Crystal Wallet Design Improvement

@gramkit_ton   @iksent

🔗 **Figma**   🔗 **Desktop Prototype**   🔗 **Mobile Prototype**

Hello! We are very pleased to take part in this amazing contest.
We have made every effort to create a truly user-friendly interface. This is evident in everything: the design is based on current Free TON's projects that people are already used to, and the navigation is as simple as in the Surf.
The number of pages is minimized, everything is visible at once: the menu on the left, the list of coins (right away with editing favorites) and the main contents of the screen. Dialog windows familiar to everyone, which are shown on top of the content.
