
Free TON Academy Contest: DEVPRIDE 2nd Attempt with dates changed

Type: Contest

Contest dates: September 1, 2021 — October 15, 2021 (at 23:59 UTC).

AMA Cycle: 3 days

Voting cycle: 10 days

THE GOAL

We know about and see teams and individuals involved in onchain programming, devops solutions, smart contracts and tools facilitating interaction with blockchain.

We want to support ongoing efforts of development teams to

- Support creation of quality documentation during and after project development
- Gather maximum useful information in one place
- Offer standard documentation format to allow for unification and convenience for other users

and of course to

- Encourage developers to showcase their products and solutions.

We would like to ensure ongoing specialised learning by providing new and existing users with adequate, accessible documentation about Free TON blockchain as it is being developed by various teams. We want to assist in attracting developers to join the Free TON Community. New developers joining free TON for the very first time should be able to access all necessary information quickly and conveniently.

As Free TON is a community driven ecosystem, choice of materials should be diverse, with multiple teams competing for developers' attention. Therefore, this contest is aimed at projects and teams able to create and maintain developer-oriented documentation dedicated to one or several areas.

Main criteria shall be completeness and quality of documentation.

THE TIMING

1. Contest submissions - 45 days from start
2. If the contestant has a development plan, such plan for 6 months should be provided

3. AMA sessions (up to 20 min each) following the Contest to describe submission and answer questions from the Community - 3 days
4. Jury deliberations - 10 days

Note - Free TON Academy shall create space in GitBook for each contestant and all contestants shall use such space to publish documentation. Contestants may link this space to your domain. Access and domain settings can be requested from @alimovpavel and/or @ducktalesblock.

CANDIDATES' CRITERIA

Confirmed experience in onchain programming in Free TON, devops solutions, smart contracts and tools facilitating interaction with blockchain of not less than 3 months before this Contest.

Confirmation of availability of Github repository code.

SUBMISSION CRITERIA

1. Documentation is in GitBook
2. Documentation is in English
3. Documentation describes work on Free TON network
4. Contestants shall submit plan to develop and create further documentation to receive rewards under vesting

SUBMISSION REQUIREMENTS

1. Confirmation of the main contestant criteria - demonstration of the relevant work performed, participation in contests
2. Plan to develop and create further documentation
3. Gitbook link
4. Contacts and wallet address of participant(s). Each submission must have an identifiable contact that can be matched with your description. In the absence of confirmation by the contestant of the authorship of the submitted work, the submission is rejected.

Documentation must be available throughout the Contest. Submission must be in English in .pdf format, on Academy's section of gov.freeton.org. Submission shall contain links to source materials based on submitted project documentation.

THE REWARDS

To receive Rewards, a minimum of 6 points is needed.

1 Place 27000 TONs (9000 plus 3000/mo for 6 month based on activity report by contestant)

2 Place 25000 TONs (7000 plus 3000/mo for 6 month based on activity report by contestant)

3 Place 23000 TONs (5000 plus 3000/mo for 6 month based on activity report by contestant)

4-6 Place 15000 TONs (3000 plus 2000/mo for 6 month based on activity report by contestant)

Total Contest Rewards respectfully requested - 120000 TONs.

JURY COMPOSITION

If needed, Academy SD may request external expertise on this technically advanced Contest from DevOps, DevX and other specialised groups.

JURY REWARDS

Due to complexity and depth of required knowledge, an amount equal to 25% of the total sum of all total tokens awarded to contest winners will be distributed among jurors who vote and provide feedback. This percentage will be awarded on the following basis:

- The percentage of tokens awarded to the jury will be distributed based on the number of votes each juror casts. For example, if one juror votes 50 times and another juror votes 5 times, the juror who votes 50 times will get 10 times more tokens than the juror who votes 5 times.
- Feedback is mandatory to collect any rewards.
- Jury rewards are distributed in full upon the end of voting regardless of the long term outcome juror will vote by rating each submission on a scale of 1 to 10 or can choose to reject it if it does not meet requirements or vote 'Abstain' if they feel unqualified to judge. If a judge abstains, he or she will get 100 tons.
- Jurors must provide feedback on submissions or lose their reward.
- The Jury will reject duplicate, sub-par, incomplete, or inappropriate submissions.

VOTING

- The juror must have a solid understanding of the described technology to provide a score and feedback. If not, the juror should choose to 'Abstain'.
- Jurors or whose team(s) intend to participate in this contest by providing submissions lose their right to vote in this contest.
- Each juror will vote by rating each submission on a scale of 1 to 10 or can choose to reject it if it does not meet requirements or vote 'Abstain' if they feel unqualified to judge.

NOTES

Admin fee - 5% of total rewards to be shared among administrators of the Contest as decided by the Academy SubGovernance Initial Members.

Publications that are already financed via community sub-governances or through partnerships cannot participate in this contest.

Each contestant has the right to provide several submissions if they are all original and differ from one another significantly enough to be considered different. This scale of difference will be judged by the jury subjectively as there is no clear way to define it. The operative phrase here is to “use your common sense”. If multiple submissions are deemed to be too similar by the jury, or if they in any way appear to be partially the same work done twice, or if they appear to be one whole body of work divided into parts to create the illusion of several submissions, jurors have the right to reject such submissions without question. Again, common sense and honesty will prevail in the event of discrepancies.

If the contestant makes an additional submission or submissions in order to replace a previously published submission, the contestant must inform the jury about this fact in their correct submission PDF, indicating which submission is the correct one to be judged. In this case, only the indicated work will count. If the contestant fails to indicate which submission is to be judged, then said contestant leaves it in the jury’s hands. NO EXCEPTIONS!

If and when this Proposal is accepted, Free TON Academy SubGovernance shall request proposed rewards from Free TON Community since they exceed Rewards approved in current Academy Global Proposal as described in
