SUMMARY

Self-taught developer with a passion for iOS and Swift, looking to apply my skills to some incredible products. I am well versed in a multitude of APIs, SDKs and libraries, and have built many projects on my own. I've also had the opportunity to contract out my skills to local businesses, on top of my professional experience.

EXPERIENCE

White House Custom Colour   Minneapolis, Minnesota   November 2016 - Present
iOS Engineer
- Iteratively develop a flagship mobile product involving heavy image processing, a large codebase, and intensive user interface development
- Integrate extensive third party APIs for OAuth, Cloud Services, and more - often using cocoapods
- Work closely with designers to polish the final product across multiple screen sizes and discuss optimal architecture based on a fluid user experience
- Develop data and network models to download and upload via RESTful services; parsing, processing, caching large data sets - including images

Red Shepard LLC   Minneapolis, Minnesota   April 2016 - Present
Development Lead, Self-Employment
- Development in Swift with Objective-C interoperability, with architectural oversight to all clients' system layers
- Built applications and services in HTML5/ CSS, Node.js, PHP and Java. Experience with Google Cloud Platform, AWS, Heroku, Firebase, SQL, NoSQL and heavy JSON parsing
- Develop project plans, timelines, mockups, and high-fidelity designs while conscious of full system architecture
- Program and develop full-stack applications with modern design, functionality, and scalable backends
- Employ contract labor, if needed, to explore new technology, and assist in development when needed
- Present applications to marketplace, advertise the applications, and manage the ongoing financial aspects of the business

Tamarack Consulting   Minneapolis, Minnesota   June 2016 - Nov 2016
Software Developer
- Experience in Salesforce Development catered to the Equipment Finance industry
- Developed a proof of concept loan provider application built natively in iOS with Swift
- Present platform builds regularly to client technical teams and leadership

Wipfli - Spiderlogic   Milwaukee, Wisconsin   May 2015 - Sept 2015
IT Consulting/Software Developer
- Facilitate the upgrade of client mobile applications from Objective-C to Swift while working as a member of a scrum team
- Assisted in the data mapping and database schemas for multiple enterprise applications built across many platforms
- Delivered high level documents to both project managers and clients while acting as a business analyst to an enterprise development team

U.S. Army National Guard   Fond Du Lac, Wisconsin   April 2011 - April 2017
Infantryman
- Graduated with honors: 17 weeks of split-operation training at the United States Army Infantry School in Ft. Benning, Georgia
- Continued planning and operating with high level leadership on mission critical tasks
- Training in over 80 hrs of both Combat First Aid and Night Vision operations
- Gained immense squad-level leadership experience with a heavy decision making focus and tactical leadership on a daily basis
