

# Hello!

GramKit team is happy to present a submission

[gov.gramkit.org](#)

Scroll down for description

## About the project

[gov.gramkit.org](#) is a new project from the **GramKit** team

It is made in the same style as the [gramkit.org](#) website and fits perfectly into the ecosystem of **GramKit** projects about Free TON

**The Winners Catalog is just the beginning.**

We plan to expand the functionality to a full-fledged Free TON contests site by implementing an improved analogue of [gov.freeton.org](#)

## Advantages

### 01. Advanced filter on the main page

There is a filter on the main page in which you can select several subgovernances at the same time. And you can also select a category of contests and subgovernances with the found contests will be selected automatically

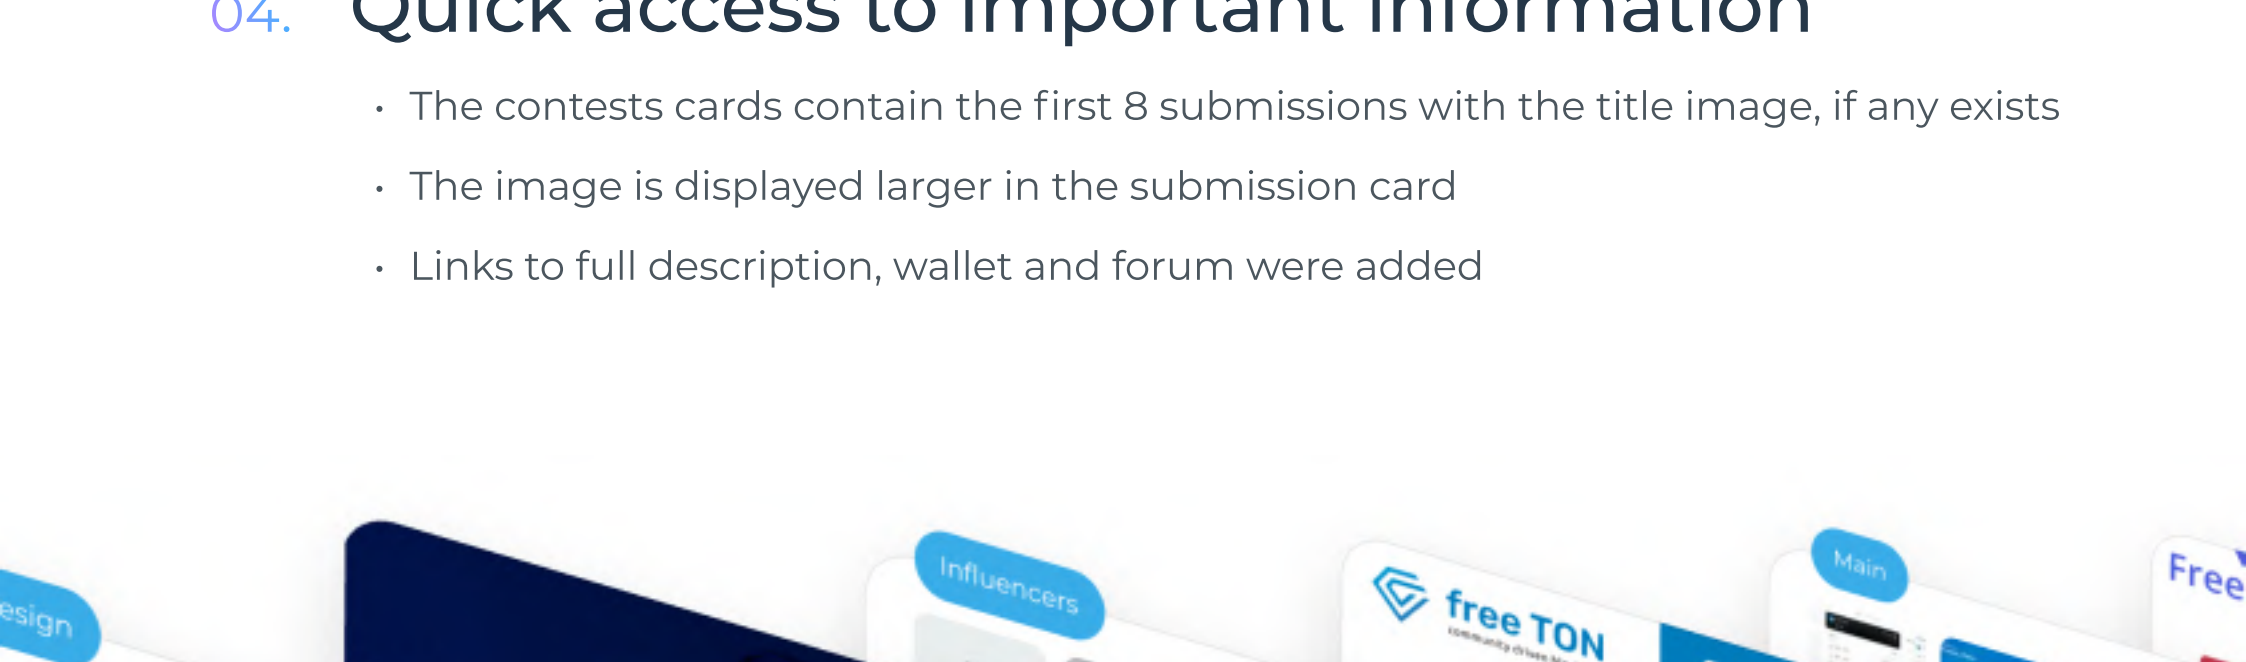

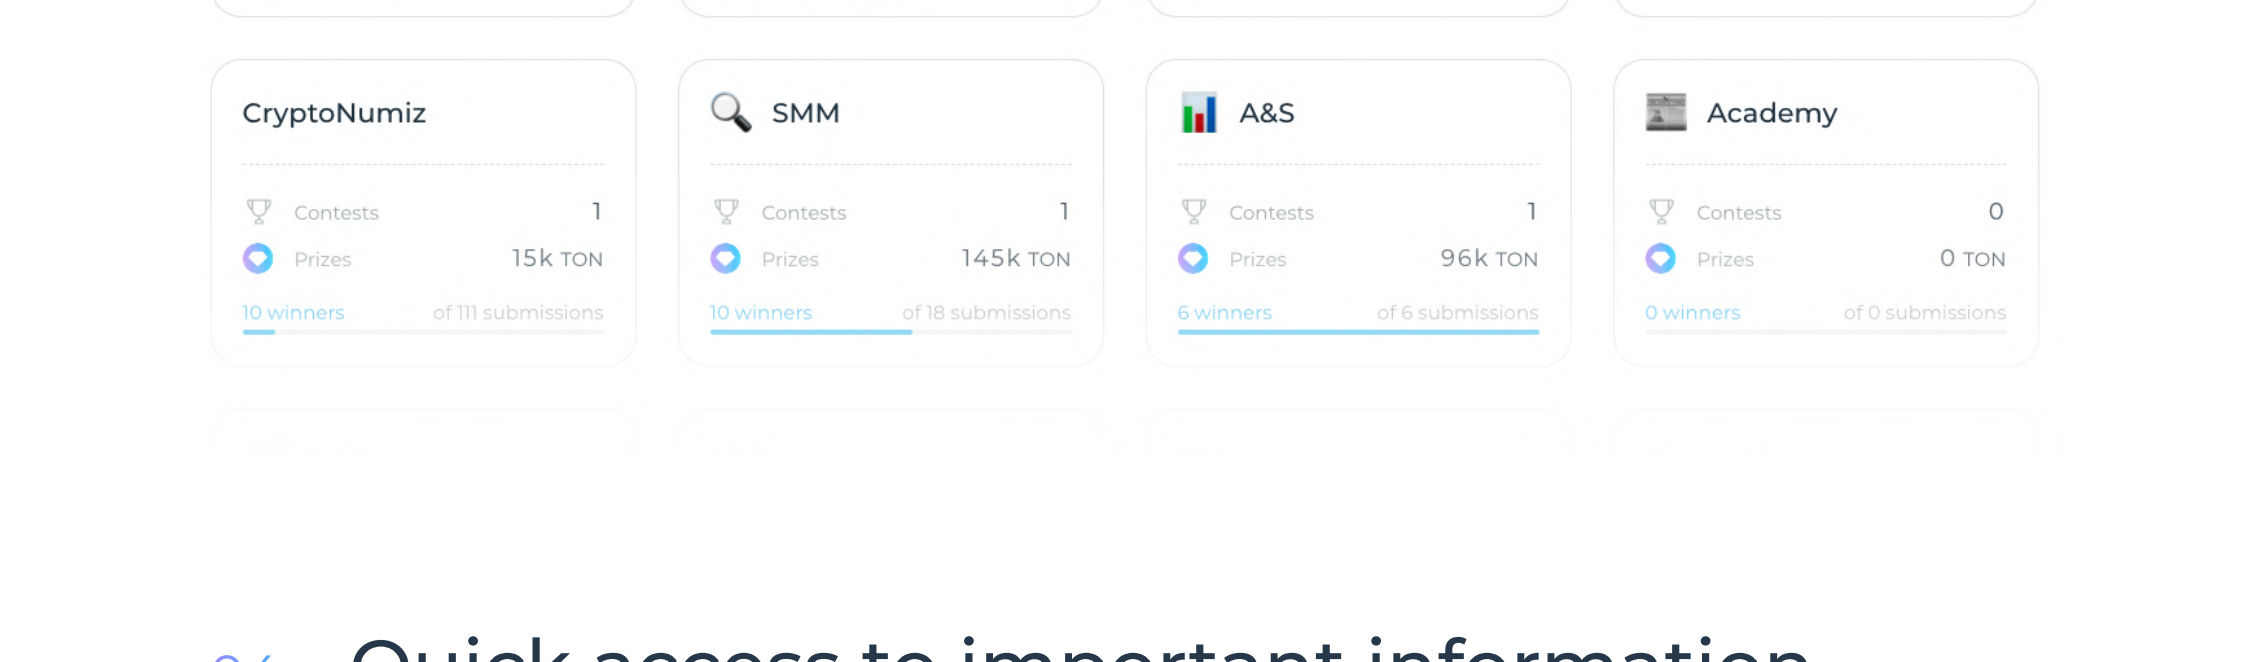

### 02. Convenient navigation

The website has pages for a list of subgovernances, a separate subgovernance and a contest

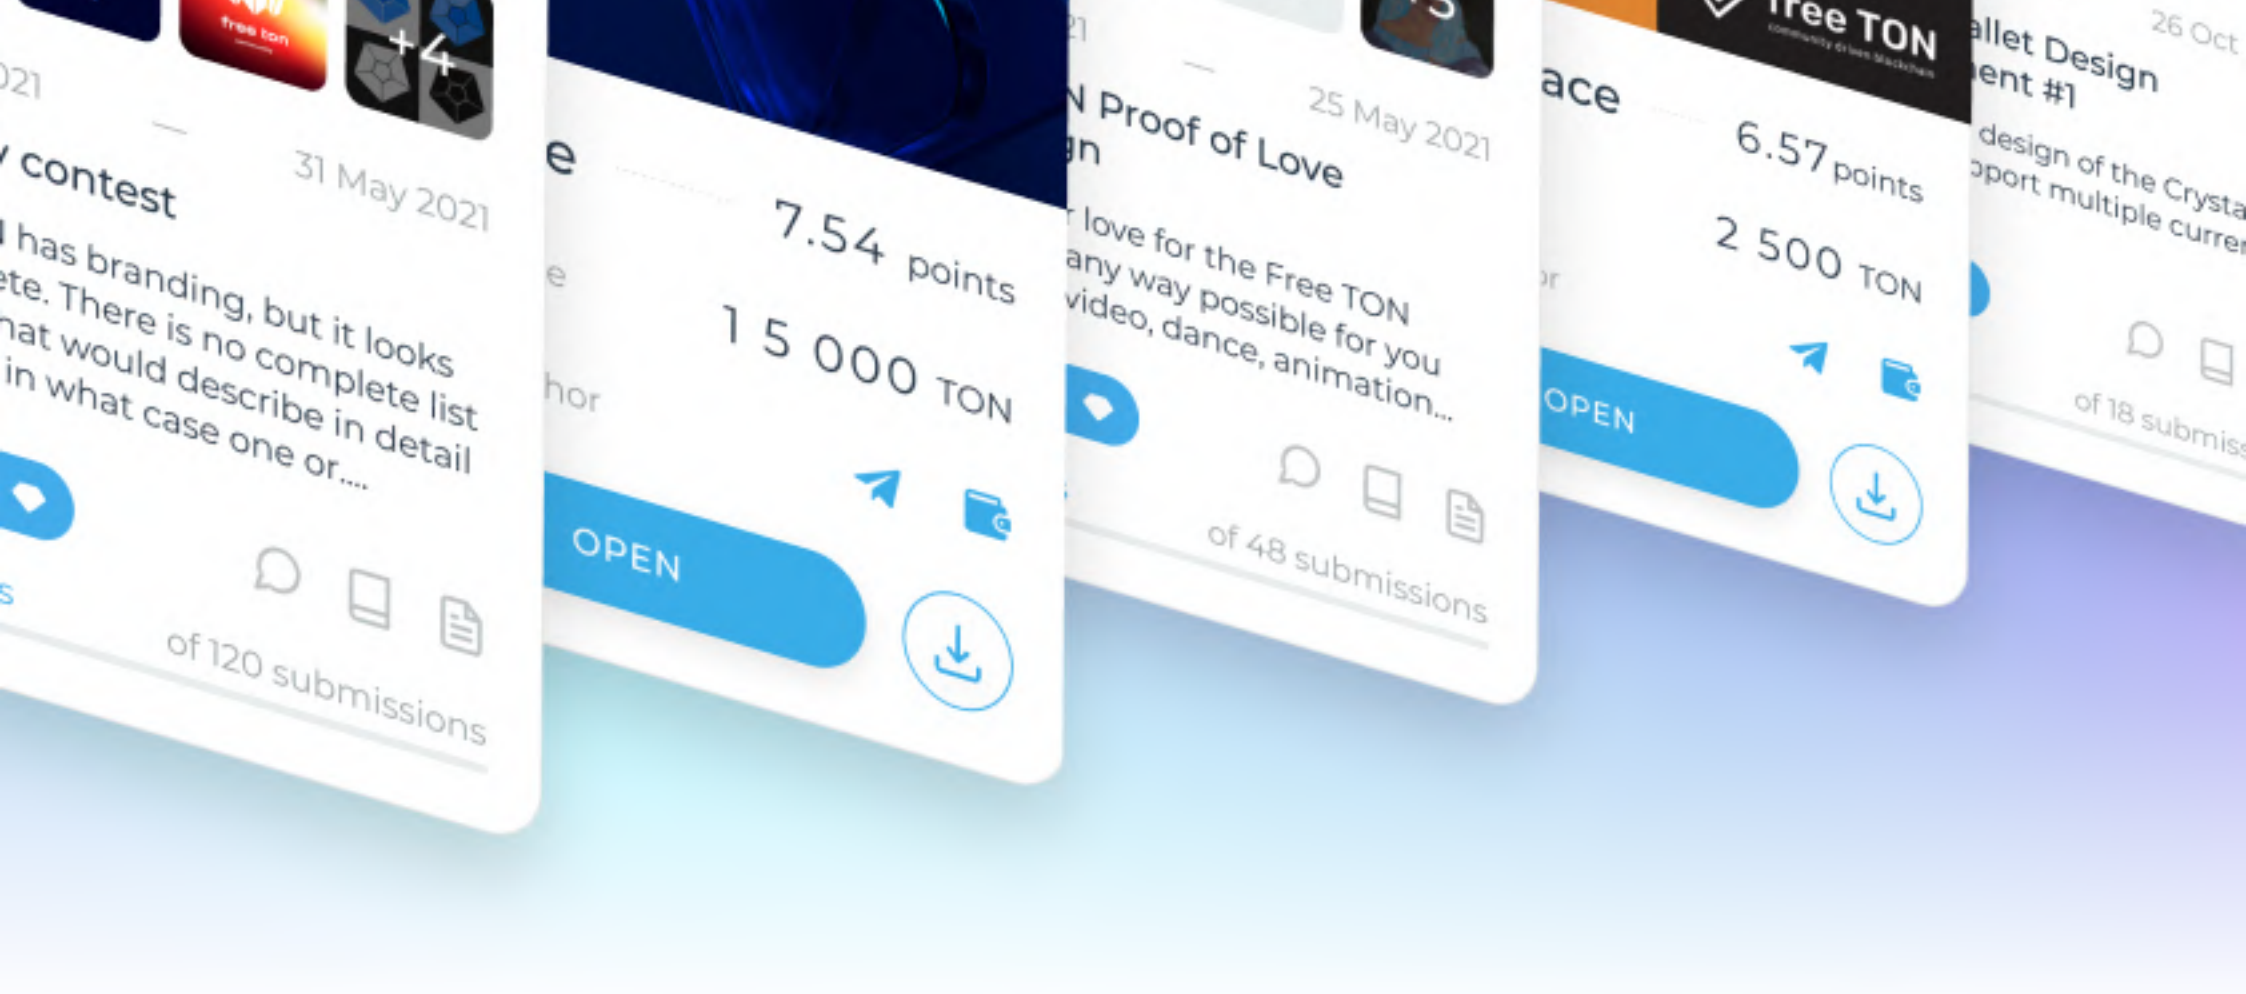

### 03. Useful statistics

All pages have statistics for submissions, contests and subgovernances

### 04. Quick access to important information

- The contests cards contain the first 8 submissions with the title image, if any exists
- The image is displayed larger in the submission card
- Links to full description, wallet and forum were added

## And that is not all...

### 05. Search in a prominent place

It will greatly facilitate life if you need to find something quickly

### 06. Comments widget

Each contest has a Telegram comments widget

### 07. Links to authors

The submission cards contain links to the forum and the Telegram author for quick communication

### 08. Links to resources

The submission cards provide a button for downloading all the resources provided by the author

## More about website

### The website loads quickly and works fast

95+ points on PageSpeed.  
1 second — average load time  
1 MB — average page weight

### Fast and accurate search for Free TON materials

The materials you are interested in can easily be found in a split second

### 100% responsive layout for all screen sizes

We paid great attention to layout for mobile devices - minimum scrolling, maximum information on the screen!

### Optimized for search engines

Added all meta tags (including tags for social network), alternate links for translations, sitemap

### Fresh, concise and modern design

We use Glass Morphism — a new trend in web design. Glass cards and thin dividers. Clean, light and neat design

### Multilingual: Russian and English

At the moment we support English and Russian, but support for other languages will be added in the near future

## What's under the hood?

Frontend

**Next**

React · GraphQL · TypeScript · SCSS · CSS Modules · React Query · React Context · React Hooks · Material UI · Lodash · Prettier · ESLint · Feather Icons

100% Free & Open Source

Backend

**Directus**

Open-Source Data Platform — Directus wraps any SQL database with a real-time GraphQL+REST API and an intuitive app for non-technical users

100% Free & Open Source

## Q&A — Answers to important questions

01.

**Is the GramKit team ready to transfer site files to W&D subgovernance?**  
Yes, the project is implemented in a separate repository and does not technically depend on gramkit.org
02.

**How will the file transfer work?**  
We will upload the files to a new repository and superficially change the design of the website: colors, fonts and logo - so that there is no connection with the GramKit team.  
However, it is worth noting that the GramKit team plans to develop and support this project regardless of file transfer. Thus, after transferring the files, there will be 2 projects with similar interfaces for some time
03.

**Why was Directus chosen as the admin panel?**  
We create Directus interfaces tailored for specific projects. That is why we use a unique design and React for frontend development, and not ready-made CMS like WordPress or Joomla.  
At the same time, for simple projects from a backend point of view, there is no need to reinvent the wheel, using a ready-made solution is a more correct approach.  
We analyzed and tried many **Headless CMS** and concluded that **Directus 9** is the best CMS, even though the current version is a Release Candidate. Clean design, user-friendly and nimble interface, **responsive development team**. What else do you need for a good admin panel?  
**Just take a look at screenshots!**
- And now a little about us

## Roadmap

We plan to implement many different tools for working with Free TON

At the same time, the GramKit team plans to always maintain and improve previously created solutions

Daily publication of news and information about Free TON

Improving the relevance and usability of the website and search

Website and Telegram channel promotion

Creation of educational materials about Free TON

The following is a roadmap for new projects.

2021 Q3.

Development of an interface for displaying complex information about Free TON contests

Expansion of search with new sources  
— forum.freeton.org  
— Free TON information resources  
— GitHub Repositories related to Free TON

2021 Q4.

Implementation of search by Blockchain Explorer

GramKit Wallet - TON Crystal cross-platform wallet

Creating a training course for beginners

2022 Q1.

Staking support to all available DePools in the GramKit Wallet

Implementation of search in Telegram chats and channels about Free TON

2022 Q2.

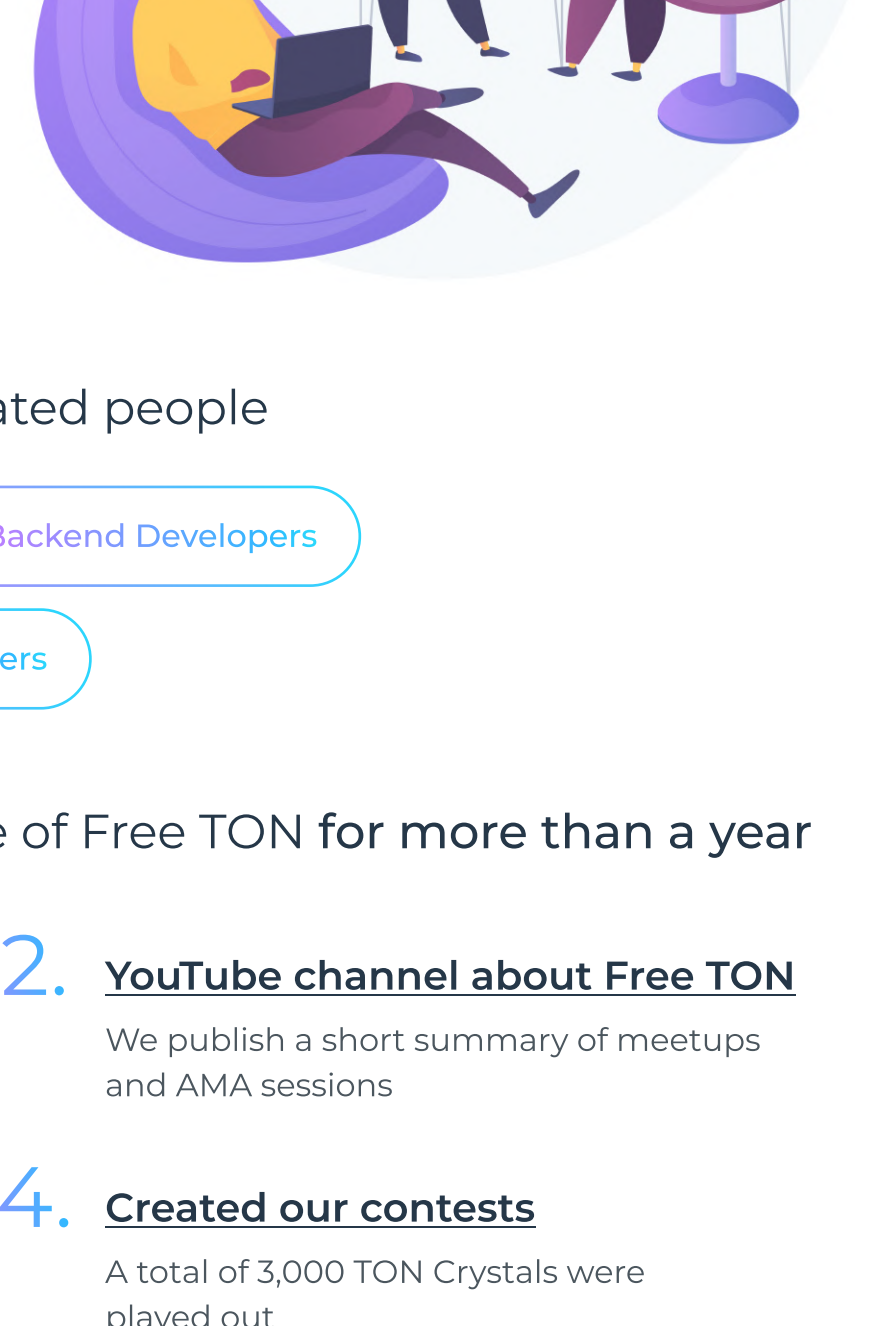

GramKit Wallet Debot Browser - Debot browser integrated into GramKit Wallet

## COMING SOON

## Team

**GramKit** is a team of young enthusiasts committed to the active work and success of the Free TON project. All our efforts are centered around Free TON and are aimed at improving the ecosystem

First of all, we specialize in content management in Telegram and the development of web applications and Telegram bots

Our team consists of energetic and motivated people

- Copywriters

Frontend developers

Backend Developers

Designers

Translators

SMM managers

We've been taking an active part in the life of Free TON for more than a year

01.

**Telegram channel about Free TON**  
A year later - 3200 participants.  
920 posts published
02.

**YouTube channel about Free TON**  
We publish a short summary of meetings and AMA sessions
03.

**Participated in contests**  
We managed to participate in 8 contests to this point
04.

**Created our contests**  
A total of 3,000 TON Crystals were played out
