NFT Marketplace. The top 3 winners.

June 13, 2021

The NFT Marketplace competition has just ended, and the battle for leadership was very hot!
We have prepared for you a quick overview of the three winners of this competition, based on the feedback from the jury of the NFT Marketplace competition.

1st place: GrandBazar (https://grandbazar.io/).
Average points: 8.69
Most of the jury members noted the stylish and laconic design of the site.
Unfortunately, at the end of the competition, the auction functionality was not implemented, but the authors promised to complete it in a few days.
You can log in to the site through Google or Github, and if you have the ExtraTon extension installed, the system will automatically see your wallet address and link it to your account. One of the jury members went the farthest when reviewing this application and created his first NFT, thereby confirming that this is a fully working project.

2nd place: NiFi.Club (http://nifi.club/)
Average points: 7.73
The jury members noted the high-quality implementation of the purchase and sale mechanism
NFT tokens. This project is also integrated with ExtraTON. NFT tokens are created through deBot. The jury members named the main disadvantage of the fact that registration on the site is possible only through ExtraTON.
