e xterior

ACUITY**e x** comes with a compact, high-performance, low-voltage CPU, a slim 22" HDMI LCD monitor, and a direct access remote control.

At 1.5" deep, the sleek, flat screen monitor mounts almost flush to the wall when the CPU is mounted below it.

e xam

ACUITY**e x** offers immediate access to letter, numeric, pictorial and non-literate optotypes with varied isolation displays. One-touch sizing allows decreases and increases up to 20/400. The streamlined system includes eight additional commonly-used vision tests, such as basic letter contrast and fixation disparity.

Add advanced tests such as Low Vision and our patented Glare Testing Kit (US Patent 8,550,631), for an additional cost.

e xperience

ACUITY**e x** offers a lifetime software license and a one-year limited hardware warranty. Customers have access to our USA-based technical support for any questions or for replacement components, if the need arises.

in **e x**pensive

ACUITY**e x** is the affordable option to add streamlined, computerized vision testing to your practice. It is the perfect fit for vision screening examination lanes or for quick, basic tests in sub-specialty practices.
