### EDUCATION

**B.Tech**

**Jamia Millia Islamia**

2020-2024

### PROFILE

Passionate Full-Stack Web Developer with a love for cutting-edge technologies. Started a publication on Hashnode in 2023 to teach HTML and CSS in a simple way. YouTube channel caters to tech enthusiasts and beginners alike. Skilled in creating impactful small projects and committed to continuous learning. Friendly and approachable, fostering strong connections within the tech community. Dedicated to crafting exceptional user experiences, driving innovation, and empowering others on their tech journeys. Striving to make a positive impact in the tech world and beyond.

### WORK EXPERIENCE

#### FullStack Web developer intern

Meta16labs Healthcare and Analytics Pvt Ltd

- Demonstrating strong communication skills to foster seamless teamwork and efficient collaboration, resulting in successful project deliveries.
- Proficiently working on user interfaces using ReactJS, where my focus was on crafting intuitive and visually appealing UI designs to enhance user experience.
- Undertaking backend development in ExpressJS, responsibly providing REST APIs to support the frontend UI and ensure smooth functionality
- Independently building the dietary and other modules, guided by the mentorship of senior developers and diligently gathering project requirements from project managers to align with project goals.
- Successfully accomplishing various third-party software integrations single-handedly, showcasing adaptability and versatility in handling different technologies.

#### Freelancer as a Frontend Web developer

Various clients on Upwork and Fiverr

- Developed an efficient dashboard for advertisement management, incorporating tables for campaigns and ad groups. Implemented language toggling (Japanese and English) and integrated charts and graphs using HTML, CSS/SCSS, JavaScript, and Chart.js.
- Designed and developed a user-friendly camping website, featuring search functionality for nearby camps. Utilized HTML, CSS/Bootstrap, and JavaScript to create carousels, cards, navbars, and footers, focusing on optimizing user experience.
- Implemented algorithms for calculating long-run and short-run profit/loss on a trading website. Leveraged Chart.js to plot data received from the Django backend, ensuring a seamless algorithm pipeline for data validation and graph plotting.
- Developed a visually appealing 6-page HTML/CSS website for a logistics company, ensuring a delightful customer experience. Created UI elements, including navbar, header, footer, contact us page, and tracker pages.
- Led a team of 3 in creating a web app using Python Dash framework. Enabled user registration, authentication, and password retrieval. Implemented functionality for product addition and deletion, along with an admin portal. The web app allowed users to add Amazon products and relevant keywords, with backend functionality to determine keyword rankings and display them on the website.
