## Why ReactJS Academy?

ReactJS Academy ([our website](#)) gives students quality, one-on-one training that you simply can't get from online courses. We were the first in Europe to offer such a service and pride ourselves on teaching the most up-to-date curriculum for the React ecosystem (including Redux and GraphQL).

Our coaches are working professionals, building products day-to-day as well as teaching what they know, enabling them to offer real-world experience and expert-knowledge to students. The core coaching team are part of LeanJS - a company who works exclusively in the Lean methodology, an iterative approach that we employ in our curriculum evolution as well as our development approach.

## What other companies have sent attendees to ReactJS Academy?

We have taught devs and tech leads from:

- Asos.com
- Capgemini
- IBM
- John Lewis
- Net-a-Porter
- The Financial Times
- Sainsbury's
- Tesco
- The Telegraph
- Trainline

## Who is ReactJS Academy?

Our team of coaches come with different expertise from a variety of backgrounds:

- [Alex Lobera](#) - Tech Lead at LeanJS
- [Richard Moss](#) - Senior React Engineer at LeanJS
- [Horacio Herrera](#) - Designer and Developer at LeanJS
- [Eva Hoffmann](#) - Interactive Developer at SapientRazorfish
- [Will Voelcker](#) - Senior Full-stack JavaScript Engineer at LeanJS
- [Adam Lancaster](#) - Software Engineer at Nested

## What courses are do we offer?

### [React Bootcamp](#)

- 1 week
- Full time
- For experienced devs
- Small classes
- Project-based training
- Cost: £2160

### [Advanced React](#)

- 3 days
- Full time
- For experienced React devs
- Small classes
- Project-based training
- Cost: £1500

### [React Native](#)

- 1 day
- Full time
- For experienced React devs
- Small classes
- Project-based training
- Cost: £500

### [React Part-Time](#)

- 5 weeks
- Part-time - 2 evenings a week
- For experienced devs
- Small classes
- Project-based training
- Cost: £1400

These details are subject to change and should be taken as a guide. Please visit [reactjs.academy](https://reactjs.academy) for the latest information.

## What about private corporate training?

We have run a multitude of different private training sessions with companies such as IBM, Xing and Tesco to name just a few.

[See our site](#) for more details on private training or email us [hello@reactjs.academy](mailto:hello@reactjs.academy) and we'll set up a call to talk over your specific needs.

[Click here](#) and see what Andru Dunn, Senior Developer at **John Lewis** has to say...

## **Are these course for beginners, intermediate or advanced devs?**

Our courses are a deep dive into the React ecosystem, created for developers who have at least 1 years' experience using JavaScript. **It is not for beginners** who do not know how to code at all.

## **Why should developers learn React? What's in it for the business?**

React is a JavaScript library for creating user interfaces (UI) and represents a new approach in UI development. It is the technology of choice for leaders such as Facebook, Instagram, Netflix, New York Times, to name but a few.

In practical terms, using React helps create a more efficient development workflow with a component-based architecture. This slots easily into modern approaches to digital product creation (such as design systems and lean/agile methodologies).

From the start, React was (and is) designed to be fast, simple and scalable, with easy to test features that build more robust applications in comparison to traditional development approaches. React is a declarative library, which means:

- Less code
- Less bugs
- Easier to understand
- Easier to change and maintain

## **Want to chat? Contact us!**

Our website [reactjs.academy](https://reactjs.academy) has all the latest information about our courses but we're also available on social media, check us out:
