SWFXS9 with kV2c Socket Meter

SWFXS9
(Rear View)

ADVANTAGES

- Replaces 3700/4700 and CM2000 meter with a standard socket or panel meter
- Less expensive than switchboard meters
- Easy installations with pre-wired solutions and mounting mates with existing panel holes
- No re-wiring needed. Great for asbestos wires and tight spaces

DESCRIPTION

These Non-case Adapters (SWF series) allow retrofitting of any standard panel or socket meter in place of the GE / Siemens / PM 3700/4700 meter or CM2000 meter.

Most utilities have standardized on socket / panel meters, taking advantage of lower costs and simplified maintenance. These panel adapters provide an easy and convenient way of installing meters on panels, thus eliminating the need for more expensive switchboard meters.

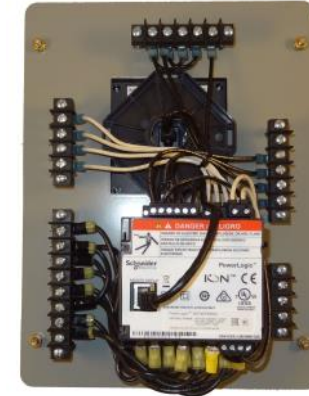

Retrofit Applications

- 3700/4700 meter to panel or socket meter
- CM2000 meter to panel or socket meter
- Socket Form 5, 6 and 9
- Contact SUSI Adapters for non standard or custom hole patterns
