

High-Hardness, High-Performance, Advanced Technology

Designed to soften extremely hard water (>75 gpg), the 185UFHEDP's dual-tank system offers a more cost-effective solution than larger single-tank systems. The first resin tank significantly reduces water hardness and the second tank acts as a 'polisher' to prevent hard water slippage. The HEDP's high-efficiency technology uses less salt while supplying consistent soft water.

KEY FEATURES

UPFLOW REGENERATION: Saves salt by preserving the unused portion of the softening bed from unnecessary ion exchange.

PRECISION BRINING: Calculates the exact amount of brine required to regenerate, using up to 30% less salt.

AUTOMATIC SYSTEM REFRESH: If no water is used for seven (7) days, the system will perform an automatic refresh to prevent bacteria growth.

BACKWASH FREQUENCY PRESET: Save up to 2,000 gallons of water per year by skipping up to ten (10) backwash cycles on clean municipal water supply.

SOFT WATER BRINE TANK REFILL: Keeps tank & injectors clean.

SOFT WATER RECHARGE: If capacity goes below 3%, an automatic 15-minute recharge restores softening until the next regeneration.

TANK FEATURES: Brine tank with safety float, air check and injection molded brine grid to reduce bridging. Moisture wicking neoprene tank jacket included on all pressure tanks.

VALVE FEATURES

UNIQUE BYPASS DESIGN

Integrated turbine meter saves space, eliminates connections and is more durable.

TIMESAIVING QUICK CONNECT FITTINGS & PRE-INSTALLED BYPASS

Quick connect fittings on bypass, drain line (10' included), brine line and power cord.

BACKLIT LCD DISPLAY

"No Touch" display rotates key information including last regeneration date and volume remaining.

USER-FRIENDLY PROGRAMMING

Just set the time, date, number of people and hardness.

48-HOUR PROGRAMMING MEMORY

Automatic programming restore for up to 48 hours during power loss.

TANKMATE™ Unique design sends water through both the carbon and resin tanks in a single pass.
