

Retrofit Panel Adapters (SWD Series)

Adapter with SATEC PM174

Adapter with SATEC PM130P

Adapter with SATEC PM335

DESCRIPTION

These Retrofit Panel Adapters (SWD Series) allows the user to install a SATEC small panel meter into any switchboard panel. The installation can be done in minutes without de-energizing the circuit or re-wiring anything. Easy installation translates into lower labor costs, which makes the meter upgrade feasible for many applications.

With this solution, you can cost-effectively offer your customer the newest metering technology without shutting down their circuit or being concerned about miss-wiring or handling asbestos wiring. Once this adapter has been installed, your customer will have the benefit of easily upgrading the metering in the future.

These adapters are among the newest additions to SUSI's comprehensive patented Panel Adapter products.

ADVANTAGES

- Easy installation. No re-wiring or shutting off power is needed
- Retrofits into 15 different existing large and small switchboard/panel meter cases (GE, Westinghouse, ...)
- Especially good for applications where there are old meters, asbestos wiring or very tight regulations
- Lower initial and replacement costs
- Less expensive solution than using switchboard meters or A-base meters
- Reduces meter and spare part inventory

- ***Easy installation.
No re-wiring or
de-energizing***
- ***Cost-effective solution
for upgrading old
metering***
- ***Retrofits into existing
switchboard meter
cases***
