

Tbadel - Buy & Sell Anything Locally, Free Marketplace App

Mobile Application

Summary

Tbadel Is A Bartering Platform That Lets Users Trade Items Or Skills - Mno Buying Or Selling Involved—By Matching What You Have With What You Want. It Encourages Sustainable Practices By Reducing Waste And Promoting Reuse Within A Supportive Community. Users Can Create Listings, Use Filters To Find Nearby Offers, And Chat/ Negotiate Directly. The App Supports Both Arabic And English, Aiming To Revive The True Spirit Of Value-For-Value Exchange.

Problem Statement

Many People Own Items Or Skills That Go Unused, While Others Struggle To Access What They Need Affordably. Traditional Buying And Selling Often Lead To Overspending And Unnecessary Waste. There Is A Lack Of A Simple, Trusted Platform That Enables Direct, Fair Exchanges, Encouraging Reuse And Community Connection. Tbadel Addresses This Gap By Making Bartering Easy, Accessible, And Sustainable.

Our Process

Our Process Begins With Users Listing The Items Or Skills They Wish To Exchange. They Can Then Browse Through Available Offers And Find Suitable Matches Tailored To Their Needs. Once A Match Is Found, Both Parties Can Connect Through In-App Chat To Discuss And Finalize The Swap. Finally, The Exchange Takes Place, Fostering Trust, Sustainability, And A Sense Of Community.

Identification Of Problem

We Identify The Problem And Frame A Problem Statement For It.

Research/Benchmarking

This Step Includes The Researching Of The Solution To The Given Problem By We And With Reference To What Other Apps And Software Do.

Ideate

We Try To Come Up With The Best Possible Solution To The Given Problems Based On The Research.

Sketching/Wireframing

Here, We Draw The Screens On A Paper According To The Ideation. Later, We Draw Out The Wireframes.

Designing

Based On The Wireframes, We Draw The Design Into Figma For The Final Look And Feel.

Analysing

The Designs Made Are Then Analyzed For Any Errors In Colors Or Font Size, Spacing Etc. Basically, We Made Everything Pixel Perfect And Double Check If There Is Anything Missing Which May Contradict Our Solutiob To The Given Problem Statement.

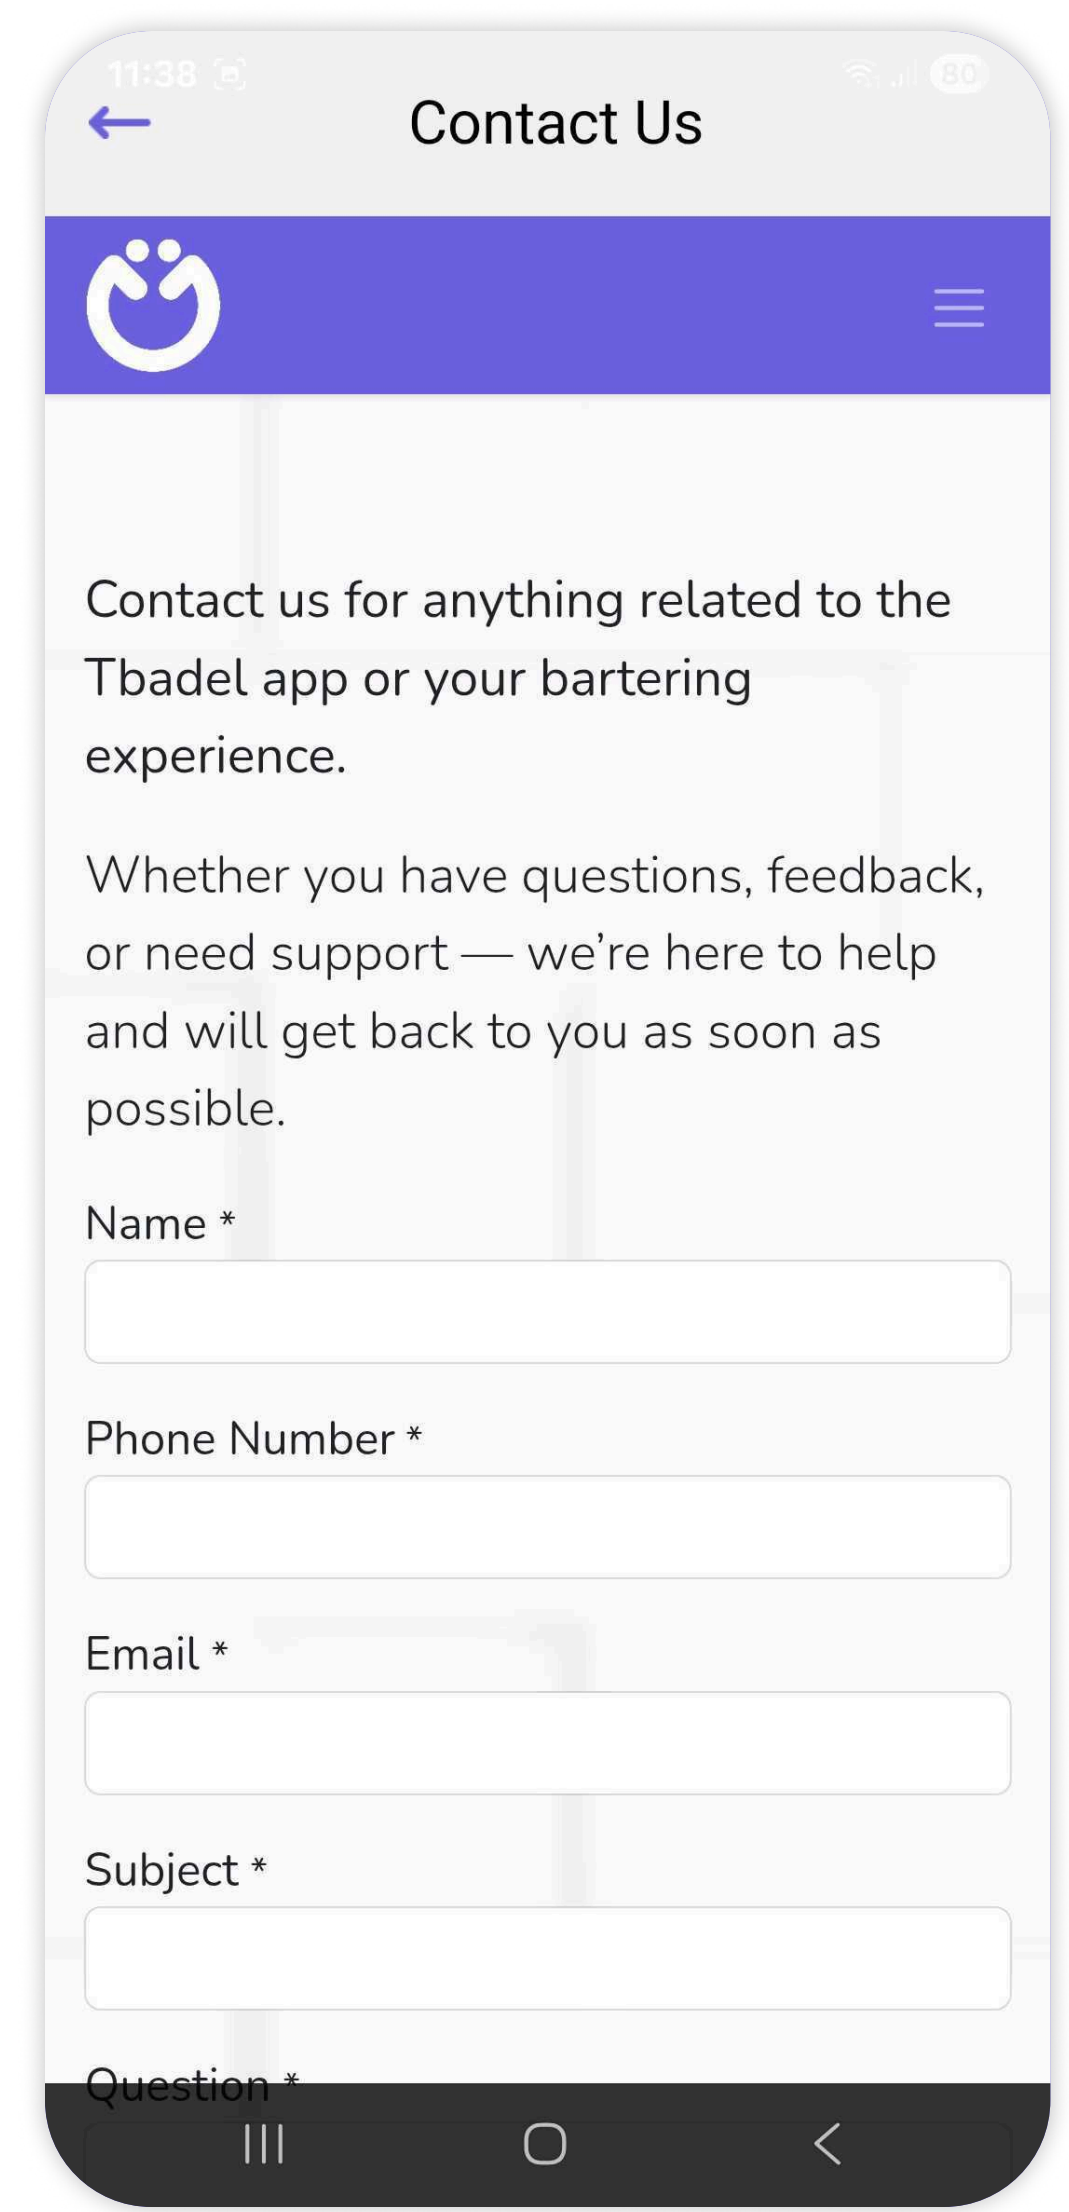

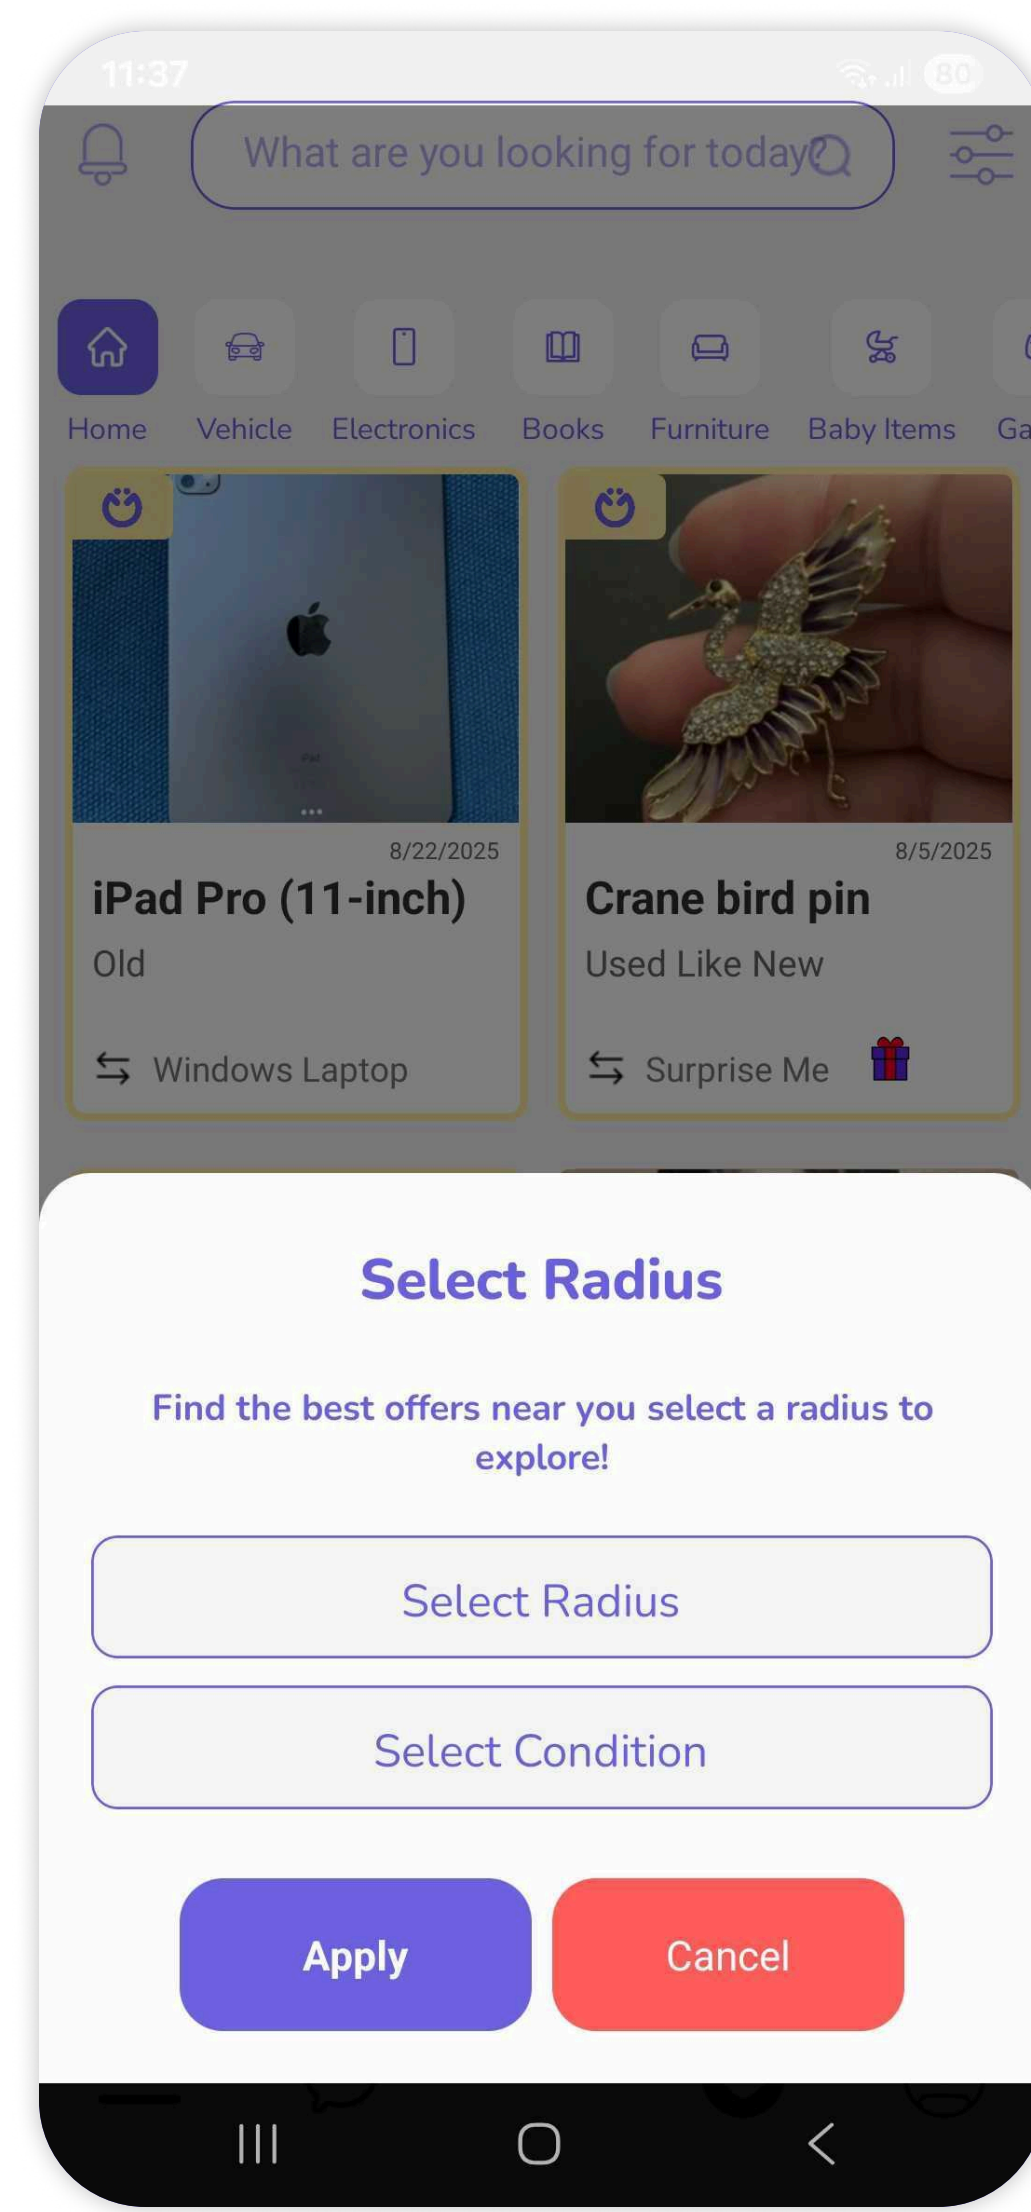

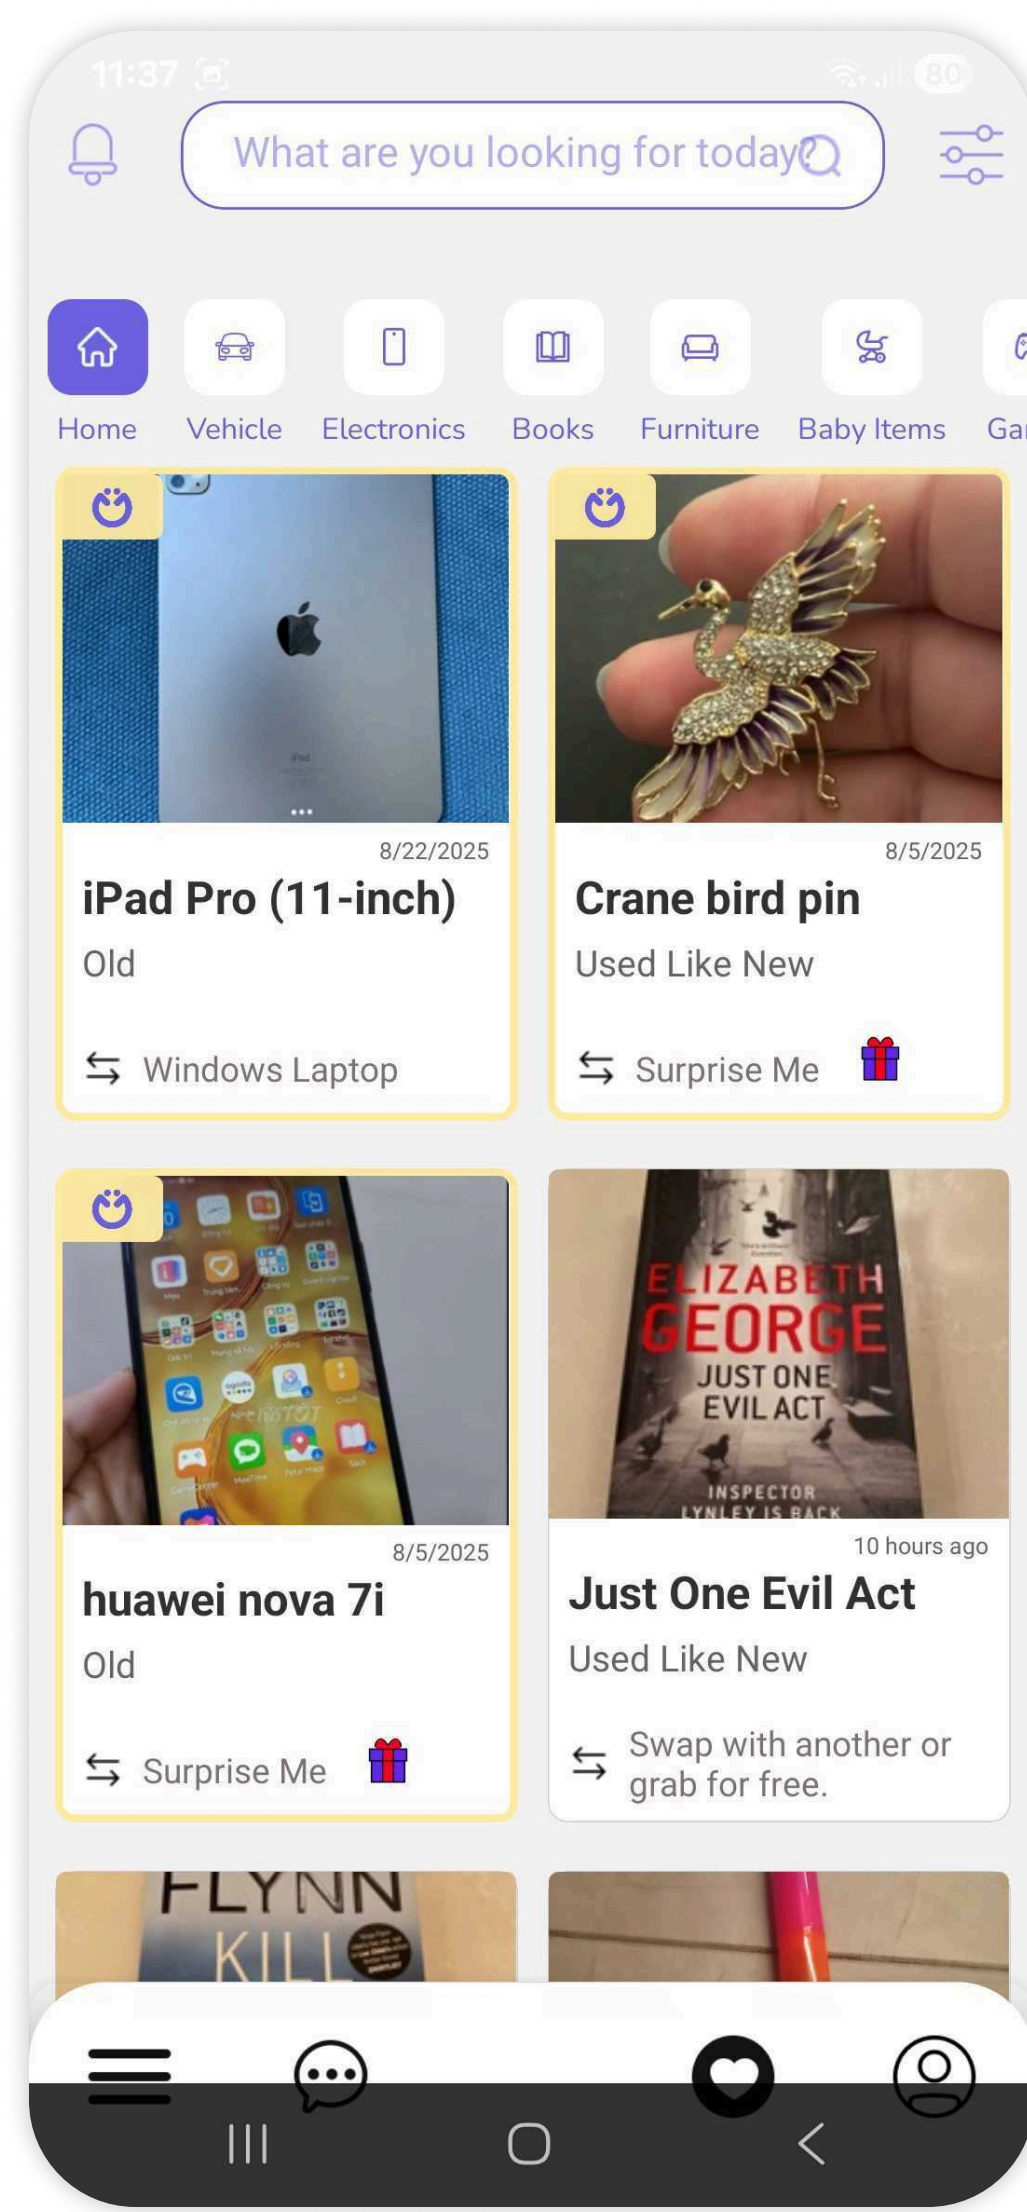

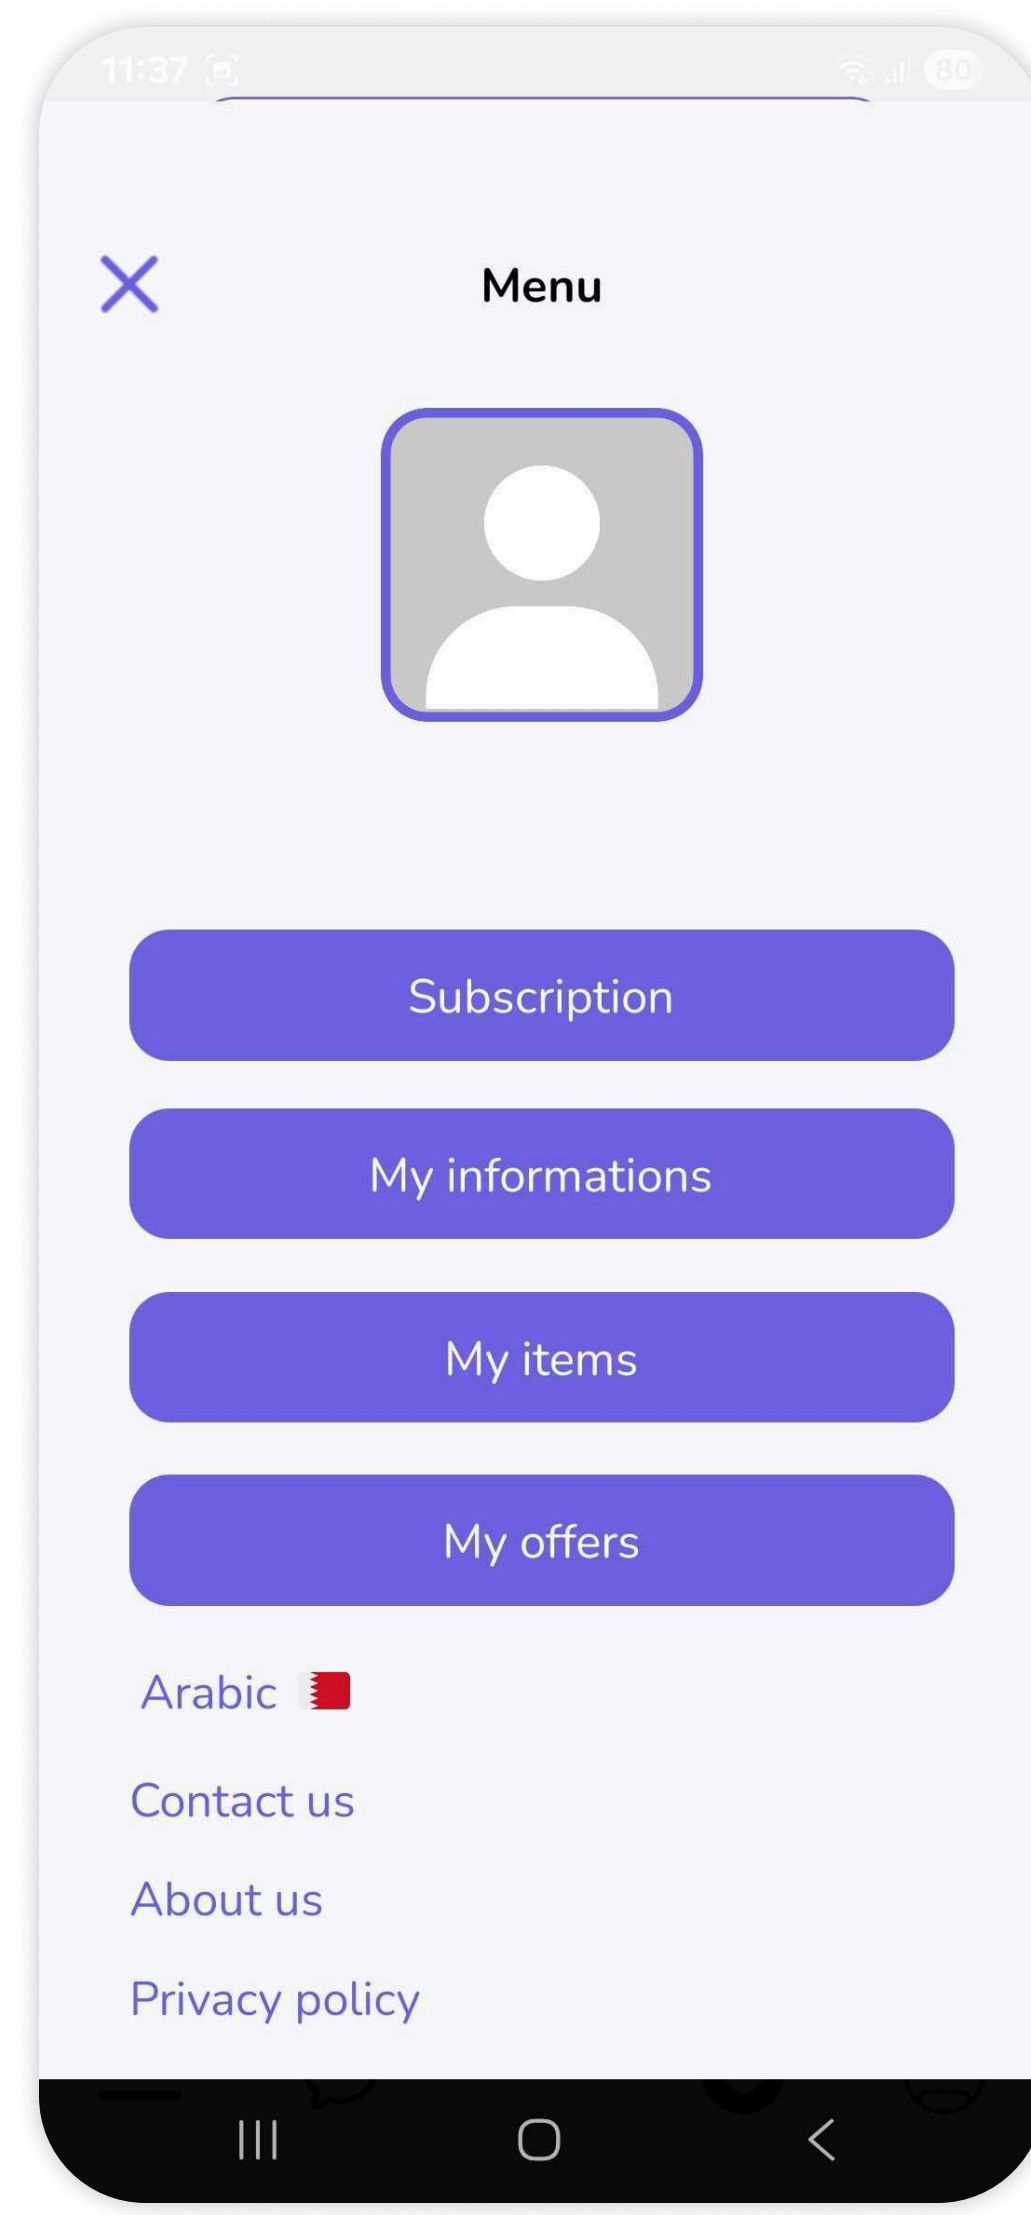

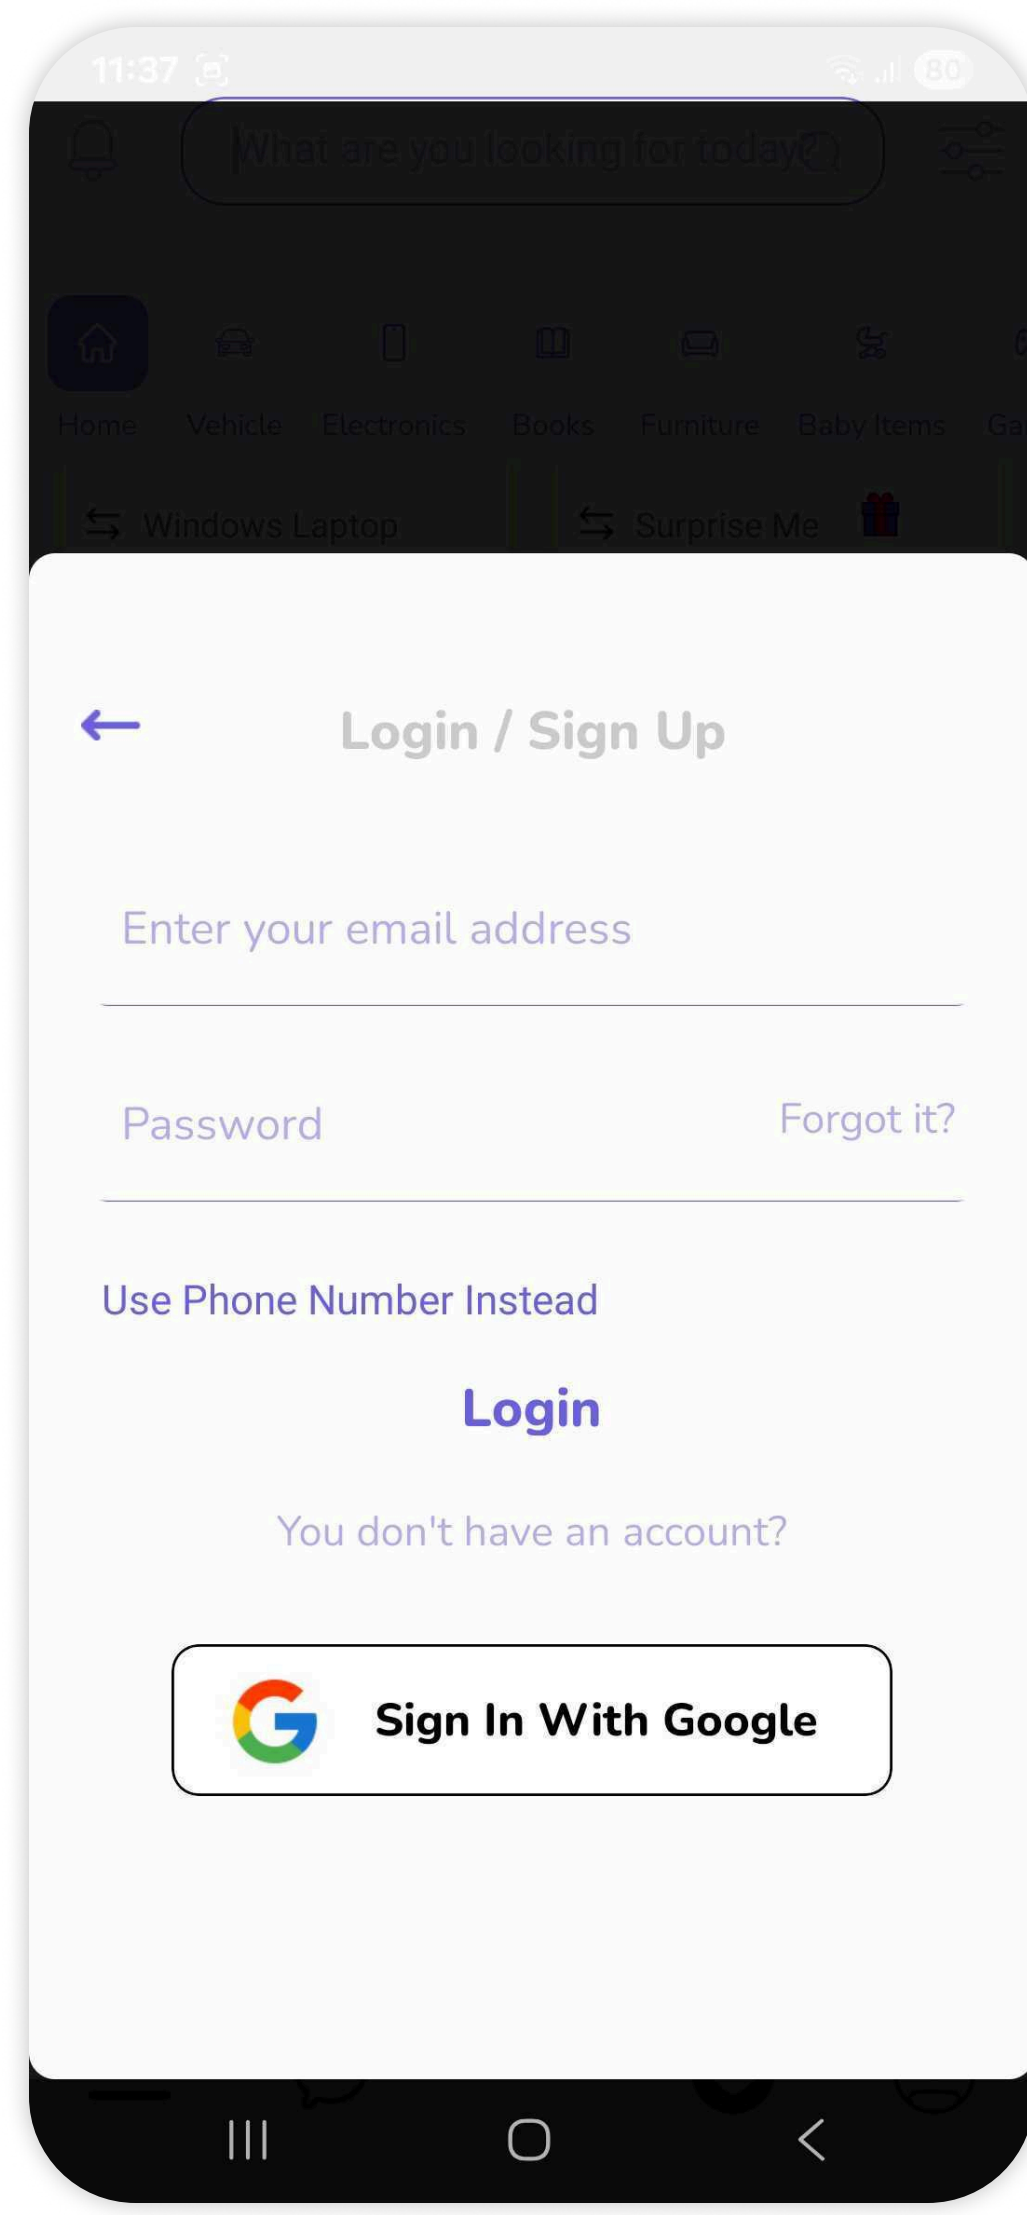

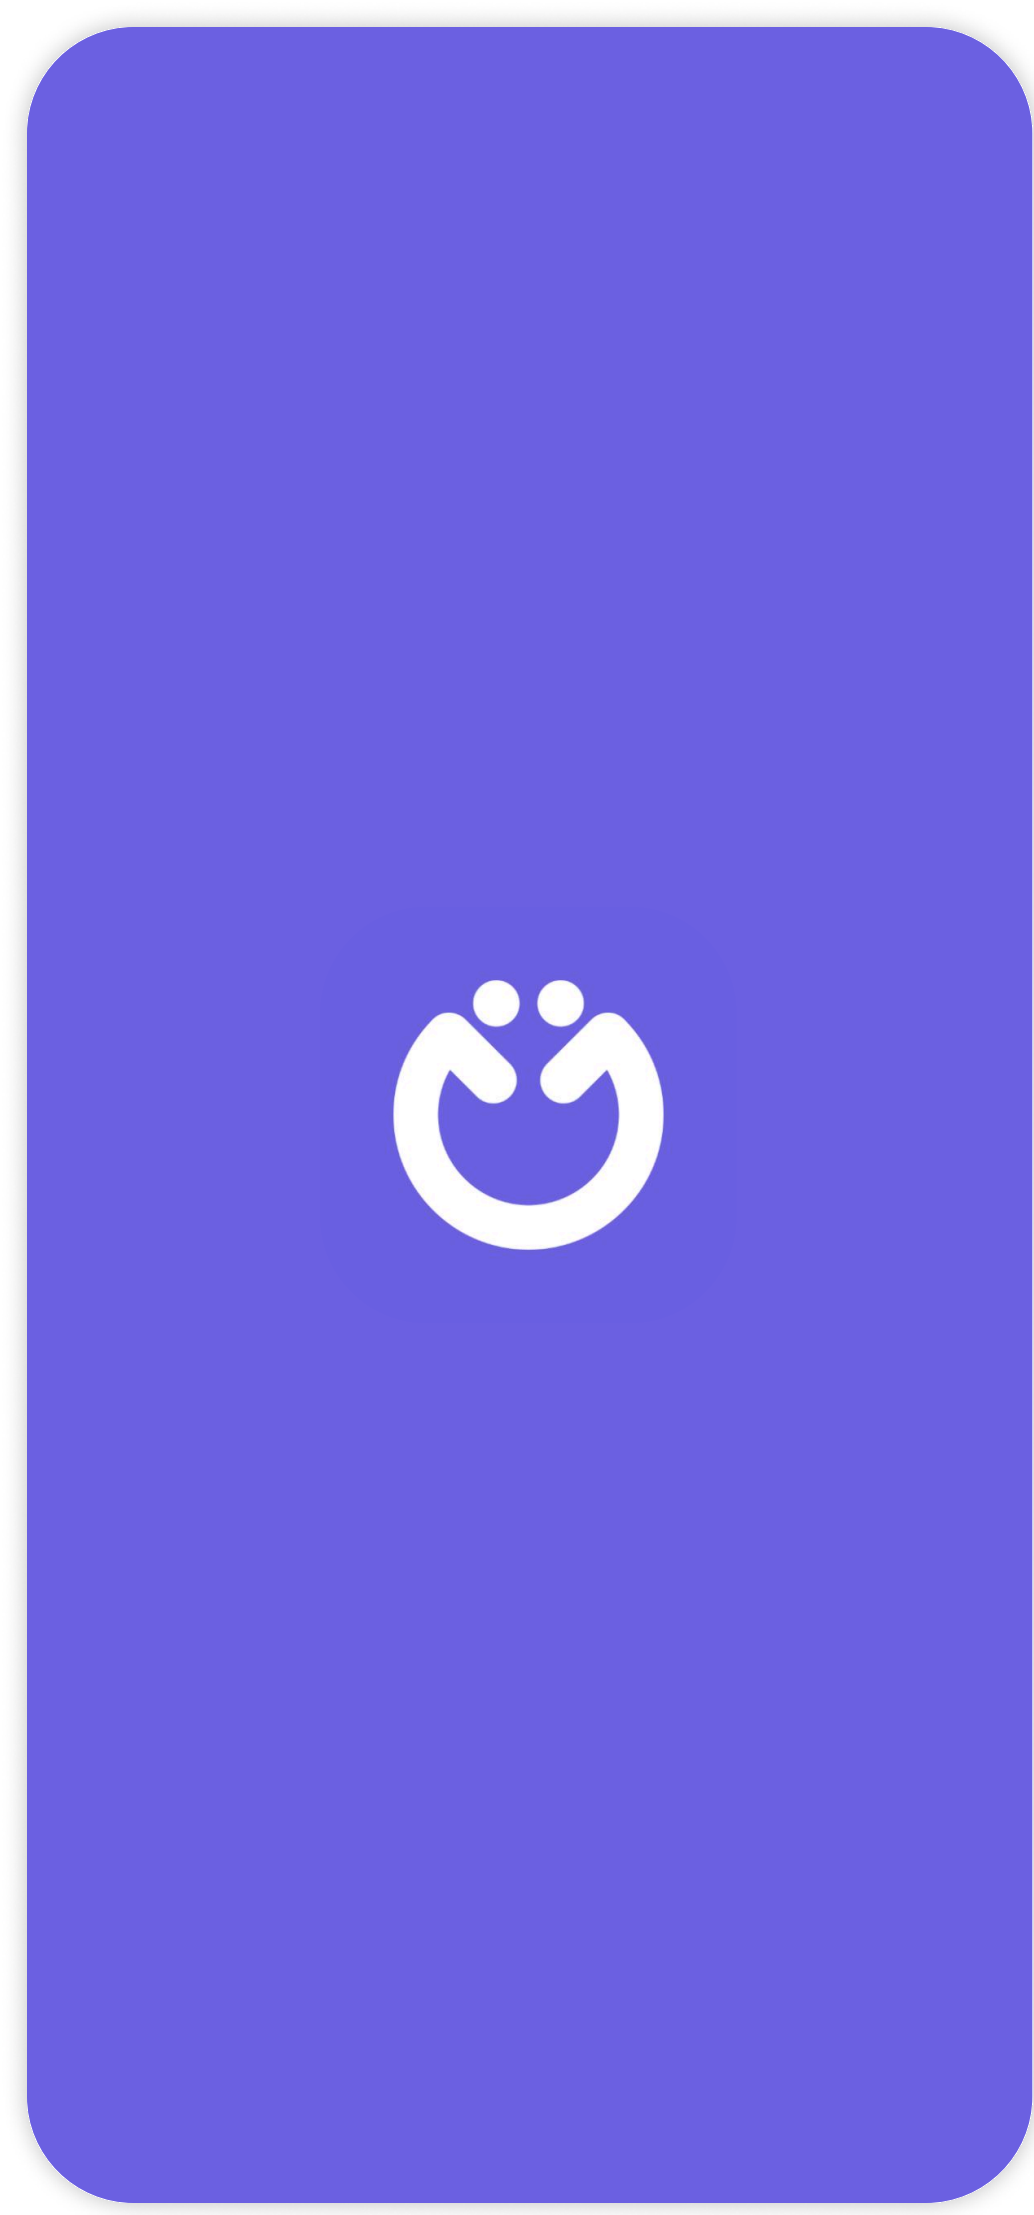

Testing

The Final Output We Can See In The Testing.
