👤 Summary

I am a self-motivated professional passionate about quality control. I bring to this position a hands-on approach in the testing of software systems. I have a solid understanding of QA methodologies used in the industry and the Software Development Life Cycle (SDLC). I have 9.8 years of work-related experience in Quality assurance. My areas of expertise extend to cover Test Plans and Test Cases Development, Configuration and Troubleshooting.

💼 Experience

Apr 2014 - Present

Sr.QA Engineer
Hewlett-Packard Co

Review designs and technical specifications and translate them into test-cases maximizing test coverage.

Work with Engineering (frontend and backend) in an agile squad-based environment to thoroughly test and verify new features in a timely manner before they are released.

Execute test cases and log defects into the bug tracking system in accordance with QA company standards. Manage schedule to complete all testing in time for release deadlines, and will sign off when a build is ready for app submission.

Collaborate closely with Developers, Designers, Product Managers, and Customer Support to clarify inconsistencies between the spec and the outcome, and ensure that the final product meets expectations. Provide comprehensive QA test reports.

Operate with limited oversight to fulfill duties. Work with Engineering and Product Manager to provide input on new features being developed. Understand the life cycle of features and releases. Identify workflows and scenarios that will affect our users.
