- **Methodologies:** Agile, SCRUM

Education

Bachelor of Computer Science

International Islamic University Malaysia (IIUM)

6-Month Training Camp

ASAC of LTUC College (Jordan)

Professional Experience

Senior Full-Stack Developer

Shai For AI @ Jordan

May 2025 - Current

- Acted as tech lead for the core product, overseeing architecture, development, and technical direction.
- Supervised team members across the stack, ensuring code quality, delivery timelines, and scalable practices.
- Collaborated closely with the UX/UI designer, heavily contributing to product vision and user experience.
- Led implementation of frontend and backend features, focusing on performance, usability, and maintainability.

Senior Frontend Developer

Logatta @ Jordan

Aug - Dec 2025

- Lead frontend developer for an education SaaS product as a freelancer, responsible for the entire UI codebase.
- Implemented modular, testable components and enhanced the UI performance across key modules.

Senior Full-Stack Developer

AlembicSoft @ Jordan

Jul 2023 - Apr 2025

- Owned the entire product lifecycle from requirement gathering to system architecture, development, testing, and deployment.
- Designed intuitive user interfaces and crafted scalable backend systems tailored to client needs.
- Led discussions with stakeholders to align technical solutions with business goals.
- Delivered full-stack applications with a strong focus on performance and user-centric design

Delivery Consultant

Deloitte @ Jordan

Jun - Jul 2023

- Continued working on active AgileTz projects following the acquisition by Deloitte.
- Contributed to delivery processes and project handoffs with minimal disruption to ongoing development.
- Departed due to a required overseas relocation that was not feasible to meet.

Senior Full-Stack Developer

AgileTz @ Jordan

Aug 2022 - May 2023

- *Sole frontend developer for Sanad, Jordan's unified e-services web platform, ensuring consistent performance and UI/UX quality.*
- *Led frontend development for the DLS project, working closely with the project manager and actively shaping the user experience.*
- *Managed architecture, reusable components, and development timelines for high-impact government services.*

Frontend Developer

Luxtag @ Malaysia

Nov 2020 - Oct 2021

- *Lead frontend developer for a blockchain-based SaaS product, responsible for the entire UI codebase.*
- *Served as second-in-command for the development team, covering team lead responsibilities during absence.*
- *Implemented modular, testable components and enhanced the UI performance across key modules.*

Full-Stack Developer

AIS @ Malaysia

Sep 2019 - Aug 2020

- *Owned the full lifecycle of the school's internal systems — from requirements collection, UX/UI design, full-stack development, to testing and deployment.*
- *Architected and built an end-to-end platform used daily by students, staff, and management.*
- *Delivered a robust product with minimal technical debt by emphasizing clean code and modular design.*

Open-Source Contributor

Freelance

Sep 2019 - Current

- *Solved many daily-life challenges with end-to-end opens-ource products in various industries and life aspects.*
- *Led the development of products, supervised and reviewed others' development results.*
- *Used it as an approach to adopt, absorb and test new development technologies & frameworks.*

Full-Stack Developer

Freelance

Oct 2015 - Current

- *Architected and built end-to-end opens-ource and on-demand platforms used daily by various stakeholders.*
- *Spearheaded the development of introductory, online fronts and landing pages for many organisations and individuals.*
- *Delivered robust results with minimal technical debt by emphasizing clean codes and modular designs.*

Projects

Mustaheq

Frontend Web Dev

Public / Governmental Services

Mustaheq is a government-backed unified platform enabling non-profit organizations in Saudi Arabia to coordinate, streamline operations, and manage beneficiaries. Led the project end-to-end as full-stack developer and tech lead.

- *Designed and built the platform architecture from scratch using NestJS (backend) and ReactJS (frontend).*
- *Developed modules for beneficiary management, eligibility tracking, and coordination across multiple government bodies.*
- *Implemented role-based access for government officials, NGOs, and auditors with strict data permissions.*
- *Led a small cross-functional team and collaborated closely with product management and design.*
- *Ensured compliance with Saudi government digital infrastructure standards and data security requirements.*

Sanad

Frontend Web Dev

Public / Governmental Services

Sanad is Jordan's national gateway to digital government services. Built the frontend from scratch and maintained it as the only frontend developer.

- *Delivered a responsive, modular frontend interface supporting various ministries and services.*
- *Maintained accessibility, performance, and UX consistency across a growing number of services.*
- *Collaborated closely with backend and DevOps teams to ensure seamless API integrations.*
- *Contributed to UI/UX design decisions with the PM for maximum citizen engagement.*

Department Of Lands & Survey (DLS)

Full-Stack Web Dev

Public / Governmental Services

Led the frontend development of DLS web platform, digitizing public land services for the Jordanian governmental Department of Lands and Survey.

- *Built complex, dynamic forms and search interfaces for real estate, land registry, and title services.*
- *Led a small frontend team while handling primary development tasks.*
- *Integrated Express.js backend for lightweight data handling and API support.*
- *Directly contributed to UX alongside the PM and stakeholders.*

Semesteer

Full-Stack Web Dev

B2B Education SaaS System

Semesteer is a full-featured School Information System (SIS) SaaS platform. Superheaded the project from concept to deployment — including client interviews, UX/UI design, architecture, development, and production delivery.

- *Designed and implemented a multi-tenant architecture allowing each school to have isolated data environments.*
- *Built core modules including student profiles, course management, attendance, fees, results, and parent portals.*
- *Developed role-based access control and school-specific branding capabilities.*
- *Integrated PDF generation, notifications, analytics dashboards, and support for both English and Arabic languages.*
- *Optimized for AWS deployment with CI/CD, Docker, and secure configuration.*

Trellah

Frontend Web Dev

Ride-Hailing for Goods System

Trellah is a logistics marketplace for commercial and personal shipments via trucks. Was the lead frontend developer working under a senior full-stack developer.

- *Developed interactive UIs for both shippers and drivers, including map and order tracking components.*
- *Implemented responsive dashboards for dispatchers and logistics coordinators.*
- *Collaborated closely with backend engineer for real-time data handling and authentication flows.*

Rasmi & Kiwan

Full-Stack Web Dev

Data-Management Portal

Rasmi & Kiwan is Jordan-based regional engineering consulting firm. Needed an internal platform to manage HR & project-management matters.

- *Built core modules including staff profiles, project management, attendance, and financial data.*
- *Developed role-based access control and branding customization capabilities.*
- *Optimized for AWS deployment with CI/CD, Docker, and secure configuration.*

BrandTag

Frontend Web Dev

Brand Protection SaaS App

BrandTag is a blockchain-based product verification platform. Spent 6 months in full-stack development before transitioning to lead frontend responsibilities.

- *Integrated NEM blockchain APIs for tracking and verifying unique product tags.*
- *Built interfaces for brand owners and consumers to validate product authenticity.*
- *Created QR-scanning features and dashboards to visualize product movement.*
- *Led refactoring of the frontend into modular, reusable components using React.js.*
