

Integrated Adapters (SWIE Series)

- *Easy installation. No re-wiring or de-energizing*
- *Cost-effective solution for upgrading old metering*
- *Retrofits into existing switchboard meter cases*
- *Simplifies maintenance, testing and replacement*
- *Flush metering solution*

DESCRIPTION

The SUSI Integrated Adapter™ (SWIE series) allows users to install SATEC's latest generation meter, the eXpertmeter EM 920™ Meter, into many switchboard cases including GE, Westinghouse, Basler styles, and others. The meter will fit flush inside a new or existing case.

INSTALLATION

Installation is a matter of minutes, not hours. Simply remove the cover, slide out the old meter, slide in the new SUSI Integrated Adapter™ assembly (Adapter/Meter) and attach the new flush cover. There is no need to shut down the circuit or do any re-wiring. The customers will not experience any power interruptions.

BENEFITS

The SUSI Integrated Adapter™ makes the installations fast, simple, and cost-effective. Customers won't have to be concerned about miswiring or handling old asbestos wiring. Easy installation translates into lower labor costs, which makes the meter upgrade feasible for many applications.

Integrated Adapters can retrofit into existing meter cases or be used with new cases for new metering installations. Adapters are available for 8 different retrofits. Customers will benefit from having a new electronic meter in many ways, including long-term monitoring and storage capabilities for many months of information. Time of use (TOU), load profile, Min/Max, and custom reports can all be recorded through these meters, providing essential information for planning and maintenance engineers.
