Non-Regenerating, Whole-Home Catalytic Carbon Filter, Reduces Chlorine, Chloramines and Bad Taste & Odors

Once water arrives safely at your home there is no further need for disinfectants. In fact, they are undesirable. Disinfectants can create unpleasant tastes and odors, dry out skin, damage plumbing, and generate potentially harmful by-products. The NRVTOC and NRVTOCK whole-home carbon filters reduce chlorine, chloramines and bad taste and odors.

### **KEY FEATURES**

Affordable: Economical whole-house carbon filtration solution for reducing chlorine, chloramines and other bad tastes and odors. TOCK models reduce chlorine plus hydrogen sulfide (H2S) caused by sulphate reducing bacteria common in warmer climates.

**Certified Chlorine Reduction:** Certified by IAPMO R&T to NSF/ANSI 42 for Chlorine Reduction (based on the NRVTOC-105 model). **Catalytic Carbon:** AQUAFINE® is a catalytic, high activity granular activated carbon manufactured by steam activation of select coconut shell charcoal. Its large micropore volume makes it particularly well-suited for the removal of chlorinated by-products such as chloroform and other trihalomethanes (THMs). An important feature of this material is its superior mechanical hardness and the extensive dedusting during its manufacture ensures an exceptionally clean activated carbon product.

#### **VALVE FEATURES**

Factory Installed One-Piece Bypass

#### / Non-Regenerating

Valve Economical non-backwashing distribution head with convenient quick connect fittings.

34" 90-Degree Elbows Included for each installation. Optional quick connect SharkBite® fittings are also available.

\*Based on model: NRVTOC-150.

## 97% CHLORINE REMOVAL FOR OVER 1,100,000 GALLONS\*

The lifespan of the carbon media bed in these units will be shorter compared to a backwashing carbon filter.

The actual media bed life will vary depending on water consumption, chlorine/chloramines concentration and flow rate.

Exceeding the peak flow rate listed above will drastically reduce the life expectancy of the carbon media.
