Projects

Online shopping site
Information technology and services.

An online shopping site for the Birla Institute of Technology. The Graduation Project report submitted in partial investigation of the requirements for obtaining a Bachelor's degree in Computer Applications.

Introduction :

The main reason we chose this project is to help the buyers in Dubai, to make purchase items easier sitting in their homes or offices rather than having to go down to the market to buy it, site makes this all the more profitable and a good addition to a shopper's tool kit. Our online shopping website concentrate mainly on electronics. It will allow customers to look at the items on sale, search for specific items through item specification or through name. The customer will be able to log in to the website to make use of the 'add to cart' feature and select items to be checked out at a later time. The details of the purchase and delivery information are delivered to the customer through email that the customer provides. The customer needs to make the cash payment only when the product is delivered at his/her place. The further processing of the delivery of goods is done through the phone number which the customer provides at the time of his/her sign up to the Shopping Website.

Abstract :

Online Shopping Website for Birla Institute of Technology, is a project that is created to manage the Online Shopping of customers all over Oman and the purchased products are delivered to customer's delivery place by the Shopping Website .

Online shopping is done through Microsoft ASP. NET C #.

Gives username and password to customers of the Shopping Website

View the items in the cart of customer.

Verifies the unique username and phone number.

Once sign up process is done, the customer is a registered user.
The customer can view the products, make purchase according to his wish.
The customer needs to make the cash payment only when the product is delivered.
The details of the purchase and delivery information are delivered to the customer through email.

Objective of project :

In Dubai the purchasing of an item is of manual process mainly which is going to the market to buy it. A User friendly Shopping Website makes it easier for all the buyers to purchase items of their wish and it also enables them to compare prices with many suppliers of different brands. This Online Shopping Website enables all the buyers to register easily and to view all the products, compare prices and get the product delivered to their respective places. It facilitates Cash on delivery payment system which enables the users to pay for their product only when it is actually delivered to them. Thus implementing our Shopping Website helps the buyers to purchase products at low prices with easy cash on delivery system. The registration process is also simplified and helps to register within a minute.
