

Introduction

Hello everyone, my name is Nina and I am glad to submit my application for the AIBC Event in Dubai.

I am deeply involved in the life of the community. I am an active member of Analytics&Support Subgovernance, Free TON Academy and Wiki Subgovernance.

In my submission, I will first talk about my skills and activities in the community. And then I will demonstrate my idea of a use case on the Free Ton Blockchain

6 months in the community

EDUCATION

- **ART EDUCATION TEACHER**
Faculty of Fine Arts
- **GRAPHICS DESIGN**
Additional education courses
- **WEB ANALYTICS**

AWARD IN FREETON

- **DESUPPORT 2020 CONTEST**
| 6 Place

- **ANALYTICS DEWORKFLOW CONTESTS**
| 1 Place

- **CHALLENGE MIT/HARVARD PAPER ON BLOCKCHAIN FAULTS IN ELECTION SYSTEMS**
| 11 Place

- **CONTEST: FREE TON CHRISTMAS/NEW YEAR GREETING CARD DESIGN**
| 10 Place

MY ACTIVITIES IN FREE TON

Analytics & Support SG

- Writing Proposals
- Create, administration of tables for contests and jury voting statistic
- Help in moderating Analytics chats, Presentation of SG's work
- Informing members and jury about voting, important news, etc...

Free TON Academy Subgovernance

- Informational support of members
- Create, administration of statistics tables
- Creating courses

Wiki Subgovernance

- Review Editing articles
- Working with the Media Wiki engine
- Administrative issues

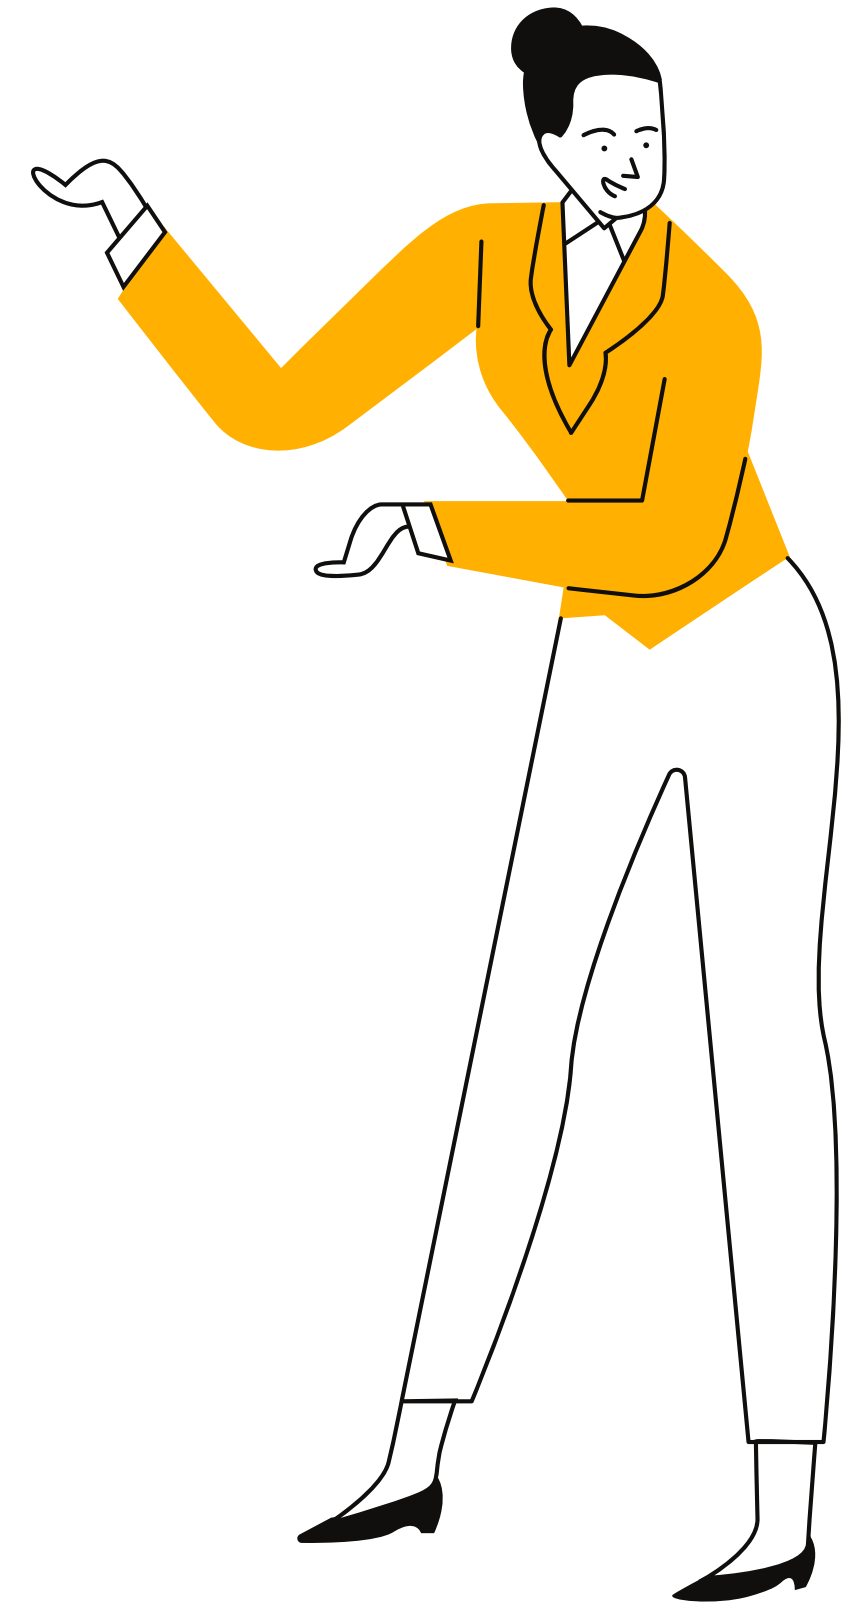

I created

- A guide for Gov.Freeton.Org ([published on Medium](#)) With the help of @Anesthesia_v
- Contest Essay "Blockchain voting. Going from past to future" ([Link](#))

I helped to create the design for **AIBC Event** - Roll-up banner and Menu Artwork. Together with **Tim @stop_think_ask**

We converted into vector and reworked an illustration of one of the Landing Design Contest winners. We adapted the design for AIBC Event.

I also created pictures and gifs for Free TON (for Telegram news) and participated in design contests.

Let me introduce you to my Free TON blockchain use case project

FreeTLancer Freelance Exchange.

Using centralized freelance exchanges, users always pay a service commission and it is quite large. Clients and performers pay money simply for creating tasks or responding to them. In addition, they also pay a commission to the service for the security of each transaction.

My idea is to create an open and free Freelance exchange on the Free TON blockchain with payment in TON Crystal. The service takes a commission only for transfers within the exchange, which goes to the developers and administrators to support the platform.

The project will have the following sections:

For small tasks

For large projects with a vesting for performers

For Contests

Catalog of customers and performers with reputation rating – DeHunt

Any user can create a task on the service. Tokens from the customer are transferred to a separate wallet (giver) and, after completing the task, are sent to the performer's wallet. It is also possible to lock a stake and give money to performers of large contracts through vesting.

The exchange service supports the cancellation of transactions for performers who do not fulfill their obligations. If the obligations are not met, then, according to the smart contract, the payer will be able to withdraw the balance to the giver wallet from which he paid using a unique seed phrase.

Contests

Contests are especially important for Free TON! They were chosen to replace the classic airdrop as a fair way of distributing tokens according to the principles of meritocracy. In the FreeTlance project, each user will be able to create contests for any amount for the tasks he needs.

Multicurrency

Thanks to DeFi tools, it will be possible to exchange other tokens for TON Crystal, which will make the service more universal.

DeHunt catalog

This is a catalog of customers and performers. Their profiles are open, they can directly communicate with each other through messages on the website (it will be possible to allow or deny private messages and to set up a blacklist). Performers will be able to specify their specializations with hashtags, which will help customers find them quickly and easily.

NFT tokens

Reputation is always important. Clients and performers of the FreeTLance exchange will receive it for completed orders, their volumes in tokens, for winning competitions and a large number of positive feedbacks. No one will be able to fake the qualification of a specialist. Unique «badges of reputation» will have value outside the exchange and thus popularize it.

Thanks for attention! I hope you will be inspired by my idea.
I am ready to present my project on the AIBC Event and have prepared a layout for the booklet.
