Objective

Be able to work and contribute in a company using my communication skills and experience in Software Development and Product Designing.

Experience

Engineer II, S.S.D

Samsung Philippines

Taguig, Philippines
April 2023 - Present

I am one of the Front End Engineers of the Cloud Solutions Team of Samsung mainly focused on implementing UI/UX Design from FIGMA to a **ReactJS** or **NextJS** based project. I am always active in Daily Stand Up meetings making sure that I have shared my ideas very well to contribute even in the smallest way that I can.

Software Engineer

COTIT

Amsterdam, Netherlands
April 2023 - Present

I am the Front End Engineer of the team and I mainly focused on implementing UI/UX Design from FIGMA to a **ReactJS**, **NextJS**, **Vue** and **Nuxt** based project. I am always active in Daily Stand Up meetings making sure that I have shared my ideas very well to contribute even in the smallest way that I can.

Software Engineer

Digipay

Shaw Blvd, Philippines
May 2021 - April 2023

I am one of the Fullstack Software Engineers and Front end Team Lead of the company that handles four(4) web applications, three(3) backend services, one(1) native Android Mobile application, and also the one who deploys changes in the server. The technology stack used to build the projects are **React**, **Gatsby**, **NextJS**, **Ruby on Rails**, **NGINX**, **PUMA**, **AWS**. I always participate in Daily Standup Meetings and project presentations for our senior management.

Flutter Developer

U-PRO PLUS

Tokyo, Japan
March 2022 - November 2022

I am the Lead **Flutter** Developer of the team. The project is mostly focused on creating applications for advertising purposes such as ADs management for Beauty Salons in Japan. I always participate in daily stand up meetings and at times when I am required to present the new updates for the application.

Software Engineer

MYNTHCHAIN

Netherlands, Amsterdam.
March 2022 - November 2022

I am one of the **React** and **NextJS** Developers and also the Product Designer of the applications that needs to be presented as proposal to our superiors. The projects are focused on Digital Wallets, Digital Currency Trading, and Cryptocurrency. I always participate in meeting with the superiors and supporting the clients.

Software Engineer

ITSY

Netherlands, Amsterdam.
May 2021 - March 2022

I am one of the **Flutter**, **React**, and **NextJS** Developers and also the Product Designer of the applications that needs to be presented to our superiors. The projects are focused on Digital Wallets, Digital Currency, Online Workspace, and Cryptocurrency. I always participate in meeting with the superiors and supporting the clients.

Software Engineer

Tech1 Corporation

Makati, Philippines
May 2020 - February 2021

I am the pioneer software developer of the company and created six(6) mobile applications focused on video call, voice call, and real time messaging using tools such as **Android Studio**, **XCode**, **Flutter**, and **React Native**. I always participate in team discussions and project presentations in front of our superiors.
