For travel updates, how to add and do we need to update and put new policy changes or can we link with AI to get the updates directly?

All these visa guides should be prepared by me or upload in the form of blogs or should we connect it directly with AI to get latest updates and upload here??

Can we show here some more information like visa fee and some other important info at each country front page to attract peoples more and give the most meaningful hint they are looking for??

ABOUT

Travel planning should feel exciting, not complicated.

SanniTravel brings the essential parts of getting ready to travel — discovery, entry rules, budgets and organisation — into one connected platform.

Our story

Planning a trip means answering three questions at once: can I enter, what will it cost, and when do I need to apply. The answers live in different places — an embassy page, a flight search, a spreadsheet — and none of them talk to each other.

SanniTravel started as a way to hold those answers in one place. Requirements come from the official portals and link straight back to them. Costs are calculated from your real inputs, with every line showing how it was derived. Nothing is hidden behind a number you cannot question.

We need to put information about me with some pictures or a profile or cover picture.

PASSPORT Brazil	Food & drink 4 days × 2 travellers at your chosen level \$464 13%	
ACCOMMODATION Mid-range hotel	Local transport Metro, taxis and transfers across 4 days \$232 6%	
FOOD & DRINK	Activities Attractions and tours across 4 days \$290 8%	

From the calculator we need to remove the passport option because nothing happens when you change the passport country. If we need to keep it then at least the flight fare should change as per the country of origin to destination. It should not be the same from all countries.

Who will updates these policies? Should I ? and how many policies I can submit here? Can we link it directly to AI so any changes from few major cities reflect here?

1. Add a section for flights booking like scanner.com or google flight. Com so that peoples can book their flights directly from my website
2. Add a section for hotel reservations like booking.com or agoda.com so the peoples can book directly their hotels, rent a car and everything directly from website.
3. For the travel visa guide, add a section where I can upload the pdf documents so people can download and read it out to understand the whole procedure.
4. Inside each region, keep at least 5 to 7 countries famous for tourist. And inside each country there should be option for selection the country from where the visitor is applying or from where his passport belongs and then the visa requirements should be visible to him as per his country. This will give more specific details to each country traveller.
5. Keep it in the beginning only for visit or tourist visa, remove study and work permit visa

6. Keep the origin only for now Pakistan, india, bangaldesh, Afghanistan, Saudi arabia, dubai, Qatar.
7. Keep destination for now as suggested: dubai, Qatar, Georgia, Azerbaijan, Malaysia, Singapore, Thailand, Indonesia, turkey, sri lanka, Vietnam, Maldives, Kazakhstan, Uzbekistan, Armenia, Albania, Serbia, France. I think these countries in the beginning are fine.
8. Make a portion inside each country where I can upload visa documents checklist in pdf form so that people can check and download for preparation.
9. Make a portion inside each country where I can put best places names in that country at least I can put 5 cities names and 5 best places of each place.
10. Create a portion where I can show my gadgets what I am using for my vlogging with pictures and details and usage how I am using by adding some pictures or short videos.
11. Create a portion where I can sell my items like my cameras, and other vlogging gadgets like a shop.
