Java SE, Java EE (Servlets, JSP), Spring, Thymeleaf, MySQL,

Object-Oriented Programming, Test-Driven Development, Version Control with Git, Paired Programming

Exposure to: React, Next.js

Education

Codeup

Certification of Completion

Jun 2021 - Jan 2022

A fully-immersive, project-based, and intensive 22-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development.

St. Edwards University

Associate of Arts in Public Relations

Jan 2019 - Jan 2021

Austin Community College

Associate of Arts in Communication Studies

Jan 2014 - Jan 2018

Inquisitive Software Developer with a degree in communication and experience in public relations. My marketing background helped to develop me as a communicator, advocate, and critical thinker. As the industry shifted due to the pandemic, my personal network helped me to discover how I could leverage my creative talents as a web developer. Looking to leverage my technical and creative skills to create dynamic websites that drive traffic and engagement.

Development Projects

[IKnowASpot](#)

A full-stack application using the Spring boot framework, allowing users to view the best user-submitted spots in their area. For the back-end, it integrates Java, Spring MVC, Thymeleaf Security, a MySQL relational database, and full CRUD functionality. In a team of 4, we were involved in the full software development life cycle including planning, requirement gathering, coding, testing, and implementation.

[Adlister](#)

An ad listing website developed in Java with interdependent servlets, JSPs, Beans, DAOs, and Factories to create a full-stack web application. The ad lister is multifunctional for the user and the viewer. A viewer can create a profile with a username, email, and password, as well as view and search for ads. A user may create their own ads with the ability to edit and delete them as well as update their profile.

[Movie Project](#)

A movie review website created using JavaScript, Jquery, HTML, and CSS. The viewer is able to search through movie cards, read their summaries and ratings, as well as add their own movie cards, summaries, and reviews.

[Weather Map](#)

Weather map displays an eight day real time forecast for whichever location the user chooses. It includes a drag and drop marker that can retrieve forecast data from anywhere on the map as well as a search bar. The forecast data includes; the current date, sky description, temperature, humidity, wind speed, and air pressure. This was a solo project using Mapbox API, OpenWeatherApp API, JavaScript, HTML, and CSS.

Professional Experience

T-Werx Coworking - Austin, TX

Marketing Assistant / Aug 2018 - Jan 2019

- Managed five social media accounts with a focus on audience engagement metrics and posted according to our main demographic.
- Built and sustained a network of thirty different entrepreneurs to create a fun and productive working atmosphere in the company's headquarters.
- Planned events for T-Werx and other groups in the company's network in innovative formats, while also compiling the company's monthly newsletter.
- Prepared weekly reports in Google Spreadsheets that addressed the attendance rate and speaker performance of each event.

LibertyTax - Austin, TX

Advertising Associate / Jan 2017 - April 2018

- Built relationships with around one hundred businesses in the Pflugerville area to promote LibertyTax, raise customer traffic, and ensure fruitful relationships within the retail community.
- Organized promotional events for the company for the celebration of a new store and to advertise discounted rates.
