Selecting your schedule for OHBM 2021

There is a core program track of four hours per day, which is repeated twice each day to accommodate different time zones. To the right is an example pie chart displaying the scheduled programming for each hour within a 24 hour cycle. (Note that the circle covers a full 24 hours rather than the 12 hours of a traditional clock.) The first and second tracks present the same content, but please note that the order is shuffled across days so that the same content is generally not repeated within a single day.

The Poster sessions (green) have been designed to allow people within a given region of the world to interact with all other regions. Poster sessions have been split into three regions: Africa/Europe, Asia/Australia, and Americas. By attending any two of the three available, you will have the opportunity to directly interact with people across all regions. The regions assigned to each poster session are indicated in the maps on the circle perimeter.
