

WRITE FROM DICTATION

- 1) The plight of wildlife has been ignored by developers.
- 2) The university seeks funds for renovation of the theatre.
- 3) Children in this village enjoy free education and medical care.
- 4) Life cannot be scientifically explained by theories.
- 5) This course provides valuable information for work experience.
- 6) Many graduates studying journalism get jobs in the communications field.
- 7) Teenagers more than most age groups feel strong pressure to conform.
- 8) Peer review is an essential part of scientific methods.
- 9) Good research delivers practical benefits for real people.
- 10) I thought a good architectural structure should be useful, durable and beautiful.
- 11) Review all your sources before drawing any definitive conclusions.
- 12) Mathematics can be applied in various disciplines.
- 13) You should submit your term papers to the general office.
- 14) Tutors should set a clear goal at the start of a class.
- 15) Parents are financially responsible for the children until they reach adulthood.
- 16) An undergraduate is required to do many projects.
- 17) A lack of sleep can increase the chance of some illnesses.
- 18) Nowadays, accounting is far more important for businesses than ever before.
- 19) Students should take advantage of the online resources before attending the lecture.
- 20) The government will continue to offer financial aids to students.
- 21) Traffic is the main cause of pollution in major cities.
- 22) Lectures outlines are available on the college internal website.
- 23) You will be tested via continuous assessment and examinations.

- 24) A group meeting will be held tomorrow in the library conference room.
- 25) New developments in manufacturing are constantly changing the way we live.
- 26) This camera can identify eyes and focus on them.
- 27) Some people argue that education is not that important.
- 28) Several candidates will be qualified as the greatest scientists of all time.
- 29) A good research assistant is not afraid to ask questions.
- 30) Graduates want to find works related to their field.
- 31) Students requiring for an extension should apply sooner rather than later.
- 32) It would be extremely beneficial to work together.
- 33) Human beings compete with other things for resources and space.
- 34) In spite of the differences, all the species of life share certain characteristics.
- 35) The extent of advertising for children is open to much debate.
- 36) American have progressively found the growth in quantitative terms.
- 37) The article considered the leisure habits of teenagers in rural areas or places.
- 38) Reference materials are on hold at the library reference desk.
- 39) Novelists write things about things they know about.
- 40) The department has higher than normal proportion of post-graduate students.
- 41) Sea levels are expected to rise during the next century.
- 42) Doctoral writings have the structure in place as well as scientific papers.
- 43) Radio is a popular form of entertainment throughout the world.
- 44) Novelists have a major role to play in reflecting their time to their readers.
- 45) These young students are grouped by the teachers according to their age.
- 46) Animals raised in captivity behave differently from their wild counterparts.
- 47) Many businesses near the campus offer students discounts.
- 48) This advanced course requires a basic knowledge of economic theory.

- 49) Organizational failure is considered in various perspectives in academic literature.
- 50) The massive accumulation of data was converted into a communicable argument.
- 51) You can never go to college if you drop out of high school.
- 52) Patients diagnosed with heart failure will often report being depressed.
- 53) Enrolling a second major will increase the career options.
- 54) Identity theft happens to thousands of people every year.
- 55) We have been seeking to protect the quality of teaching and learning.
- 56) Science library is currently located on the ground floor of the library.
- 57) Undergraduates may pay their interest on special stages within specific programs.
- 58) Read the safety instructions before using any equipment in the workshop.
- 59) Science is found everywhere in society today.
- 60) Unfortunately, two of my favorite selective subjects clash on my timetable.
- 61) Relative humidity is the amount of moisture that the air can hold.
- 62) In this book, the author discussed the role of cultural differences.
- 63) Your lowest quiz grade has been omitted from the calculations.
- 64) Please confirm that you have received the textbook.
- 65) Safety glasses should be worn while doing experiments in the lab.
- 66) The team declared to have made a great scientific discovery.
- 67) The nation achieved prosperity by opening its ports for trades.
- 68) Any texts or references you make should be cited appropriately in the footnotes.
- 69) Atmosphere is composed of several layers.
- 70) Let me know if anybody struggles in the lab.
- 71) The history course is assessed via three written assignments.
- 72) Graphs and charts allow data more easily to be understood.
- 73) In written assignment, a detailed literature review is important.

- 74) All staff must leave from the fire hydrant exit.
- 75) By agreement with the government, the fast-food company restricted its advertising.
- 76) The dance department stages celebrated performances each semester.
- 77) The ways in which people communicate are constantly changing.
- 78) Some people believe that education should be free for all.
- 79) The toughest part of research for post-graduate students is funding.
- 80) The new art gallery can only be visited on Fridays.
- 81) Students have the option to live in college residencies or apartments.
- 82) Weather patterns have changed significantly over the past two hundred years.
- 83) Please note submission deadlines are only negotiable in exceptional circumstances.
- 84) The rising temperature is changing the wildlife population.
- 85) There is no fixed career path for a qualified journalist.
- 86) Students are instructed to hand in their assignments by the end of this week.
- 87) The date of publication should be included in the reference.
- 88) The city's founders created a set of rules that became laws.
- 89) Library reference desks hold a lot of materials on academic history.
- 90) Everyone must evacuate the premises during the fire drill.
- 91) She is never absent from school without a reasonable cause.
- 92) The visiting speaker used to be a lecturer in this department.
- 93) Those who are considering a career in marketing should attend the talk.
- 94) The weather report advised us to prepare for a big freeze.
- 95) The key difference between courses is the kind of assessment.
- 96) Students will develop confidence in their ability to think critically.
- 97) Laundry facilities are available in each school unit for free of charge.
- 98) The new paper challenged the previously accepted theories.

99) Essays and assignments spread out across the academic year.

100) In his lifetime, he composed most of the works.

REPEAT THE SENTENCES

- 1) she is an expert in the eighteenth-century French literature.
- 2) The generic biology technology lab is located at the North Wing of the library.
- 3) During the next few centuries, London become one of the most powerful and prosperous cities in Europe.
- 4) There won't be any space for me in the car.
- 5) A periodical is a publication that is issued regularly.
- 6) What distinguishes him from others is his dramatic use of black and white photography.
- 7) Please sort and order the slides of the presentation according to topic and speech time.
- 8) The negative discourse continues to be predominant in discussions about gender.
- 9) You can pay by cash or using a credit card.
- 10) Knives and forks should be placed next to the spoon on the edge of the table.
- 11) The framework will help pose more research questions systematically.
- 12) The program will be shown on television during the weekend.
- 13) Nearly half of the television outputs are given away for educational programs.
- 14) Hypothetically, insufficient mastery in these areas slows future progress.
- 15) It's time to finalize the work before the Wednesday seminar.
- 16) The real reason for global hunger is not the lack of food, but poverty.
- 17) Please pass the handouts along to the rest of the people in your row.

- 18) With the development of technology, automation brings a lot of benefits to the US.
- 19) The cafeteria closes soon but the snack machine is accessible throughout the night.
- 20) You should enquire what the author means by "Sustainability".
- 21) Essays with few or no citations will be regarded as invalid.
- 22) In marketing, short-term thinking leads to many problems.
- 23) With the development of technology, automation brings a lot of benefits to the US.
- 24) In consultation with your supervisor, your thesis is approved by the faculty committee.
- 25) The chemistry exams results were posted on the website yesterday.
- 26) I don't like cheese and tomato sandwiches on white bread and orange juice.
- 27) The Law Library is closed on Sundays and public holidays.
- 28) Please have copies of your seminar papers in the library a week in advance.
- 29) You are not permitted to take reference books out of the library.
- 30) Tuesday sessions will last for approximately two hours.
- 31) opposition to the government's tax policies was widespread across business sectors.
- 32) Our school of arts and technology accepts applications at all points throughout the year.
- 33) This part of the story is the story of my father.
- 34) All students must return the books to the college library before the end of the term.
- 35) The visiting professor is going to give a lecture on geology.
- 36) Your watch is fast, you need to reset it.
- 37) Collaboration is a feature of a successful company.
- 38) I can give you a hand if you need help.
- 39) A demonstrated ability to write clear, correct and concise English is bigotry.
- 40) We can meet in my office after the lecture.
- 41) We need to read the first five chapters to prepare for next week's tutorial.
- 42) Many students are so scared of writing essays, because they never learned how.

- 43) Our university welcomes postgraduate students from all over the world.
- 44) We are constantly looking for ways to bring industry and agriculture closer together.
- 45) The tutor is there for help, so do ask if you don't understand anything.
- 46) All students are encouraged to vote in the forthcoming elections.
- 47) The context includes both the land history and the human history.
- 48) Half of the marks in mathematics are allocated to the correct working.
- 49) Several students raised different examples.
- 50) Number the beakers and put them away.
- 51) Answering such a complex question with a simple yes or no is absolutely impossible.
- 52) Geography is generally divided into two branches: human and physical.
- 53) You can retake the module if your marks are too low.
- 54) It is good for the environment also good for your bill.
- 55) If she doesn't speak the language, she's not going to sit around and wait for a translator.
- 56) Company exists for money, not for society.
- 57) Arteries carry oxygenated blood from the heart to other parts of the body.
- 58) The hypothesis needs to be tested in a more rigorous way.
- 59) Basketball was created in 1891 by a physician and a physical instructor.
- 60) The United States has developed a coffee culture in recent years.
- 61) Several students raised different examples.
- 62) Meteorology is a detailed study of earth's atmosphere.
- 63) All applications of internship are available in the office.
- 64) Your tutor is there to help you, so do ask if you don't understand something.
- 65) Unfortunately, the two most interesting economic electives clash on my timetable.
- 66) The student service centre is located on the main campus behind the library.
- 67) Until you complete the form, you cannot attend.

- 68) Our demand for clean water will increase over the next decade.
- 69) May the love of those around you help you through the days ahead?
- 70) By clicking this button, you agree with the terms and conditions of this website.
- 71) Acupuncture is a technique involved in traditional Chinese medicine.
- 72) Today's lecture is cancelled because the lecturer is ill.
- 73) Key business partners are often intertwined in expense accounts.
- 74) 39.5% California residents don't speak English at home.
- 75) She feared becoming an object of ridicule.
- 76) Essays and assignments should be submitted to the department office before the deadline.
- 77) It's traditional in America to eat turkey on Thanksgiving Day.
- 78) The difficult teacher is always responsible for the contribution to student marks.
- 79) African elephant is the largest land living mammal in the world.
- 80) I expect a long and stagnant debate for a week or two on this issue.
- 81) Students can avoid viruses by eating lots of fruits and vegetables.
- 82) If you want to receive the reimbursement, you must submit the original receipts.
- 83) Number the beakers and put them away.
- 84) Each child was asked to participate in extracurricular activities at school.
- 85) Students can get access to computers on a daily basis.
- 86) The program depends entirely on private funding.
- 87) The older equipment has been put at the back of the building.
- 88) You can minimize the danger of driving by obeying the rules.
- 89) Building trust is not anything that can be achieved overnight.
- 90) We are delighted to have professor Robert to join our faculty.
- 91) Contemporary critics dismissed his idea as eccentric.

- 92) Newspapers across the country have been reporting stories of the president.
- 93) The modern approach to the problem is to stress the symbolic side of human nature.
- 94) You need to give a better example to support your argument.
- 95) In my free time, I would like to read current affairs and newspapers.
- 96) Application forms for sharing accommodations must be completed two months in
- 97) advance.
- 98) Globalization has been an overwhelming urban and urbanization phenomenon.
- 99) My mom made a milkshake with frozen bananas and chocolate sauce.
- 100) To understand its entity, we need to go back to its origin.

READ ALOUD

1. Turmeric

For thousands of years, turmeric has been used as a dye, spice, and a medicine in South East Asia, India and the Middle East. It has long been known for its health properties, but recently Western scientists have discovered just how powerful of a medicine turmeric really is. It can help prevent cancer and Alzheimer's disease, reduce inflammation, lower cholesterol, improve our liver function, and more.

2. English

Well, one way to your contact hours with English that you can actually understand is through a practice called extensive reading. The idea is that you choose books to read that are very easy and understand, and you then read lots and lots of them. For most learners, this involves using graded readers that is, books written using the most common English words for people who are not yet fluent at English.

3. Traditions

There is no denying the fact that traditions have a greater hold on the public than anything else. So, the traditions play a major role in determining the form of a political system which the country adopts. In Czarist Russia there was a major problem how to adjust Russian traditions to Westernisation which in their wake were bound to bring innovations. Though both U.S.A.

and Russian have modernized themselves. Yet they have a different political system according to their own traditions.

4. Institutions

The challenge of designing institutions conflict is a long-running topic of academic inquiry and dispute. Generally speaking, the focus is on how legislatures, executives, and electoral systems can be organized to accommodate the politics of deeply divided societies. The design of courts figures much less frequently in this literature. But courts, particularly constitutional courts, may play a vital role in such contexts.

5. Alzheimer

More than 5.4 million Americans live with Alzheimer, a disease that involves an abnormal build-up of proteins in the brain's memory circuits. One in three seniors will die with Alzheimer or another dementia. Once diagnosed, most people live another six to nine years, during which time the disease causes the function of their brain circuits to deteriorate irreversibly.

6. Radiocarbon dating

The method was developed by Willard Libby in the late 1940s and soon became a standard tool for archaeologists. Libby received the Nobel Prize for his work in 1960. The radiocarbon dating method is based on the fact that radiocarbon is constantly being created in the atmosphere by the interaction of cosmic rays with atmospheric nitrogen.

7. Great Man

It is known very well that the people of the country except a few will be taking this holiday as fun or resting day instead of paying homage to the great man. The people out here don't really care who this great man is or was, but will be thanking him; because of him they got a holiday and got time to have a resting day without really paying any respect or homage to the great man which was the main motive of the holiday.

8. Satellites

The weather satellite is a type of satellite that is primarily used to monitor the weather and climate of the Earth. Satellites can be polar orbiting, covering the entire Earth asynchronously, or geostationary, hovering over the same spot on the equator. Meteorological satellites see more than clouds and cloud systems. City lights, fires effects of pollution, auroras, sand and dust storms, snow cover, ice mapping, boundaries of ocean currents, energy flows, etc.

9. Yellow

Yellow is considered as the most optimistic colour. Yet surprisingly, people lose their tempers more often in yellow rooms and babies cry more in them. The reason may be that yellow is the hardest colour for eyes to take in. So, it can be overpowering if overused.

10. Akimbo

Akimbo, this must be one of the odder-looking words in the language and puzzles us in part because it doesn't seem to have any relatives. What's more, it is now virtually a fossil word, until recently almost invariably found in arms akimbo, a posture in which a person stands with hands on hips and elbows sharply bent outward, one signalling impatience, hostility, or contempt.

11. Charlie Parker

Charlie Parker noticed that the solos were only improvised through the melodies, but that he could also improvise them through the chords, thus creating new variations over the structure of the songs, and also playing more notes and faster.

12. Universities of Europe

During the Early Modern period, the universities of Europe would see a tremendous amount of growth, productivity, and innovative research. At the end of the Middle Ages, about 400 years after the first European university was founded, there were twenty-nine universities spread throughout Europe.

13. English Revolution

The speaker reminisces about his views of the English Revolution when he was a student and how it seemed quite clear which side he was on - 'the aristocrats, not the puritans'. Later he realized there was more to it than that and there were several ways of interpreting the Revolution: as a struggle between the king and parliament, as a class war or as an unpredictable situation without clear sides.

14. Starry Night

Nature offers no greater splendour than the starry sky on a clear, dark night. Silent, timeless, jewelled with the constellations of ancient myth and legend, the night sky has inspired wonder throughout the ages — a wonder that leads our imaginations far from the confines of Earth and the pace of present day, out into boundless space and cosmic time itself.

15. Microbes

Investigators also compared those microbes with those living in 52 other soil samples taken from all around the planet. The park had organisms that also exist in deserts, frozen tundra, forests, rainforests, and prairies. Antarctica was the only area that had microbes that did not overlap with those found in Central Park. Only a small percentage of the park's microbes were found to be already listed in databases.

16. Slang

Australians do speak English. However, for some tourists and travelers, it can be difficult to understand the slang. Also, the links between Australian and American English were seen to be very tenuous. At least some colloquialisms in Australian English do not exist in other types of English.

17. Body Composition

Your body's composed of trillions of cells - lots of different types of cells that make up different organs and other parts of your body. Your body is also where 10 times that number of bacteria calls 'home sweet home.' But don't be afraid - these bacteria do better than harm to you. And besides, just in case you wanted to strike up a conversation with your tenants, you and your bacteria do have a few things in common.

18. Material and Non-material

For the purposes of argument, culture is divided into material and non-material, and the speaker's aim is to show how they both affect each other. Material developments in tools and technology can affect non-material culture, our customs and beliefs, and the other way around. Genetics is used as an example as it has changed the way we think about life, but also our beliefs have affected its rate of development.

19. Hunter-gatherer

The life of a hunter-gatherer is indeed, as Thomas Hobbes said of the state of nature, 'solitary, poor, nasty, brutish, and short'. In some respects, to be sure, wandering through the jungle bagging monkeys may be preferable to the hard slog of subsistence agriculture.

20. Language Diversity

Despite a number of events in recent years devoted to language diversity, language endangerment, and multilingualism, such as the International Year of Languages, public awareness of the issues is still remarkably limited. Only one in four of the population know that half the languages of the world are so seriously endangered that they are unlikely to survive the present century.

21. Nature of Reality

In attempts to understand the very nature of our reality, physicists sure have some mind-bending theories. Like what if information is a tangible and fundamental aspect of physical reality itself – alongside matter and energy? Or, alternatively, what if information is the fifth state of matter?

22. Delta

As the Delta variant of coronavirus sweeps the U.S. businesses, universities and cities such as New York and San Francisco have introduced vaccine mandates to boost uptake of jabs, but vaccine hesitancy remains high and a cottage industry for bogus inoculation cards has emerged to help people get around the rules.

23. Neurotransmitter

A ubiquitous neurotransmitter that carries signals between brain cells, dopamine, among its many functions, is involved in multiple aspects of cognitive processing. The chemical messenger has been extensively studied from the perspective of external cues, or "deterministic" signals.

24. Sandra Lousada

London's National Portrait Gallery is currently celebrating the fifty-year career of photographer Sandra Lousada. The twenty-one portraits on display depict key figures in literature, film and fashion from the early 1960s. Subsequent to the acquisition of forty portraits by Lousada, the display at The National Portrait Gallery highlights shots taken between 1960 and 1964, many of which feature in Lousada's book *Public Faces Private Places* (2008). Formal commissioned portraits are shown alongside behind the scenes photographs taken on films sets and unguarded portraits of sitters captured at home.

25. Russia

Long isolated from Western Europe, Russia grew up without participating in the development like the Reformation that many Russian's taking pride in their unique culture find dubious value. Russia is, as a result, the most unusual member of the European family, if indeed it is European at all. The question is still open to debate, particularly among Russians themselves.

26. Tea Ceremony

The Japanese tea ceremony is a ritual tour influenced by Buddhism in which green tea is prepared and served to a small group of guests in a peaceful setting. The ceremony can take as long as four hours and there are many traditional gestures that both the server and the guest must perform.

27. Blue

While blue is one of the most popular colours, it is one of the least appetizing. Blue food is rare in nature. Food researchers say that when humans searched for food, they learned to avoid toxic or spoiled objects, which were often blue, black, or purple. When food dyed, blue is served to study subjects, they lose appetite.

28. Tissues and Organs

Tissues are grouped together in the body to form organs. These include the brain, heart, lungs, kidneys, and liver. Each body organ has a specific shape and is made up of different types of tissue that work together. For example, the heart consists mainly of a specialized type of muscle tissue, which contracts rhythmically to provide the heart's pumping action.

29. Personal Libraries

Scholars build their own personal libraries to support not only particular projects but also general reading in their field. They buy or make photocopies of materials when possible so they can come out themselves frequently, but page and write annotation on them. When moving into a new field they add to the collections only concentrating on primary texts.

30. Summerhill School

Summerhill School was regarded with considerable suspicion by the educational establishment. Lessons were optional for pupils at the school, and the government of the school was carried out by a School Council, of which all the pupils and staff were members, with everyone having equal voting rights.

31. Dreams Phenomenon

Having the same dream again and again is a well-known phenomenon - nearly two thirds of the population report having recurring dreams. Being chased, finding yourself naked in a public place or in the middle of a natural disaster, losing your teeth or forgetting to go to class for an entire semester are typical recurring scenarios in these dreams.

32. Moods

Moods may also have an effect on how information is processed, by influencing the extent to which judges rely on pre-existing, internal information, or focus on new, external information. Positive moods promote more holistic and top-down processing style, while negative moods recruit more stimulus-driven and bottom-up processing.

33. Education

Since 2003, borrowing for education advanced faster, in percentage terms, than all other types of consumer debt that includes mortgages, auto loans and credit cards, data from the Federal Reserve Bank of New York show. As of the fourth quarter, student loans represented 10.5 percent of a record \$13.1 trillion in household debt, up from 3.3 percent at the start of 2003.

34. Australian Scientists

Australian scientists say they have developed pain-free blood sugar testing for diabetics a non-invasive strip that checks glucose levels via saliva for diabetics managing their blood sugar levels typically means pricking their fingers multiple times a day with a lancet and then placing a drop of blood on a testing strip.

35. Doctor

If a doctor expects a treatment to be successful, a patient may experience less pain and have better outcomes, according to a new study. The findings reveal how social interactions between hypothetical healthcare providers and patients have the power to influence how patients perceive the effectiveness of a treatment, even when it is a placebo.

36. Domestic Violence

Domestic Violence Increased During Lockdown In The United States - "A new study, published in Psychology of Violence, looks at rates of intimate partner violence during the pandemic in the United States. Like data from the UK, it suggests that domestic violence increased during lockdown.

37. Labour Migration

Most countries are affected by labour migration. In many rural places, the traditional extended family has been undermined by the need for family members to migrate to towns as an economic necessity. Migration, therefore, presents a major challenge everywhere to social and economic policy.

38. Drug Test

Tests of a drug known to stimulate brain activity have shown early success in reducing symptoms of sluggish cognitive tempo in 38 men and women with attention deficit hyperactivity disorder. It also significantly corrected deficits in executive brain function, with fewer episodes of procrastination, improvements in keeping things in mind, and strengthened prioritization skills.

39. Biological Processes

For centuries, the study of biological processes has inspired fundamental mathematical developments, while mathematical analyses have been instrumental in developing a mechanistic understanding of biological observations. This fruitful cross-fertilization has gained momentum over recent decades, thanks in part to extraordinary technological advancements in the biological sciences, as well as the rising availability of large-scale computational resources.

40. Smartphones

Smartphones have become an everyday essential for millions of us - we rely on them for everything from updating our social media profiles to banking. Taking out a smartphone contract that bundles together your calls, data, and texts with the cost of the handset can help spread the cost - but can also mean you'll pay more over the long run.

41. Earth's Temperature

It's projected that, over the next hundred years, temperatures on Earth could rise an average of nearly five degrees Celsius. While some animals might be able to migrate north to escape the brunt of the heat, plants can't uproot themselves quite so easily. Researchers wondered whether the creatures that disperse plant seeds might be able to help.

42. Hazard Assessment

A Hazard Assessment should be performed for work involving distillations of organic liquids and should thoroughly address issues relating to residual water and possible decomposition of the solvent in question, as well as the physical placement of the distillation apparatus and heating equipment to be employed.

43. Biopedturbation

Biopedturbation, the disturbance of soils by animals, is an important and often essential functional component of many ecosystems worldwide. It determines the spatiotemporal characteristics of soil patches and thereby contributes to the ecosystems' diversity and heterogeneity.

44. Schooling

The conventional model of schooling emerged in Prussia in the 18th century. Alternatives have so far failed to teach as many children as efficiently. Classrooms, hierarchical year-groups,

standardized curriculums and fixed timetables are still the norm for most of the world 's nearly 1.5 billion schoolchildren.

45. Scientist's Evidence

A scientist's evidence is thought to be reliable because it will have been tested and verified at every stage. This is not, of course, infallible as scientists are subject to human error as much as the rest of us.

46. Avalanche

Avalanche is rapidly descending large mass of snow, ice, soil, rock, or mixtures of these materials, sliding or falling in response to the force of gravity. Avalanches, which are natural forms of erosion and often seasonal, are usually classified by their content such as a debris or snow avalanche.

47. Global Warming

Global warming is defined as an increase in the average temperature of the earth's atmosphere. This trend began in the middle of the 20th century and is one of the major environmental concerns of scientists and governmental officials worldwide. The changes in temperature result mostly from the effect of increased concentrations of greenhouse gasses in the atmosphere.

48. Coffee

Coffee is a beloved beverage known for its ability to fine-tune your focus and boost your energy levels. In fact, many people depend on their daily cup of coffee when they wake up to get their day started on the right foot. In addition to its energizing effects, coffee has been linked to a long list of potential health benefits, giving you more reasons to get brewing.

49. Sun

The sun is a massive gaseous ball. It measures 1,392,000 kilometres in diameter. It's so big that millions of planets could fit inside. Hydrogen and helium gas make up the majority of the Sun's composition. The photosphere is the name given to the Sun's surface. The chromospheres are a thin layer of gas that surrounds the photosphere. There would be no life on Earth if the Sun did not exist. Plants, animals, and humans would all be extinct. The Sun provides energy to all living creatures on Earth, allowing them to survive.

50. Examination of Domicile

At an early stage in the examination of the domicile of dependency rule in so far as it related to married women it seemed to the Commission that it would be better to examine the whole

concept of domicile, particularly as dependent domicile arises in the case of minors (children under the age of majority) and mentally disordered persons as well as in the case of married women.

ANSWER SHORT QUESTIONS

1. A planet or a galaxy that is very distant can be seen with what device? – Telescope.
2. Computer, telephone and typewriter, which one is first invented? – Typewriter.
3. Which field of study uses the periodic table? - Chemistry
4. If something is irreparable, what could no one do it? - Repair.
5. What do you call a person who has died for their country? - Martyr
6. In a job interview, would nice candidates try to appear enthusiastic, lazy, or confused?
- Enthusiastic.
7. What do you call a building for horses? - Stable
8. What is a standard set of letters that is used to write one or more languages based upon the general principle? –Alphabet.
9. What is the opposite of the word ‘artificial’? –Natural / genuine / real.
10. How many years are there in a millennium? –A thousand years.
11. If Monday is the first day, what day is the fourth day? - Thursday.
12. What do you need to submit for completing a degree in the university? - Dissertation.
13. What do you call a specialist who repairs leaking water pipes? - Plumber.
14. What does a sundial measure? - Time.
