growing group within the community.

Options:

- 1) heritage, asset, appearance, prestige
 - 2) statistics, standards, authorities, records
 - 3) senses, characteristics, aspects, directions
 - 4) experienced, expected, compensated, estimated
 - 5) associated, favourable, comprehensive, irrevocable
- (APEUni Website / App FIBRW #12)

200. Climate

Climate is the word we **use** for weather over a long period of time. The desert has a dry climate because there is very **little** rain. The UK has a 'temperate climate', **which** means winters are, overall, mild and, **summers** generally, don't get too hot.

Options:

- 1) estimates, predict, cares, use
 - 2) torrential, often, little, heavy
 - 3) what, these, that, which
 - 4) summers, winter, desert, dessert
- (APEUni Website / App FIBRW #11)

201. Cloth-making

About 10,000 years ago, people learned how to make cloth. Wool, cotton, flax, or hemp was first spun into a thin thread using a spindle. The thread was then woven into a fabric. The earliest weaving machines **probably** consisted of little more than a pair of sticks that held a set of parallel threads, called the warp, while the cross-thread, called the weft, was inserted. Later machines called looms had rods that separated the threads to allow the weft to be inserted more **easily**. A piece of wood, called the shuttle, holding a spool of thread, was passed between the separated threads. The basic **principles** of spinning and weaving have stayed the same until the present day, though during the industrial revolution of the 18th century many ways were found of **automating** the processes. With new machines such as the spinning mule, many threads could be spun at the same time, and, with the help of devices like the flying shuttle, broad pieces of cloth could be woven at great speed.

Options:

- 1) doubtless, probably, possible, possibility
 - 2) precise, accuracy, easily, accurate
 - 3) role, principles, foundation, criteria
 - 4) automating, slower, faster, existing
- (APEUni Website / App FIBRW #9)

202. Global Heating

Three degrees does not sound like much but it **represents** a rise in temperature compatible with the global heating that occurred between the last ice age, some 15,000 years ago, and the warmth of the eighteenth century. When Earth was cold, giant glaciers sometimes extended from the polar-regions as far south as St Louis in the US and the Alps in Europe. Later this century when it is three degree hotter glaciers everywhere will be melting in a climate of often **unbearable** heat and drought, punctuated with storms and floods. The **consequences** for humanity could be truly horrific; if we fail to act swiftly, the full impact of global heating could cull us along with vast populations of the plant and animals with whom we share Earth. In a worst-case scenario, there might – in the 22nd century – be only a remnant of humanity eking out a **diminished** existence in the polar-regions and the few remaining oases left on a hot and arid Earth.

Options:

- 1) represents, tolerates, proved, show
 - 2) cool, push, suits, unbearable
 - 3) facts, fruits, benefits, consequences
 - 4) diminished, increasing, reducing, faded
- (APEUni Website / App FIBRW #8)

203. Language Extinct

At the moment, there are between six and seven thousand languages in the world. According to linguists, fifty percent of these are in danger of **becoming** extinct. The speed of language loss has accelerated over the past few decades because businesses that need to communicate with a range of people from other cultures **prefer** to employ more widely used languages, such as English, Chinese, or Spanish. This attitude is understandable, but it means that many local languages are dying out before anyone **has had** the opportunity to study them. According to linguists, some of these languages could reveal a great **deal** of useful information about language learning and cognitive development. In addition, a local language that has been built on the local culture contains words and phrases that express that culture; lose the language and you arguably may lose the culture, too. And finally, historians will **argue** that a language contains evidence of a region's history and should, for that reason alone, be preserved.

Options:

- 1) to become, became, of becoming, have become
 - 2) select, prefer, fancy, must
 - 3) would have, has had, have, having had
 - 4) size, deal, load, capacity
 - 5) speak, argue, explore, tell
- (APEUni Website / App FIBRW #6)

204. Honorary Degree

Victoria University of Wellington has conferred an honorary degree on a distinguished astrophysicist in a recent graduation ceremony. Professor Warrick Couch **received** the honorary degree of Doctor of Science for his remarkable contribution to our knowledge of galaxies and dark energy. Professor Couch is a distinguished astrophysicist who has **played** a crucial role in the discovery that the Universe is expanding at an accelerating rate, a finding which led to the lead scientists being awarded a Nobel Prize in Physics in 2011, which he attended in recognition of his contribution. In his research, Professor Couch uses large ground-based and spaced-based telescopes to observe galaxy clusters, **which** are the largest Structures in the Universe. He is also involved in a number of national and international committees overseeing the management of these telescopes. **In addition to** his own research activities, Professor Couch has worked to support young researchers and provide public comment on astronomy internationally.

Options:

- 1) was receiving, received, had received, is received
 - 2) led, played, done, found
 - 3) who, they, those, which
 - 4) As a result of, Instead of, In addition to, Regarding
- (APEUni Website / App FIBRW #1)

Multiple Choice (Multiple)

1. Sundial (Incomplete)

Points: In history sundial was used to measure the time. 'passage' is mentioned. It is not clear why some churches have sundials. People who were rich enough began to own waist watches, and portable sundials. Options: On some occasions sundials will move to another place to measure the time. (APEUni Website / App RMCM #124)

2. Dogs (Incomplete)

Points: A long text about the relation between dogs and owners. Previously dogs' personalities were thought to be stable. But research shows that dogs will be more and more like their owners, and if a dog's owner changes, the dog's behaviors will change. (APEUni Website / App RMCM #123)

3. Bicycle Ways (Incomplete)

Points: About building a highway or motorway for bicycles. (APEUni Website / App RMCM #122)

4. Gorilla Infection (Incomplete)

Points: About how ill gorillas have been infected by human interactions and the solutions towards the issue. (APEUni Website / App RMCM #121)

5. Turks and Caicos (Incomplete)

Points: The Turks and Caicos Islands are a multi-island archipelago at the southern tip of the Bahamas chain, approximately 550 miles south-east of Florida. The islands are an overseas territory' of the United Kingdom although they exercise a high degree of local political autonomy. The economy of the islands rests mainly on tourism, with some contribution from offshore banking and fishing. Primary schooling is divided into eight grades, with most pupils entering at the age of four years and leaving at twelve. After two kindergarten years, Grades 1–6 are covered by a graded curriculum in maths, language, and science that increases in difficulty as pupils get older. There is little repetition and pupils are expected to progress through primary school in their age cohorts. At the end of primary schooling, pupils sit an examination that serves to stream them in the secondary setting. Primary and secondary school enrolment is virtually universal. There are a total of ten government primary schools on the Islands. Of these, seven are large enough to organize pupils into single-grade classrooms. Pupils in these schools are generally grouped by age into mixed-ability' classes. The remaining three schools, because of their small pupil numbers, operate with multigrade groupings. They serve communities with small populations whose children cannot travel to a neighboring larger primary school. Pupils in these classes span up to three grade and age groups. As far as classroom organization is concerned, the multigrade and monograde classrooms are similar in terms of the number of pupils and the general seating arrangements, with pupils in rows facing the blackboard. There is no evidence that the multigrade teachers operate in a particularly resource-poor environment in the Turks and Caicos Island. This is in contrast to studies conducted in other developing country contexts. Question 1: In the last paragraph, what information can you have? Options: Multigrade and monograde have similar teaching resource; In this area multigrade is better than that in other countries. Question 2: According to the text, which of the following statements can be concluded about primary classes in the Turks and Caicos Islands? Options: Multigrade classes are mostly found in smaller schools; Most primary pupils are in mixed-ability classes.

(APEUni Website / App RMCM #105)

6. Children Care (Incomplete)

Points: 要点：关于child care。选项：government child care 更有效；（答案）带mother的选项。（答案）

(APEUni Website / App RMCM #91)

7. Optional Courses (Incomplete)

Points: 要点：关于美国的教育制度，提到secondary school和high school。本来提供很多课程是为了学生可以向自己喜欢的方向发展，结果学生只是和关系好的人选同一门或选容易的课程，使得课程设置原本的目的没有达到。选项：结果不如intended那样；（答案）学生可以自主选择课程。（答案）

(APEUni Website / App RMCM #90)

8. Jails (Incomplete)

Points: About prison with a lot of numbers, including the percentage of prisoners, what crimes they have been imprisoned for and how long they will be kept in.

(APEUni Website / App RMCM #88)

9. (Incomplete)

Points: 要点：关于新能源公交车electric buses, 提到两个公司，公司1占有市场份额的60%。government 购买这种bus to be environmentally friendly。选项：A: 政府为了环保购买这种bus；（答案）B: 公司1的 market share大于公司2；（答案）

(APEUni Website / App RMCM #87)

10. Pink Tube (Incomplete)

Points: A picture of a wild duck with the caption 'pink tube'. The duck has a pink tube circling on its ankle. One of the reasons why ducks are decreasing is that they enter fishing areas mistakenly and are caught by fishing nets. Question: Which of the following statements are true? Option: Pink tubes protect ducks from being caught by fishing nets.

(APEUni Website / App RMCM #85)

11. Zoo (Incomplete)

Points: 要点：关于把动物关在zoo里面供研究和参观，对动物有哪些负面影响。第二段说应该加入museum那样的声光技术和模拟技术让zoo更有意义。选项：Zoo is now like museum; Zoo should be more educational.

(APEUni Website / App RMCM #80)

12. ANZAC (Incomplete)

Points: ANZAC (Australian and New Zealand Army Corps) in the battle field of World War One in Gallipoli, Turkey. Options: ANZAC has profound impacts on modern Australians' values; (True) Soldiers threw grenades against those on the other side; (True, according to 'back and forth' in the first paragraph, because ANZAC was close enough to the target) Many people were used in the construction of defense works; 13,000 Turks died; (False) Those dead soldiers had come from other campaigns; (False) ANZAC invaded Turkey.(False)

(APEUni Website / App RMCM #74)

13. Everest (Incomplete)

Points: In the year 1852, a clerk rushed into the chamber of Sir Andrew Waugh, India's surveyor general,

and exclaimed that a Bengali computer named Radhanath Sikhdar, working out of the Survey's Calcutta bureau, had discovered the highest mountain in the world. In 1865, nine years after Sikhdar's computations had been confirmed, Waugh bestowed the name Mount Everest on Peak XV, in honor of Sir George Everest, his predecessor as surveyor general. As it happened, Tibetans who lived to the north of the great mountain already had a more mellifluous name for it, Jomolungma, which translates to "goddess, mother of the word," and Nepalis who resided to the south called the peak Sagarmatha, "goddess of the sky", But Waugh pointedly chose to ignore these native appellations (as well as official policy encouraging the retention of local or ancient names), and Everest was the name that stuck. 问题: 作者对这座山峰的命名持什么态度? 选项: Waugh不该以前辈的名字命名; (正确答案) 应该根据Tibet和Nepail起名; 应该起名为Nepail因为坐落在Nepail; 不该起名为Everest; (正确答案) 应该保持Peak XV。(APEUni Website / App RMCM #72)

14. History of Sleep

Original:

September 2, 1752, was a great day in the history of sleep. That Wednesday evening, millions of British subjects in England and the colonies went peacefully to sleep and did not wake up until twelve days later. Behind this feat of narcoleptic prowess was not some revolutionary hypnotic technique or miraculous pharmaceutical discovered in the West Indies. It was, rather, the British Calendar Act of 1751, which declared the day after Wednesday 2nd to be Thursday 14th. Prior to that cataleptic September evening, the official British calendar differed from that of continental Europe by eleven days—that is, September 2 in London was September 13 in Paris, Lisbon, and Berlin. The discrepancy had sprung from Britain's continued use of the Julian calendar, which had also been the official calendar of Europe from its invention by Julius Caesar (after whom it was named) in 45 B.C. until the decree of Pope Gregory XIII in 1582. Caesar's calendar, which consisted of eleven months of 30 or 31 days and a 28-day February (extended to 29 days every fourth year), was actually quite accurate: it erred from the real solar calendar by only 11.5 minutes a year. After centuries, though, even a small inaccuracy like this adds up. By the sixteenth century, it had put the Julian calendar behind the solar one by 10 days. In Europe, in 1582, Pope Gregory XIII ordered the advancement of the Julian calendar by 10 days and introduced a new corrective device to curb further error: century years such as 1700 or 1800 would no longer be counted as leap years, unless they were (like 1600 or 2000) divisible by 400.

Question:

What factors were involved in the disparity between the calendars of Britain and Europe in the 17th century?

Options:

- A) the provisions of the British Calendar Act of 1751
- B) Britain's continued use of the Julian calendar
- C) the accrual of very minor differences between the calendar used in Britain and real solar events
- D) the failure to include years divisible by four as leap years
- E) the decree of Pope Gregory XIII
- F) revolutionary ideas which had emerged from the West Indies
- G) Britain's use of a calendar consisting of twelve months rather than eleven

Answer:

B, C, E

(APEUni Website / App RMCM #52)

15. Decision

Original:

By the laws of probability, most decisions made under pressure should be flawed ones, yet psychologists have found that people routinely make correct judgments most of the time, even with limited information. One of Gladwell's surprising points is that we can actually learn how to make better snap judgments, in the same way that we can learn logical, deliberative thinking. But first we have to accept the idea that thinking long and hard about something does not always deliver us better results, and that the brain actually evolved to make us think on our feet.

Question:

Which of the following does the passage tell us about decision making?

Options:

- A) The brain is designed to enable quick decision making.
- B) Quick decision making can be improved.
- C) Quick decision making routinely leads to error.
- D) To make correct decisions we require all relevant information.
- E) Thinking things through thoroughly will lead to greater success.

Answer:

A, B

(APEUni Website / App RMCM #50)

Re-order Paragraphs

1. Learning in Childhood (Incomplete)

Points: Sentence 1: Children learn how to read and write in childhood. Sentence 2: ... 5 years they learn to ... Sentence 3: At the age of 5 ... Sentence 4: ... they start understanding logos ...

(APEUni Website / App RO #558)

2. Temperature Measurement (Incomplete)

Points: Four sentences about temperature rising. In 1980 ... was used to measure temperature. Earlier than the invention of thermometer, ... was used to measure temperature.

(APEUni Website / App RO #557)

3. Meerkats

Correct Order:

- 1) Meerkats, a small group-living mongooses in southern Africa, have been so extensively studied and filmed that we can follow individuals through their lives like characters in an animal soap opera.
- 2) The Kalahari Desert meerkats, *Suricata Suricata*, have been followed over generations.
- 3) They are so habituated to humans that they will climb on and off weighing scales when a scientist wants to weigh an animal.
- 4) It is remarkable that behavior, which at one time could only be observed by dedicated field workers, is now readily available for all of us to see.

(APEUni Website / App RO #556)

4. Leaf Structure

Correct Order:

- 1) The natural structure found within leaves could improve the performance of everything from rechargeable batteries to high-performance gas sensors, according to an international team of scientists.
- 2) The researchers have designed a porous material that utilises a vascular structure, such as that found in the veins of a leaf, and could make energy transfers more efficient.
- 3) The material could improve the performance of rechargeable batteries, optimising the charge and discharge process and relieving stresses within the battery electrodes, which, at the moment, limit their life span.
- 4) The same material could be used for high performance gas sensing or for catalysis to break down organic pollutants in water.

(APEUni Website / App RO #555)

5. Takeaway Meals

Correct Order:

- 1) Over time, fashion and people's tastes change.
- 2) Such changes affect the demand for products and services.
- 3) Changes in work patterns tend to mean that fewer families sit down in the evening for a traditionally produced family meal, often because a lack of time.
- 4) Consequently, people are now more likely to buy takeaway meals or convenience food, as opposed to ingredients for meals that take time to prepare.
- 5) In contrast, people now tend to spend more time shopping and are therefore more likely to spend time relaxing in a coffee shop or restaurant while on a shopping trip.

(APEUni Website / App RO #554)

6. Locomotion

Correct Order:

- 1) Researchers need to understand why different forms of locomotion evolved.
- 2) Long-held assumptions, such as the need for energy efficiency, have already been overturned.
- 3) For example, a mechanical ankle brace can improve the metabolic efficiency of human walking, implying that walking is inefficient.
- 4) But variation of movement is important, too: such an ankle brace holds you back if you try to skip, gallop or skitter.
- 5) Similarly, legged robots struggle to deploy different gaits, just as roboticists struggle to enumerate them.

(APEUni Website / App RO #549)

7. Mandarin

Correct Order:

- 1) Mandarin is the most common language in the world as it is the official language of Mainland China, Taiwan, and one of the official languages of Singapore.
- 2) Thus, Mandarin is commonly referred to as 'Chinese'.
- 3) But in fact, it is just one of many Chinese languages.
- 4) Depending on the region, Chinese people also speak Wu, Hunanese, Jiangxinese, Hakka, Min, and many other languages.
- 5) Even in one province, there can be multiple languages spoken. For example, in Fujian province, you can hear Min, Fuzhounese, and Mandarin being spoken, each being very distinct from the other.

(APEUni Website / App RO #496)

8. St. Johns River

Correct Order:

- 1) The St. Johns River is the longest river in Florida, running up the eastern coast of the state from St. Johns Marsh to the Atlantic Ocean.
- 2) The earliest people to live along the river were likely the hunter-gatherers known as Paleo-Indians, who inhabited the Florida Peninsula over 10,000 years ago.
- 3) It was Spanish missionaries who later established a mission at the mouth of the river.
- 4) The mission was named San Juan del Puerto (St. John of the Harbor), giving the river its name.

(APEUni Website / App RO #495)

9. Mining Company

Correct Order:

- 1) In 1844 the Mendip Hills Mining Company began work in the Charterhouse area.
- 2) The company employed Cornish miners with experience and expertise of working deep tin mines.
- 3) Initially, the aim was to exploit the ore at depth, which previous miners could not reach.
- 4) Four deep shafts were sunk, up to 108m deep.

(APEUni Website / App RO #415)

10. Plato

Correct Order:

- 1) Although usually remembered today as a philosopher, Plato was also one of ancient Greece's most important patrons of mathematics.
- 2) Inspired by Pythagoras, he founded his Academy in Athens in 387 BC, where he stressed mathematics as a way of understanding more about reality.

- 3) In particular, he was convinced that geometry was the key to unlocking the secrets of the universe.
 - 4) The sign above the Academy entrance read: 'Let no-one ignorant of geometry enter here'.
- (APEUni Website / App RO #414)

11. Answering Question

Correct Order:

- 1) You must take account of how many marks are available for each part when you answer it.
 - 2) Even if you think you can write more, don't spend 15 minutes answering a part worth only 5 marks. Leave space at the end of your answer and come back to it if you have time to spare later.
 - 3) And if you can't think of an answer to some part, leave a space and move on to the next part.
 - 4) Don't write about something else if you don't know the correct answer — this is just a waste of your valuable time (and the examiner's).
- (APEUni Website / App RO #407)

12. Antarctic Ice

Correct Order:

- 1) Scientists have known for over a decade that the West Antarctic Ice Sheet has been losing mass and contributing to sea level rise.
 - 2) Its eastern neighbor is, however, ten times larger and has the potential to raise the global sea level by some 50 meters.
 - 3) Despite its huge size and importance, conflicting results have been published on the recent behavior of the East Antarctic Ice Sheet.
 - 4) A study led by a group of NASA scientists, that was published in 2015, suggested that this part of Antarctica was gaining so much mass that it compensated for the losses in the west.
- (APEUni Website / App RO #392)

13. Poincaré

Correct Order:

- 1) Poincaré had an especially interesting view of scientific induction.
 - 2) Laws, he said, are not direct generalizations of experience; they aren't mere summaries of the points on the graph.
 - 3) Rather, the scientist declares the law to be some interpolated curve that is more or less smooth and so will miss some of those points.
 - 4) Thus a scientific theory is not directly falsifiable by the data of experience; instead, the falsification process is more indirect.
- (APEUni Website / App RO #377)

14. Sun Light (Incomplete)

Points: Sentence 1. The sun ... light Sentence 2. It provides for plants ... Sentence 3. Trees use this sunlight chemical energy ... Sentence 4. This energy ...

(APEUni Website / App RO #391)

15. Sun and Plants (Incomplete)

Points: Sentence 1. The sun ... light ... Sentence 2. It provides ... for plants ... Sentence 3. Trees use this sunlight ... chemical energy ... Sentence 4. This energy ...

(APEUni Website / App RO #390)

16. Huawei Program (Incomplete)

Points: Sentence 1. Huawei offers college students a certification program. Sentence 2. The program includes various training. Sentence 3. The program exempts students from exam fees. Sentence 4. The fee for the program used to be 200 or 500 dollars each student.

(APEUni Website / App RO #389)

17. Women Force (Incomplete)

Points: Sentence 1: During wars, women have to go to work. Sentence 2: Women earn less a half of what men earn. Sentence 3: Women do not have the same physical strength as men have. Sentence 4: But men stress on their own contribution when men will come back after wars.

(APEUni Website / App RO #386)

18. Playwrights

Correct Order:

- 1) Playwrights come to their craft with different aesthetic sensibilities.
- 2) They create recognizable worlds with troubling relevance to human behavior and social themes.
- 3) Others dismiss the “illusion of the real” to engage us in political arguments or absurdist metaphors.
- 4) Thornton Wilder and Tennessee Williams, on the one hand, and Bertolt Brecht and Samuel Beckett, on the other, are playwrights with very different approaches to empathy and aesthetic distance.
- 5) However, these writers have in common their means of artistic expression — the play.

(APEUni Website / App RO #384)

19. English Agricultural Revolution

Correct Order:

- 1) Historians are now agreed that beginning in the 17th century and continuing throughout the 18th century, England witnessed an agricultural revolution.
- 2) English (and Dutch) farmers were the most productive farmers of the century and were continually adopting new methods of farming and experimenting with new types of vegetables and grains.
- 3) They also learned a great deal about manure and other fertilizers.
- 4) In other words, many English farmers were treating farming as a science, and all this interest eventually resulted in greater yields.

(APEUni Website / App RO #379)

20. Big Five

Correct Order:

- 1) Some psychologists believe that independent, peer-reviewed research in the decades since the MBTI was devised has provided something better than Myers-Briggs.
- 2) They champion the notion of the “Big Five” personality traits — openness, conscientiousness, extroversion, agreeableness and neuroticism.
- 3) Of these, only one trait is closely shared with the MBTI — extroversion.
- 4) Myers-Briggs does not focus on “neuroticism” or, indeed, any similarly negative trait, which may point to one of the reasons why the criticisms lobbed at the test by modern science have yet to undermine its popularity.
- 5) As Adam Grant says, ‘Going around telling people that they’re neurotic and disagreeable will not win you any friends.’

(APEUni Website / App RO #378)

21. First Publication

Correct Order:

- 1) To celebrate his first publication, Frost had a book of six poems privately printed; two copies of *Twilight* were made—one for himself and one for his fiancée.
 - 2) Over the next eight years, however, he succeeded in having only 13 more poems published.
 - 3) During this time, Frost sporadically attended Dartmouth and Harvard and earned a living teaching school and, later, working a farm in Derry, New Hampshire.
 - 4) But in 1912, discouraged by American magazines' constant rejection of his work, he took his family to England, where he found more professional success.
- (APEUni Website / App RO #376)

22. Photogrammetry

Correct Order:

- 1) Photogrammetry involves taking hundreds of photos of an object at slightly different angles and 'stitching' them together to create an interactive digital 3D model.
 - 2) The process is already being used by the University of Aberdeen's anatomy department to create digital models of organs and other body parts to aid teaching and learning for young doctors.
 - 3) Now the same technology is being used to create virtual replicas of artifacts within the University's museum's collections, including an ancient Egyptian mummified cat, prehistoric skulls and ancient Greek pottery.
 - 4) These artifacts are rarely handled as they are so fragile.
 - 5) Photogrammetry lets the public and students get to see them close-up and in very high detail.
- (APEUni Website / App RO #374)

23. Arctic Environment

Correct Order:

- 1) With the Arctic the fastest-warming region on the planet, climate change is already altering key components of the Arctic environment.
 - 2) Some of the clearest signs of change are the thinning and retreat of sea ice and the migration of species into the Arctic that normally live at lower latitudes.
 - 3) The response of the Arctic to climate change will have an unprecedented impact on how the Arctic ecosystem operates.
 - 4) This is likely to affect the UK's climate and economy, with anticipated impacts on industries like tourism and fisheries.
- (APEUni Website / App RO #371)

24. History

Correct Order:

- 1) The people and events of the past can only be understood when viewed within the larger context in which they existed.
 - 2) That is not possible when historical events or topics are isolated and extracted from the web of historic time to serve some other curricular purpose.
 - 3) The value of history also depends upon the chronological presentation of events through time.
 - 4) It is only through a chronological survey that students can begin to understand the process of social and cultural change, which is one of the principal purposes of history.
- (APEUni Website / App RO #370)

25. Taste and Toxin (Incomplete)

Points: Sentence 1: There are many studies about human's taste and smell... Sentence 2: One of them ... research institute ... someone name ... to study whether human can taste toxin ... Sentence 3: ... how to

do an experiment... Sentence 4: ... suggest that humans can taste.

(APEUni Website / App RO #363)

26. Research Report

Correct Order:

- 1) So now that you've completed the research project, what do you do?
- 2) I know you won't want to hear this, but your work is still far from done.
- 3) In fact, this final stage — writing up your research — may be one of the most difficult.
- 4) Developing a good, effective and concise report is an art form in itself.
- 5) And, in many research projects you will need to write multiple reports that present the results at different levels of detail for different audiences.

(APEUni Website / App RO #361)

27. LiDARs

Correct Order:

- 1) Cameras help autonomous vehicles read street signs and the color of traffic lights.
- 2) But LiDARs, aka light detection and ranging systems, do the important work of sensing and helping cars avoid obstacles, whether that's a fallen tree, a drunk driver, or a child running out into the road.
- 3) Now, a startup called Luminar Technologies Inc., is unveiling a high-resolution LiDAR sensor that was five years in the making.
- 4) The startup, which has raised \$36 million in seed-stage funding so far, built its LiDAR systems from scratch.

(APEUni Website / App RO #309)

28. Echolocation

Correct Order:

- 1) Vision and echolocation have many features in common.
- 2) One narrow range of radiation — light in the case of vision, ultrasounds in the case of echolocation — provides information relevant to a wide variety of cognitive and practical goals.
- 3) Why, then, is vision so common and echolocation so rare?
- 4) Because, in most environments, vision is much more effective.
- 5) Echolocation is adaptive only in an ecological niche where vision is impossible or badly impaired—for instance, when dwelling in caves and hunting at night, as bats do.

(APEUni Website / App RO #308)

29. Noise and Study

Correct Order:

- 1) Some students say that they need complete quiet to read and study.
- 2) Others study best in crowded, noisy rooms because the noise actually helps them concentrate.
- 3) The point is, you should know the level of noise that is optimal for your own studying.
- 4) However, one general rule for all students is that the television seems to be more of a distraction than music or other background noise, so leave the TV off when you are reading or studying. Also, don't let yourself distracted by computer games, email, or internet surfing.

(APEUni Website / App RO #307)

30. Oasis (Incomplete)

Points: Oasis formed naturally in dessert with definition of air zap(?) or purifier. Rain makes it fall and wells are formed. Other type is man-made. A long sentence explains about wells made by it.

(APEUni Website / App RO #274)

31. An Important Measuring (一个重要的方法)

Correct Order:

- 1) A review is a survey of what you have covered.
- 2) It is a review of what you are supposed to accomplish not what you are going to do.
- 3) Rereading is an important part of the review process.
- 4) Reread with the idea that you are measuring what you have gained from the process.

(APEUni Website / App RO #297)

32. Tourism (Incomplete)

Points: Sentence1: Tourism is luxury and ... way ... Sentence2: In this way ... leisure ... Sentence3: The transportation ... both cheap price, time ... Sentence4: .Until recently, ... both low prices, time ... , people can travel conveniently. (The sequence is unconfirmed.)

(APEUni Website / App RO #286)

33. Selective Books (认真挑选的书籍)

Correct Order:

- 1) History is selective.
- 2) What history books tell us about the past is not everything that happened, but what historians have selected.
- 3) They cannot put in everything: choices have to be made.
- 4) Choices must similarly be made about which aspects of the past should be formally taught to the next generation in the shape of school history lessons.

(APEUni Website / App RO #281)

34. Far From Content (远离无用内容)

Correct Order:

- 1) Your first draft is complete, but your paper is far from finished.
- 2) The next step is to revise your paper: strengthen the content.
- 3) Start this at least a week before your paper is due.
- 4) In fact, you don't need to wait until you have a complete first draft to start revising.

(APEUni Website / App RO #278)

35. Sydney (Incomplete)

Points: About how architecture of those buildings affect Sydney...

(APEUni Website / App RO #275)

36. Panda (熊猫)

Correct Order:

- 1) People didn't know pandas well.
- 2) Now, people can attach a GPS to them.
- 3) This GPS can transmit data every couple of hours for up to two years.
- 4) Then it is found five pandas' habitats sometimes overlap.

(APEUni Website / App RO #184)

37. Green Areas (Incomplete)

Points: 1. Definition of Green Areas 2. These areas are good places of working meeting. 3. However,

mobile phone is not suitable there. 4. Mobile phone usages in (regulations of phone usage are mentioned)

(APEUni Website / App RO #269)

38. Client Management (Incomplete)

Points: You may have heard about a client management system that can collaborate clients' data. If we have such a system... Now we have this system... This system can benefit... Once you have this system, even those people who don't understand management can use it well.

(APEUni Website / App RO #265)

39. 2100–2013

Correct Order:

- 1) By 2100, human-induced climate change threatens to raise temperatures by 2–4°C and push up tide-lines by 4–6m.
- 2) The government has promised to help counter this global trend by reducing UK carbon emissions by 80 percent from 1990 levels by 2050.
- 3) And with the second largest tidal range in the world, British marine energy could play an important role in this shift.
- 4) But harnessing the power of the tides is not without consequence.
- 5) In 2013, plans to construct a 34 billion pounds barrage across the Severn estuary were rejected after concerns were raised about its effect on local ecosystems.

(APEUni Website / App RO #263)

40. Child Temptation (孩子的诱惑)

Correct Order:

- 1) A four-to-six-year-old child sits alone in a room at a table facing a marshmallow on a plate.
- 2) The child is told: if you don't eat this treat for 15 minutes you can have both this one and a second one.
- 3) Kids on average wait for five or six minutes before eating the marshmallow.
- 4) The longer a child can resist the temptation has been correlated with higher general competency later in life.

(APEUni Website / App RO #259)

41. Essential Skill (必要技能)

Correct Order:

- 1) Many of us happily drive a car without understanding what goes on under the bonnet.
- 2) So is it necessary for children to learn how to program computers?
- 3) After all, some experts say coding is one of the human skills that will become obsolete as artificial intelligence grows.
- 4) Nevertheless, governments believe coding is an essential skill.

(APEUni Website / App RO #255)

42. Children's Clothes (儿童服装)

Correct Order:

- 1) During the past few years, some of the world's biggest names in high-end fashion have begun to see children's clothes as a promising sideline with which to extract more value from their main business.
- 2) For example, Jean Paul Gaultier, Chloe and John Galliano have all launched children's clothes lines.
- 3) But for France's Bonpoint, making kids' clothing is the main business.

4) Since Bonpoint was founded 40 years ago by clothes store owner Marie–France and Bernard Cohen, children and babies have been at the centre of the brand’s development.

(APEUni Website / App RO #254)

43. Advertising (Incomplete)

Points: Sentence 1: Advertising is introducing goods and ... and is sponsored by identical companies.

Sentence 2: This allows companies to present their products in a less costly way to lots of people

(something like that) that are channel members. Sentence 3: ... (something about advertising on TV)

marketers also find a less costly way for advertisement is digital media such as social media. Sentence

4: Marketers also consider other media: cinema, station.

(APEUni Website / App RO #253)

44. Deaf School (Incomplete)

Points: To be completed..

(APEUni Website / App RO #251)

45. O’Keeffe

Correct Order:

1) O’Keeffe never formally recorded her theories about art.

2) She did, however, leave a long trail of interviews and letters that reveal how she approached her painting practice—and the rituals, experiences, and environments that inspired her.

3) Correspondence with her husband, photographer Alfred Stieglitz, in particular, offers a raw, honest glimpse into O’Keeffe’s creative mind.

4) The two exchanged 25,000 pages of letters between 1915 and 1946, during which time she found her voice as an artist: first, through her flower paintings, and later, through landscapes and surrealistic still lifes inspired by her mountainous, skull–studded surroundings in New Mexico.

(APEUni Website / App RO #250)

46. Mobile Phone (手机)

Correct Order:

1) Bitcoin is an online money.

2) That’s to say you need to download mobile phone app to use such money.

3) With above done it generates a bitcoin address.

4) This address can only be used once.

(APEUni Website / App RO #248)

47. Tree Roots (Incomplete)

Points: 关于树根，有一个过程能产生一种蛋白质，介绍这种蛋白质，这个过程能帮植物应对极端条件，通过这些能挑选出抗干旱的植物。 1) tree roots /a process/ a protein 2) the/this protein 3) this

process/extreme condition 4) drought

(APEUni Website / App RO #247)

48. Actors' Performance

Correct Order:

1) In a wonderful set of studies and subsequent book, Elly A. Konijn looked to the question of how much actors are aware of their performance as they perform it, and how much they let the character 'take over'.

2) She asked Dutch actors to rate their own emotions and the emotions of the characters they were

playing across a range of affective states (from disgust and anxiety to tenderness and pleasure).

3) She found that positive emotions were often felt by the actors as they played those character's emotions.

4) However, the more negative the emotion of the character, the less likely the actor would report feeling that emotion onstage

(APEUni Website / App RO #244)

49. Understanding Differences (了解差异)

Correct Order:

1) Around 1 billion people depend on water resources originating from the Hindu–Kush Karakoram Himalayan region, attributable to both rainfall and melting of snow and ice.

2) The wind in the valleys in the region plays an important role in transporting clouds and moisture and redistributing snow in the valleys, and so understanding what drives this wind is crucial.

3) Around the world, wind in valleys generally travels up the valley, and up the sides of mountains, during the day.

4) This is often driven by differences in pressure caused by the slopes of the mountains and the shape of the valleys.

(APEUni Website / App RO #238)

50. Sea Turtles

Correct Order:

1) The bony shell of a sea turtle can actually sense when something touches it.

2) A series of thin nerves run along the shell and detect pressure changes associated with touch.

3) The nerves do not contain pain receptors so scientists do not think sea turtles feel pain when touched on the shell, but these thin nerves could transmit information to other parts of the sea turtle's body.

4) In addition, researchers and scuba divers have observed sea turtles respond to the stimulation of being touched on the skin of their head and their flippers.

(APEUni Website / App RO #237)

51. Brain Function

Correct Order:

1) The brain is our most treasured possession.

2) It coordinates our movements, our words, our relationships, and the ability to pass on our genes.

3) Our body therefore protects the organ fiercely: The central nervous system polices particles traveling through the bloodstream and invites only the safest into our cognitive chamber.

4) This selective process occurs due to a proactive boundary known as the blood–brain barrier.

5) The barrier serves a vital role, but is also poses a tremendous challenge for scientists developing drugs to treat brain–based disorders.

(APEUni Website / App RO #236)

52. DRM

Correct Order:

1) Due to its ability to solve all main problems associated with digital goods, Digital Rights Management is the favorite option used by companies to tackle piracy.

2) The aim of this article is to discuss the consequences of DRM for consumers, firms and society.

3) The rationales of DRM are discussed and the expected benefits for firms are presented.

4) In contrast, consumers are shown to be likely to see few benefits in DRM.

5) The article concludes with some public policy recommendations.

(APEUni Website / App RO #235)

53. Mink

Correct Order:

- 1) The American mink has been present in Iceland since the 1930's and despite heavy hunting since 1939 the species has become well established.
- 2) The ecosystem in Iceland is simpler than in other areas where mink are found; the only other mammalian predator is the arctic fox.
- 3) Direct competition between these species appears to be minimal although the arctic fox will sometimes chase mink and disturb them while foraging.
- 4) Iceland is therefore an ideal place to study undisturbed feeding behaviour and ecology of mink.

(APEUni Website / App RO #234)

54. Soda Water (苏打水)

Correct Order:

- 1) Sherbet powder is a mix of baking soda and citric acid.
- 2) When it is mixed with water in your mouth, an endothermic reaction occurs, taking heat energy from your mouth and making it feel cooler.
- 3) This process is endothermic—taking heat energy from the surroundings and cooling the injured part of your body.
- 4) In this way, the cold pack acts as an ice pack.

(APEUni Website / App RO #225)

55. Superpower (Incomplete)

Points: 1)The 'superpower' has international text, which means having control on resources and ... political power 2) It's including 3) In terms of "green superpower", 4) In addition to the green energy superpower, companies should meet above global average ... emissions and .

(APEUni Website / App RO #213)

56. Turkey (土耳其)

Correct Order:

- 1) If you want to visit Mars, visit Turkey.
- 2) That's where you'll find lakes so salty that the only bugs able to live there are species that could probably survive on Mars as well.
- 3) For that reason, microbiologists in Turkey have surveyed the array of species that inhabit the Acigol, Salda and Yarisli lakes.
- 4) They're hopeful that studying some of them will yield useful insights into the kinds of biology that could help microbes exist on Mars or other potentially habitable planets and moons.

(APEUni Website / App RO #222)

57. Predators (捕食者)

Correct Order:

- 1) Australia's native plants and animals adapted to life on an isolated continent over millions of years.
- 2) Since European settlement they have had to compete with a range of introduced animals for habitat, food and shelter.
- 3) Some have also had to face new predators.
- 4) These new pressures have also caused a major impact on our country's soil and waterways and on its native plants and animals.

(APEUni Website / App RO #199)

58. Children's Verbal Skills

Correct Order:

- 1) Many young children are inexperienced in dealing with emotional upheaval.
- 2) As a result, they lack the coping strategies that many adults have.
- 3) In particular, they lack the verbal skills to express their emotions and to effectively communicate their need for emotional support.
- 4) The frustration of not being able to effectively communicate may manifest itself in alternative behaviors.
- 5) Moreover, such behaviours may risk developing behavioural, social and emotional problems.

(APEUni Website / App RO #193)

59. Unprecedented

Correct Order:

- 1) We live in an age of unprecedented opportunity: with ambition, drive, and talent, you can rise to the top of your chosen profession regardless of where you started out.
- 2) But with opportunity comes responsibility!
- 3) Companies today aren't managing their knowledge of workers' careers.
- 4) Instead, you must be your own chief executive officer.
- 5) That means it's up to you to carve out your place in the world and know when to change course.

(APEUni Website / App RO #192)

60. World Feeding

Correct Order:

- 1) We'll likely have two billion more mouths to feed by mid-century —more than nine billion people.
- 2) But sheer population growth isn't the only reason we'll need more food.
- 3) The spread of prosperity across the world, especially in China and India, is driving an increased demand for meat, eggs, and dairy, boosting pressure to grow more corn and soybeans to feed more cattle, pigs, and chickens.
- 4) If these trends continue, the double whammy of population growth and richer diets will require us to roughly double the amount of crops we grow by 2050.

(APEUni Website / App RO #189)

61. Two-and-a-half (2.5升空气)

Correct Order:

- 1) To gauge optimism and pessimism, the researchers set up an experiment involving 22 calves.
- 2) Before they started the experiment, they trained the calves to understand which of their choices would lead to a reward.
- 3) In the training, each calf entered a small pen and found a wall with five holes arranged in a horizontal line, two-and-a-half feet apart.
- 4) The hole at one end contained milk from a bottle, while the hole at the opposite end contained only an empty bottle and delivered a puff of air in calves' faces.
- 5) The calves learned quickly which side of the pen held the milk reward.

(APEUni Website / App RO #188)

62. EU Fishing

Correct Order:

- 1) The European Union has two big fish problems.
 - 2) One is that, partly as a result of its failure to manage them properly, its own fisheries can no longer meet European demand.
 - 3) The other is that its governments won't confront their fishing lobbies and decommission all the surplus boats.
 - 4) The EU has tried to solve both problems by sending its fishermen to West Africa. Since 1979 it has struck agreements with the government of Senegal, granting our fleets access to its waters.
 - 5) As a result, Senegal's marine ecosystem has started to go the same way as ours.
- (APEUni Website / App RO #177)

63. Hip Pop

Correct Order:

- 1) Hip hop emerged as a reaction to the gang culture and violence of the South Bronx in the 1970s, and daily experiences of poverty, racism, exclusion, crime, violence, and neglect.
 - 2) It necessarily embodies and values resilience, understanding, community and social justice.
 - 3) Without these, Hip Hop culture would never have been, and it is because these values remain at its core that Hip Hop is such a powerful agent of positive social change around the world.
 - 4) Yet, the hip hop project is not yet free from these difficult circumstances.
- (APEUni Website / App RO #157)

64. Montana Two Ways (两条路)

Correct Order:

- 1) In Montana as elsewhere, companies that have acquired older mines respond to demands to pay for cleanup in either of two ways.
 - 2) Especially if the company is small, its owners may declare the company bankrupt, in some cases conceal its assets, and transfer their business efforts to other companies or to new companies that do not bear responsibility for cleanup at the old mine.
 - 3) If the company is so large that it cannot claim that it would be bankrupted by cleanup costs (as in the case of ARCO that I shall discuss below), the company instead denies its responsibility or else seeks to minimize the costs.
 - 4) In either case, either the mine site and areas downstream of it remain toxic, thereby endangering people, or else the U.S. federal government and the Montana state government (hence ultimately all taxpayers) pay for the cleanup through the federal Superfund and a corresponding Montana state fund.
- (APEUni Website / App RO #202)

65. Protein (蛋白质)

Correct Order:

- 1) Fibers suitable for clothing have been made for the first time from the wheat protein gluten.
 - 2) The fibers are as strong and soft as wool and silk.
 - 3) But they are up to 30 times cheaper.
 - 4) Narendra Reddy and Yiqi Yang, who produced the fibers at the University of Nebraska in Lincoln, say that because they are biodegradable they might be used in biomedical applications such as surgical sutures.
- (APEUni Website / App RO #197)

66. Birds (鸟类是好是坏)

Correct Order:

- 1) According to experts, feeding birds is probably the most common way in which people interact with

wild animals today.

2) More than 50 million Americans engage in the practice, collectively undertaking an unwitting experiment on a vast scale.

3) Is what we're doing good or bad for birds?

4) Recently, researchers at the Cornell Lab of Ornithology sought to answer this question, analyzing nearly three decades' worth of data from a winter-long survey called Project Feeder Watch.

5) Preliminary results suggest the species visiting our feeders the most are faring exceptionally well in an age when one-third of the continent's birds need urgent conservation.

(APEUni Website / App RO #214)

67. Results Measurement (Incomplete)

Points: Psychologists measure results in terms of validity and reliability. Validity is defined as ... For example, when a survey is asking about someone's personality, it shouldn't ask him chemistry questions. Meanwhile, a survey also values reliability.

(APEUni Website / App RO #191)

68. Four Rock Planets (四颗星球)

Correct Order:

1) For more than 30 years, the prevailing view of the formation of our moon has been the "giant impact hypothesis".

2) The precursors to the current four rock planets — Mercury, Venus, Earth and Mars — appear to have been dozens of smaller bodies known as "planetary embryos".

3) According to the giant impact hypothesis, our moon formed as the result of the last of a series of "giant impact" mergers between planetary embryos that eventually formed the Earth.

4) In this last collision, one embryo was nearly Earth-sized and the other approximately Mars-sized.

(APEUni Website / App RO #176)

69. TV Program (电视节目)

Correct Order:

1) Recycling electronic waste such as old computers, TVs, and monitors is a daunting challenge considering how much technology we all use today.

2) The challenge didn't deter IU students, who persuaded the IT Services department to launch its Electronic Waste Collection Days program.

3) On numerous dates throughout the year, students, faculty, and staff can drop off their old equipment to be completely recycled nothing ends up in a landfill.

4) Collection days netted more than 650,000 pounds of waste in 2010.

(APEUni Website / App RO #175)

70. Voice above 5mhz

Correct Order:

1) Previous studies have shown that humans are unable to recognize melodies whose notes have a fundamental tone above 5 kilohertz.

2) It was thought that, at frequencies this high, the rapidly cycling sound wave was too fast for the auditory nerve to cope with.

3) To test this theory, Andrew Oxenham and his colleagues at the University of Minnesota in Minneapolis asked a group of six students whether two four-note melodies were identical or not.

4) As in previous studies, the volunteers could not recognize melodies with fundamental tones above 5 kHz.

(APEUni Website / App RO #187)

71. Copernicus

Correct Order:

- 1) Copernicus probably hit upon his main idea sometime between 1508 and 1514.
- 2) For years, however, he delayed publication of his controversial work, which contradicted all the authorities of the time.
- 3) The historic book that contains the final version of his theory, *De revolutionibus orbium coelestium libri vi* ("Six Books Concerning the Revolutions of the Heavenly Orbs"), did not appear in print until 1543, the year of his death.
- 4) According to legend, Copernicus received a copy as he was dying, on May 24, 1543.

(APEUni Website / App RO #79)

72. Palaus

Correct Order:

- 1) Palaus and his colleagues wanted to see if any trends had emerged from the research to date concerning how video games affect the structure and activity of our brains.
- 2) They collected the results from 116 scientific studies, 22 of which looked at structural changes in the brain and 100 of which looked at changes in brain functionality and or behavior.
- 3) The studies show that playing video games can change how our brains perform, and even their structure.
- 4) For example, playing video games affects our attention, and some studies found that gamers show improvements in several types of attention, such as sustained attention or selective attention.

(APEUni Website / App RO #156)

73. New Ventures

Correct Order:

- 1) New Ventures is a program that helps entrepreneurs in some of the world's most dynamic, emerging economies— Brazil, China, Colombia, India, Indonesia and Mexico.
- 2) We have facilitated more than \$203 million in investment, and worked with 250 innovative businesses whose goods and services produce clear, measurable environmental benefits, such as clean energy, efficient water use, and sustainable agriculture.
- 3) Often they also address the challenges experienced by the world's poor.
- 4) For example, one of the companies we work with in China, called Ecostar, refurbishes copy machines from the United States and re-sells or leases them for 20 percent less than a branded photocopier.

(APEUni Website / App RO #152)

74. Easier Said than Done

Correct Order:

- 1) In 'Easier Said than Done', we set out some of the reasons why we might find it hard to live in a healthy way, exercising, eating well, getting adequate sleep, and checking for early warning symptoms.
- 2) Perhaps most importantly, we look to the field of behavioral science for strategies that people can use to overcome those hurdles and to initiate lifestyle changes.
- 3) These include Commitment devices, where we make it very unattractive to not follow through on an intention.
- 4) Changing existing behavior can be a difficult task, but with the help of these strategies new behaviors can become habitual, facilitating a long-term sustained healthy lifestyle

(APEUni Website / App RO #147)

75. Country's Most Elite (最精英的国家)

Correct Order:

- 1) England's most selective universities must do more to attract teenagers from disadvantaged backgrounds if they want to charge higher tuition fees, the country's fair access watchdog has warned.
 - 2) Professor Les Ebdon, director of Fair Access to Higher Education, has said universities can no longer make excuses about the number of poorer students they take on.
 - 3) In a statement issued yesterday, Prof Ebdon dismissed the argument from the country's most selective universities, which claim that young people from poorer backgrounds generally secure worse grades.
 - 4) Such defenses from the country's most elite universities "do not hold water", Prof Ebdon said, as he urged the institutions to do more to widen their intakes.
- (APEUni Website / App RO #143)

76. The Light Bulb (电灯泡)

Correct Order:

- 1) In 1997 Lisa McKeon, a physical scientist with the United States Geological Survey who works in the park, came across a pair of historic photographs depicting the glaciers she studies.
 - 2) Over the years, countless photos of the majestic park have been snapped, and many of those have become part of the park's official archive, spanning over a century.
 - 3) It was a light bulb moment: Why not use the old photos to create a timeline of the morphing glaciers, and add new photos every year?
 - 4) The Repeat Photography Project was born.
- (APEUni Website / App RO #138)

77. Sun's Radiation

Correct Order:

- 1) About 70 percent of the Sun's energy passes through the atmosphere and strikes Earth's surface.
 - 2) This radiation heats the surface of the land and ocean, and these surfaces then reradiate infrared radiation back into space.
 - 3) This allows Earth to avoid heating up too much.
 - 4) However, not all of the infrared radiation makes it into space; some is absorbed by gases in the atmosphere and is reradiated back to Earth's surface.
 - 5) A greenhouse gas is one that absorbs infrared radiation and then reradiates some of this radiation back to Earth.
- (APEUni Website / App RO #129)

78. Piano

Correct Order:

- 1) Piano keys are generally made of spruce or basswood, for lightness.
 - 2) Spruce is normally used in high-quality pianos.
 - 3) Traditionally, the black keys were made from ebony and the white keys were covered with strips of ivory, but since ivory-yielding species are now endangered and protected by treaty, plastics are now almost exclusively used.
 - 4) Also, ivory tends to chip more easily than plastic.
- (APEUni Website / App RO #73)

79. San Diego (圣地亚哥)

Correct Order:

- 1) In 1992 a retired engineer in San Diego contracted a rare brain disease that wiped out his memory.
 - 2) Every day he was asked where the kitchen was in his house, and every day he didn't have the foggiest idea.
 - 3) Yet whenever he was hungry he got up and propelled himself straight to the kitchen to get something to eat.
 - 4) Studies of this man led scientists to a breakthrough: the part of our brains where habits are stored has nothing to do with memory or reason.
 - 5) It offered proof of what the US psychologist William James noticed more than a century ago that humans 'are mere walking bundles of habits' .
- (APEUni Website / App RO #67)

80. Australia Role Models (澳洲榜样)

Correct Order:

- 1) A University of Canberra student has launched the nation's first father-led literacy project, to encourage fathers to become more involved in their children's literacy.
 - 2) Julia Bocking's Literacy and Dads (LADS) project aims to increase the number of fathers participating as literacy helpers in K-1 school reading programs at Queanbeyan Primary Schools.
 - 3) Having worked as a literacy tutor with teenagers, she saw the need for good attitudes towards reading to be formed early on – with the help of more male role models.
 - 4) 'A male that values reading sets a powerful role model, particularly for young boys, who are statistically more likely to end up in remedial literacy program', she said.
- (APEUni Website / App RO #55)

81. A Big Challenge (大挑战)

Correct Order:

- 1) When Vijay Govindarajan and Christian Sarkar wrote a blog entry on Harvard Business Review in August 2010 mooting the idea of a "\$300- house for the poor", they were merely expressing a suggestion.
 - 2) Of course, the idea we present here is an experiment," wrote Prof Govindarajan, a professor of international business at the Tuck School of Business at Dartmouth and Mr Sarkar, a marketing consultant who works on environmental issues – an almost apologetic disclaimer for having such a "far-out" idea.
 - 3) Who could create a house for \$300 and if it was possible, why hadn't it been done before?
 - 4) Nonetheless, they closed their blog with a challenge: "We ask chief executives, governments, NGOs, foundations: Are there any takers?"
- (APEUni Website / App RO #41)

82. Restaurant

Correct Order:

- 1) The physical location of a restaurant in the competitive landscape of the city has long been known as a major factor in its likely success or failure.
 - 2) Once restaurants are established in such environments they can do little about their location.
 - 3) All they can do is work to improve customer access to their premises.
 - 4) Restaurateurs often do this by engaging in battles with local authorities about car parking.
- (APEUni Website / App RO #38)

83. 60,000 Charity (6万个慈善机构)

Correct Order:

- 1) A recent research has revealed that more than 60,000 species of trees are available globally.
 - 2) The BCGI (Botanical Gardens Conservation International), a charity that compiled the list of trees on the basis of data gathered from its network of 500 members organizations.
 - 3) The researchers claim to have collected information over a period of two years from sources including over 500 published contents and 80 experts in the BCGI's network.
 - 4) The data will be kept updated with the discovery of new species or the extinction of some, said the researchers.
 - 5) All the data required for the world's trees is now available in one database, thanks to Global Tree Search.
- (APEUni Website / App RO #37)

84. Chalk River (粉笔河)

Correct Order:

- 1) The Canadian Institute for Neutron Scattering will be holding the eleventh neutron summer school at Chalk River on May 8– 13, 2011.
 - 2) The aim of the school is to cover a wide range of topics associated with thermal neutron scattering, including powder diffraction, stress analysis, texture, reflectometry, and small-angle neutron scattering together with the underlying theory associated with neutron scattering.
 - 3) The theory will be presented in a way that should be understood by people in any of these fields.
 - 4) For more information, see the Canadian Institute for Neutron Scattering's Neutron Summer School.
- (APEUni Website / App RO #34)

85. Sojourner

Correct Order:

- 1) More recent missions to Mars include the hugely successful Mars Pathfinder, which landed a small 'rover' called Sojourner on the surface to explore a region where there may once have been life.
 - 2) Sojourner has now been effectively switched off, but lasted almost twelve times its expected lifetime.
 - 3) Similarly the lander, which imaged several areas around the landing site (dubbed the Carl Sagan Memorial site) and took atmospheric measurements, lasted a good deal longer than expected.
 - 4) The only unfortunate thing to have arisen from the mission is the naming of the rocks at the landing site (including everything from Scooby Doo to Darth Vader).
- (APEUni Website / App RO #29)

86. Inuit

Correct Order:

- 1) Jean Briggs has worked with the Inuit of the Canadian Arctic and has described how, within these communities, growing up is largely seen as a process of acquiring thought, reason and understanding (known in Inuit as ihuma).
 - 2) Young children don't possess these qualities and are easily angered, cry frequently and are incapable of understanding the external difficulties facing the community, such as shortages of food.
 - 3) Because they can't be reasoned with, and don't understand, parents treat them with a great deal of tolerance and leniency.
 - 4) It's only when they are older and begin to acquire thought that parents attempt to teach them or discipline them.
- (APEUni Website / App RO #24)

87. Greener Technologies

Correct Order:

- 1) Engineers are much needed to develop greener technologies.
 - 2) The energy sector has a fantastic skills shortage at all levels, both now and looming over it for the next 10 years.
 - 3) Not only are there some good career opportunities, but there's a lot of money going into the research side, too.
 - 4) With the pressures of climate change and the energy gap, in the last few years funding from the research councils has probably doubled.
- (APEUni Website / App RO #18)

88. Mission

Correct Order:

- 1) Early in 1938, Mario de Andrade, the municipal secretary of culture here, dispatched a four– member Folklore Research Mission to the northeastern hinterlands of Brazil on a similar mission.
 - 2) The intention was to record as much music as possible as quickly as possible, before encroaching influences like radio and cinema began transforming the region's distinctive culture.
 - 3) They recorded whoever and whatever seemed to be interesting: piano carriers, cowboys, beggars, voodoo priests, quarry workers, fishermen, dance troupes and even children at play.
 - 4) But the Brazilian mission's collection ended up languishing in vaults here.
- (APEUni Website / App RO #15)

89. Airbnb

Correct Order:

- 1) Back in 2008 a small company in San Francisco called Airbnb had a dream.
 - 2) People with spare bedrooms would welcome strangers into their homes and share restaurant recommendations with them for a small fee.
 - 3) Fast forward to 2016 and the big, successful Airbnb is considered a mainstay of what we now call "the sharing economy".
 - 4) It is also the business that defines the mentality of the millennial.
- (APEUni Website / App RO #10)

90. 1906 San Francisco (1906年旧金山)

Correct Order:

- 1) At 5:12 a.m. on April 18, 1906, the people of San Francisco were awakened by an earthquake that would devastate the city.
 - 2) The main temblor, having a 7.7–7.9 magnitude, lasted about one minute and was the result of the rupturing of the northernmost 296 miles of the 800–mile San Andreas fault.
 - 3) But when calculating destruction, the earthquake took second place to the great fire that followed.
 - 4) The fire, lasting four days, most likely started with broken gas lines (and, in some cases, was helped along by people hoping to collect insurance for their property—they were covered for fire, but not earthquake, damage).
- (APEUni Website / App RO #9)

91. Exploratory Urge

Correct Order:

- 1) All animals have a strong exploratory urge, but for some it is more crucial than others.
- 2) It depends on how specialized they have become during the course of evolution.
- 3) If they have put all their effort into the perfection of one survival trick, they do not bother so much with the general complexities of the world around them.

- 4) So long as the ant eater had its ants and the koala bear had gum leaves, then they are satisfied and the living is easy.
- 5) The non-specialists, however, the opportunities of the animal world, can never afford to relax.
(APEUni Website / App RO #5)

92. Speaking English

Correct Order:

- 1) Anyone wanting to get to the top of international business, medicine or academia (but possibly not sport) needs to be able to speak English to a pretty high level.
- 2) Equally, any native English speaker wanting to deal with these new high achievers needs to know how to talk without baffling them.
- 3) Because so many English-speakers today are monoglots, they have little idea how difficult it is to master another language.
- 4) Many think the best way to make foreigners understand is to be chatty and informal.
- 5) This may seem friendly but, as it probably involves using colloquial expressions, it makes comprehension harder.
(APEUni Website / App RO #8)

93. Some Type Soda (某些类型的苏打)

Correct Order:

- 1) A reaction that needs some type of energy to make it go is said to be endothermic. It takes in energy.
- 2) For example, the sherbet you used for the chapter problem on page 25 is a mixture of baking soda and citric acid.
- 3) When it is mixed with water in your mouth, an endothermic reaction occurs, taking heat energy from your mouth and making it feel cooler.
- 4) Another example of an endothermic reaction is seen with the cold packs used by athletes to treat injuries. These packs usually consist of a plastic bag containing ammonium nitrate dissolves in the water.
- 5) This process is endothermic-taking heat energy from the surroundings and cooling the injured part of your body. In this way, the cold pack acts as an ice pack.
(APEUni Website / App RO #1)

94. Social Sites (Incomplete)

Points: About social sites... Facebook When a person create a profile on a facebook, then add information on the profile like personal details, images etc., then 3 features Five sentences in total.
(APEUni Website / App RO #380)

Fill in the Blanks (Reading)

1. Maya

The Classic Era of Mayan **civilization** came to an end around 900 AD. Why this happened is unclear; the cities were probably over-farming the land, so that a period of drought led to famine. Recent geological **research** supports this, as there **appears** to have been a 200-year drought around this time.

Options:

research, retrospects, argument, civilization, appears, urbanization
(APEUni Website / App FIBR #844)

2. MBA

Deciding to go to business school is perhaps the simplest part of what can be a complicated process. With nearly 600 accredited MBA programs on **offer** around the world, the choice of where to study can be overwhelming. Here we explain how to **choose** the right school and course for you and unravel the application and funding process. "Probably the **majority** of people applying to business school are at a point in their careers where they know they **want** to shake things up, but they don't know exactly what they want to do with their professional lives," says Stacy Blackman, an MBA admissions consultant based in Los Angeles. "If that's the case with you, look at other **criteria** : culture, teaching method, location, and then pick a place that's a good fit for you with a strong general management program. Super-defined career goals don't have to be a part of this process."

Options:

standards, except, hold, offer, choose, deprive, minority, want, majority, criteria
(APEUni Website / App FIBR #843)

3. Banana (B) (Incomplete)

Points: Banana is a basic (crop) ... Such (international) tradebenefits (producing) countries like ... (exports) ...

(APEUni Website / App FIBR #842)

4. Performance Appraisals

Performance appraisals have traditionally been considered the best way to **evaluate** an employee's performance, but increasingly organizations are finding them of little **value** . Employees find them stressful and unhelpful. Importantly, they also take up a lot of time. When Deloitte analyzed their own **process** , they found managers and employees spent around 2 million hours a year on performance reviews. A growing number of companies have decided to **abolish** performance reviews altogether, instead introducing more regular catch-ups.

Options:

monopolize, rating, value, presence, evaluate, abolish, process
(APEUni Website / App FIBR #841)

5. Higher Education Shift

After centuries of inequality in UK higher education benefiting men, there has been a **reversal** over the past three decades. A lower proportion of entrants to UK higher education institutions are male than ever before and they **make** up less than one-half of the total. Other developed countries have **undergone** a similar shift. Male **underachievement** is not seen only in the figures for entry but also in non-continuation (drop-out) rates and degree performance statistics.

Options:

underachievement, phased, reversal, make, undergone, coincidence, deceit, recovery, hitch
(APEUni Website / App FIBR #679)

6. Fascination

A fascination with the fate of those who show great early talent remained with me. Then in 1981, I happened upon a radio documentary **commemorating** Hephzibah, who died earlier that year. Produced and narrated for the Australian Broadcasting Commission's The Coming Out Show by the influential feminist commentator and academic Eva Cox — who was, I learnt for the first time, Hephzibah's stepdaughter — it **featured** interviews with Hephzibah and with those who had **known** her. I heard her light, precise voice with its slightly Germanic vowels and hint of an American **drawl** as she spoke about things that were important to her, and I was drawn to her warmth, thoughtfulness and humor.

Options:

prescribing, known, mourned, drawl, commemorating, displaced, abase, featured
(APEUni Website / App FIBR #619)

7. Accounting and Finance

While accounting focuses on the day-to-day management of financial **reports** and records across the business world, finance uses this same information to **project** future growth and to analyze expenditure in order to strategize company finances. By studying this major you get to have a better insight on the market, with the right **knowledge** and skills acquired you should be able then when you graduate to advise others in making strong investments. This major will help you gain responsibility of predicting and **analyzing** the potential for profit and growth, assessing monetary resources, utilizing accounting statistics and reports, and also looking externally for future funding options.

Options:

editorials, knowledge, analyzing, announce, project, using, content, reports
(APEUni Website / App FIBR #618)

8. Chapters

Most chapters have a mixed exercise after the **main** work of the chapter has been completed. This will help you **revise** what you have done, either when you have finished the chapter or at a later date. All chapters **end** with some mathematical puzzles and practical investigational work. For this work you are encouraged to **share** your ideas with others.

Options:

end, main, revise, share, team, downsize, mingle, bare
(APEUni Website / App FIBR #616)

9. Bioenergy

A Graphic Introduction was put together by northern artists, who have **interpreted** discussions with scientists from the Supergen Bioenergy Hub in a **series** of striking images which imagine alternative futures and explain some of the technology **involved** and how it might be put into practice.

Options:

involved, distinguished, discriminated, interpreted, forsook, system, series
(APEUni Website / App FIBR #615)

10. Activity Tracker (Incomplete)

Points: Million of people keep ... with wristband activity tracker ...

(APEUni Website / App FIBR #612)

11. Banana

Well, the banana is the first cultivated fruit. It's one of the food items that literally **brought** people out of the jungle, out of their hunter–gatherer lifestyles and was there at the **dawn** of agriculture which is what helped force human beings into **communities** . It's really one of the things that helped invent human culture. It's about 7000 years of history, and the banana, from its center of **origin** , which is believed to be Papua New Guinea, spread out with people who traveled in boats across the Pacific into the mainland of Asia and all the way south to Australia across Indonesia and Micronesia and eventually they moved as far as Africa and even possibly to Ecuador all in this time and all on **paddle** boats and wind driven boats.

Options:

origin, communities, phase, brought, complex, hefty, paddle, dawn, keep, connections

(APEUni Website / App FIBR #610)

12. Dictionary

Samuel Johnson's Dictionary of the English Language is one of the most famous dictionaries in **history** . First published in 1755, the dictionary took just over eight years to compile, **required** six helpers and listed 40,000 words. Each word was defined in **detail** , the definitions illustrated with quotations **covering** every branch of learning. It was a huge scholarly **achievement** , a more extensive and complex dictionary than any of its predecessors — the comparable French Dictionnaire had taken 55 years to compile and required the dedication of 40 scholars.

Options:

required, covering, achievement, sustainability, leading, repulsed, detail, history, declaration

(APEUni Website / App FIBR #598)

13. Marshmallow Test

Mischel is the creator of the marshmallow test, one of the most famous experiments in the history of psychology, which is often cited as evidence of the importance of self–control. In the original test, which was administered at the Bing Nursery School, at Stanford, in the nineteen–sixties, Mischel's team would present a child with a treat (marshmallows were just one option) and tell her that she could either eat the one treat **immediately** or wait alone in the room for several minutes until the researcher returned, at which point she could have two treats. The promised treats were always visible and the child knew that all she had to do to stop the agonizing wait was ring a bell to call the experimenter back — although in that **case** , she wouldn't get the second treat. The longer a child delayed gratification, Mischel found — that is, the longer she was able to wait — the better she would fare later in life at numerous measures of what we now call executive function. She would **perform** better academically, earn more money, and be healthier and happier. She would also be more likely to avoid a number of negative outcomes, including jail time, obesity, and drug use .

Options:

frequently, perform, immediately, achieve, case, topic

(APEUni Website / App FIBR #597)

14. Bias

One of the questions we need to ask ourselves is: How much of the news is biased? Can we recognize

bias? The fact is, despite the journalistic ideal of ‘objectivity’, every news story is **influenced** by the attitudes and background of its interviewers, writers, journalists, photographers and editors. That is not to say that all bias is **deliberate**, but it does exist. So how can we, as readers or viewers, **determine** bias? Well, in the case of newspapers, it manifests itself in a number of ways, such as what events are selected for inclusion or omission. The placement of the article, meaning its proximity to the front or back pages, is significant. The use of headlines, photographs and language are **further** examples.

Options:

deliberate, random, bare, influenced, further, determine, hampered, measure
(APEUni Website / App FIBR #583)

15. Pop Art (Incomplete)

Points: About pop art. ... turning to () ... Americans use familiar subjects nearby, such as bottles, to () ... But UK’s (imager / archives / ...) use magazines ...
(APEUni Website / App FIBR #595)

16. Sound Speed

The speed of sound (otherwise known as Mach 1) varies with temperature. At sea level on a ‘standard day’, the temperature is 59°F, and Mach 1 is approximately 761 mph. As the altitude increases, the temperature and speed of sound **both** decrease until about 36,000 feet, after which the temperature remains steady until about 60,000 feet. Within that 36,000 – 60,000 foot range, Mach 1 is about 661 mph. Because of the **variation**, it is possible for an airplane flying supersonic at high altitude to be slower than a subsonic flight at sea level. The transonic band (the ‘sound barrier’) extends **from** around Mach 0.8 — when the first supersonic shock waves form on the wing — to Mach 1.2, when the entire wing has gone supersonic.

Options:

via, towards, both, from, variation, differences, either
(APEUni Website / App FIBR #592)

17. Management Accounting

Management accounting is concerned with providing information and **analysis** to managers to help them plan, evaluate and control activities, in order to achieve an organization’s **objectives**. Whereas financial accounting is concerned with reporting on the past financial performance of an organization, management accounting is essentially concerned with improving its future performance. In order to understand the **concepts** and principles of management accounting it is necessary first to have some **appreciation** of what managers do! This, in turn, requires an understanding of the organizations in which managers work — and of the external environment in which these organizations exist and operate.

Options:

fames, category, appreciation, analysis, comparison, concepts, objectives
(APEUni Website / App FIBR #572)

18. Studying Law

It is important to **emphasize** the need for hard work as an essential part of studying law, because far too many students are tempted to think that they can succeed by relying on what they imagine to be their natural ability, without bothering to add the **expenditure** of effort. To take an analogy some people prefer the more or less instant **gratification** which comes from watching television adaptation of a classic novel

to the rather more laborious process of reading the novel itself. Those who prefer watching television to reading the book are less likely to study law successfully, unless they rapidly acquire a taste for text-based materials .

Options:

level, gratification, emphasize, taste, prefer, expenditure, laborious, expensive, meet
(APEUni Website / App FIBR #570)

19. Voting (Incomplete)

Points: Voting is your civil (duty) and that's regarding (study\research) from the US ...
(APEUni Website / App FIBR #566)

20. Selfies

To better understand selfies and how people form their identities online, the researchers combed through 2.5 million selfie posts on Instagram to determine what kinds of identity statements people make by taking and sharing the photos. Nearly 52 percent of all selfies fell into the appearance category: pictures of people showing off their make-up, clothes, lips, etc. Pics about looks were two times more popular than the other 14 categories combined . After appearances, social selfies with friends, loved ones, and pets were the most common (14 percent). Then came ethnicity pics (13 percent), travel (7 percent), and health and fitness (5 percent). The researchers noted that the prevalence of ethnicity selfies (selfies about a person's ethnicity, nationality or country of origin) is an indication that people are proud of their backgrounds. They also found that most selfies are solo pictures, rather than taken with a group. Overall, an overwhelming 57 percent of selfies on Instagram were posted by the 18–35-year-old crowd, something the researchers say isn't too surprising considering the demographics of the social media platform. The under-18 age group posted about 30 percent of selfies. The older crowd (35+) shared them far less frequently (13 percent). Appearance was most popular among all age groups. Lead author Julia Deeb-Swihart says selfies are an identity performance—meaning that users carefully craft the way they appear online and that selfies are an extension of that. This evokes William Shakespeare's famous line: "All the world's a stage, and all the men and women merely players."

Options:

made up, resembling, considering, more, each, fell into, rather, combined
(APEUni Website / App FIBR #546)

21. GM Corn

Almost no one regards corn with suspicion. But the same can't be said for humans' ingenious ability to engineer the plants we eat. Genetically modified(GM) crops are viewed with such hostility that they are barely grown in Europe. However, a new study by an independent group of scientists, who have done the most comprehensive review of the evidence so far, shows that our aversion to GM food is pointless , unscientific and harmful to farmers .

Options:

same, unscientific, sickness, those, such, some, terrific, review
(APEUni Website / App FIBR #539)

22. Supply and Demand

The supply of a thing, in the phrase 'supply and demand', is the amount that will be offered for sale at each of a series of prices; the demand is the amount that will be bought at each of a series of prices. The principle that value depends on supply and demand means that in the case of nearly every

commodity, more will be bought if the price is lowered, less will be bought if the price is **raised** . Therefore sellers, if they wish to induce buyers to take more of a commodity than they are already doing, must reduce its price; if they raise its price, they will sell less. If there is a general falling off in demand – due, say, to trade depression – sellers will either have to **reduce** prices or put less on the **market** ; they will not be able to sell the same **amount** at the same price. Similarly with supply. At a certain price a certain amount will be offered for sale, at a higher price more will be offered, at a lower price less. If consumers want more, they must offer a higher price; if they want less, they will probably be able to force prices down. That is the first result of a change in demand or supply.

Options:

admit, recorded, amount, market, raised, reduce, rate, gear
(APEUni Website / App FIBR #498)

23. Egyptian Music

Music was as important to the ancient Egyptians as it is in our modern society. Although it is thought that music played a **role** throughout the history of Egypt, those that study the Egyptian writings have discovered that music **seemed** to become more important in what is called the 'pharaonic' **period** of their history. This was the time when the Egyptian dynasties of the pharaohs were **established** and music was found in many parts of every day Egyptian life.

Options:

need, period, showed, established, rank, seemed, history, role
(APEUni Website / App FIBR #486)

24. Seminars

Seminars are not designed to be mini-lectures. Their educational **role** is to provide an opportunity for you to discuss interesting and difficult aspects of the course. This is founded on the **assumption** that it is only by actively trying to use the knowledge that you have acquired from lectures and texts that you can achieve an adequate understanding of the subject. If you do not understand a point, it is highly **unlikely** that you will be the only person in the group in that position; you will invariably be undertaking a **service** for the entire group, if you come to the seminar equipped with questions on matters which you feel you did not fully understand. The seminar is to introduce and **provoke** discussion.

Options:

part, provoke, unlikely, job, theory, service, role, assumption, impossible, stir
(APEUni Website / App FIBR #485)

25. Shakespeare and Richard (Incomplete)

Points: About Shakespeare and Richard. ... (newer) works, and Shakespeare didn't (create) and only touched and (improved) it. Shakespeare expressed many (opportunities / ways). Other option: subtle (?)
(APEUni Website / App FIBR #482)

26. Self-expression

A surprising number of writers, even those who have thought of their writing as "self-expression," have sought a **freedom** from the tyranny of subjectivity, echoing Goethe's claim that "Every healthy effort is directed from the **inward** to the outward world." From time to time others have risen to defend commitment, engagement, involvement. But, at least until **recently** , the predominant demand in this **century** has been for some sort of objectivity.

Options:

pressure, extension, freedom, character, then, inward, century, recently
(APEUni Website / App FIBR #476)

27. Power Station

The ruins of the South Fremantle Power Station have stood empty since 1985, home only to urban explorers and street **artists** . Opened in 1951, the power station was once a pillar of progress for the expanding energy **demands** of Perth. Here it stood proud and strong for 34 years, supplying energy to its surrounding metropolis until 1985 when it was deemed to no longer be worth the **money** .

Options:

ratings, status, demands, collectors, artists, money
(APEUni Website / App FIBR #429)

28. New Ideas

First, new ideas are the wheels of progress. Without them, stagnation **reigns** . Whether you're a designer dreaming of another world, an **engineer** working on a new kind of structure, an **executive** charged with developing a fresh business concept, an advertiser seeking a breakthrough way to sell your product, a fifth-grade teacher trying to plan memorable school **assemblies** , or a volunteer looking for a new way to sell the same old raffle tickets, your ability to **generate** good ideas is critical to your success.

Options:

rise, assemblies, changes, reigns, generate, engineer, executive
(APEUni Website / App FIBR #411)

29. Green Spaces

Green spaces **contribute** significantly to a **reduction** of soil and aerial temperatures during spells of hot weather, so contributing to human wellbeing. In the garden **context** , there is, however, little information as to what extent various types of plants **differ** in their cooling potential and how certain planting combinations may maximize cooling under a scenario of **low** rainfall and minimal water inputs.

Options:

addition, focus, background, low, differ, context, massive, reduction, contribute
(APEUni Website / App FIBR #408)

30. Atoms (Incomplete)

Points: About atoms. ... atoms free (float) ... nuclei and electrons are easily (attractive) to each other. New electrons enter the (orbit). ... (forced) to leave ... this (phenomenon) Key words: inclined.
(APEUni Website / App FIBR #466)

31. Diamond (Incomplete)

Points: About black diamond from outer space.
(APEUni Website / App FIBR #450)

32. Marketing (Incomplete)

Points: Marketing is a (professional/flexible) job such as (financial) service and consumer goods to resolve less (balance) problem to remain economy.
(APEUni Website / App FIBR #449)

33. Undesirable Substances

There are a number of substances (toxic as well as non-toxic) which are being added to the environment by pollution-caused **events**. These are, in fact, the undesirable consequences of modern civilization. These substances, which are continuously going into air, water and soil, bring about undesirable **changes** in physical, chemical and biological **aspects** of our environment and the life **processes** of animals and plants.

Options:

possessions, changes, events, aspects, processes, intentions
(APEUni Website / App FIBR #446)

34. Corn and Modified Food (Incomplete)

Points: Blanks: unscientific, view, review, like, since
(APEUni Website / App FIBR #437)

35. Long-term Goal (Incomplete)

Points: The long term goal can be divided into short term (realistic/naturalistic) goal ... For example, (in order to) achieve a high grade you need to ... (along the way/ timely).
(APEUni Website / App FIBR #129)

36. Bilingual and Monolingual (Incomplete)

Points: About the difference between bilingual and monolingual. 'cognitive function' is mentioned.
Options: differences, intention, equality, function, ...
(APEUni Website / App FIBR #435)

37. Online Learning

If you are interested in studying but have other **commitments**, our online and distance learning courses offer an alternative flexible **mode** of study. Teaching is conducted through a mixture of audio-visual, written and interactive materials. There are also **opportunities** for online discussion and collaborative projects with tutors and other students. Some programmes include residential **modules** taught on campus, giving you the chance to meet and work alongside your tutors and fellow students face-to-face. Our Graduate School provides comprehensive support for distance and part-time researchers, many of whom study for up to six years or more.

Options:

opportunities, rate, charges, mode, modules, commitments, comments
(APEUni Website / App FIBR #431)

38. Insect Concealment (Incomplete)

Points: The world of species is tricky, in which it is (fatal) for insects to be exposed, and they have to (conceal) themselves. For predators, nothing is less (appetizing) than a dead prey. Blanks: works, until, ...
Other options: thrives, caution, cautious, ...
(APEUni Website / App FIBR #421)

39. Agricultural Investment (Incomplete)

Points: About financial investment in agriculture. Options: development, insurance, comparison, efficient
(APEUni Website / App FIBR #402)

40. Mathematics and Science (Incomplete)

Points: Mathematics and science are both (broad) disciplines; (participation) at home,

(obtaining) job opportunities;...
(APEUni Website / App FIBR #178)

41. Fossil Fuel

But look beyond fossil fuels for the most intriguing trends. One is that the energy intensity of the world economy -- the amount of energy it takes to produce one dollar's worth of **income** -- keeps falling, at a rate of about 2 percent. What this means is that even without any change in the **relative** shares of fossil-based and fossil-free sources in the world's energy mix, we could have 2 percent annual economic growth without increasing carbon emissions from energy use. Of course that is not enough to **address** climate change and we need more economic growth than that. It is **nonetheless** a stunning number, which refutes the claim by some environmentalists that permanent economic growth is fundamentally incompatible **with** finite physical resources.

Options:

nonetheless, address, irrelevant, outcome, merge, income, relative, however, with, by
(APEUni Website / App FIBR #407)

42. Education and Well-being

Education and well-being have often been **associated**. The idea that education can promote individual well-being indirectly, by **improving** earnings and promoting **social** mobility, is an old one; so are notions of education helping to promote the good society by **contributing** to economic growth and equality of opportunity.

Options:

local, improving, resorting, associated, demonstrating, social, contributing, discriminated
(APEUni Website / App FIBR #405)

43. Electric Eels

Electric eels are born to shock. Thanks to cells called electrocytes which, stacked like batteries, make up 80% of their bodies, these cunning South American **hunters** can deliver debilitating blows of up to 600 volts to their prey. But they've harnessed their electricity to pack even bigger punches. Last year, Vanderbilt University biologist Kenneth Catania revealed electric eels bring their positively charged head and negatively charged **tail** closer together to generate a more powerful **current**.

Options:

objects, current, limb, hunters, tail, engine
(APEUni Website / App FIBR #401)

44. (Incomplete)

Points: 第一个空 political() 第二个空 teacher... forum for() and for discussion... 第三个空 which() students want to live in... 第四个空最后一句 There is so much () in university for students...interests... 备选项: agreement/ parties/societies/ ideals/debate/ opportunity/ 可能还有一个备选项
(APEUni Website / App FIBR #400)

45. Melting Ice

At the end of the last ice age, the melting ice disrupted the ocean currents in the North Atlantic and **caused** a drop in temperature of almost 5 degrees. Even though the rest of the planet was warming **up**, the North Atlantic region remained in a cold period for 1300 years. The same thing happened **around** 8000 years ago, when the cooling lasted about a hundred years, and it **could** happen

again today. Even a short period of cooling in the North Atlantic could have a dramatic effect on the wildlife, and the human populations, living there.

Options:

forwent, up, never, caused, could, around
(APEUni Website / App FIBR #399)

46. Active Learning Classrooms

Active learning classrooms (ALCs) are student-centered, technology-rich classrooms. They are easily identified with their large **circular** tables and movable seating designed to improve student **engagement** in class. Typically, each table is accompanied by a whiteboard and flat-screen monitor to display student work and larger rooms frequently have miniature bulb and microphones at each table. In this way, students are able to **signal** if they have questions or want to speak to the **entire** room.

Options:

sign, circular, entire, engagement, partly, signal, arrangement, square
(APEUni Website / App FIBR #387)

47. Sandra Lousada

London's National Portrait Gallery is currently celebrating the fifty-year **career** of photographer Sandra Lousada. The twenty one portraits on display depict key **figures** in literature, film and fashion from the early 1960s. Subsequent to the acquisition of forty portraits by Lousada, the display at The National Portrait Gallery highlights shots taken between 1960 and 1964, many of which feature in Lousada's book *Public Faces Private Places* (2008). Formal commissioned portraits are shown alongside behind-the-scenes photographs taken on films **sets** and unguarded portraits of sitters captured at home.

Options:

sets, elements, status, career, figures
(APEUni Website / App FIBR #385)

48. Father in Family

With the increase in women's **participation** in the labour force, many mothers have less time **available** to undertake domestic activities. At the same time, there has been increasing **recognition** that the father's **relationship** with a child is important. A father can have many **roles** in the family, ranging from income provider to teacher, carer, and playmate. Therefore, balancing paid work and family responsibilities can be an important issue for both fathers and mothers in families.

Options:

relationship, efficient, roles, separation, shares, participation, recognition, available
(APEUni Website / App FIBR #377)

49. Jury

Serving on a jury is normally compulsory for individuals who are **qualified** for jury service. A jury is **intended** to be an impartial panel capable of reaching a verdict. There are often **procedures** and requirements, including a fluent understanding of the language and the opportunity to test juror's neutrality or otherwise exclude jurors who are perceived as likely to be less than **neutral** or partial to one side.

Options:

qualified, detained, negative, options, neutral, intended, procedures
(APEUni Website / App FIBR #371)

50. Conservancy

To qualify as a conservancy, a committee must define the conservancy's boundary, elect a **representative** conservancy committee, negotiate a legal constitution, prove the committee's ability to **manage** funds, and produce an acceptable plan for **equitable** distribution of wildlife-related benefits. Once approved, registered conservancies acquire the **rights** to a sustainable wildlife **quota**, set by the ministry.

Options:

equitable, consecutive, representative, deposit, rights, quotation, infringements, quota, irresistible, manage
(APEUni Website / App FIBR #366)

51. Economic Dimension

The difference in **views** is so great that one wonders, are the protesters and the policy makers talking about the same **phenomenon**? Are they looking at the same data? Are the visions of those in **power** so clouded by special and particular **interests**?

Options:

power, suspicions, coherence, parts, depth, views, phenomenon, interests
(APEUni Website / App FIBR #365)

52. Business Emission

An American retail giant is set to ask its suppliers to measure and report their greenhouse gas emissions. There is a need to **disclose** business emission. The **data** of emission can be used to test which company causes climate change, and **conflate** the government campaigners and environmental **invigilators**.

Options:

conflate, invigilators, dislike, disclose, dismiss, landlord, data, quota
(APEUni Website / App FIBR #363)

53. Paris Stage

In the preceding hundred years, Paris had been **center** stage for political and social **movements** that had deeply affected all of Europe. The many ways in which tradition had already been challenged and **shaken** during those years helped make it easier for those to achieve a break with tradition art.

Options:

movements, rehearsals, concocted, shaken, overhead, center
(APEUni Website / App FIBR #360)

54. E-Learning

E-Learning is the new way forward. We believe **passionately** in E-Learning. Our innovative approach opens up new **opportunities** for busy professionals that simply did not previously exist — the **chance** to combine a prestigious Masters programme with a demanding professional and personal **life**. Our small virtual classrooms facilitate intensive **interaction** and collaboration among professionals from all over the world.

Options:

competitions, opportunities, interaction, passionately, course, life, proportionately, chance
(APEUni Website / App FIBR #342)

55. Folklore

Folklore, a modern term for the **body** of traditional customs, superstitions, stories, dances, and songs that have been adopted and maintained within a given **community** by processes of repetition is not reliant on the written **word**. Along with folk songs and folktales, this broad **category** of cultural forms embraces all kinds of legends, riddles, jokes, proverbs, games, charms, omens, spells, and rituals, especially those of pre-literate societies or social classes. Those forms of verbal expression that are handed on from one generation or locality to the next by word of mouth are said to constitute an oral **tradition**.

Options:

book, regime, body, tradition, community, art, category, word
(APEUni Website / App FIBR #341)

56. Suez Canal

Britain became the largest **shareholder** in the canal in 1875, purchasing its interest from the Egyptian khedive. The Convention of Constantinople signed by the major European powers in 1888 keeps it open for free **passage** to all nations in time of peace or war. Britain became the **guarantor** of the canal's neutrality and management was left to the Paris-based Suez Canal Co.

Options:

guarantor, kingdom, tariff, shareholder, passage, owner
(APEUni Website / App FIBR #336)

57. Private School

Private schools in the UK are redoubling their marketing efforts to foreigners. Almost a third of the 68,000 boarding pupils at such schools **already** come from overseas. But now, with many UK residents **unwilling** or unable to afford the fees and a cultural **shift** away from boarding, many schools are looking abroad to survive. Overseas students now **account** for about 500m pounds of fee income a year for boarding schools in the UK.

Options:

weigh, already, unwilling, fuss, account, seldom, shift, unweaned
(APEUni Website / App FIBR #330)

58. Conduit of Energy

Plants serve as the conduit of energy into the biosphere, provide food and materials used by humans, and they **shape** our environment. According to Ehrhardt and Frommer, the three major challenges facing humanity in our time are food, energy, and environmental **degradation**. All three are plant related. All of our food is produced by plants, either directly or indirectly via animals that eat them. Plants are a **source** of energy production. And they are intimately involved in climate change and a major factor in a variety of environmental concerns, including agricultural expansion and its impact on habitat destruction and waterway pollution.

Options:

degradation, source, liaison, conduct, derivation, shape
(APEUni Website / App FIBR #328)

59. The Press

Throughout its history, one of the strengths of the Press has been the diversity of the Press's list. The Press has also distinguished itself with its strong list in social work, publishing texts that have been **widely** adopted in courses and are used by professionals in the field. Through its European Perspectives **series** and the publication of the Wellek Library Lectures, the Press has published a range of innovative and **leading** scholars. Other notable lecture series published by Columbia University Press include The Leonard Hastings Schoff Memorial Lectures and The Bampton Lectures in America.

Options:

series, supporting, episodes, leading, thoroughly, widely
(APEUni Website / App FIBR #326)

60. Research

Research is a process of investigation leading to new **insights** effectively shared and is central to the **purpose** of any university. Students have the right to be taught by acknowledged **experts** in their field, which requires that staff members operate at the most advanced level appropriate to their **discipline** and level. Research is, therefore, crucial to a **positive** student experience from further education to doctoral development.

Options:

equivocal, discipline, experts, novices, discretion, positive, purpose, insights
(APEUni Website / App FIBR #316)

61. Western Firms

What such a map would have failed to reveal, however, was the changing nature of the **connections** put in place by Western firms as they shifted work around the globe. It is often assumed that when Western firms, or any firm for that matter, reach out across **borders** to establish a factory outlet here, an assembly plant there or a subsidiary in some far-off **location**, they do so through directly investing and thereby wholly owning such facilities. In the 1970s and 1980s, among the low-cost manufacturing overseas operations, this was indeed often the case, but increasingly Western firms started to conduct their business at-a-distance through a variety of indirect means, of which subcontracting became the principal **arrangement**. Subcontracting is a way of putting out work to partner firms on a defined, contractual basis, where the tasks involved are specified precisely, as are the turnaround times and the quality of the finished goods. As a business arrangement, it is more flexible than owning factories overseas and more enforceable than a **straightforward** market exchange relationship.

Options:

arrangement, emergency, location, positions, borders, range, services, straightforward, connections, far-reaching
(APEUni Website / App FIBR #308)

62. Coffee

Coffee is enjoyed by millions of people every day and the 'coffee experience' has become a staple of our modern life and **culture**. While the current body of research related to the effects of coffee **consumption** on human health has been contradictory, a study in the June issue of Comprehensive Reviews in Food Science and Food Safety, which is published by the Institute of Food Technologists (IFT), found that the potential **benefits** of moderate coffee drinking outweigh the risks in adult consumers for the majority of major health **outcomes** considered.

Options:

costs, cult, consumption, cares, outcomes, expenditure, benefits, culture
(APEUni Website / App FIBR #307)

63. Class Participation

Because of the instructional methods, expected class participation and the nature of the courses vary, no fixed number of absences is applicable to all **situations** . Each **instructor** is responsible for making clear to the class at the beginning of the **semester** his or her policies and procedures in regard to class **attendance** and the reasons for them.

Options:

situations, member, assignments, attendance, roster, instructor, semester
(APEUni Website / App FIBR #306)

64. Critical Thinking

Critical thinking involves looking at something you may have seen many times and examining it from many different **angles** and perspectives. It involves going beyond the **obvious** or beyond 'easy' to seek new understanding and rare **solutions** . It involves looking at common issues with uncommon eyes, known problems with new skepticism, everyday conflicts with probing **curiosity** and daily challenges with greater attention to detail.

Options:

curiosity, solutions, oblivious, caution, functions, angles, consequences, obvious
(APEUni Website / App FIBR #304)

65. Techniques

In the process of studying these techniques, I learned something **remarkable** : that there's far more potential in our **minds** than we often give them credit for. I'm not just talking about the fact that it's possible to memorize lots of **information** using memory techniques. I'm talking about a lesson that is more **general** , and in a way much bigger: that it's possible, with training and hard work, to teach oneself to do something that might seem really **difficult** .

Options:

redundant, remarkable, information, ways, general, inspiration, minds, difficult
(APEUni Website / App FIBR #294)

66. The University of Maryland

The University of Maryland boasts 78 academic programs **ranked** in the top 25 nationally and 29 academic programs in the top 10 according to U.S. News and World report. By drawing top-notch faculty, attracting the brightest students and **investing** in the quality of our academic programs, we are a force to **reckon** with on a national **basis** .

Options:

perspective, agree, reckon, investing, ranked, involving, basis, ranged
(APEUni Website / App FIBR #293)

67. An Artist's Life

The **closing** decades of an artist' s life do not generally make the biographer' s heart beat faster, but Claude Monet is one of a handful of painters who bucks the pattern of an **irrelevant** old age. While it' s true that by the time he was 73 he had **accumulated** all the usual dragging baggage — outhouses full of fancy cars, a taste for expensive wine and a sprawl of dependents — it was also now that he produced

career–defining work.

Options:

accumulated, inspired, early, irrelevant, closing, missing
(APEUni Website / App FIBR #292)

68. Physical Activity

Participating regularly in physical activity has been shown to benefit an individual’s health and **wellbeing**. Regular **physical** activity is important in reducing the risk of **chronic** diseases, such as heart disease and stroke, obesity, diabetes and some forms of cancer. The National Physical Activity Guidelines for Adults **recommend** at least 30 minutes of moderate–intensity physical activity, **preferably** every day of the week, to **obtain** health benefits.

Options:

recruit, recommend, exploit, chronic, preferably, medicine, affordably, physical, obtain, wellbeing
(APEUni Website / App FIBR #291)

69. Telephone Networks

Telephone networks are big and **complex** because the **demand** increases, and need to function well in multiple environments. Therefore, we need to **forecast** future development and use the simulation system that is **greatly** in use.

Options:

demand, forecast, communicative, complex, cost, furnish, greatly, collectively
(APEUni Website / App FIBR #289)

70. Scrambled Memory

Memories can become scrambled, sometimes in the process of attempting to **retrieve** something. You might relate a story to a friend but **unwittingly** include some mistaken details. Later, as you attempt to recall the **episode**, you might come across your memory of the scrambled recall attempt instead of your original memory. Memory is malleable. It is not, as **commonly** thought, like a museum piece sitting in a display case.

Options:

unwittingly, commonly, retrieve, section, arduously, rehabilitate, episode, wittingly
(APEUni Website / App FIBR #283)

71. Repetitive Syllables

Assessments of language learning in 18–month–olds suggest that children are better at grasping the names of objects with repeated syllables, over words with non–identical syllables. Researchers say the study may help **explain** why some words or phrases, such as ‘train’ and ‘good night’, have given rise to versions with repeated syllables, such as choo–choo and night–night. The researchers say such words are easier for infants to learn, and may provide them **with** a starter point for vocabulary learning. A team from the University of Edinburgh assessed the infants’ language learning behavior in a series of **visual** and attention tests using pictures on a computer screen of two unfamiliar objects. The two objects were named with **made–up** words which were **communicated** to the infants by a recorded voice — one with two identical syllables, for example neenee, and the other without repeated syllables, such as bolay. The infants were then tested for their recognition of **each** word. Recordings of their eye movements showed they looked more reliably at the object labeled with repeated syllables, than the other object. Researchers validated their results with a control test, in which the infants responded to

pictures of familiar objects — such as a dog or an apple.

Options:

content, with, genuine, visual, explain, communicated, since, made-up, each
(APEUni Website / App FIBR #280)

72. Australian Dwellings

The stock of Australia's dwellings is **evolving** with current homes having more bedrooms on average than homes ten years ago. At the same time, households are getting smaller on average with decreasing **proportions** of couple families with children and **increasing** couple-only and lone-person households. This **article** tells the changes in household size and number of bedrooms from 1994_95 to 2003_04. It also looks at the types of households with spare bedrooms and the size of recently purchased new homes compared with existing stock.

Options:

proportions, involving, evolving, patent, increasing, article, incidents
(APEUni Website / App FIBR #275)

73. Shakespeare's Work

Shakespeare produced most of his **works** between 1589 and 1613. His early plays were comedies and histories – **genres** he raised to the peak of sophistication and artistry by the end of the 16th century. He then wrote tragedies until about 1608, including Hamlet, King Lear, Othello, and Macbeth, considered some of the finest **examples** in the English language. In his last phase, he wrote tragicomedies, also known as romances, and **collaborated** with other playwrights.

Options:

works, collaborated, designed, genres, actors, examples
(APEUni Website / App FIBR #272)

74. Changing English

English has been changing throughout its lifetime and it's still changing today. For most of us, these changes are fine as long as they're well and truly in the past. Paradoxically, we can be **curious** about word origins and the stories behind the **structure** we find in our language, but we **experience** a queasy distaste for any **change** that might be happening right under our noses. There is a certain **lack** of consistency. There are even language critics who are **convinced** that English is dying, or if not dying at least being progressively **crippled** through long years of mistreatment.

Options:

curious, crippled, convinced, experience, structure, expect, kind, lack, change
(APEUni Website / App FIBR #271)

75. Air Moving

Wind is air moving around. Some winds can move as fast **as** a racing car, over 100 miles per **hour**. Winds can travel around the world. Wind can make you feel cold because you lose heat from your body **faster** when it is windy. Weather forecasters need **to** know the speed and direction of the wind. The strength of wind is measured using the Beaufort scale from wind force 0 when there is no wind, to wind force 12 which can damage houses and buildings and is called hurricane force.

Options:

hour, as, second, more, slower, with, to, faster

(APEUni Website / App FIBR #269)

76. Ozone

Clones of an Eastern cottonwood (*Populus deltoides*) in the Bronx and other city spots grew to double the biomass of clones **planted** outside small towns upstate or on Long Island, says Jillian Gregg, now of the Environmental Protection Agency’s western–ecology division in Corvallis, Ore. The growth gap comes from **ozone** damage, she and her New York colleagues report. Ozone chemists have known that **concentrations** may spike skyscraper high in city air, but during a full 24 hours, rural trees actually get a higher cumulative ozone exposure from **urban** pollution that blows in and lingers. A series of new experiments now shows that this hang–around ozone is the **overwhelming** factor in tree growth, the researchers say in the July 10 *Nature*. ”This study has profound importance in showing us most vividly that rural areas **pay** the price for urban pollution,” says Stephen P. Long of the University of Illinois at Urbana–Champaign. ”This work should be a wake–up call,” he adds.

Options:

pay, urban, oxygen, ozone, rural, gaps, spend, overwhelming, concentrations, planted, necessary, protected

(APEUni Website / App FIBR #267)

77. Paris

Paris is very old— there has been a settlement there for at least 6,000 years and its shape has been determined in **part** by the River Seine, and in part by the edicts of France’ s rulers. But the great boulevards we admire today are relatively new, and were constructed to prevent any more barricades being **created** by the rebellious population; that work was carried out in the middle 19th century. The earlier Paris had been in part a maze of narrow streets and alleyways. But you can imagine that the work was not only highly expensive, but caused great distress among the half a million or so whose houses were **simply** razed, and whose neighborhoods disappeared. What is done cannot usually be undone, especially when buildings are torn **down** .

Options:

only, part, at, random, down, up, creating, been, simply, created

(APEUni Website / App FIBR #265)

78. Housing Agency

Housing agencies pay the utility **costs** , generally because **units** in developments don’t have individual meters. Some buildings have individual meters, and each family pays its own to the utility **company** , so agencies will deduct the **amount** from your **rent** .

Options:

costs, units, company, allowance, spends, amount, debt, collect, rent

(APEUni Website / App FIBR #175)

79. Lake Turkana

Lake Turkana is a large lake in Kenya, East Africa. This **part** of Africa was home to some of the first humans. Here, archaeologists have found piles of **bones** (both human and animal) and collections of stones that humans used as **tools** . By carefully uncovering and **examining** these remains, scientists have started to put together the story of our earliest ancestors. In 2001, a 4 million year–old skeleton was uncovered in the area. Although a link between it and modern–day humans has not been established, the skeleton shows the species was walking upright.

Options:

painting, bones, part, city, tools, examining, notches, weapons
(APEUni Website / App FIBR #253)

80. Linguistic Effects

An important corollary of this focus on language as the window to legal epistemology is the central role of **discourse** to law and other sociocultural processes. In particular, the **ideas** that people hold about how language works combine with linguistic structuring to create powerful, often unconscious effects. In recent years, **linguistic** anthropologists have made much progress in developing more precisely analytic **tools** for tracking those effects.

Options:

implements, linguistic, disclosure, speech, facts, discourse, tools, ideas
(APEUni Website / App FIBR #251)

81. Coral Reefs

Coral reefs support more marine life than any other ocean ecosystem and are, not **surprisingly**, a favorite pursuit for many divers. But as well as being physically and biologically spectacular, coral reefs also **support** the livelihoods of over half a billion **people**. What is more, this number is expected to **double** in coming decades while the area of high-quality reef is expected to halve. In combination with the very real threat of climate change, which could lead to increased seawater temperatures and ocean **acidification**, we start to arrive at some quite frightening scenarios.

Options:

decreasing, double, surprisingly, oppose, support, necessarily, people, acidification, human
(APEUni Website / App FIBR #246)

82. Hay-drying Device

A novel device for helping farmers to dry out hay more quickly has won a University of Glasgow graduate a prestigious design award. Gavin Armstrong, 23, from Kippen, Stirlingshire **scooped** the Glasgow 1999 Design Medal for his design for a swath inverter — a **device** for flipping over a hay crop to help dry out the damp underside. Dry hay is an essential farmyard food source for sheep and cows. Gavin came up with the design as part of his Product Design Engineering degree course, run in **conjunction** with Glasgow School of Art. He built a working prototype of the device which is powered and towed by a tractor and uses a pair of parallel belts to invert the swath. The rollers are driven from one hydraulic motor and are geared so as to spin at the same speed and in opposite directions **ensuring** that the touching inner two faces of the belt that perform the inversion move rearwards at the same speed.

Options:

scooped, guaranteeing, ensuring, located, device, partnerships, instruction, conjunction
(APEUni Website / App FIBR #239)

83. Darkness

The increasing darkness in the Northern Hemisphere this time of year indicates to the plant that **autumn** is coming on. So it starts recouping materials from the **leaves** before they drop off. Evergreens protect their needle-like foliage from freezing with **waxy** coatings and natural "antifreeze." But broadleaf plants, like sugar maples, birches, and sumacs, have no such protections. As a result, they **shed** their leaves. But before they do, the plants first try to **salvage** important nutrients such as nitrogen and phosphorus.

Options:

autumn, reassess, summer, salvage, slimy, leaves, roots, waxy, shed
(APEUni Website / App FIBR #230)

84. Viper

The horned desert viper's ability to hunt at night always has puzzled biologists. Though it lies with its **head** buried in the sand, it can strike with great precision as soon as prey appears. Now, Young and physicists Leo van Hemmen and Paul Friedel at the Technical University of Munich in Germany have developed a computer model of the snake's auditory **system** to explain how the snake "hears" its prey without really having the ears for it. Although the vipers have internal ears that can hear frequencies between 200 and 1000 hertz, it is not the sound of the mouse scurrying about that they are detecting. "The snakes don't have external **eardrums**," says van Hemmen. "So unless the mouse wears boots and starts stamping, the snake won't hear it."

Options:

head, hearing, system, eardrums, ability
(APEUni Website / App FIBR #229)

85. Space

Researchers already know that spending long periods of time in a zero-gravity **environment** ----- such as that inside the International Space Station (ISS) ---- results in loss of bone density and **damage** to the body's **muscles**. That's partly why stays aboard the ISS are **restricted** at six months. And now, a number of NASA astronauts are reporting that their 20/20 vision **deteriorated** after spending time in space, with many needing glasses once they returned to Earth.

Options:

background, timed, environment, deteriorated, integrated, muscles, mass, restricted, ability, devastate, damage
(APEUni Website / App FIBR #226)

86. Enigma

And if the voice of an animal is not heard as message but as art, interesting things start to happen: Nature is no longer an alien **enigma** but something immediately beautiful, an exuberant **opus** with space for us to join in. Bird melodies have always been called songs for a **reason**.

Options:

opus, exuberant, enigma, bearing, season, reason, accuse
(APEUni Website / App FIBR #216)

87. Wrinkle Cure

Barrie Finning's, a professor at Monash University's college of pharmacy in Melbourne, and PhD student Anita Schneider, recently tested a new wrinkle cure. Twice daily, 20 male and female volunteers applied a liquid containing Myoxinol, a patented **extract** of okra (*Hibiscusesculentus*) seed, to one side of their faces. On the other side they applied a similar liquid without Myoxinol. Every week for a month their wrinkles were tested by self-assessment, photography and the size of depressions made in silicon moulds. The results were impressive. After a month the **depth** and number of wrinkles on the Myoxinol-treated side were reduced by approximately 27 per cent. But Finnin's research, commissioned by a cosmetics company, is unlikely to be published in a scientific **publication**. It's hard to even find studies that show the active ingredients in cosmetics penetrate the skin, let alone more **comprehensive** research

on their effects. Even when **rigorous** studies are commissioned, companies usually control whether the work is published in the traditional scientific literature.

Options:

depth, extract, publication, important, comprehensive, body, width, review, solid, rigorous, tract
(APEUni Website / App FIBR #214)

88. Concrete Jungle

Spending too much time in the concrete jungle is bad for city **dwellers** ' health and could have potentially catastrophic **consequences** for the environment, conservation biologist Richard Fuller will argue during a seminar at the University of Canberra today. Dr Fuller, **lecturer** in biodiversity and conservation at the University of Queensland and CSIRO, will explore the fact that although there's evidence that the well-being of humans increases with **exposure** to our surrounding biodiversity, the **opportunities** for people to experience nature are declining rapidly in the modern world.

Options:

consequences, opportunities, problems, meaning, dwellers, lecturer, exposure, researchers, addition, colleague
(APEUni Website / App FIBR #213)

89. Dog Emotion

Can dogs tell when we are happy, sad or angry? As a dog owner, I feel **confident** not only that I can tell what kind of **emotional** state my pets are in, but also that they respond to my emotions. Yet as a hard-headed scientist, I try to take a more **rational** and pragmatic view. These **personal** observations seem more likely to result from my desire for a good relationship with my dogs.

Options:

emotional, confidential, personal, rational, confident, communal, pathological
(APEUni Website / App FIBR #209)

90. Economists and Ecologists

There is a pointless argument between economists and ecologists over which **crisis** is more important — the ecosphere or the economy? The materialistic **answer** is that their fates are interlinked. We know the natural world only by interacting with it and transforming it: nature **produced** us that way. Even if, as some supporters of 'deep ecology' **argue**, the earth would be better off without us, it is to us that the task of saving it falls.

Options:

produced, answer, crisis, reply, development, denote, argue, grew
(APEUni Website / App FIBR #206)

91. Low Fertility

Low fertility is a concern for many OECD countries as they face the prospect of population aging. This article makes **comparisons** between Australia and seven other OECD countries in fertility rates between 1970 and 2004. Changing age **patterns** of fertility are also compared and show that for most of the countries, women are **postponing** childbirth and having fewer babies. The **associations** of women's education levels and rates of employment with fertility are also **explored**.

sense, patterns, notions, postponing, associations, comparisons, gaps, accelerating, explored,

comparable

(APEUni Website / App FIBR #90)

92. Iceland

On average, Iceland **experiences** a major volcanic event once every 5 years. Since the Middle Ages, a third of all the lava that has **covered** the earth's surface has erupted in Iceland. However, according to a recent geological hypothesis, this estimate does not include **submarine** eruptions, which are much more extensive than those on the land surface.

Options:

experiences, interior, covered, submarine, explodes, spread, ground

(APEUni Website / App FIBR #203)

93. Mini Helicopter

A mini helicopter modeled on flying tree seeds could soon be flying overhead. Evan Ulrich and colleagues at the University of Maryland in College Park turned to the biological world for inspiration to build a scaled-down helicopter that could mimic the properties of full-size aircraft. The complex **design** of full-size helicopters gets less efficient when shrunk, **meaning** that standard mini helicopters expend most of their power simply fighting to stay stable in the air. The researchers realized that a simpler aircraft designed to stay stable passively would use much less power and reduce manufacturing costs to boot. It turns out that nature had **beaten** them to it. The seeds of trees such as the maple have a single-blade structure that **allows** them to fly far away and drift safely to the ground. These seeds, known as samaras, need no engine to **spin** through the air, thanks to a process called autorotation. By analyzing the behavior of the samara with high-speed cameras, Ulrich and his team were able to copy its design. The samara copter is not the first single-winged helicopter— one was flown in 1952, and others have been attempted since — but it is the first to take advantage of the samara's autorotation. This allows Ulrich's vehicle to perform some neat tricks, such as falling safely to the ground if its motor fails or using vertical columns of air to stay aloft indefinitely. "We can turn off the motor and autorotate, which requires no power to sustain," says Ulrich.

Options:

design, meaning, spin, beaten, tells, makes, caught, allows, conceive, flourish

(APEUni Website / App FIBR #202)

94. Leading Scientists

The Life Science Institute at the University of Michigan achieves **excellence** in biomedical research by bringing together the world's leading scientists from a variety of life science disciplines to **accelerate** breakthroughs and discoveries that will improve human health. With close to 400 scientific staff members, the LSI is exploiting the power of a **collaborative** and interdisciplinary approach to biomedical research in an open-laboratory facility.

Options:

ambiguity, collaborative, quit, excellence, positive, accelerate

(APEUni Website / App FIBR #197)

95. Music

What is music? In one sense, this is an easy **question**. Even the least musical among us can recognize pieces of music when we hear them and name a few canonical **examples**. We know there are different kinds of music and, even if our **knowledge** of music is restricted, we know which kinds we like and which

kinds we do not.

Options:

volume, question, examples, knowledge, issue, classes
(APEUni Website / App FIBR #193)

96. United Nation Library

The Dag Hammarskjold Library at United Nations Headquarters in New York is a library designated to facilitate the work of the United Nations and **focuses** mainly on the needs of the UN Secretariat and diplomatic missions. Anyone with a valid United Nations Headquarters grounds **pass**, including specialized agencies, accredited media and NGO staff, is able to visit the library. Due to **security** constraints in place at the United Nations Headquarters complex, the library is not open to the general **public**.

Options:

cards, focuses, pass, public, surpass, people, safety, security
(APEUni Website / App FIBR #191)

97. Roman People

The Roman people had at first been inclined to regard the French Revolution with either indifference or **derision**. But as the months went by and the **emigres** who remained in the city were less and less **hopeful** of an early return home, the mood of the Romans became increasingly antagonistic towards the 'assassins of Paris'.

Options:

derision, dispatches, division, cheerful, hopeful, emigres
(APEUni Website / App FIBR #188)

98. Biological Systems

Since biological systems with signs of **complex** engineering are unlikely to have arisen from accidents or coincidences, their **organization** must come from natural selection, and hence should have **functions** useful for survival and reproduction in the environments in which humans evolved.

Options:

organization, complex, complete, ideas, functions, behaved
(APEUni Website / App FIBR #187)

99. Tokyo's Skytree

Team Lab's digital mural at the entrance to Tokyo's Skytree, one of the world's monster skyscrapers, is 40 metres long and immensely detailed. But **however** massive this form of digital art becomes — and it's a form subject to rampant inflation — Inoko's theories about seeing are based on more modest and often pre-digital sources. An early devotee of comic books and cartoons (no surprises there), then computer games, he recognised when he started to look at traditional Japanese art that all those forms had something **in common**: something about the way they captured space. In his discipline of physics, Inoko had been taught that photographic lenses, **along with** the conventions of western art, were the logical way of transforming three dimensions into two, conveying the real world on to a flat surface. **But** Japanese traditions employed "a different spatial logic", as he said in an interview last year with j-collabo.org, that is "uniquely Japanese".

Options:

however, therefore, different, in common, similar, along with, But, So
(APEUni Website / App FIBR #150)

100. Climate

Climate is the word we **use** for weather over a long period of time. The desert has a **dry** climate, because there **is** very little rain. The UK has a temperate climate, **which** means winters are, overall, mild and **summers**, generally, don't get too hot.

Options:

is, are, describe, use, dry, wet, that, which, quarters, summers
(APEUni Website / App FIBR #145)

101. UW Course Description

The UW course descriptions are **updated** regularly during the academic year. All announcements in the General Catalog and Course Catalog are subject to change without **notice** and do not constitute an **agreement** between the University of Washington and the student. Students should assume the responsibility of **consulting** the appropriate academic unit or adviser for more current or specific information.

Options:

updated, new, consulting, agreement, notice, alarm, contract, enquiring
(APEUni Website / App FIBR #140)

102. Crime Prevention

Crime prevention has a long history in Australia, and in other parts of the world. In all societies, people have tried to **protect** themselves and those close to them from assaults and other abuses. Every time someone locks the door to their house or their car, they practise a **form** of prevention. Most parents want their children to learn to be law abiding and not spend extended periods of their lives in prison. In this country, at least, most succeed. Only a small minority of young people become **recidivist** offenders. In a functioning society, crime prevention is part of everyday life. While prevention can be all- **pervasive** at the grassroots, it is oddly neglected in mass media and political discourses. When politicians, talkback radio hosts and newspaper editorialists pontificate about crime and **possible** remedies, it is comparatively rare for them to mention prevention. Overwhelmingly, emphasis is on policing, sentencing and other 'law and order' responses.

Options:

crime, recidivist, possible, form, protect, pervasive, practice, maintain, unlimited
(APEUni Website / App FIBR #139)

103. Plates

In geologic terms, a plate is a large, rigid slab of solid rock. The word tectonics comes from the Greek **root** "to build". Putting these two words together, we get the term plate tectonics, which **refers** to how the Earth's surface is built of plates. The theory of plate tectonics **states** that the Earth's outermost layer is **fragmented** into a dozen or more large and small plates that are moving **relative** to one another.

Options:

argue, foundation, relative, refers, states, fragmented, root, relevantly, pieced, talks
(APEUni Website / App FIBR #143)

104. Neuroscientists

We now know through the work of neuroscientists that the human brain is wired to mimic other people, and this mimicry involves actual involuntary physiological **experience** in the observer. Human beings tend to **imitate** actions that they see. Physiologically, our brains include mirror neurons, which **react** to actions that are seen as if we are doing the action ourselves. It is largely an unconscious and automatic experience. When we hear people speak, observe their vocal **nuances**, watch their posture, gestures, and facial expressions, etc, neural networks in our brains are stimulated by the "shared representations" generating feelings within us that **reflect** the experience of those we are observing.

Options:

experience, nonsense, feeling, aim, imitate, react, nuances, differences, moderate, reflect
(APEUni Website / App FIBR #146)

105. Higher Education Qualifications

Higher education qualifications provide a substantial **advantage** in the labour market. Higher education **graduates** are less likely to be unemployed and **tend** to have higher incomes than those without such qualifications. Having a highly educated **workforce** can also lead to increased productivity and innovation and make Australia more **competitive** in the global market.

Options:

aggressive, workforce, weakness, grudge, competitive, tend, graduates, advantage
(APEUni Website / App FIBR #113)

106. Steven Pinker

Steven Pinker, a cognitive psychologist best known for his book "The Language Instinct", has called music "auditory cheesecake, an exquisite confection crafted to tickle the sensitive spots of at least six of our mental faculties." If it **vanished** from our species, he said, "the rest of our lifestyle would be **virtually** unchanged." Others have argued that, on the **contrary**, music, along with art and literature, is part of what makes people human; its absence would have a brutalising effect. Philip Ball, a British science writer and an **avid** music enthusiast, comes down somewhere in the middle. He says that music is **ingrained** in our auditory, cognitive and motor functions. We have a music **instinct** as much as a language instinct, and could not rid ourselves of it if we tried.

Options:

sense, virtually, vanished, contrast, remained, avid, avoidable, ingrained, instinct, contrary
(APEUni Website / App FIBR #112)

107. Landlords (Incomplete)

Points: In Rome times(?), landlords showed great defense, supplying food to the town, and then cultivated fields were limited. ... in remote areas ... no access.

(APEUni Website / App FIBR #18)

108. The Sun and the Moon

In these distant times the sun was seen to make its daily **journey** across the sky. At night the moon appeared. Every new night the moon waxed or waned a little and on a few nights it did not appear at all. At night the great dome of the heavens was dotted with tiny specks of light. They **became** known as the stars. It was thought that every star in the heavens had its own purpose and that the **secrets** of the universe could be discovered by making a study of them. It was well known that there were wandering stars, they appeared in different nightly positions against their neighbours and they became known as planets. It took centuries, in fact it took millennia, for man to **determine** the true nature of these

wandering stars and to evolve a model of the world to accommodate them and to **predict** their positions in the sky.

Options:

pivot, determine, assume, predict, secrets, seemed, became, journey
(APEUni Website / App FIBR #103)

109. Cuteness

Cuteness in offspring is a **potent** protective mechanism that **ensures** survival for otherwise completely **dependent** infants. Previous research has linked cuteness to early ethological ideas of a "kindchenschema" (infant schema) where infant facial features serve as "innate releasing mechanisms" for **instinctual** caregiving behaviours. We propose extending the concept of cuteness beyond visual features to **include** positive infant sounds and smells. Evidence from behavioural and neuroimaging studies links this extended concept of cuteness to simple "instinctual" behaviours and to caregiving, protection and complex emotions. We review how cuteness **supports** key parental capacities by igniting fast privileged neural activity followed by slower processing in large brain networks also involved in play, empathy, and perhaps even higher-order moral emotions.

Options:

invalid, ensures, include, contain, dependent, instinctual, proper, supports, proves, deliberate, guaranteed, potent
(APEUni Website / App FIBR #92)

110. Shark's Personalities

Down the road, the study authors write, a better understanding of sharks' **personalities** may help scientists learn more about what drives their choice of things like prey and **habitat**. Some sharks are shy, and some are outgoing; some are **adventurous**, and some prefer to stick close to what they know, information that could prove useful in making sense of larger species-wide behaviour **patterns**.

Options:

personalities, offspring, dangerous, habitat, patterns, extrovert, adventurous
(APEUni Website / App FIBR #89)

111. Light Pollution

The widespread use of artificial light in modern societies means that light pollution is an increasingly common feature of the environments humans inhabit. This type of pollution is **exceptionally** high in coastal regions of tropic and temperate zones, as these are areas of high rates of human population growth and settlement. Light pollution is a threat for many species that inhabit these locations, particularly those whose ecology or behaviour depends, **in some way**, on natural cycles of light and dark. Artificial light is known to have detrimental effects on the ecology of sea turtles, particularly at the hatchling stage when they emerge from nests on natal beaches and head towards the sea. Under natural conditions, turtles hatch predominantly at night (although some early morning and late afternoon emergences occur) and show an innate and well-directed orientation to the water, **relying** mostly on light cues that attract them toward the brighter horizon above the sea surface. Artificial lighting on beaches is strongly attractive to hatchlings and can cause them **to move away from** the sea and **interfere** with their ability to orient in a constant direction. Ultimately, this disorientation due to light pollution can lead to death of hatchlings from exhaustion, dehydration and predation.

Options:

pending, by the way, exceptionally, to move away from, disturb, to stay away from, interfere, in some

way, specifically, relying

(APEUni Website / App FIBR #87)

112. Omniscience

Omniscience may be a foible of men, but it is not so of books. Knowledge, as Johnson said, is of two **kinds**, you may know a thing yourself, and you may know where to find it. Now the amount which you may actually know yourself must, at its best, be limited, but what you may know of the **sources** of information may, with proper training, become almost boundless. And here come the **value** and use of reference books—the working of one book in connection with another—and applying your own **intelligence** to both. By this means we get as near to that omniscient volume which tells everything as ever we shall get, and although the single volume or work which tells everything does not exist, there is a vast number of reference books in existence, a knowledge and proper use of which is essential to every intelligent person. Necessary as I believe reference books to be, they can easily be made to be **contributory** to idleness, and too mechanical a use should not be made of them.

Options:

sides, output, property, expense, kinds, sources, value, intelligence, contributory, devoted

(APEUni Website / App FIBR #85)

113. Genius

Genius, in the popular conception, is inextricably tied up with precocity – doing something truly creative, we're inclined to think, requires the freshness and exuberance and energy of youth. Orson Welles made his masterpiece, "Citizen Kane," at twenty-five. Herman Melville wrote a book a year **through** his late twenties, culminating, at age thirty-two, with "Moby-Dick." Mozart wrote his breakthrough Piano Concerto No. 9 in E-Flat-Major at the **age** of twenty-one. In some creative forms, like lyric poetry, the **importance** of precocity has hardened into an iron law. How old was T. S. Eliot when he wrote "The Love Song of J. Alfred Prufrock" ("I grow old ... I grow old")? Twenty-three. "Poets peak young," the **creativity** researcher James Kaufman maintains. Mihály Csíkszentmihályi, the author of "Flow," agrees: "The most creative lyric verse is believed to be that written by the young." According to the Harvard psychologist Howard Gardner, a leading **authority** on creativity, "Lyric poetry is a **domain** where **talent** is discovered early, burns brightly, and then peters out at an early age."

Options:

talent, industry, key, intellectual, domain, originality, creativity, icon, across, time, age, through, importance, authority

(APEUni Website / App FIBR #83)

114. Kathryn Mewes

Kathryn Mewes does not meet bohemian, hippy parents in her line of work. Typically one, or both, of the parents she sees work in the City of London. "Professionals seek professionals," she says. Originally a nanny, Mewes is now a parenting consultant, advising couples privately on changing their child's behaviour, **as well as** doing corporate seminars for working parents. Her clients find they are unprepared for the chaos and unpredictability that having a child can entail. "Parents are getting older, they have been in control their **whole lives** and been successful. Suddenly a baby turns up and life turns on its head." Nicknamed the "Three-Day Nanny" **because of** her pledge to fix behavioural problems in children under the age of 12 within three days, she is filming a new Channel 4 television series demonstrating her techniques. The **role** of the parenting consultant – distinct from that of a nanny – has developed, she says, as people are used to buying in expertise, such as personal trainers or, in her case, parenting advice.

Options:

at the meantime, because, role, play, because of, whole lives, identity, entire life, as well as
(APEUni Website / App FIBR #81)

115. Ikebana

More than simply putting flowers in a **container**, ikebana is a disciplined art form in which nature and humanity are brought together. Contrary to the idea of a particolored or multicolored **arrangement** of blossoms, ikebana often emphasizes other areas of the **plant**, such as its stems and leaves, and puts emphasis on shape, line, and form. Though ikebana is an **expression** of creativity, certain rules govern its form.

Options:

crevice, container, commitment, creature, arrangement, plant, expression, illusion
(APEUni Website / App FIBR #71)

116. Sportswomen

Sportswomen's records are important and need to be preserved. And if the paper records don't **exist**, we need to get out and start interviewing people, not to put too fine a **point** on it, while we still have a **chance**. After all, if the records aren't kept in some form or another, then the stories are **lost** too.

Options:

Appear, focus, admit, exist, opportunity, point, chance, lost, disappear
(APEUni Website / App FIBR #68)

117. History

History is selective. What history books tell us about the past is not everything that happened, but what historians have **selected**. They cannot put in everything: choices have to be made. Choices must similarly be made about which aspects of the past should be formally taught to the next generation in the shape of school history lessons. So, for example, when a national school curriculum for England and Wales was first discussed at the end of the 1980s, the history curriculum was the subject of considerable public and media **interest**. Politicians argued about it; people wrote letters to the press about it; the Prime Minister of the time, Margaret Thatcher, **intervened** in the debate.

Options:

passion, interest, screened, paused, selected, intervened
(APEUni Website / App FIBR #184)

118. Ice Storm

An ice storm is a type of **weather** when **cold** rainfall comes down into the cold air and the water turned into **ice**. Once there were **more** than 16,000 households which had a blackout **during** an ice storm as the cables snapped with ice weighing on them.

Options:

weather, cold, icy, more, during, rather, climate, after, ice
(APEUni Website / App FIBR #80)

119. Pre-Raphaelitism

Pre-Raphaelitism was Britain's most significant and influential 19th-century art movement. Founded in 1848, it **centered** on a group of three young artists: William Holman Hunt, Dante Gabriel Rossetti and John Everett Millais. These artists sought to revive English art by radically turning away from the old

studio **tradition** and bringing painting into direct **contact** with nature. With an eye for absolute **accuracy**, every detail was now to have intense realist as well as **symbolic** meaning.

Options:

symbolic, delicacy, accuracy, counted, persuasive, centered, tradition, relation, contact, contract
(APEUni Website / App FIBR #182)

120. American Executive

The American executive, unlike the British, has no **connection** with the legislature, and this lack of **coordination** between executive and legislature is one of the **distinctive** features of American federal government. The Constitution guarded against executive control by **disqualifying** federal officials, whether civil or military, from membership in Congress.

Options:

disqualifying, importance, obvious, coordination, distinctive, accepting, connection
(APEUni Website / App FIBR #180)

121. AVG

Currently, there is concern about the increasing amount of time children spend in sedentary activities, the number of children who fail to achieve **minimum** daily physical activity guidelines (i.e. 60 min of moderate-to-vigorous intensity activities every day), and the apparent increase in obesity prevalence as a result of such sedentary **behaviors**. Screen-based activities, including television viewing and playing computer games are among the most frequently observed sedentary activities that children partake with children spending 2.5–4 h per day participating in such activities. The introduction of “active video games” (AVGs) into the gaming market presents an opportunity to convert traditional, sedentary screen-time into active screen-time and thus increase total daily energy expenditure (EE). Modern AVGs utilize cameras and motion sensors to allow the gamer to physically perform a variety of actions, **dependent** on the console, such as swinging a tennis racquet or running. The most demanding AVGs provided similar responses to walking and, based on international standards, should be classified as low-intensity activities. Whilst AVGs may provide children with a better alternative to sedentary gaming, they are not a sufficient **replacement** for normal physical activity, e.g. sports and outdoor play.

Options:

enough, decisions, repetition, focusing, behaviors, dependent, minimum, replacement
(APEUni Website / App FIBR #173)

122. Movie (Incomplete)

Points: A movie is a sequence of still pictures. A __ (separate/continuous) movement ... is an __ (illusion/idea). When you see the first picture, you remember ... it's a ... phenomenon. When you see the second picture, your brain will ... __ (blend) into the first one.

(APEUni Website / App FIBR #167)

123. Teenage Daughter

Your teenage daughter gets top marks in school, captains the debate team, and volunteers at a shelter for homeless people. But while driving the family car, she text-messages her best friend and rear-ends another vehicle. How can teens be so clever, accomplished, and responsible—and reckless **at the same time**? Easily, according to two physicians at Children's Hospital Boston and Harvard Medical School (HMS) who have been **exploring** the **unique** structure and chemistry of the **adolescent** brain. “The teenage brain is not just an adult brain with fewer miles on it,” says Frances E. Jensen, a professor of

neurology. "It's a paradoxical time of **development** . These are people with very **sharp** brains, but they're not quite sure what to do with them." Research during the past 10 years, powered by technology such as functional magnetic resonance imaging, has revealed that young brains have **both** fast-growing synapses and sections that remain unconnected.

Options:

explored, adult, respectively, sharp, exploring, unique, adolescent, at the same time, both, development
(APEUni Website / App FIBR #10)

124. Volcanoes

Volcanoes blast more than 100 million tons of carbon dioxide into the atmosphere every year but the gas is usually **harmless** . When a volcano erupts, carbon dioxide spreads out into the atmosphere and isn't **concentrated** in one spot. But sometimes the gas gets trapped **underground** under enormous pressure. If it escapes to the surface in a dense **cloud** , it can push out oxygen-rich air and become deadly.

Options:

cloud, concentrated, dangerous, harmless, underground, aimed, air, harmful, atmosphere, underwater, collection, some, fact
(APEUni Website / App FIBR #102)

125. Kindness Campaign

Fortunately, educators have access to many online resources that are **especially** useful when helping children along the path to peace. The Young Peacemakers Club, started in 1992, provides a Website with resources for teachers and **information** on starting a Kindness Campaign. The World Centers of Compassion for Children International call attention to children's rights and how to help the **victims** of war. Starting a Peacemakers' Club is a praiseworthy venture for a class and one that could spread to other classrooms and ideally affect the culture of the **entire** school.

Options:

forward, respectively, especially, victims, cooperative, information, prisoners, entire
(APEUni Website / App FIBR #67)

126. Duel

A "duel of honour" was a way of settling disputes between gentlemen over some injury or insult. The **fight** had to be arranged privately because duelling was never **legal** , but it became common in the 17th century. A social code governed the duel of honour and, as long as the rules were **kept** to, the survivor could usually escape without being punished by the law. Duels were fought with either pistols or swords, but pistols became the more usual **weapon** after swords went out of fashion at the end of the 18th century.

Options:

solution, fight, gun, kept, legal, obeyed, weapon
(APEUni Website / App FIBR #44)

127. Reading

Reading is an active process, not a **passive** one. We always read within a **specific** context, and this affects what we notice and what seems to matter. We always have a purpose in reading a text, and this will shape how we **approach** it. Our purpose and background knowledge will also **determine** the strategies we use to read the text.

Options:

predominate, specific, approach, digital, determine, passive, volume
(APEUni Website / App FIBR #11)

128. Botswana

Although Botswana is rich in diamonds, it has high unemployment and stratified socioeconomic classes. In 1999, the nation **suffered** its first budget deficit in 16 years **because** of a slump in the international diamond market. Yet Botswana **remains** one of the wealthiest and most stable countries on the African **continent** .

Options:

suffered, endure, while, continent, remains, enjoyed, because
(APEUni Website / App FIBR #1)

Multiple Choice (Single)

1. Number of Languages (Incomplete)

Points: Number of languages in tropical areas and in cold areas varies. More languages are in tropical areas, like Bangladesh, and fewer languages are in countries at high latitudes, like Russia.

(APEUni Website / App RMCS #166)

2. Iceberg

Original:

B-15 broke off from the Ross Ice Shelf in Antarctica. It was the largest iceberg ever documented, with a surface area of more than 4,200 square miles—more than twice the size of the state of Delaware. After it started breaking up, the largest of its pieces, B-15a, drifted along the coast of Antarctica, lingered on a shallow seamount, and collided with an ice tongue, before running aground and breaking again. Late in 2007, the largest remaining chunk floated out into the South Pacific where, in the warmer water, it began to disintegrate. For the whole of the next year, the ocean was noisier than usual. All the way up past the equator, 4,350 miles or so away from where B-15a broke apart, hydrophones that scientists from the National Oceanic and Atmospheric Administration (NOAA) had suspended underwater were picking up strange signals. Another set of hydrophones, this one in the Juan Fernández Islands, off the coast of Chile, picked up the noise, too, even louder. When the scientists used the two sets of data to determine the source of the noise, they found the most likely culprits: B-15a and C-19a, another giant iceberg. Twenty years ago, not so long before B-15 broke off from Antarctica, “we didn’t even know that icebergs made noise,” says Haru Matsumoto, an ocean engineer at NOAA who has studied these sounds. But in the past few years, scientists have started to learn to distinguish the eerie, haunting sounds of iceberg life—ice cracking, icebergs grinding against each other, an iceberg grounding on the seafloor—and measure the extent to which those sounds contribute to the noise of the ocean. While they’re just now learning to listen, the sounds of ice could help them understand the behavior and breakup of icebergs and ice shelves as the poles warm up.

Question:

Where did the largest piece off from B-15 eventually go?

Options:

- A) Seafloor
- B) Antarctica
- C) Chile
- D) South Pacific

Answer:

B

(APEUni Website / App RMCS #165)

3. Social Scientists

Original:

Social scientists use particular methods to gather qualitative evidence, from observation to interview, but they also use autobiographical accounts, journalism, and other documentary material to flesh out and add meaning to statistics. As with reading numbers, reading textual evidence requires us to practice, to set time aside to learn how to do it, and to understand the conventions of writing which operate in the different forms of writing we encounter. One of the main problems with reading textual evidence, though, is that, unlike the relationship most of us have with numbers where we may use them at a pretty

basic level, most of us are, if anything, over-familiar with words. When we want to understand their value as social science evidence we need to forget how familiar we are with first person accounts and everyday speech – for example, in newspapers, magazines, and books – and learn a different approach to them. Social scientists use observation, interviews and even print journalism as evidence for the claims they make. They may collect evidence through questionnaires with pre-set questions and by open-ended interviews which allow respondents to speak for themselves. They may observe social relations explicitly as social scientists or may participate themselves in a particular community to gain 'inside' information. Social scientists also draw on print journalism on occasion and may use the same sources, for example official statistics, and the work of other social scientists to support their claims. We need to remember, though, that journalists do not need to present the same rigorous referencing and support for their claims as social scientists are required to do. Most importantly, newspaper and magazine articles are written under commercial pressures; for example they must help to sell the newspaper by being deliberately provocative, or by reflecting the dominant views of its readers.

Question:

According to this passage, what do social scientists use written sources to do?

Options:

- A) Formulating questionnaires and interview questions.
- B) Advising them on how to collect qualitative evidence.
- C) Adding information to other data they have collected.
- D) Change their understanding of numbers.

Answer:

C
(APEUni Website / App RMCS #115)

4. John Robertson

Original:

When he was awarded an Honorary Degree by the University of Newcastle, even John Robertson himself must surely have looked back in wonder at his astonishing rise to success. The year was 1910, and those assembled were to hear not only of his generosity to the University, which enabled it to contribute to the pioneering research into tropical diseases being carried out at that time, but also of his humanitarian work in southern Africa, where he was ahead of his time in improving the working conditions of local mine workers. To those who knew John in his youth, it will have come as no surprise to hear of his success. He was now enjoying the rewards of the fierce determination, desire to succeed and extraordinary ability to acquire knowledge, which they had noticed in the young man.

Question:

What does the reader of this text learn about John Robertson?

Options:

- A) He was born in Africa.
- B) His abilities were evident at a young age.
- C) He studied medicine.
- D) He completed his degree in 1910.

Answer:

B

(APEUni Website / App SST #631)

2. African American Rights (Audio Available)

Original:

During this period of time, there was a huge surge of activism taking place to reverse this discrimination and injustice. Activists worked together and used non-violent protest and specific acts of targeted civil disobedience, such as the Montgomery Bus Boycott and the Greensboro Woolworth Sit-Ins, in order to bring about change. Much of this organizing and activism took place in the Southern part of the United States; however, people from all over the country—of all races and religions—joined activists to proclaim their support and commitment to freedom and equality. For example, on August 28, 1963, 250,000 Americans came to Washington, D.C. for the March on Washington for Jobs and Freedom. They came to have their voices heard and listen to speeches by many civil rights leaders, especially Martin Luther King, Jr., who delivered what would become one of the most influential speeches in history. In the aftermath of World War II, African American civil rights efforts were hampered by ideological splits. The Southern system of white supremacy was accompanied by the expansion of European and American imperial control over nonwhite people in Africa and Asia as well as in island countries of the Pacific and Caribbean regions. Like African Americans, most nonwhite people throughout the world were colonized or economically exploited and denied basic rights, such as the right to vote.

3. Telescopes and Eyes (Audio Available)

Original:

Telescopes and eyes are both tools for collecting and detecting light. In fact, telescopes can be thought of as bigger, more powerful eyes. The type of lenses and mirrors and their arrangement determine some of the features of the telescope. The resolution of the telescope is a measure of how sharply defined the details of the image can be. The telescope's primary mirror may have a fraction. As a result, starlight is not brought to a focus at the same point, resulting in blurry images. The name 'telescope' covers a wide range of instruments. There are major differences in how astronomers must go about collecting light in different frequency bands. The telescope is widely used in the astronomy field because it is a digital detector, 100 times more efficient than our eyes. Now physicists have begun to develop a various quantum mechanism.

4. Technology Development (Incomplete)

Points: ... application ... technology development ... To form a company ... A group of people ... work out the solutions ... Higher level of confidence. 'application' is mentioned at both the beginning and the end. (APEUni Website / App SST #501)

5. Air Pollution (Audio Available)

Original:

In today's lecture I'm going to talk about changes in air pollution since the middle of the last century and what has created these changes. So, um — by the 1950s, air pollution was very visible with frequent thick black fogs known as 'smogs' in many large cities around the world. The main source of this pollution was from factories and it caused severe health problems. For example, a particularly severe smog in London in 1952 caused over four thousand deaths. Obviously something had to be done and in 1956 a Clean Air Act was introduced in Britain. This addressed the pollution from factories and the smogs soon disappeared. However, as you know, these days air pollution is still a big issue. The main difference between now and the 1950s is that you can't see it — it's invisible. Also, the main source of pollution now is from cars and lorries, and although these don't produce visible signs, this air pollution is still a significant risk to health. And one of the key factors in the rise of this type of pollution is that we have all become much more vehicle-dependent. There are far more cars and lorries, trains and planes than in the 1950s and this is now the main source of air pollution around the world.

6. Sociology (Incomplete)

Points: What is sociology? Sociology is a science that studies human behaviors and the structure any people are in, not very difficult. ... is easy. Academic construction in college is mentioned: how it has been an institutionalized subject at universities and in history most of sociologists weren't university professors but amateurs. History professors never say they are sociologists because they feel they are immature. Sociology involves various professions in the world, and is taught in many institutions around the world.

(APEUni Website / App SST #493)

7. Salt (Incomplete)

Points: We can run faster because we sweat more than other animals. When we sweat, we lose lots of water and salt from our bodies. People love sweet and salt. we love eating salty food. One third of ... markets produce salty food, so many people have high blood pressure. Physical exercises have impact on the heart and the blood pressure. One third of Americans have excessive intake of ... Humans can run longer because we sweat. But it's important to take some salt after long time exercises to prevent dehydration. Salt was as valuable as gold in ancient history. We need to be cautious when using salt because it can cause high blood pressure and other diseases.

(APEUni Website / App SST #488)

8. Risk Management (Incomplete)

Points: About of management of risks in investment by a lecturer from the Department of Finance. The board of directors should acknowledge the idea of the investment. Then, people should make a particular investment plan, which should be reviewed by the CEO and the CFO. 'risk shareholders' and 'apply strategy' are also mentioned.

(APEUni Website / App SST #424)

9. Human Rights (Incomplete)

Points: What exactly are the basic human rights? Who gets to pick them? Who enforces them, and how? The history behind the concept of human rights is a long one. Throughout the centuries and across societies, religions, and cultures we have struggled with defining notions of rightfulness, justice, and rights. But one of the most modern affirmations of universal human rights emerged from the ruins of World War II with the creation of the United Nations. The treaty that established the UN gives us one of its purposes to reaffirm faith in fundamental human rights. And with the same spirit, in 1948, the UN General Assembly adopted the Universal Declaration of Human Rights. This document, written by an international committee chaired by Eleanor Roosevelt, lays the basis for modern international human rights law. The declaration is based on the principle that all human beings are born free and equal in dignity and rights. It lists 30 articles recognizing, among other things, the principle of non-discrimination and the right to life and liberty. It refers to negative freedoms, like the freedom from torture or slavery, as well as positive freedoms, such as the freedom of movement and residence. It encompasses basic civil and political rights, such as freedom of expression, religion, or peaceful assembly, as well as social, economic, and cultural rights, such as the right to education and the right to freely choose one's occupation.

(APEUni Website / App SST #377)

10. Canada (Audio Available)

Original:

Canada is a country of the enormous natural resources. It is the world's largest exporter of forest products and a top exporter of fish, furs, and wheat. Minerals have played a key role in Canada's transformation into an urban-industrial economy. Alberta, British Columbia, Quebec, and Saskatchewan are the principal mining regions. Ontario and the Northwest (NWT) and Yukon Territories are also significant producer of uranium and potash, the third-largest of asbestos, gypsum, and nickel, and the fourth-largest of zinc. Oil and gas are exploited in Alberta, off the Atlantic coast, and in the northwest — huge additional reserves are thought to exist in the high Arctic; oil price is making extraction profitable at a growing number of the country's deposit. Canada is also one of the world's top hydroelectricity producers.

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

13. Absolutism (Explanation) (Audio Available)

Original:

With the concept of moral objectivism, what we're looking at is the idea that there can be some universal moral principles: some rules, some ideas and guidelines that are valid for all people in all social environments and all situations. The idea that we can essentially have some signposts or a road map to guide behavior is going to be consistent across all individuals. Now if we take a look at this in another perspective, we can come up with a view of moral absolutism. In the area of moral absolutism, basically, what we have is illustrated on the right-hand side of this slide, is a very firm and unyielding boundary between what is right and what is wrong. And so, within moral absolutism, basically what you have are these non-overrideable principles. They must be followed. They must never be violated and there were no exceptions. It is always right. It is always wrong. And nothing is subject to interpretation, and nothing is dependent upon the situation.

15. Energy of Internet (Audio Available)

Original:

The internet, the most powerful tool in terms of engineering made by humans, has the most complicated structure. What we call the Internet is made up of a lot of things, wires traversing the ocean, satellites and cell phone towers, massive data centers sending packets of information all over and devices. The internet can be connected via a modem, or an ADSL switch center, to a local landline telephone exchange network. It can connect us from Sydney to Melbourne and then to the U.S.. However, it takes energy for the transmission system to transmit information. For example, the longer email you write, the more energy is consumed. Meanwhile, there are more than 30 billion things connected to the Internet, like cell phones, laptops, credit card readers, smart TV, and so on, and each of them requires electricity. In total, Internet-connected devices probably use around five percent of the world's electricity. And most of the electricity comes from burning fossil fuels, which release greenhouse gases into the atmosphere.

16. Approach and Avoidance (Explanation) (Audio Available)

Original:

Approach and avoidance motivation is composed of three conceptually distinct components. Approach indicates a propensity to move toward (or maintain contact with) a desired stimulus, such as vocational plans. Avoidance indicates a propensity to move away from (or maintain distance from) an undesired stimulus in order to reduce anxiety. Motivation is defined as the energization and direction of behavior. The valence of stimuli is at the core of the distinction between approach and avoidance, with positively valenced stimuli typically leading to approach and negatively valenced stimuli typically leading to avoidance. Stimuli can be external or internal, implicit or explicit, conscious or non-conscious.

17. Credit Card (Incomplete)

Points: About a study by a banker on using credit cards, about how messages influence decisions. A bank issued credit cards to consumers but many of them did not use the cards. Then the bank asked the inactive consumers why, and found they feared possible loss. There are two groups of inactive credit card users. One group receives messages saying they will be offered benefits if they continue to use the credit cards. The other group receives messages saying they will be applied a penalty if they don't use the credit cards any more. 'potential loss of not using the cards' is mentioned a few times. The conclusion is that customers are more motivated by a threat to lose something than by potential gains or persuasive messages. Key words: being beneficial.

(APEUni Website / App SST #280)

18. DNA Pieces (Explanation) (Audio Available)

Original:

My lab works on the applications of synthetic biology, so we're very interested in doing useful things with biological systems. Up to now, life has evolved, and now we actually have the ability and the power to engineer it, to design it. And so I'm curious about what the natural world is going to look like in the future. So synthetic biology is sort of the next level of genetic engineering. So about 40 years ago, we being scientists and engineers, developed techniques to basically move pieces of DNA from one organism to another. And this was sort of done by physically cutting and pasting. Now we're moving beyond that where we can write DNA so we're no longer limited to the pieces. We can cut from one and put in another. We can chemically synthesize this DNA on a machine and put that into an organism. And now we can even create new organisms completely from scratch. So if you imagine a cell that's programed to make a useful compound, say, material or drug, then what you have is basically a micro-scale manufacturing unit. It's basically a cellular factory. And the cool thing about cellular factory is that when you want more factories, you love that cell grow and divide. So in in the lab, if we have one bacteria, we put it in a flask. The next day we come in. We have millions, if not billions of bacteria.

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

19. Needs (Incomplete)

Points: In the English language, not in the American language, the term 'need' has different meanings. When you say, 'I need a vacation', it is an expression of a strong desire but not a basic need. It also can

be an objective statement. For example, when a designer want to design a planet, the planet needs sunlight, water, organism systems, and so on. All the things mentioned above are essential to a planet. Meanwhile, This term is a multifunctional word which is very important and has benefits when used in the social environment. When someone lacks something as a psychological desire, 'need' is a psychological term as humans are involved in nature, and people's needs advance revolutions of social structures. (APEUni Website / App SST #273)

20. Patients' Recovery (Audio Available)

Original:

We have a long history to research on hospital design and patient recovery. A long time ago, people began to study therapeutic environments. For example, in 1855, Florence Nightingale recognized that color and form enhanced a patient's recovery. They found that fresh air and sunlight had positive impacts, and architecture also played as an important part. Views of the hospital's backyards can help patients rest well and sleep fast, and can also help relieve their stress and pain easily, because of the pleasant feelings caused by nature. Being Visited by friends or family members can help patients be better off sooner, as well as living alone in a single room. 90% of patients and nurses in hospitals agree that the well-designed hospital environment links to recovery rates.

(APEUni Website / App SST #269)

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

21. Newspaper Industry (Explanation) (Audio Available)

Original:

Because of the economic model, the newspaper industry has been shrinking drastically from the last 50 years of the 20th century in some states of America. Also as the economic model changed, newspapers increased the cash flow. However, there are still some newspaper industries losing money because of a decrease in advertising and buyers. They can't find buyers. Only a few newspapers have positive cash flow. Over 100 newspapers with cash flow in red had no money to publish the newspaper everyday. Some of them published three days per week. Small-sized newspapers only published once a week and had to go online. Some newspapers even disappeared. The staff working in newspaper industry decreased by 30–60% or more.

23. Automatic Driving (Similar) (Audio Available)

Original:

Transportation officials, advocates, companies and users around the world are talking about how automated vehicles will change transportation as we know it, autonomous vehicles are split into six levels of automation as defined by the Society of Automotive Engineers. Zero, no automation. One, driver

assistance. Two, partial automation. Three, conditional automation. Four, high automation. And five, full automation. Humans are responsible for monitoring the vehicle and performing most functions in levels one and two, while an automated driving system performs all functions and levels three, four and five. Vehicles and levels three and up are considered highly automated vehicles. As vehicles progress to higher levels of automation, less responsibility is put on the driver for monitoring the vehicle. Here's how an automated vehicle works. Several systems work in conjunction with each other to control an automated vehicle. Radar sensors dotted around the car monitor the position of vehicles nearby. Video cameras detect traffic lights, read road signs and keep track of other vehicles while also looking out for pedestrians and other obstacles.

24. Nature of Business (Incomplete)

Points: The nature of the business entity is to exchange something you have for something you desire. The function of marketing is to transfer products from suppliers to consumers to meet their demands. Meanwhile, the capital gain is crucial, and it is important to assure capital returned because this is how investment and production can continue.

(APEUni Website / App SST #254)

25. Three Primary Colours (Incomplete)

Points: Yellow is the most common color in nature, such as in flowers. People could make yellow as early as in the 19th century. Red comes from insects and soil. And blue comes from a plant called indigo, which is the only plant that contains molecules as the source of the color blue.

(APEUni Website / App SST #252)

26. Mars (Explanation) (Audio Available)

Original:

Mars is the fourth planet from the sun and the second smallest planet in the solar system after Mercury, named after the Roman god of the war. It is often referred to as a red planet because the iron oxide prevalent on its surface gives it a reddish appearance. Mars is a terrestrial planet with a thin atmosphere, having surface features reminiscence both of the impact crater of the moon, and the volcanoes, valleys, deserts, and polar ice caps of the earth. The rotational period and the season cycles of the Mars are likewise similar of those of earth, as it was the tilt that produce the seasons. Mars is the site of the Olympus Mons, the largest volcano and the second largest known mountain in the solar system, and the Valles Marineris, one of the largest canyon in the solar system. Until the first successful Mars flyby in 1965 by Mariner 4, many speculated about the presence of the liquid water on the planet surface. This was based on observed periodic variation in the light and the dark patches, particularly in the polar latitude, which appeared to be seas and continents. Geological evidence gathered by the unmanned mission suggested that Mars once had large scale of water coverage on the surface on some earlier stages existence.

Answer:

This lecture mainly talks about Mars. Firstly, the speaker emphasizes that it is often referred to as a red planet because of the iron oxide prevalent on its surface. Also, he mentions that the rotational period and the season cycles of the Mars are similar of those of earth. Lastly, the speaker believes that Mars once had a large scale of water coverage. In conclusion, this lecture is very informative.

27. History of English (Explanation) (Audio Available)

Original:

English, as you have already read, is not a pure language. I don't think there really are any pure languages in the world. But English is definitely not a pure language. English, in fact, has borrowed from over 350 languages in its history. So it's a variety of many languages. Some people say it's like a dog, a mongrel dog, a dog that has been made up of many different dogs. The English language is like that. By looking at the history of the English language we learn about the history of the English people. The two things are closely connected. So, in fact, today we are not only learning about language but we are learning about history. The fact that English has borrowed words from over 350 languages has been viewed differently throughout history. So for example in Shakespeare's time people were very angry about words which were not, they thought, original English words – words which came from other languages, they didn't like them.

Answer:

This lecture mainly talks about the English language's history. Firstly, the speaker emphasizes English is definitely not a pure language, which has borrowed from many languages. Also, she mentions we are not only learning about language but we are learning about history, which are closely connected. Lastly, the speaker believes borrowed words have been viewed differently throughout history. In conclusion, this lecture is very informative.

28. Genetic Impact (Explanation) (Audio Available)

Original:

Since the discovery of DNA structure, people have believed that genes have an impact only on people's physical structure. However, the study of mapping of genes in 2001 found that there is a genetic responsibility to human's physical and psychological behaviors, which has changed the way we understand our behaviors. Findings from behavioral genetic research have broadly impacted modern understanding of the role of genetic and environmental influences on behavior. The research on genes has provided integrating information, and the findings can benefit biologists, psychologists and neuroscientists. Qualitative research has fostered arguments that behavioral genetics is an ungovernable field without scientific norms or consensus, which fosters controversy.

29. Sign Language (Explanation) (Audio Available)

Original:

So the topic for today is abstraction. And this is a very important layer of computer because you can't do anything with a computer unless you have a symbolic system in place. Right. So we're talking about the origin of symbolic systems. Language is a classic symbolic system. Apparently one theory for why language evolved is that people communicated with sign language and with movement quite well for a long time. And it turned out that they wanted to communicate even while they were doing things. So, while they were trying to strangle the dinosaur, not the dinosaurs, the rhinoceros, they wanted to say

"Come help me" and they use sign language to do it. They had to let go of the rhinoceros and the rhinoceros ran away. So you can see that it's a good idea to be able to do something with your hands and be able to communicate at the same time. Hence there come words and language.

30. HTML (Explanation) (Audio Available)

Original:

Well, the 90s came around and finally it clicked that normal people could get online, which hadn't really clicked before. And the little trick that finally put it together was Tim Berners Lee HTML, so thank you to the UK for providing the fellow who finally put the missing link in place. And then what happened in the 90s was this extraordinary outpouring of creativity and constructiveness from millions and millions of people. There were millions of people making Web pages, creating content online, creating social experiments, creating lessons—all sorts of things. And the first decade of the web took place without much of a profit motive, without any particular charismatic figures driving it, without fear, without a desire for an afterlife or any other religious gambits, without advertising, without any of the traditional motivational schemes. It simply happened because people enjoyed it and it was a good idea.

31. Housing Price in Australia (Explanation) (Audio Available)

Original:

Well, it's like, why is Australian housing is so expensive? Essentially, it's showing of how well the Australian economy has been doing over the last 15 years. We have had 15 years more or less of an uninterrupted economic growth during which average earning has been raised by close to 90 percent. While over the course of that period, the standard variable mortgage rate has roughly halved. That meant that the amount which a typical home buying household can afford to borrow under rules which aren't strictly applied as they used to be had more than doubled. Over the same period, rising immigration in falling average household size has meant that the number of households looking for accommodation has risen by about one and a half million. That's around 200 thousand more than the number of dwellings has increased by. So you have had a substantial increase in the purchasing power of households. No net increase in the supply of housing enhance all that addition purchasing power has gone into pushing up the price of housing.

Answer:

This lecture mainly talks about why Australian housing is so expensive. Firstly, the speaker emphasizes that an uninterrupted economic growth is a main reason. Also, he mentions that the standard variable mortgage rate has roughly halved. Lastly, the speaker believes that rising immigration in falling average household leads to a substantial increase in the purchasing power of households. In conclusion, this lecture is very informative.

33. Change of Body Fat (Explanation) (Audio Available)

Original:

I would like to look at a recent survey conducted by Canadian researchers on diet. Total thirty-one women volunteered in the survey. They've been told to participate in the exercise program without changing their diet. After careful observation, the researchers actually found that some volunteers experienced a body fat change after six months from the day they've started the experiment. The finding further stated that some actually lost a significant amount of fat, which led to a decrease in body mass. On the other hand, there were others who did not lose fat at all. So, I guess, the study concludes that there must be two explanations. Those who did not lose weight must have eaten more. And another factor is that it is because there are psychological reasons—not to believe in losing fat.

34. Brand Image (Explanation) (Audio Available)

Original:

It turns out consumers are incredibly smart. They combine a lifetime of experience with that brand, combined with whatever its designed appeal is, how it makes them feel, performance and price. And they do all that in a few seconds. So brands are essential to our business to allow us to deliver the increased consumer value associated with our products. We're not into the generic business of toilet paper. We're into probably about the softest product you're going to want to buy. We're not into a generic soap. We're into the best, you know, stain removing laundry detergent you're going to buy. But we're going to want you to remember that as the tide brand. Now, that means there's a second moment of truth. If they do select you and they pay 50% more than they would have paid for Walmart's brand, when they get home, it'd better perform when it's used. And here's where the science starts, folks. There's an amazing number of fundamental engineering contradictions, right? Airplanes deal with, you know, weight and strength. I want something that's light but strong. That's an engineering contradiction. Once I deal with our things, got to be strong but soft. They have to be strong even when they're wet. Bright but not tear, liquids, mixtures, not common things, but they need... they can't separate. You don't want to shake before use, before you pour down in your washing machine.

35. Facial Recognition (Explanation) (Audio Available)

Original:

Last week we talked about how people recognize objects and really how well people recognize objects, given how difficult the problem is, given how objects can be seen in all different sorts of illumination, in different positions, in different angles. And yet we are able to extract that information, we are able to take the visual stuff out there, interpret it in a way that allows us to recognize all the different things that we can see in our environment. Today we're gonna kind of carry on looking at that, but we gonna look at what's really a special class of objects. That's the human face. So we gonna look at how we recognize human faces and how we do it quite as well as we do. We're really expert at recognizing faces. So again we can think about how do we take that visual information and how do we transform it into a form which allows us to put a name to a face, and to do all the other clever things that we can do with faces. So I'm gonna start off again by just pointing out that it's a hard problem. Face recognition is a hard problem, and it's a clever thing we do. If you think about all the different types of faces you can recognize, and all the different types of information you can get from the face, you kind of start to appreciate how well we can do face recognition.

Answer:

This lecture mainly talks about how people recognize human faces. Firstly, the speaker emphasizes how we take visual information and transform it to allow us to recognize a face. Also, he mentions that face recognition is a hard problem, and it is a clever thing we do. Lastly, the speaker believes that people start to appreciate how well we can do face recognition. In conclusion, this lecture is very informative. (APEUni Website / App SST #207)

36. Wildlife as Food (Explanation) (Audio Available)

Original:

In my view, it's impossible not to talk about wildlife, and not think about its role in livelihood. And I guess part of that is my own view, part of the research that I do in Africa. In most Eastern West Africa, I look at the role. All the humans rely on wildlife as the source of food, and also the source of income. And we talk about our wildlife, if we talking about fish, we are talking about what is probably the single most important source of protein for human that across the globe. And, so, billions of, or more than a billion of people rely on fish as their primary source of animal protein, and most of these people living in poverty. So the management of wild fish resource in that sense causing incredibly important to livelihoods and health. And also, wildlife tourism is the multi-billion-dollar industry, and in many places, such as Africa, South America, it can be the No.1 source of income. It can be the No.1 source of foreign income for economies.

Answer:

This lecture mainly talks about wildlife as food. Firstly, the speaker emphasizes that in most of Africa, all the humans rely on wildlife as the source of food. Also, he mentions that more than a billion of people rely on fish as their primary source of animal protein. Lastly, the speaker believes that wildlife tourism is the multiple billion dollars' industry. In conclusion, this lecture is very informative.

37. Organization Study (Incomplete)

Points: The two male speakers are talking quickly about organization study and how they appreciate it. Organization study is about a whole family of disciplines, such as social science, psychology, sociology, history, and cultural studies. The speaker enjoys studying organization study because of its broad range and its breadth. What organization study has taught him is liberating ideas without disciplinary boundaries.

(APEUni Website / App SST #176)

38. Industrial Revolution (B) (Explanation) (Audio Available)

Original:

Through the 1950s and into the 1960s, the idea of the Industrial Revolution was that it was the work of some genius inventors who created machines used primarily in the textile industry but also in mining that eliminated blocks to assembly line production. Then everybody was crowded into factories and the new brave world opened up. In fact, one of the most interesting books and great classics that is still in print was written by an economic historian at Harvard who's still alive called David Landes. It's a good book called *The Unbound Prometheus*, which was basically that. Some of the inventions that I briefly describe in your reading, the spinning Jenny, etc, refer to that. Well, and that kind of analysis led one to concentrate on England where the Industrial Revolution began, and to view industrialization as beginning a situation of winners and losers by not going as fast. Now, that analysis has been really rejected greatly over the past years, because Industrial Revolution is measured by more than simply large factories with industrial workers and the number of machines. This is the point of the beginning of this. The more that we look at the Industrial Revolution, the more that we see that the Industrial Revolution was first and foremost an intensification of forms of production, of kinds of production that were already there. And thus, we spend more time looking at, you know, the intensification of artisanal production, craft production, of domestic industry, which we've already mentioned, that is people mostly women but also men and children, too, working in the countryside. The rapid rise of industrial production was very much tied to traditional forms of production.

Answer:

This lecture mainly talks about the Industrial Revolution. Firstly, the speaker emphasizes it was the work of some genius inventors who created machines used primarily in the textile industry. Also, he mentions that that analysis has been really rejected greatly over the past years. Lastly, the speaker believes that the rise of industrial production was very much tied to traditional forms of production. In conclusion, this lecture is very informative.

39. Internet (Explanation) (Audio Available)

Original:

Internet was invented by people who were good at programming, and people keep optimizing it for different purposes. So Internet has been growing organically. Internet can achieve many things but has advantages and disadvantages. The email system was designed by graduate students and researchers who know and trust each other. Using email needs trust between the senders and the receivers as the authentication process was not originally built in this system. Email authentication is a technical solution to proving that an email is not forged. In other words, it provides a way to verify that an email comes from who it claims to be from. Email authentication is most often used to block harmful or fraudulent uses of email such as phishing and spam. In practice, we use the term "email authentication" to refer to

technical standards that make this verification possible. Initially, the email system didn't consider security because there was no suspicion between them at that time, and there was no authentication process built into this system.

40. Architecture Design (Explanation) (Audio Available)

Original:

Design of buildings is important according to architectural textbooks. At its roots, architecture exists to create the physical environment in which people live, but architecture is more than just the built environment, it's also a part of our culture. It stands as a representation of how we see ourselves, as well as how we see the world. There are poorly designed buildings, but also some great building works. In the Victoria Era, architects designed buildings based on bricks and other materials. The design of flaws was based on lighting as it would not only affect appearance but also health conditions. The materials that buildings are made of also matter. For example, the design of ground floors must ensure that the building is able to withstand the weight of the higher levels. In the 20th century, many old buildings with design flaws were demolished or modified through a natural selection process, which means they are an altered state rather than an original state. This is an application of Darwin's theory of natural selection to modification of old buildings, which means buildings should adapt to the new world to survive, or be pulled down. So, it's argued to be unfair to criticize the demolition, although some people believe that whether to be remained should be decided based on their nature and functions. As the world became more and more connected, the styles evolved, but even in modern construction, there is still an importance in honoring the cultural nuances in the built environment.

41. IT Development (Explanation) (Audio Available)

Original:

The history of software is of course very very new. And the whole IT industry is really only 6,70 years old which is extraordinary and to be so close to the birth of a major new technology, a major new discipline is quite remarkable given where we got to in those 6,70 years. And the progression has been not so much a progression as a stampede because Moore's Law, the rapid expansion in the power of computing and the rapid fall of the cost of computing and storage and communications has made it feasible for information technology to move into all sorts of areas of life that were never originally envisaged. What has happened is that there has been as I said a stampede for people to pick the low-hanging fruit. And that is what's guided the development of software and information technology over the past decades and continues to do so with a number of consequences that we will explore.

Answer:

This lecture mainly talks about the development of IT industry. Firstly, the speaker emphasizes that it is really only 67 years old. Also, he mentions the rapid expansion in the power of computing and the rapid fall of the cost of computing. Lastly, the speaker believes that that is what has guided the development of software and information technology over the past decades. In conclusion, this lecture is very informative.

42. Definition of Risk (Explanation) (Audio Available)

Original:

What's the literal definition of "risk"? Business schools use risk analysis. So, what do you mean by "risk", and we need a dictionary. When you look at dictionary, this is literal, literal definition of risk. What it says is, the definition for example, the possibility of injury, a dangerous element or factor, chance of, degree or possibility of such loss, and so on. So, risk has two parts, as you look at the literal definition of risk. One part is the consequence of some kind of particular danger, hazard loss. And the other is about the probability, of it: chance and consequence, OK? And then at least just as English language concerns, when you look up the word of safe and safety, which you'll learn as, it's a little bit of a loop, a little circular argument that free from harm or risks, secure from danger, harm or loss, the condition of being safe and so on for all. And why we take out of it? At least when we talk about safe at least in English language, we are talking about something that is safe, or it sounds safe.

Answer:

This lecture mainly talks about the literal definition of risk. Firstly, the speaker emphasizes risk has two parts, the consequence of particular danger and the probability. Also, he mentions it is a little bit of a loop and a little circular argument that are free from harm or risks. Lastly, the speaker believes when talking about 'safe', we mean something safe, or sounding safe. In conclusion, this lecture is very informative.

[There're audio records available for this question. Search by the question number at APEUni Website / App to listen.](#)

43. Telescope (Explanation) (Audio Available)

Original:

The aperture of a telescope is several times larger than the aperture of human eye so that the objects that can not be normally seen by unaided eye can be seen. Light-gathering power of a telescope is proportional to the area of its aperture and hence depends on the square of the radius of the mirror. Therefore, a 20 cm diameter telescope collects four times more photons than a 10 cm diameter telescope. A telescope can be equipped to record light over a long period of time, by using photographic film or electronic detectors such as photometers or CCD detectors while the eye has no capability to store light. A long-exposure photograph taken through a telescope reveals objects too faint to be seen with the eye, even by looking through the same telescope. A third major advantage of large telescopes is that they have superior resolution, the ability to discern fine detail. Small resolution is good. The resolution is directly proportional to the wavelength being observed and inversely proportional to the diameter of the telescope.

Answer:

This lecture mainly talks about telescope. Firstly, the speaker emphasizes that the aperture of a telescope is several times larger than the aperture of human. Also, he mentions that a telescope can be equipped to record light over a long period of time. Lastly, the speaker believes that large telescopes have superior resolutions, the ability to discern fine detail. In conclusion, this lecture is very informative.

44. Children's Life Quality (Incomplete)

Points: A male professor is giving his lecture. Well educated families have well-educated children who have sufficient education resources and support since they were born. According to studies, the life chance of a child has been set by 5 years old, which is a very disturbing fact. There is no obvious way to address the deep root of inequality in society.

Answer:

According to the professor's sociology research, the capacity of well-educated parents will remain in their prosperous children because these children have sufficient educational capacity and support since they were born. According to studies, the life chance of a child has been set by five years old, which is a compelling and disturbing fact. The professor cannot find obvious ways to address this deep root of inequality in society.

(APEUni Website / App SST #162)

45. Traveling & Transport in Paris (Explanation) (Audio Available)

Original:

There are a number of possible purposes for a social network. You now have a good understanding of how to analyze the basic characteristics of your social network or that of another individual. Network is a social relationship which helps transfer information such as traveling from one place to another. It also helps people get to different destinations more quickly if they need to travel in a long distance or two destinations. It is suitable for old cities with high-density population like Paris. There are thousands of trips and too many travelers everyday in Paris. The transportation network in Paris provides thousands of public services and links them together. A good network can help people with long-distance or multi-destination trips. In cities with high-density population such as Paris, people would better carefully plan their journeys by looking at the routes of the network in advance, to reduce the density of commuters at the same time.

46. Government Tricks (Explanation) (Audio Available)

Original:

I suppose it's the truism to point out that citizens need to be well informed. Maybe it's something we take for granted in our liberal western democracies. But there will be plenty of societies, well, that is run counter to explicit government policy. Many areas of the world still suffer from the reverie of the deliberate missing information. Governments, especially the unelected ones, but also some elected ones, have denied the events that have ever taken place. They pretend that other events did take place. They would help spin what they cannot deny. Ensure they've used every trick of the book, to pull the eyes of the world, and in an attempt to cover up their mistakes.

Answer:

This lecture mainly talks about citizens being well informed. Firstly, the speaker emphasizes that it is something taken for granted in western liberal democracies. Also, he mentions that many areas of the world still suffer from the reverie of the deliberate missing information. Lastly, the speaker believes that governments would help spin what they cannot deny. In conclusion, this lecture is very informative.

47. Youth Communities (Explanation) (Audio Available)

Original:

A research on 7000 young students and children in the United Kingdom is about how they participate in their communities, how they form values with character education and what influence them most. The outcomes involve parents, friends, schools and siblings, and researchers figure out which factors are essential and more important than others. Successful schools depend on the resources and support of their communities and schools at the centre of their communities are often the most successful schools. In turn, schools are vital to the social health of their local communities. Also, families are the first social unit in which children learn and develop. Good parenting can take different forms and be shaped by various social and cultural forces, but it invariably involves providing children with the support, care, love, guidance and protection that set the conditions for healthy physical, mental and social development. The research has also attracted attention and interest from many national policy makers and contacted me. (APEUni Website / App SST #155)

48. Human Rights (Explanation) (Audio Available)**Original:**

The Human Rights Act can be seen as far-reaching, some would argue controversial in the UK's history of rights. At the same time, it can be described as a somewhat cautious document that provides the starting point for a wider application of law to rights. In many ways, the freedom protections contained in the Human Rights Act were not new to people in the UK. The Act puts into UK law most of the clauses of the European Convention on Human Rights. The convention itself was devised following the end of the Second World War by the Council of Europe. UK law has played a significant role in the drafting of the Convention and the UK was among the first governments to ratify the convention in 1951. Rights are sometimes described as being of a positive or a negative nature. That's to say some can be expressed as a right to and others as freedom from. The 1998 act puts into place 15 specific rights and freedoms which include rights to liberty and security, a free trial, free expression, free elections and the right to marry and found a family. There are also freedoms from torture, from slavery or forced labor and from discrimination on grounds such as race, sex, religion, political opinion or social origin. The Human Rights Act has been described as the start of a process. The act itself does not expand on the provisions made by the European Convention which some would consider is following a baseline or a minimum standard for human rights.

Answer:

The Human Rights Act in the UK is far-reaching, controversial, and somehow a cautious document. UK signed the European Convention to protect human rights in 1951. Afterwards, the Human Rights Act 1998 sets out the fundamental rights and freedoms that everyone in the UK is entitled to. Lastly, the speaker believes the European Convention is following a baseline or a minimum standard for human rights. In conclusion, this lecture is very informative.

50. Globalization (Explanation) (Audio Available)**Original:**

Globalization is an overused and often misunderstood concept. We hear it all the time on news broadcasts and in any type of public discussion. But the starting point for understanding globalization is that it is industries and markets that globalize, not countries. That's why it's helpful to think of globalization as 'the integration of economic activities across borders'. But why does globalization matter? I would argue globalization matters because it means the rise of interconnectedness between countries and markets across the world. For example, one of the reasons why the financial crash of 2007/2008 was so serious was because the financial and banking systems of countries around the world have become so closely interconnected with the globalization of markets.

Answer:

This lecture mainly talks about globalization. Firstly, the speaker emphasizes that we hear it all the time on news broadcasts and in any type of public discussion. Also, he mentions that it is industries and markets that globalize, not countries. Lastly, the speaker believes that it means the rise of interconnectedness between countries and markets across the world. In conclusion, this lecture is very informative.

51. Vitamin D (Explanation) (Audio Available)**Original:**

I'm going to start with Vitamin D today, and I think probably most of you know that vitamin D is called the "sunshine vitamin". And it's called that because there is absolutely no dietary need for vitamin D if you get adequate sunshine. And I think the real important words there is "if" because it turns out that in certain climates which aren't near the equator, there's a big question as to whether or not you do get adequate sunshine. So vitamin D really isn't actually a vitamin. It's a pro-hormone. When human beings evolve, we evolved in tropical climates and ran around naked with plenty of skin exposure to sunlight and so there was no dietary need for vitamin D at all. As humans migrated away from equatorial regions, they actually created a need for vitamin D in food because the sunlight wasn't adequate, I mean certainly, particularly during the winter months, it wasn't adequate at all.

Answer:

This lecture mainly talks about Vitamin D, the sunshine vitamin. Firstly, the speaker emphasizes there is no dietary need for vitamin D if you get adequate sunshine. Also, she mentions that vitamin D really isn't the vitamin and it's a pro-hormone. Lastly, the speaker believes that humans created a need for vitamin D in food. In conclusion, this lecture is very informative.

52. Good Ideas (Explanation) (Audio Available)**Original:**

To be a successful entrepreneur, you should have good ideas, but the definition of a good idea varies depending on whom you ask. A great idea should have several features. Firstly, the great idea should be various and novel. Secondly, the great idea should be unique, which means no one has thought about it. Thirdly, it is essential for great ideas to be transformative and productive. All ideas are essentially a combination of other smaller ideas, but this doesn't mean they can't be unique. Merely copying doesn't make anything idiosyncratic, it's the individuality that one puts in which makes a concept stand out. Constant innovation leaves no room for stagnation and thus, adds on to the basic idea, effectively making it unique. Unique ideas are inspired by basic things, they are simply extensions of pre-existing notions. And, an idea or a concept is unique only when it transcends its predecessor and serves its purpose in a better and more precise way.

53. Mapping of Genes (Incomplete)

Points: Mapping of genes was completed in 1920. Recent research has shown that genes can determine not only humans' physical features, such as height, eye color and hair color, but also psychological features, such as our behavior. Our research on genes can contribute to biology, psychology, sociology and neuroscience, and provides some integrating information.

54. Big Bang (Explanation) (Audio Available)**Original:**

One of the most amazing things that have happened even in my lifetime is the prediction of cosmology. When I started out forty-odd years ago, we thought we knew that the universe began a big bang, some people doubted even then. We thought the universe was about ten or twenty billion years old. But now for really very sound scientific reasons, we can say that the universe did start in a Big bang and it's 13.8 billion years old. So it's not 14, it's not 13 because a decimal point in there and that's a stunning achievement to know that. And we also know that the laws of physics that apply to tiny particles inside atoms also explains what happened in the big bang, you can't have one without the other. A very neat example of this is that when you apply nuclear physics, that kind of physics to understand how stars work, you find out that the oldest star in the universe is about 13 billion years old. So their universe is just a little bit older than the stars. Fantastic, if we done it and counted in the other way around and said that the stars were older than the universe, we would say science was in deep trouble. But it's not, everything fits together and we know how the universe began, we got to know how the way it is. The future that it 'll suspects we don't know quite well what's going, but we got some ideas, which are as good as those ideas we had 40 years ago about how big bang happened.

Answer:

This lecture mainly talks about the prediction of cosmology. Firstly, the speaker emphasizes that the universe did start in a big bang. Also, he mentions that the laws of physics that apply to tiny particles also explain the big bang. Lastly, the speaker believes we got some ideas as good as those ideas we had 40 years ago about how big bang happened. In conclusion, this lecture is very informative.

55. Recycling Water (Explanation) (Audio Available)**Original:**

Why do we need to recycle water? Because we don't generate much new water. Chemically the process of generating water, which is basically taking hydrogen and oxygen and burning them to produce water, is not a process that happens a lot anymore. So in terms of our total volume of water in the world, yes it is changing, but it's not changing significantly relative to the rate at which we are using or demand fresh new water. Now there are a lot of different areas of technology involved in water recycling, and we are later in the interview going to get to industrial use and the reclamation of sewerage. What about in the home at the moment; what sort of technology is being utilized in the home when we talk about water recycling? Well very little on average. Typically in a modern home, we turn on the tap, we take a glass of water, we probably in turning on that tap flush ten glasses of water down the sink. We take a shower, we use fresh water, we do a whole range of things, and there is nominally very little recycling of that. It goes down the drain and it goes off to a wastewater treatment plant. There is actually very, very little recycling at a local level. People don't actually say well I'm now going to take the water I just used, put it through a sophisticated process and reuse it and have a closed loop. It's not a closed loop in the home.

Answer:

This lecture mainly talks about water recycling. Firstly, the speaker emphasizes that chemically the process of generating water is not a process that happens a lot anymore. Also, he mentions that there are a lot of different areas of technology involved in water recycling. Lastly, the speaker believes that there is nominally very little recycling of water used at home. In conclusion, this lecture is very informative.

56. Mars and The Earth (Explanation) (Audio Available)**Original:**

We are going to look at an very interesting and important place today. It is called the Mars which is not far away from the earth. Mars is an interesting neighboring planet to Earth with a similar geological surface and landscape, such as the desert, covered with rocks. Although there has not been evidence for the existence of water yet, the trace of heavy gases has existed on Mars for billions of years. Traces of a great amount of water in icy form just like mountains have been found. There is not much atmosphere, but rare gases are still found. It is possibly because heavy gasses do not evaporate within a low gravity. The low gravity on Mars indicates that there may be a thin layer of the atmosphere on Mars. Therefore, Mars might be the most ideal destination other than Earth.

57. Negative Emotions (Incomplete)

Points: Positive emotions, such as contentment and pleasure, are more frequently and more lightly experienced, and cannot be easily recalled. Negative emotions, like fears, are less frequently experienced, strong and intense, and can stay in our minds for long. They can help us evaluate the environment, avoid life-threatening issues, and survive. 'pay attention to' repeats many times in the lecture. 'meditation' is mentioned a few times. 'Saving for a holiday' and 'get away from negative things' are possibly mentioned.

(APEUni Website / App SST #123)

58. Roman Building (Explanation) (Audio Available)

Original:

But you can see from the relatively crooked and narrow streets of the city of Rome as they look from above today. You can see that again, the city grew in a fairly ad hoc way, as I mentioned. It wasn't planned all at once. It just grew up over time, beginning in the eighth century B.C.. Now this is interesting because what we know about the Romans is when they were left to own devices and they could build the city from scratch, they didn't let it grow in an ad hoc way. They structure it in a, in a very care, very methodical way. That was basically based on military strategy, military planning. The Romans they couldn't have conquered the world without obviously having a masterful military enterprise and everywhere they went on their various campaigns, their various military campaigns. They would build, build camps and those camps were always laid out in a very geometric plan along a grid, usually square or rectangular. So, when we begin to see the Romans building their ideal Roman city, then turn to that so call castrum or military camp design.

Answer:

This lecture mainly talks about Rome. Firstly, the speaker emphasizes that the streets of the city of Rome were not planned all at once. Also, she mentions that the Romans structured it in a methodical way, based on military strategy. Lastly, the speaker believes that they would build camps, always laid out in a very geometric plan along a grid square or rectangular. In conclusion, this lecture is very informative. 59. Climate and Crops (Explanation) (Audio Available)

Original:

Now we spend a lot of time thinking about how climate will affect crops. But crops affect climate themselves and they do this in two ways. First of all, about one-quarter of the land surface is used for growing crops. Another 10–15 % are used for pasture. So a substantial amount of the land surface is used in crop and agricultural production. And how we used that land affects our climate? If we were, for example, to deforest a substantial area and replace it with the annual crop such as soybean. Then we would alter the characteristics of the land surface, alter the way that water and heat flows from the land surface to the atmosphere and back, and ultimately change the regional climate if that is not enough to change the land surface. So this is an absolutely fascinating topic and one that's really quite difficult to understand because of the complexity. It's difficult because it needs us as crops scientists to work even more closely with our climate scientist, colleagues. And it's difficult because we have to join our models together.

Answer:

This lecture mainly talks about climate and crops. Firstly, the speaker emphasizes crops affect climate themselves and they do this in two ways. Also, he mentions this is an absolutely fascinating topic and

one that's really quite difficult to understand because of the complexity. Lastly, the speaker believes it needs us as crops scientists to work even more closely with our climate scientist. In conclusion, this lecture is very informative.

60. Globalization and Detraditionalization (Explanation) (Audio Available)

Original:

So, I think you all know what I mean by globalization, don't you? This is the idea that we all live in a global village. With instant communications, we can share ideas, and consume cultural artifacts from countries all over the world, just by going into the Internet and all dream up, basically. The world is shrinking. In terms of speeds, it is accelerating, but in terms of distance, it's shrinking. What do I mean by detraditionalization? I mean the disappearance or the erosion, for the better word to use, the erosion of traditional values, of conventional ways of doing things, of conventional moralities. More and more young people around the world are rejecting the culture they grow up in, and it's probably a little bit cruel. But some imitating a Hollywood model of society, rather than the one which they inherit from their local tradition background. OK?

Answer:

This lecture mainly talks about globalization. Firstly, the speaker emphasizes that we all live in a global village with instant communications, by which we can share ideas. Also, he mentions that the world is shrinking in terms of distance. Lastly, the speaker believes that detraditionalization means the erosion of traditional values, conventional ways of doing things, and conventional moralities. In conclusion, this lecture is very informative.

61. Earthquake and Fault (Explanation) (Audio Available)

Original:

So, faults are breaks in the earth's crust. We can identify them because of the discontinuity in the structure within the earth crust across faults. And earthquakes occur on these faults, so varied processes by which these faults move to a large extent are due to earthquakes. So, we have a fault plane and the earthquake is so focused on this fault plane. And the earthquake starts at the particular point on the fault plane and we call that the focus of the earthquake. The rupture propagates out from that point on the rupture plane to cover the entire fault plane. The rupture is in that particular earthquake. We talked about the epicenter of the earthquake a lot. The epicenter is just the surface projection of the focus of the earthquake. So, if you wanted to look at map view where the earthquake was located, we would be able to look that into the earth. We would see the focus down some depth in the earth or the epicenter just a point vertically above that focus at the surface of the earth. So, this is the relationship between the faults and the earthquakes.

Answer:

This lecture mainly talks about faults and the earth crust. Firstly, the speaker emphasizes that these faults moving processes are due to earthquakes. Also, he mentions that the epicenter is the surface projection of the focus of the earthquake. Lastly, the speaker believes that the focus down some depth in the earth. In conclusion, this lecture is very informative.

62. Talent War (B) (Explanation) (Audio Available)

Original:

I think there is an intense competition at the moment to hire the most talented and most intellectually able people. There is a time when I think companies have many of the adventures in the world. That involves the companies' world. It was the bosses' world. Now I think it reverses the case. We have a shortage in talent base within countries and between countries, have an intense battle between companies to hire the most talented workers and also between countries, which are looking to recruit talented young people, talented young immigrants. We have this sense of immigrants being things that countries are battled to keep out, and immigrants want to get in, climb of the walls. I think the opposite isn't that the case. And the topic is that countries are trying to lure bright young people to get them to go to universities and get them to become immigrants. So, on many levels, talent is a premium. There is a shortage of talent, and so countries, companies, all sorts of organizations, of course, volunteer organizations as well as, are competing to hire the best and the brightest. You know we have a baby-boom population which is aging. We have an economy which is becoming more sophisticated. And so, for all those sorts of reasons, talent is a premium.

Answer:

This lecture mainly talks about an intense competition. Firstly, the speaker emphasizes that we have a shortage in talent base within countries and between countries. Also, she mentions that on many levels, for all those sorts of reasons, talent is a premium. Lastly, the speaker believes that we have an economy which is becoming more sophisticated. In conclusion, this lecture is very informative.

63. Canned Food (Explanation) (Audio Available)

Original:

One of the things that was going on during the Great Depression was the beginning of this sort of modern food technology that rules, you know, the way Americans eat today. That is there are a lot of canned foods were being – coming onto the market at the time. And also, refrigerators were really becoming very, very popular during the Great Depression, both in cities and in rural parts of the country. Thanks to electrification, the Rural Electrification Administration, people could buy appliances. You know, farmers could buy appliances. And that meant frozen foods were becoming big. And, you know, at that time, few people could afford to buy them during the early years of the Great Depression. But, you know, gradually, these things picked up. And so this was, like, the sort of beginning of the era when people were starting to think about supermarkets with rows and rows of freezer cases and rows and rows of canned foods.

Answer:

This lecture mainly talks about canned food. Firstly, the speaker emphasizes one of the things going on during the Great Depression was the beginning of this sort of modern food technology ruling the way Americans eat today. Also, he mentions refrigerators were becoming popular. Lastly, the speaker believes few people could afford to buy them during the early years of the Great Depression. In conclusion, this lecture is very informative.

64. Fight or Flight (Explanation) (Audio Available)

Original:

To understand the Fight or Flight response it helps to think about the role of emotions in our lives. Many of us would prefer to focus on our logical, thinking nature and ignore our sometimes troublesome emotions, but emotions have a purpose. Our most basic emotions like fear, anger or disgust are vital messengers: they evolved as signals to help us meet our basic needs for self-preservation and safety. It would be dangerous to be indecisive about a threat to our survival so the brain runs information from our senses through the most primitive, reactive parts of our brain first. These areas of the brain control instinctive responses and they don't do too much thinking. This more primitive part of our brain communicates with the rest of our brain and our body to create signals we can't ignore easily: powerful emotions and symptoms.

Answer:

This lecture mainly talks about fight or flight. Firstly, the speaker emphasizes it helps to think about the role of emotions. Also, he mentions our most basic emotions like fear, anger or disgust are vital messengers. Lastly, the speaker believes this more primitive part of our brain communicates with the rest of our brain and body to create signals we can't ignore easily. In conclusion, this lecture is very informative.

65. Indian Peasant Debt (2) (Explanation) (Audio Available)

Original:

The debt today is so high, it's two hundred thousand rupees, three hundred thousand rupees of peasant who have no capital. They who know within a year or two, when they accumulate that kind of debt. Where is the debt coming from? It's coming from a seed that is costing a hundred thousand to two hundred thousand rupees per kilogram, depending on what you got. Seeds that used to be free, used to be theirs. Pesticides each time, the more they use, the more they have to use, 12 sprays, 15 sprays, 20 sprays. Pesticides used in just the last five years in the land areas of India has shown up by 2000 percent. That's why the free market and globalization have brought and since we are talking about peasants, who have no money, who have no capital, they can only buy expensive seeds and expensive pesticides by borrowing. And who lend that money? The seed companies that sell the pesticides, which are the same companies that sell the seeds, as you know, are now also the major creditors.

Answer:

This lecture mainly talks about Indian peasant debt. Firstly, the speaker emphasizes that it is three hundred thousand rupees of peasants who have no capital. Also, she mentions that it is coming from a seed that is costing a hundred thousand to two hundred thousand rupees per kilogram. Lastly, the speaker believes the seed companies that sell the pesticides are the major creditors. In conclusion, this lecture is very informative.

66. University Competition (Explanation) (Audio Available)

Original:

Today a university like the LSE certainly has to acknowledge that it is in competition for the best students, all of whom have choices they can exercise, and many of them choices which run across national and continental borders. We are in competition, too, for staff. The academic job market is one of the most global 25 there is. And in the 21st century English is the new Latin, so universities in English speaking countries are exposed to more intensive competition than those elsewhere. We are in competition for government funding, through the assessment of research quality. We are in competition for research contracts, from public and private sector sources, and indeed we are in competition for the philanthropic pound. Many of our own donors were at more than one university, and indeed think of the LSEs requests alongside those of other charities to which they are committed. That is a competitive environment which is particularly visible to a vice-Chancellor.

Answer:

This lecture mainly talks about university competition. Firstly, the speaker emphasizes that universities are in competition for the best students and staff. Also, he mentions that universities in English speaking countries are exposed to more intensive competition than those elsewhere. Lastly, the speaker believes that we are in competition for research contracts, from public and private sectors. In conclusion, this lecture is very informative.

67. Smile of Mother (Explanation) (Audio Available)**Original:**

Ever try to get a baby to smile? It can seem close to impossible—and then suddenly there it is: that elusive, seemingly joyous grin. Well it turns out those smiles aren't spontaneous—they're strategic. Researchers have found that when babies smile, it's for a reason. They want whoever they're interacting with—typically a parent—to smile back. And they time it just so, a smile here and a smile there. The researchers call it sophisticated timing. The study is in the journal PLoS ONE. The researchers enlisted real mothers and infants and quantified their interactions, which fell into four categories. One: babies wanted to maximize the amount of time smiling at their mothers. Two: they wanted to maximize the time the mothers smiled at them. Three: they wanted to experience simultaneous smiling, and four: no smiling at all. By studying when smiles happened and what the subsequent effect was, the investigators were able to figure out that for mothers the goal 70 percent of the time was to be smiling simultaneously—while for babies 80 percent of the time they just wanted their mother smiling at them. So, mothers want the interaction, while babies just want to be smiled at. So your baby may not be able to feed itself, talk or even turn over yet. But when it comes to smiles, babies seem to know exactly what they're up to.

Answer:

This lecture mainly talks about babies' smiles. Firstly, the speaker emphasizes those smiles aren't spontaneous but strategic. Also, he mentions that when babies smile, they hope whoever they're interacting with to smile back, called sophisticated timing. Lastly, the speaker believes babies just want their mother smiling at them. In conclusion, this lecture is very informative.

68. Civil Society Organization (Explanation) (Audio Available)**Original:**

But in the face of this sense of dis-empowerment, there is surprisingly is no decline in involvement in

organizations which seek to share wealth and opportunities, protect one another's rights and work towards the common good. According to the United Nations, civil society groups have grown 40-fold since the turn of last century. Internationally, the non-profit sector is worth one trillion dollars, and there are 700,000 such organizations in Australia alone. The UN recognizes 37,000 specifically civil society organizations across the globe, and gave 3,500 accreditation to the 2002 World Summit on Sustainable Development. This profound movement towards harnessing voices and resources from outside the realm of governments and officialdom reflects a profound growth in NGO's third sector", as some call it. As Robert Putnam discovered in the field of local government in Italy, the best predictor of governmental success was the strength and density of a region's civic associations.

Answer:

This lecture mainly talks about civil society groups. Firstly, the speaker emphasizes civil society groups have grown 40-fold since the turn of last century. Also, he mentions this profound movement is towards harnessing voices and resources from outside the realm of governments and officialdom. Lastly, the speaker believes the best predictor of governmental success is the strength of a region's civic associations. In conclusion, this lecture is very informative.

69. Global Warming (Explanation) (Audio Available)**Original:**

There can now be no reasonable, science-based, doubt about the reality of global climate change effects brought on by the cumulative and rapidly growing emission of so-called "greenhouse gases" – primarily carbon dioxide – into the atmosphere. As these effects become increasingly more obvious worldwide, so commercial interests, groups of concerned individuals and national governments have been gripped by amounts of mass panic and what to do about it. To many, Paul Ehrlich's Malthusian "Population Bomb" of 1968 appears about to explode in the world's face in an indirect version of his millenarian vision of population growth which outpaces agricultural production capacity – with predictably catastrophic results for humanity. And his three-part crisis scenario does indeed seem now to be present: a rapid rate of change, a limit of some sort, and delays in perceiving that limit. Ehrlich's work was roundly criticized at the time, and later, from many quarters, and much of what he predicted did not come about. Nevertheless, can the world afford to take the risk that the climate scientists have got it wrong? Is it not in everyone's interest to apply the Precautionary Principle in attempting to avoid the worst of their predictions – now, rather than at some future time? As the Chairman of the Intergovernmental Panel on Climate Change, Mr. Rajendra Pachauri, has recently pointed out, eleven of the warmest years since instrumental records began have occurred in the past twelve years, while major precipitation changes are taking place on a global scale.

Answer:

This lecture mainly talks about global climate change effects. Firstly, the speaker emphasizes that population growth outpaces agricultural production capacity, with predictably catastrophic results for humanity. Also, she mentions that the three-part crisis scenario seems to be present. Lastly, the speaker believes that eleven of the warmest years since instrumental records began have occurred in the past twelve years. In conclusion, this lecture is very informative.

70. Market Economy (Explanation) (Audio Available)

Original:

Within most developed countries, notions of pragmatism, notions of the fact that we have democracies, have succeeded in tempering the market economy. In the 19th century, 18th century, the Industrial Revolution had a very negative effect on people, particularly working classes all over the world. We see data where life expectancy was reduced, heights were reduced. We were looking at the medical record. We can see that actually, living standards, much among large fractions of population, actually went down. But eventually, we pass the legislation about working conditions. And eventually, we circumscribe some of the worst kinds of behavior. We eventually, in the 20th century, we put regulations that composed better environmental conditions. And so some of the damage was reversed, and that we have made the market economy work in ways that the benefits of the all is far more what we shared in the world a hundred years ago.

Answer:

This lecture mainly talks about the market economy. Firstly, the speaker emphasizes within most developed countries, notions of pragmatism have succeeded in tempering the market economy. Also, he mentions that the industrial revolution had a negative effect on people, particularly working classes. Lastly, the speaker believes in the 20th century, we put regulations that composed better environmental conditions. In conclusion, this lecture is very informative.

71. Talent War (C) (Explanation) (Audio Available)

Original:

The war for talent refers to an increasingly competitive landscape for recruiting and retaining talented employees. In the book, Michaels, et al., describe not a set of superior Human Resources processes, but a mindset that emphasizes the importance of talent to the success of organizations. The war for talent is intensified by demographic shifts (primarily in the United States and Europe). This is characterized by increasing demand along with decreasing supply (demographically). There are simply fewer post-baby-boom workers to replace the babyboom retirement in the US and Europe (though this is not the case in most of East Asia, Southeast Asia, Central Asia, Central America, South America, or the Middle East; Eastern Europe also tends to have similar demographics, namely an aging and/or shrinking labor force). While talent is vague or ill-defined, the underlying assumption is that for knowledge intensive industries, the knowledge worker (a term coined by Peter Drucker) is the key competitive resource (see the Resource-based view of the firm). Knowledge-based theories of organizations consistently place knowledge workers as a primary, competitive resource. Talent is never explicitly defined in the book, though the Preface notes, "A certain part of talent elude description: You simply know it when you see it." After several further caveats, the authors go on: "We can say, however, that managerial talent is some combination of a sharp strategic mind, leadership ability, emotional maturity, communications skills, the ability to attract and inspire other talented people, entrepreneurial instincts, functional skills, and the ability to deliver results." The authors offer no outside support for this assertion. A 2006 article in The Economist, which mentions the book, notes that, "companies do not even know how to define "talent", let alone how to manage it. Some use it to mean people like Aldous Huxley's alphas in "Brave New World"—those at the top of the bell curve. Others employ it as a synonym for the entire workforce, a definition so broad as to be meaningless." The 'War for talent is seen by various sources as becoming irrelevant during economic downturns. However, there have been highly visible talent poaching by solvent firms of others who have economic hardship.

Answer:

This lecture mainly talks about talent. Firstly, the speaker emphasizes the war for talent refers to an increasingly competitive landscape for recruiting and retaining talented employees. Also, he mentions the knowledge worker is the key competitive resource. Lastly, the speaker believes that there have been highly visible talent poaching by solvent firms of others. In conclusion, this lecture is very informative. (APEUni Website / App SST #65)

72. Talent War (Explanation) (Audio Available)**Original:**

Talent is premium and there is a war for talents in 1990's because of the talent shortage. Companies and countries are recruiting young talented people from different countries and sending young people to universities. Some young people immigrated after they graduated from the university. They compete with the local students. Countries and organizations should put talents at the primary positions. The collapse of loyalty makes employees happy to change their workplace because of the higher income. There are three reasons: first, the change of nature of economy leads to increase in the talents demand and need skills. Second, the shrinking labor force after the baby-boom causes less supply of skilled workers and the retirement of baby-boomers will cause a shortage of experienced workers. Third, there is also a mismatch between what schools are producing and what companies need.

Answer:

This lecture mainly talks about the talent war. Firstly, the speaker emphasizes that there is a war for talents in the 1990's because of the talent shortage. Also, he mentions that countries and organizations should put talents at the primary positions. Lastly, the speaker believes that there is also a mismatch between what schools are producing and what companies need. In conclusion, this lecture is very informative.

73. Goose Migration (Explanation) (Audio Available)**Original:**

W: Hi, Dr. Adams. You wanted to see me? M: Hi, Sara. Yes, I just wanted to talk to you about your zoology report. I'm making appointments with everyone to talk about their papers. W: Oh, okay. M: So what are you writing your report on now? W: I'm looking at bird migrations. M: Oh, great. That's such a great topic. Are you focusing on anything specific? W: I think I've narrowed it down to birds that do short-distance migrations. You know, geese and those birds. M: Was there a reason you chose that particular topic? W: Actually, a big part of the decision just came from the fact that I found the most information on short-distance migration. Oh, and I found a lot of information on geese. M: Okay, well that's a pretty good reason to go with that. So what direction are you taking this report in? W: Well, I thought I'd talk about goose migration in general. I've found out that all geese have the same general migration pattern. So I'm going to discuss that first. Then I'm going to talk about the patterns of specific geese. Like, I thought I'd compare a few different species, like the Canadian goose versus the Hawaiian goose. M: That sounds good. I'm looking forward to reading your paper.

Answer:

A professor is speaking with one of his students about her zoology report. The student will focus the report on short-distance bird migrations. The main reason she chose this topic is because she found a

lot of information about it. The student will begin her report by talking about goose migration in general, because most geese have the same general migration pattern. She will then compare different species of geese.

74. Sound Receptor (Explanation) (Audio Available)

Original:

You've got sound receptors in your ear, and they are beautiful. We're not going to talk about them at any length, but there's little flappy, these little spiky things going along in your ear and they can translate vibrational energy coming from your ear, hurting your eardrum, being translated into a vibration into the fluid in your ear into a physical motion of these little receptors there into an electrical motion, into an electrical signal that goes into your ear. So, all of that, all of that's pretty impressive stuff. We are not going to talk about the details of it, but I invite some of you who want to learn more about this, particularly MIT students I think to find receptors really quite remarkable kinds of devices.

Answer:

This lecture mainly talks about sound receptors. Firstly, the speaker emphasizes that these spiky things can translate vibrational energy coming from your ear. Also, he mentions that an electrical signal goes into your ear. Lastly, the speaker believes he invites some people wanting to learn more to find receptors quite remarkable kinds of devices. In conclusion, this lecture is very informative.

75. Small Business Management (Explanation) (Audio Available)

Original:

Today, I'd like to turn our attention to an area of management often overlooked in traditional management courses: small-business management. Small businesses have gone from being traditional small-town stores selling food or clothing to sophisticated, high-tech enterprises. And in addition to the important products they produce, they create jobs for lots of people because there are so many of them. It's important for management to keep in mind which of the customers' needs the business serves, because it can't serve all their needs. Writing a business plan that everyone in the organization understands and follows will help to provide the necessary focus and direction. It's important to state clearly what the purpose of the business is. Additionally, each person within the organization must know what tasks to perform in order to fulfill that purpose. Now, if for some reason a business plan doesn't work, try hard to discover why not, rewrite it, and immediately focus on the new plan. A work of caution, however, never give up a bad plan without replacing it. A business has to have a plan because it can't afford to waste its limited resources. And, as you know, waste leads to unnecessarily high production costs. Production costs are at the heart of the company's ability to make a high quality product and sell it at an affordable price.

Answer:

This lecture mainly talks about small-business management. Firstly, the speaker emphasizes small businesses have gone from being traditional stores to sophisticated, high-tech enterprises. Also, he mentions it is important for management to keep in mind which of the customers' needs the business serves. Lastly, the speaker believes a business has to have a plan because it cannot afford to waste its limited resources. In conclusion, this lecture is very informative.

13. Thinkers (Incomplete)

Points: There is a new breed of thinkers today. A background music is played around 'there is'.

(APEUni Website / App FIBL #232)

14. Feasting Food (Audio Available)

One of the things that people have said about agriculture is that on the whole it's more labor **intensive** than hunting and gathering, and that's one of the reasons why people have looked to explanations which, you might say, are kind of **corrosive** factors — that people have been forced into agriculture because they had no alternative. That is **ultimately** what may happen. But at the very beginning it could be that agriculture was developed because people wanted special status foods for feasting; that it was actually a **social** need. I mean, how much of what we do in our lives is generated by competition with others? And a lot of that is powered by desire for new things, new statuses, new **whatever** it might be. Respect, recognition also are important. And in small-scale societies a lot of those sorts of factors are **generated** by the ability to, for instance, throw feasts. One possibility is that some of these foods that were being grown were actually intended especially as feasting foods.

There're audio records available for this question. Search by the question number at [APEUni Website / App](#) to listen.

19. Banana (Audio Available)

One day the banana is perfect. Bright yellow, firm, flavorful. But even within that same day brown spots appear on your perfectly ripe banana, its flesh turns mushy, and it's destined for the compost or at best, banana bread. But scientists are developing a way to **extend** the life of ripe bananas. It's a spray-on coating made from chitosan—a substance found in crab and shrimp shells. The new gel can be **sprayed** on bananas to slow the ripening process by up to 12 days. Like other fruits bananas remain alive after being picked and it actually continues to respire. This means that they take in oxygen and release carbon dioxide. The more the banana **breathes** the faster it ripens and then rots. Bananas ripen more quickly than most fruit because they don't naturally slow the **respiration** after being picked, in fact

it speeds up, causing bananas to become mushy. Chitosan not only kills the **bacteria** on banana's skin that then leads to rot, it also **significantly** slows down the respiration in the first place. So bananas won't drive you bananas.

22. Technology and Business (Audio Available)

Good evening ladies and gentlemen. My theme for this **session** is convergence Technology Change and Business Practice. This is somewhat dear to my heart, in that I have spent much of the last fifteen years involved in various **aspects** of technology and their impact on business, across a broad **spectrum**, from applications of signal processing in manufacture right through to the use of utilization data and diary applications, to improve the time utilization of the **sales** force.

(APEUni Website / App FIBL #223)

There're audio records available for this question. Search by the question number at [APEUni Website / App](#) to listen.

23. Age (Audio Available)

What was interesting and revealing about younger and middle-aged views on old age was how **relative** these were to the individual's own age. Those in their teens regarded 40 as old whereas those in their 40s thought 70 or 80 was old. For many, health was seen as a **determining** factor in deciding who is old, and many young participants commented on how fit and active their grandparents are, while others thought ill-health and **dependence** were an inevitable part of aging. The **majority** of participants, however, regarded old age as something negative, and many expressed fear

of **growing** old.

(APEUni Website / App FIBL #222)

There're audio records available for this question. Search by the question number at [APEUni Website / App](#) to listen.

24. Lead-in Time (Audio Available)

Lead-in time is the amount of time that elapses between a business placing an order with a supplier for more stock or raw **materials** and the delivery of the goods to the business. Businesses want the lead-time to be as short as possible, so that they can meet their customer orders and **minimize** the time between paying for the stock and receiving the **feedback** from the customer. However, this may not happen due to a number of **factors**, such as delays in the supplier receiving the order, or the breakdown of the suppliers' lorries **delivering** the stock to the business.

(APEUni Website / App FIBL #221)

There're audio records available for this question. Search by the question number at [APEUni Website / App](#) to listen.

25. Early Chocolate (Audio Available)

The earlier chocolate was quite unpalatable. They used to add things to it to make it more palatable, so for the early chocolate, they didn't know how to extract all the **cocoa** fat from it, so it was, or could be quite **greasy** and if you made it as a drink you'd have this sort of scum on the top. So they used to try and add things to it, like **starch** and things, to make it a more palatable product. So there were a lot of **scandals** around the kind of things they were adding to chocolate in the nineteenth century. So by the sort of 1870s, 1880s, there are people like Cadbury's saying, 'Our chocolate is absolutely pure'. We have this new process, the Van Houten process which now extracts all this **horrible** fat that we can use to make eating chocolate. Now we have a pure product.

31. Cavemen (Audio Available)

You might picture Neanderthals as cavemen gnawing on bones around a campfire. Which wouldn't be **inaccurate**. But Neanderthals may have also dined on roasted vegetables and known a bit about medicinal plants too. So says a study in the journal *Naturwissenschaften* (The Science of Nature). Researchers **analyzed** hardened dental plaque from five Neanderthals found in El Sidrón cave, in northern Spain. Yes, 50,000-year-old dental plaque. And they found a lot lurking between the teeth. Like evidence of nuts, grasses and green veggies, **chemical** traces of wood smoke, and tiny, intact starch granules, proof Neanderthals ate their carbs. And in one individual, they detected compounds found in the **medicinal** herbs chamomile and yarrow. The herbs have no nutritional value, and since Neanderthals did have the gene to detect the herbs' bitter taste, the researchers **speculate** that the cave dwellers were munching on them not as food—but to self-medicate. Not too far-fetched, they say, because primates like chimps also use medicinal plants. Luckily for the scientists doing this **detective** work, Neanderthals may have known a thing or two about medicine, but they didn't get regular check-ups at the dentist.

33. Reptilian Fossil (Audio Available)

Some interesting facts about the great reptilian fossils recently discovered in Wyoming and Colorado have come to light. The bones **found** represent reptiles of many sizes, from that of a cat up to one sixty feet high. The latter, found at Como, Wyoming, belonged to the crocodile order; but the remains give **evidence** that the animal stood up on its hind legs, like a kangaroo. Another found in Colorado is estimated to have been 100 feet long. A great many remains of the same general class, but belonging to different species, have been collected and sent East. Among them from three to four hundred specimens of the dinosaur, and about a thousand pterodactyls, have been shipped from Colorado, Wyoming, and Kansas. The wings of one of the latter were from thirty to forty feet from tip to tip. Seventeen different species of these flying dragons have been found in the chalk of western Kansas. There have also been found six species of toothed birds. Comparatively little has been done toward classifying the late finds, and the task is such an **enormous** one. Great importance is attached to them, however, since nothing of the kind had been found in America until a little over a year ago and great **stress** had been laid by certain geologists on their absence. Another remarkable feature of the discovery was that the fossils which had been reported as not existing in this country had hardly been brought to light in one locality before thousands of tons of them were simultaneously discovered in half a dozen different **places** .

69. Job Loss (Audio Available)

The loss of construction jobs by immigrants from Latin America **contributed** to a spike in unemployment among all Latino workers to 6.5 percent, compared with 4.7 percent unemployment for non-Latino workers, the report found. As recently as late 2006, Latino workers had achieved their **historic** low unemployment rate of 4.9 percent, based mainly on a job **boom** among immigrants, the report said. "To put it bluntly, Hispanics had a rough time in the labor market in 2007," said Rakesh Kochhar, the author of the report who is **associate** director for research at the Pew center, a nonpartisan organization in Washington. Job loss was particularly severe for Mexican **immigrants**, whose unemployment rate rose to 8.4 percent from 5.5 percent in 2007, the report found. Of 247,000 jobs lost by Latino workers in the **construction** industry in 2007, workers born in Mexico lost 152,000 jobs, or about 60 percent. Latino workers make up about 14 percent of the United States **labor** force, and about 52 percent of them are

immigrants. The Pew report, which is based on recent data from the census and the Bureau of Labor Statistics, does not **distinguish** between legal and illegal immigrants. The banking credit crisis and a drop in home prices led to an abrupt slowdown in new home building last year. Illegal immigrant workers have been **concentrated** in construction, accounting for 12 percent of employment in that industry, according to a Pew study in 2006. Mexicans account for about 55% of more than 11 million **illegal** immigrants in the United States, the Pew center has estimated.

(APEUni Website / App HCS #66)

3. Ugly Building (Audio Available)

Original:

It seems to me that architecture is pretty much something that causes us both pleasure and trouble. I live in the part of western London where I think many of the streets are really really ugly, and this distresses me everytime when I walk to a supermarket or walk to the tube. I do not understand why they built those buildings without architecture. A bad building has a serious impact on the people around it, which could be hundreds of years. It lasted so long, and if you write a bad book or a bad play, I will be shocked when it was shown. Suppose the book arose a little bit from the frustration, and then I realize if you talk about architecture, you will say why building are not more beautiful. Then you will say I can use such work as "beauty", which is a really arrogant word. And no one knows what beautiful is. It's all in the eye of the beholder. I couldn't help but think about that actually. Well, you know that we all attempt to agree that Rome is nice than Milkykings, and San Francisco has the edge of Frankfurt, so we can make that sort of generalization. Surely they are something we can say about why a building works or why it doesn't. So the books really attempt to suggest why architecture works when it does and what might go wrong when it doesn't work.

Options:

- A) Whether buildings are beautiful or not does not have any influence on people' lives. Beauty is a clear definition which everyone knows.
- B) London is a modern city, where there is no ugly buildings. All the supermarkets and streets are very beautiful, because everyone who lives there knows what 'beautiful' is.
- C) Ugly buildings can impact people who live around them, even for hundreds of year. Beautiful is a very hard thing to define, as no one really knows what beautiful is.

Answer:

C

4. Pancake Ice (Audio Available)

Original:

Pancake ice is an intermediate step between an open-water configuration and a totally frozen body of water. We know that a combination of very cold temperatures and waves is necessary to make the pancakes form in the first place. After these waves make it form, there's an entire spectrum – so a wide collection of frequency waves that they would encounter, whether they be from wind shear or they'd be from you know that the ocean long slow waves. The easiest way to study it is to look at each individual range of frequencies one after another. Sort of gain a wider perspective on how the pancake ice interacts with waves. The ultimate aim of our research is to better inform the meteorological modelers of the world who are looking at Antarctica as well as the Arctic and some of the other cold regions of the world. We're conducting work in the Sea-Ice-Wind-Wave-Interaction facility here at UniMelb. It was designed by the head of our department Jason Monty. He had the foresight to use a modular design, which means there are individual sections that are stacked together, so since we're built to the space that we have in this lab right now. When we moved to Fishermans Bend we can extend our model and a few more sections to make it much longer. And that will enable us to have longer runtimes, have more developed waves as well as add some other possibilities of study.

Options:

- A) Pancake ice is formed under deep sea, which only requires extremely cold temperature itself. The aim of the research is mere scientific experiments, and does not have serve practical purposes.
- B) Pancake ice exists in a warm river, which requires warm water, rain or snow. The aim of the research is to forecast weather in those river regions.
- C) Pancake ice is formed by extremely cold temperature and waves, which needs a wide collection of frequency. The aim of the research is to give the meteorological modelers a better understanding of this phenomenon through a special lab.

5. Definition of Happiness (Audio Available)

Original:

There have been various definitions of happiness throughout history and the history of **psychology** (Answer: philosophy) , the ones which interest me are **attitudes** (Answer: approaches) to happiness that follow the Enlightenment, particularly in the work of Jeremy Bentham, for whom happiness was really a combination of physical **sensations** (Answer: feelings) , pleasures as different combinations and aggregations of pleasure and pain occur over time. They **create** (Answer: generate) these psychological experiences that Bentham called happiness. But underlying them for Bentham were physical triggers and **elements** (Answer: dimensions) .

10. Nearby Star (Audio Available)

Original:

There's an old-timer in the neighborhood, and it's got a story to tell. A new study of a relatively nearby star shows that it's almost as **bold** (Answer: old) as the big bang itself. The star HD 140283 lies about 190 light-years away in the constellation Libra. Astronomers have long known that it's ancient, because it **contrasted** (Answer: contains) mostly hydrogen and helium – which were present at the dawn of the universe – and few of the heavy elements that were **forecasted** (Answer: forged) later in stellar furnaces. With the Hubble Space Telescope, researchers have now pinned down the distance to HD 140283, which allowed them to determine how bright the star is. Along with the chemical **celebrations** (Answer: ceremonials) of the star, the newly derived stellar properties allowed for a new age estimate. The study of HD 140283, in the Astrophysical Journal Letters found that the star is 14.46 billion years old. But the entire universe, as you may have noted heard, is only 13.77 billion years old. The two age estimates aren't actually in conflict, because there's always some uncertainty. The full age estimate is thus 14.46 billion years plus or minus 800 million years. Put your money on the.

11. Conversation (Incomplete)

Points: A conversation between a tutor and Jane. The tutor is emphasizing that Jane should put more details in the report.

(APEUni Website / App HIW #74)

12. Loan Guarantee (Audio Available)

Original:

Well there... there... there's a positive obligation on the bank to ensure that the people who are signing a loan guarantee, **understand** (Answer: know) what they're doing. Loan guarantees are er kind of **rare** (Answer: unique) in that... in that someone is giving security or a guarantee and placing themselves at risk for someone else, and they receive nothing **substantial** (Answer: material) in return. So you've got to ask yourself why is this person doing this, do they know what they're doing? They're risking a lot, and not really getting anything back for it. So the imperative is that the bank must **establish** (Answer: ensure) that these people know what they're doing, and that they fully understand the **repercussions** (Answer: implications) of what they're doing, and they know that their **assets** (Answer: properties) may be sold if another person doesn't meet their obligations.

13. Probability (Audio Available)

Original:

Oh, it's very spooky. First of all, probability by itself is spooky. Give me... let me show you how

probability enters the **sample** (Answer: system) . You walk past a store window and you see an image of yourself in the store window, you straighten the part, not so bad you know, for a man of my age. The guy in the store window who's fooling around with mannequins he sees you and you see yourself. What does that mean? A **beam** (Answer: stream) of photons from sunlight leaves your face, heads for the store window — let's consider one of them. It has a choice: it can go right through, so that the guy behind the window can see you, or it can be reflected from the store window. Some **actions** (Answer: fractions) of them are reflected, and some of them go through. What determines that? What determines the future of that photon? And **doubtless** (Answer: countless) such examples teach us that it's random, that it's a **roll** (Answer: throw) of the dice, and that's where Einstein made his famous statement "God plays dice with the universe." That every instant of that single object, that quantum object we have probability, we do not have certainty.

14. Diabetes (Audio Available)

Original:

No that was, and that's an important aspect, as you **referred** (Answer: alluded) to earlier we've previously done work which has proven that in some **circumstances** (Answer: situations) , even people whose blood pressure is not high, can benefit from blood pressure lowering **rehabilitation** (Answer: therapy) . So in this study the main reason that we included the patients was because of diabetes, we didn't care what their blood pressure was, whether it was high or low. And our **intention** (Answer: objective) was to see whether or not lowering average or below average blood pressure in diabetics was beneficial and the **effect** (Answer: result) suggested that irrespective of whether your blood pressure was high or low, if you had diabetes you **profited** (Answer: benefited) .

15. Article (Audio Available)

Original:

What's an article? I was asking myself this very question in the post office yesterday, standing in line waiting to sign for, as it so happens, an article. A postal article. Not the postal article. Now before we get ahead of ourselves, an article in English is a **verb** (Answer: word) that precedes a noun, and simply indicates specificity. This sounds quite complicated, and to be honest, it's quite complicated to say without spraying everyone within 15 feet, but the concept's quite simple. The definite article in English is the word "the", and indicates a specific thing or type; for example, the train is an hour late.

By **comparison** (Answer: contrast) , the indefinite article in English is any of the words "a", "an" or "some", and the indefinite article indicates a non-specific thing; for example, would you please pass me an apple. We always **precede** (Answer: precede) a word with "a" if it doesn't start with a vowel sound. For example, take a hike; I'm spending a Weekend at Burnie's; or there's a Knight in Shining Armour. Similarly, we precede words with the indefinite article "an" if they do start with a vowel sound, for example, an ostrich, an **normal** (Answer: enormous) mess or an Occupational Health and Safety Policy.

16. Classified Advertisements (Audio Available)

Original:

Classified advertisements placed by individuals in **newsprint** (Answer: newspapers) and magazines are not covered by the Advertising Standards Authority's " **court** (Answer: code) of practice". If you happen to buy goods that have been wrongly described in such an advertisement, and have lost money as a result, the only thing you can do is bring a case against the person who placed the advertisement for misrepresentation or for breach of **contrast** (Answer: contract) . In this case, you would use the small claims procedure, which is a relatively cheap way to sue for the recovery of a debt. If you want to pursue a claim, you should take into account whether the person you are suing will be able to pay damages, should any be **rewarded** (Answer: awarded) . Dishonest traders are **wary** (Answer: aware) of this and often pose as private sellers to **expose** (Answer: exploit) the legal loopholes that exist: that is, they may claim they are not in a position to pay damages.

17. Height (Audio Available)**Original:**

Height is correlated with a lot of things. Up to a certain height, taller people make more money than the vertically challenged. And the taller **developmental** (Answer: presidential) **overpopulate** (Answer: candidate) almost always wins. Now a study finds that your height as an adult has a profound effect on your perception of your health. Short people judge their health to be worse than average or tall people judge theirs. The research was published in the journal **repairable** (Answer: Clinical) Endocrinology. Data for the study came from the 2003 Health Survey for England. More than 14,000 participants filled out questionnaires and had their heights measured. The study only looked at how good the subject thought his or her health was, not their actual health. Questions focused on five areas: mobility, self-care, normal activities, pain or **reconvert** (Answer: discomfort) and anxiety or depression. Men shorter than about 5'4" and women shorter than 5' reported the worst impressions. But small increases in height at the low end had much bigger effects on perception than the same increases among taller people. Other studies have shown, ironically, that shorter people on average actually live longer.

29. Many students are now studying science, technology, engineering and maths. #2439 [\(Audio Available\)](#)
30. Every year, more and more courses become available online. #2438 [\(Audio Available\)](#)
31. I will be back in several minutes. #2437 [\(Audio Available\)](#)
32. We encourage students to complete applications before the deadline. #2436 [\(Audio Available\)](#)
33. You may not arrange your time when reading the text. #2435 [\(Audio Available\)](#)
34. You do not need to be encouraged to be a hero. #2434 [\(Audio Available\)](#)
35. Visual aid is really helpful for revising. #2433 [\(Audio Available\)](#)
36. The rationale of my research is to present the value of the urban ecosystem. #909 [\(Audio Available\)](#)
37. **Points:** Studying art history plays an important role in ... cultural and ... benefits. #2151 [\(Incomplete\)](#)
38. We no longer respond to any postal reference requests. #2108 [\(Audio Available\)](#)

39. The main aim is to introduce educational reforms. #384 [\(Audio Available\)](#)
40. Accountancy students need to submit their dissertations this week. #1995 [\(Audio Available\)](#)
41. A good academic essay should have a clear argument. #1986 [\(Audio Available\)](#)
42. I can't hand out my dissertation this week. #1974 [\(Audio Available\)](#)
43. You will acquire many skills during the academic studies. #1973 [\(Audio Available\)](#)
44. The sports team members often practice on weekdays and play games on weekends. #1944 [\(Audio Available\)](#)
45. Newspapers across the country have been reporting stories of the president. #1942 [\(Audio Available\)](#)
46. Anatomy is the study of internal and external body structures. #1389 [\(Audio Available\)](#)
47. The three elective courses were carried out in the program. #581 [\(Audio Available\)](#)
48. There are many teachers to help students on campus. #759 [\(Audio Available\)](#)
49. **Points:** ... key business partners expand ... on bank account ... lots of entertainment... #429 [\(Incomplete\)](#)
50. **Points:** Stay ... issue from the problems. #268 [\(Incomplete\)](#)
51. Technology has changed the media we both used and studied. #48 [\(Audio Available\)](#)
52. Graduates from this course generally find jobs in insurance industry. #5 [\(Audio Available\)](#)
53. There is a widely believed perception that engineering is for boys. #1523 [\(Audio Available\)](#)
54. The blue whale is the largest animal that ever lived. #15 [\(Audio Available\)](#)
55. **Points:** Enrolling experiment cooperation... #1505 [\(Incomplete\)](#)
56. The untapped potential use of sunrays is phenomenal. #1485 [\(Audio Available\)](#)
57. Lecture outlines are available on the faculty board and the internal website. #1481 [\(Audio Available\)](#)
58. People have been dependent on using phones in their everyday life. #1478 [\(Audio Available\)](#)
59. You do not need to have specialist knowledge to enjoy this book. #1447 [\(Audio Available\)](#)
60. You will study two core and three optional modules. #1445 [\(Audio Available\)](#)
61. We have a lecture on the morning of Thursday. #1422 [\(Audio Available\)](#)
62. The department is organizing a trip to London in July. #1414 [\(Audio Available\)](#)
63. Foods containing overabundant calories supply little or no nutritional value. #1411 [\(Audio Available\)](#)
64. Rising inflation may indicate the increasing demands for consumer products. #1404 [\(Audio Available\)](#)
65. Assignments should be submitted to the department office before the deadline. #1369 [\(Audio Available\)](#)
66. All industries consist of systems of inputs, processes, outputs and feedback. #1359 [\(Audio Available\)](#)
67. The untapped potential of using the sun's rays is phenomenal. #1347 [\(Audio Available\)](#)
68. Undergraduate students can select what interests them most in the scientific program. #1341 [\(Audio Available\)](#)
69. The cafeteria was sold out of coffee on Friday this week. #1331 [\(Audio Available\)](#)
70. The tutorial timetable can be found on the course website. #1326 [\(Audio Available\)](#)
71. New media journalism is an exciting area of study. #1323 [\(Audio Available\)](#)
72. All new medical school students must attend the talk about optional courses. #1310 [\(Audio Available\)](#)
73. Members should make concentrated contributions to associated operating funds. #1303 [\(Audio Available\)](#)
74. Many experts think that the world climate is changing. #1302 [\(Audio Available\)](#)
75. Years of training are required to become a medical specialist. #572 [\(Audio Available\)](#)
76. Medical researchers have focused on the causes of diseases and treatments. #1288 [\(Audio Available\)](#)

77. Industry experts will discuss job opportunities in an automated workforce. #1280 [\(Audio Available\)](#)
78. The key witnesses to the event have conflicting recollections. #1278 [\(Audio Available\)](#)
79. Democracy is constantly offering a stable form of government. #1266 [\(Audio Available\)](#)
80. He wrote poetry and plays as well as scientific papers. #1238 [\(Audio Available\)](#)
81. Cells are the basic building blocks of all animals and plants. #1234 [\(Audio Available\)](#)
82. The economic predictions turned out to be incorrect. #1231 [\(Audio Available\)](#)
83. He was regarded as the foremost economist at that time. #1169 [\(Audio Available\)](#)
84. The deadline of this assignment is tomorrow. #1141 [\(Audio Available\)](#)
85. These three separate resources are not enough for this assessment. #1091 [\(Audio Available\)](#)
86. Students would develop confidence in their ability to think critically. #1087 [\(Audio Available\)](#)
87. The universities provide excellent leisure facilities for students and staff. #1079 [\(Audio Available\)](#)
88. It takes a long time to walk to the university. #1073 [\(Audio Available\)](#)
89. Philosophy uses logic and reason to analyze human experience. #1059 [\(Audio Available\)](#)
90. All of your assignments should be submitted by next Tuesday. #1057 [\(Audio Available\)](#)
91. The commissioner will apportion the funds among all the sovereignties. #1052 [\(Audio Available\)](#)
92. A good abstract highlights the key points of your paper. #1041 [\(Audio Available\)](#)
93. Audition of the university choir will be on hold until the next week. #1039 [\(Audio Available\)](#)
94. Students must attend the safety course before entering the engineering workshop. #1035 [\(Audio Available\)](#)
95. The history course is assessed via three written assignments. #1028 [\(Audio Available\)](#)
96. The project is divided into four main sections. #1024 [\(Audio Available\)](#)
97. Undergraduates may pursue their specific interests within certificate programs. #323 [\(Audio Available\)](#)
98. Field trips are essential parts of most geography courses. #990 [\(Audio Available\)](#)
99. The university provides different facilities for students and staff. #929 [\(Audio Available\)](#)
100. Americans have progressively defined the process of plant growth and reproductive development in quantitative terms. #847 [\(Audio Available\)](#)
101. The student shop has a range of stationery. #738 [\(Audio Available\)](#)
102. We can all meet in the office after the lecture. #729 [\(Audio Available\)](#)
103. Social media is criticized for causing Internet addiction. #1013 [\(Audio Available\)](#)
104. Slides and handouts can be downloaded after the lecture. #1007 [\(Audio Available\)](#)
105. Momentum is defined as the combination of mass and velocity. #1004 [\(Audio Available\)](#)
106. The north campus car park could be closed on Sunday. #1000 [\(Audio Available\)](#)
107. There have been too many struggles in the mathematics department. #947 [\(Audio Available\)](#)
108. Farming methods around the world have greatly developed recently. #943 [\(Audio Available\)](#)
109. They developed a unique approach to training their employees. #941 [\(Audio Available\)](#)
110. Some people are motivated by competition, while others prefer to collaborate. #927 [\(Audio Available\)](#)
111. Many graduates studying journalism get jobs in communications field. #914 [\(Audio Available\)](#)
112. The railways were made to make distant travel possible. #867 [\(Audio Available\)](#)
113. We can have a lecture on the morning of Thursday. #845 [\(Audio Available\)](#)
114. Americans have progressively found the growth in quantitative terms. #842 [\(Audio Available\)](#)
115. We cannot consider an increase in price at this stage. #835 [\(Audio Available\)](#)
116. The new technician dropped the microscope in the biology lab. #769 [\(Audio Available\)](#)
117. We were able to contact a number of research subjects. #748 [\(Audio Available\)](#)
118. The history of the university is a long and interesting one. #735 [\(Audio Available\)](#)
119. The garden behind the university is open to the public in summer. #734 [\(Audio Available\)](#)
120. Sports teams practice on weekdays and play games on weekends. #718 [\(Audio Available\)](#)

121. Native speakers are exempted from the language tests in their own languages. #714
[\(Audio Available\)](#)
122. Human beings compete with other living things for resources and space. #707 [\(Audio Available\)](#)
123. Despite their differences, all forms of lives share the same characteristics. #698 [\(Audio Available\)](#)
124. A group meeting will be held tomorrow in the library conference room. #688 [\(Audio Available\)](#)
125. Universities should invest in new technologies designed for learning. #675 [\(Audio Available\)](#)
126. Tutors should set a clear goal at the start of the class. #673 [\(Audio Available\)](#)
127. Time and distance are used to calculate speed. #660 [\(Audio Available\)](#)
128. The poster of this play is hung in the large lecture theater. #651 [\(Audio Available\)](#)
129. The department has a higher-than-normal proportion of postgraduate students. #645
[\(Audio Available\)](#)
130. The cooperator operates a continuous assessment. #644 [\(Audio Available\)](#)
131. Students who study overseas can significantly improve work chances. #641 [\(Audio Available\)](#)
