

IMPROVE YOUR DATA CONSISTENCY

Learn how MailVerifier can help you reach your
data integrity goals

WHY MAILVERIFIER

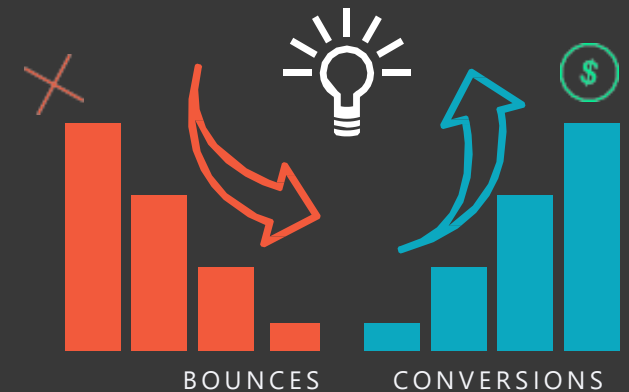

REDUCE BOUNCES

MailVerifier can reduce your bounce rates up to 98%, making your email campaigns perform better and help to keep your data integrity sound.

INCREASE REVENUE

As your bounce rates go down, your conversions go up and revenue increases.

Services

REAL-TIME EMAIL VERIFICATION

Never turn a miss-spelling into a missed customer. Our Real-Time APIs and tools ensure data entering your systems is correct as a customer types.

REAL-TIME ADDRESS VERIFICATION

MailVerifier ensures that your existing senders lists are clean and correct using the same technologies for a million addresses as for one and we integrate with your ESP of choice.

REAL-TIME PHONE VERIFICATION

In addition to removing invalid email addresses, we can detect and remove invalid phone numbers and help you find insights about the contact details.

BULK DATA VERIFICATIONS

MailVerifier ensures that your existing marketing lists are clean and correct using the same technologies for a million emails as for one and we integrate with your ESP of choice.

TEAM MANAGEMENT AND ACCESS CONTROL

Manage teams with different access control and fine grained access to list and groups. MailVerifier allows you to control every aspect of your marketing team.

Where user friendly meets enterprise ready

Ensure Integrity

7 - 15% of online forms and POS entries contain invalid, undeliverable emails mostly due to common typos.

Invalid data can be very expensive to find and remove after entering the system. Don't turn misspellings into missed customers

Ensure Humanity

Nearly all online reforms of any significant traffic experience data fraud.

MailVerifier can detect suspicious behavior and challenge the user only when they are suspect.

This removes bottlenecks to conversion while protecting your systems for data fraud.

REAL-TIME APIs

Five 9s Availability

Highly reliable APIs deliver results you can rely on.

Sub Second Response Time

Sub-second responses deliver data quality without adding delays.

Globally Distributed

Hundreds of servers distributed around the globe bring the utmost performance world wide.
