SUMMARY

I strongly believe the ability of architecture and design is to build better societies which will have positive effect on the world. My goal is to help better shape the built environment. I am enthusiastic and determined to learn and develop my creativity, vision, and sense of design. Only together we can build a better future.

EXPERIENCE

Junior Architect

J&K Associates, California Jun 2019 - Nov 2019

I worked on residential and commercial projects, interior projects. I happened to design a residential building for MHADA. My scope of work involved delivering concept design for the building and making options for clusters. I learned a lot about designing planning area calculations.

Intern

Ace Architects, New York Apr 2017 - Sep 2017

I worked on an IT park project that happened to be in Kharadi, Pune. I was involved in designing sub-core details, staircase details, façade details and mockup dockets, etc. I learned a lot of technical details and made sure the deliverable drawings are up to the mark.

Intern

M&T Associates, NY Jan 2017 - Mar 2017

I happened to design residential projects and interiors and 3D graphical representations.
