

Silicone Roof Restoration

A Smarter Way to Protect Your Roof

EXTEND LIFESPAN, IMPROVE PERFORMANCE, SAVE ON REPLACEMENT COSTS

What is a Silicone Restoration System?

Silicone restoration is a fluid-applied membrane system designed to extend the life of existing flat roofs. It provides a seamless, watertight barrier that protects against ponding water, UV damage, and harsh weather—without a full roof tear-off.

Key Benefits

- **Long-Term Protection**
Silicone membranes come with 10, 15 or 20 year manufacturer warranties.
- **Cost-Effective Alternative to Tear-Off**
Faster, more affordable solution to renew your roof's performance without the hassle and expense of a full replacement.
- **Energy Efficient**
Reflective white surface aids in minimizing transfer of heat into the building reducing energy consumption
- **Highly Weather-Resistant**
Elastomeric properties of silicone provide outstanding resistance to standing water, extreme heat, and sunlight.
- **Environmentally Friendly**
Silicone restoration preserves the current roof, eliminating waste.

Ideal Properties for Silicone Restoration

- Modified Bitumen
- EPDM Rubber
- Built-Up Roofing
- TPO & PVC
- Metal
- Gravel
