Aeroil

High Level Overview

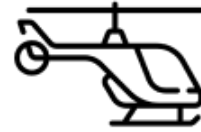

Detection of oil spill

Aerogel is dropped to oil spill location and absorbs the oil

AI predicts the location of the aerogel using weather data

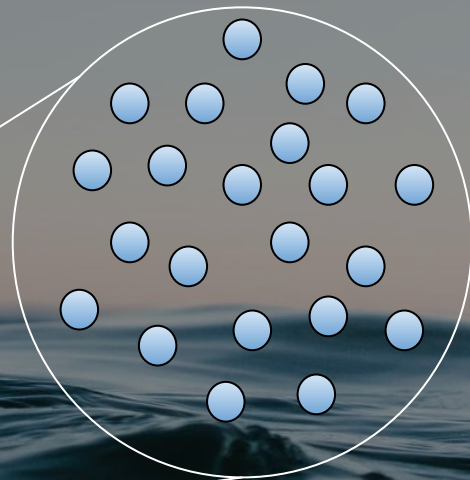

The location is sent to a helicopter through an app and the helicopter picks up the used aerogel

An aerial photograph showing a small red boat with a white sail on a body of water. The water is divided into two distinct colors: a dark, murky brown on the left side, representing an oil spill, and a clear, deep teal on the right side. The text "Why Aeroil?" is overlaid in white on the teal water.

Why Aeroil?

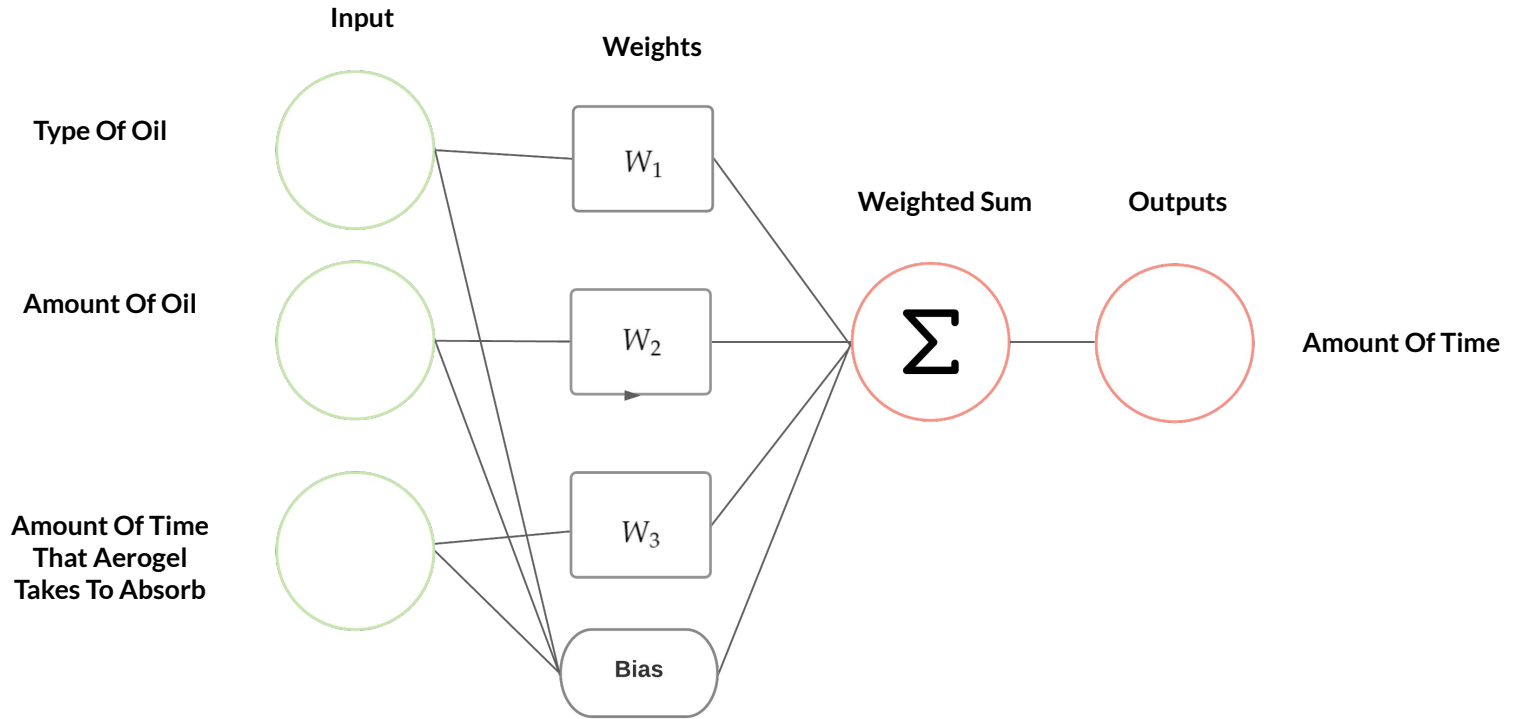

99.8% air

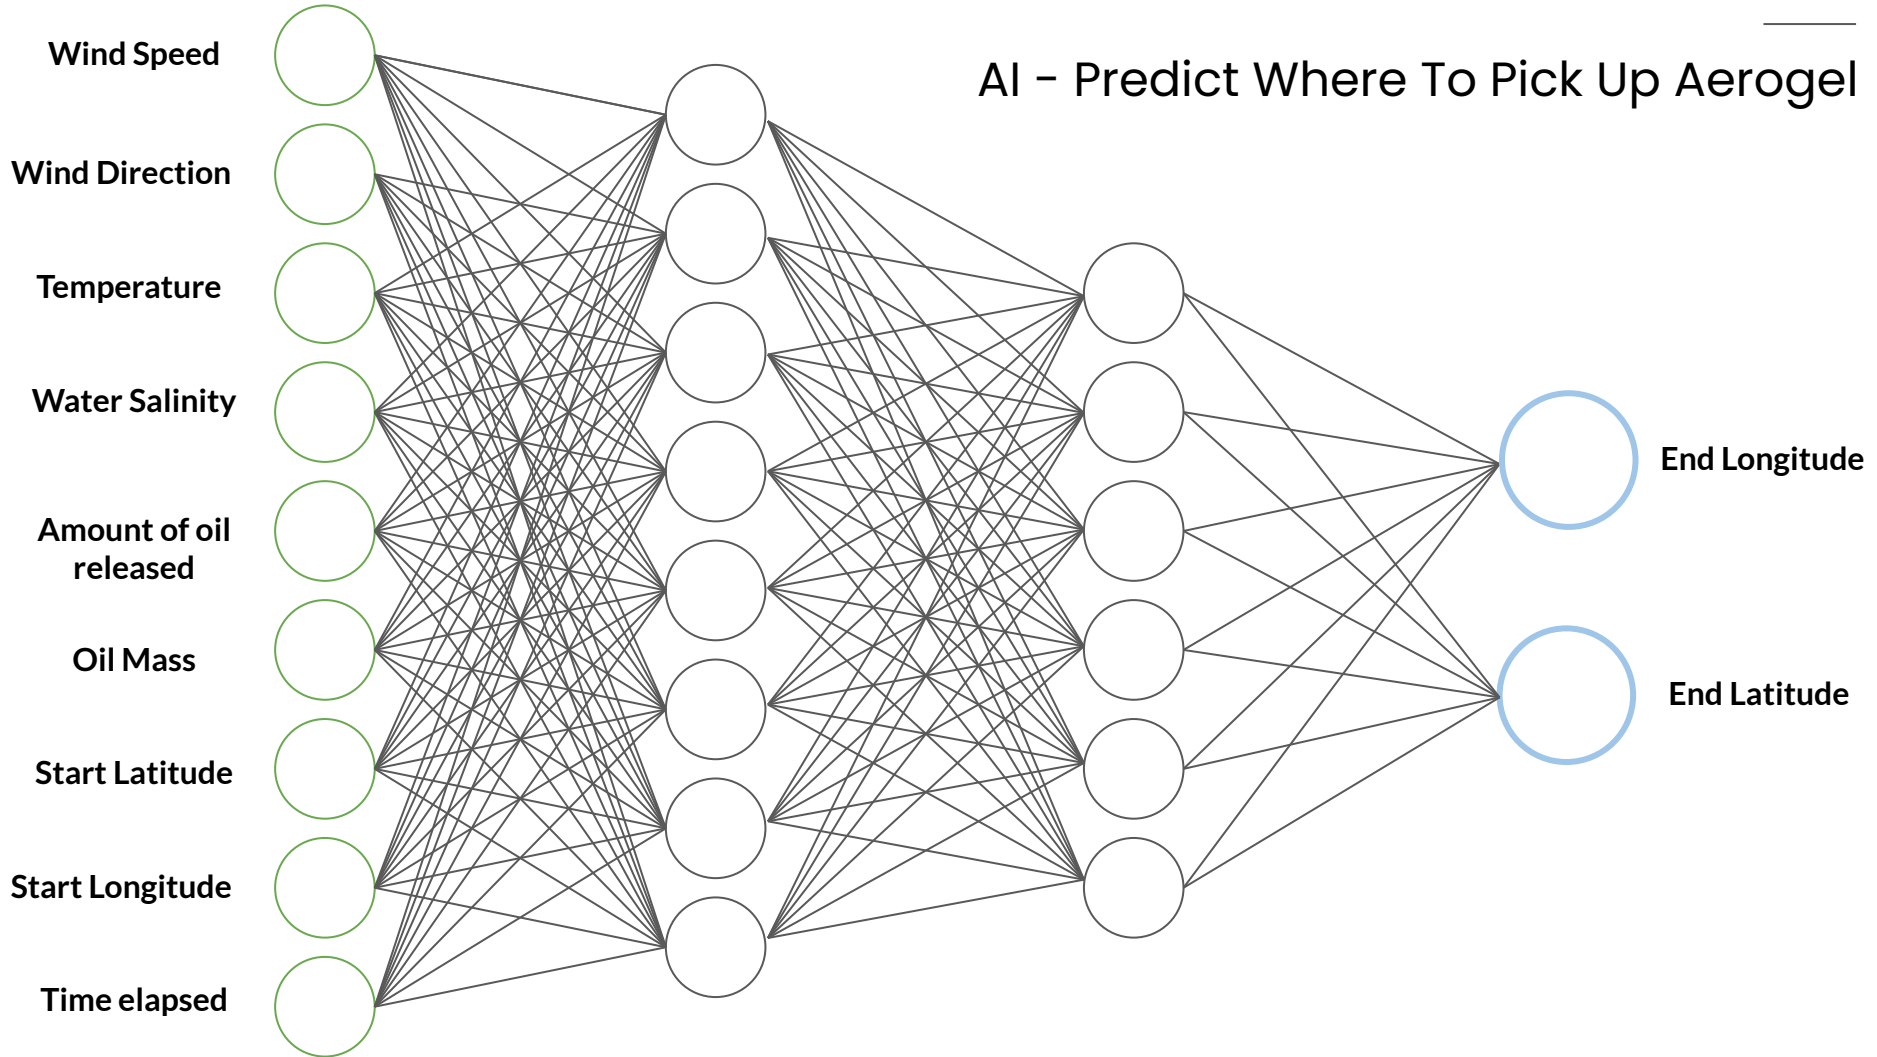

Artificial Intelligence

AI - Predict How Long It Will Take To Absorb

AI - Predict Where To Pick Up Aerogel

Aeroil Application
