5.0 Problem statement

As people develop through their lifetime they have an expectation that a time will come when they will be able to retire. For some employees the pension might be sufficient to provide a basic level of income. Others may have an opportunity to accumulate wealth without using pension schemes – perhaps through their business ventures or other assets. But most employees will want to supplement what they have with some form of pension scheme. As an employer the polytechnic takes the view that, while our employees are working, they should be building up an entitlement to a pension when they retire. For this reason we believe that pension arrangements have a number of advantages:

- When our employees come to retire they will experience a reduction in income – a pension makes up for some of this loss of income in retirement
- Pension schemes can provide protection in the form of lump sums and pensions to dependents in the event of a member's death
- In order to encourage pension schemes, the state provides tax relief on contributions made to pension schemes and the growth in their investments

As a government institution, the Kisumu National Polytechnic wants to operate an independent pension scheme separate from that of the state. Against this background the institution seeks to engage a reliable and competent service provider who will be able to meet this need. We envisage that a good pension scheme will lead to increased employee satisfaction resulting in increased productivity. In addition to this, providing the pension scheme is a statutory requirement.

The Kisumu National Polytechnic therefore invites proposals from interested eligible tenderers for the provision of pension scheme services (**DEFINED CONTRIBUTION SCHEME**) (Whose benefit is the sum of the employee's contributions, employer's contributions and investment income) for the organization

6.0 Objective of the pension

The main objective of the pension scheme is to ensure that while our employees are working they shall be building up entitlement to a pension when they retire.

Specific objectives

- To ensure that the contributions of both employer and employee are secure and are managed in accordance with sound financial and investment principles and in accordance with all applicable statutory regulations
- To ensure that the employees are able to remain updated on the health of their pensions investments
- To ensure that employees receive timely processing of their pension when they retire

7.0 scope of the scheme/ inclusion and exclusion

The pension scheme will only be applicable to any /all staff engaged by the Council on permanent terms of service and who meet the age criteria specified for entry into a pension scheme in accordance with the prevailing legislations.

8.0 Expected output / deliverables
