Experience

SAP Fiori Consultant
More & Win Infotech PVT *Jul 2016 - Jan 2019*

SAP Fiori Consultant
Amco Infotech *Jan 2019 - Present*

Projects

Project : Custom Fiori Client
Deputy Manager(Front-End Developer) *Oct 2019 - Nov 2019*
Fiori client is an SAP provided client that is used to show our FIORI Launchpad on mobile. The client wanted a custom client for Vodafone which will be authenticated using SMP and ADFS.

- To create a custom fiori client.
- To be able to login using ADFS credentials.
- To be able to save credentials in the app as all android app does.

Notable Achievements

- Created custom fiori client with the help of the client code provided by SAP.
- I have solved one of the biggest issue to save the credential on the 1 st time some one logs into the app securely.

Extension Project : MY INBOX
Deputy Manger(Front-End Developer). *Mar 2019 - Apr 2019*
Project Thesis: Description Client wanted My Inbox to be extended as per their requirement.

- As a front-end developer, perform requirement analysis and designed the
- application mobile-friendly.
- SAP cloud platform was used to extend the standard Fiori My Inbox app.

Notable Achievements

- Extended My Inbox as per the requirement.
- Created S4 view in order to show details as navigated from the S3 view.
- Dynamically created the S3 view as per the Data coming from oData from BE.

Project: Shopping Cart Application for Purchase Requisition
SAPUI5 Developer *Jun 2017 - Sep 2018*

A developed custom SAPUI5 web application that facilitates end-user to create, change and display purchase requisition in a hassle manner as having a very rich user interface(UI) that is different from traditional SAP screen. User draft shopping cart or can directly create SAP PR. Shopping cart name and number is a wrapper over SAP PR no. The application consist of the following features:

- Custom login screen(Custom sap table maintained for users)
- Create Account (Self-service)
- Change Password (Self-service)
- Forget Password (Self-service)
- List of the Shopping cart(PR) on the basis of status
- Create, change and display shopping cart
- Attachment create, change and display
- Plant based material dynamic F4 search help and live search
- Material based auto fill description, material group and UOM.
- Supplier based currency auto fill.
- Majority used controls are forms, table, text area, input, combo box, select, upload collection, label, icon tab bar/filter, button etc.

Project : Sales 360
SAPUi5 Developer *Jun 2018 - Sep 2018*
Developed a responsive app for sales team using SAP WebIde on SCP that will following features:

- List of customer(With various searching and sorting)
- Customer outstanding balance/limit
- Stock availability
- Customer- Material data
- Customer FI details
- Graphically representation of outbound deliveries
- Sales team site visit verification by Google map device location.

This is a hybrid application that can work across various platforms like desktop, android
and ios devices. The application was deployed on SAP Enterprise store using SAP Mobile
Secure services and Afaria console for Mobile device and user management.

Project: Ceo Dashboard
SapUi5 Developer *Oct 2018 - Nov 2018*
- SAP Portal Services
- Configuration (Authentication , Site Type , Content Management , Portal Configs)
- MVC architecture
- CSS
- Display (Binding Refresh Interval)

Credit Approval
SAPUi5 Developer *Aug 2016 - Dec 2016*
- Custom fiori application created, title, catalog & group
- creation, Odata service maintenance, role based app, semantic object creation, Launchpad
- role(LPD_CUST), OData binding, Split app development.
- Developed simple split app i.e. Master-Detail screen responsive Fiori application for the approval
- of pending outbound deliveries, the app consists of following features:
- List of pending outbound deliveries(With various searching and sorting)
- Customer outstanding balance/credit limit/Delivery value
