

Free Ton French subgovernance proposal V 1.1

General description

Free TON France will exist to drive the popularity of Free TON in France, Belgium, Switzerland, Canada, Morocco, and all other francophone countries.

The main purpose of this subgovernance will be to attract new francophone people to the project. IT-trends in the French blockchain community differ from global traditional platforms. We will launch special French promotion contests to promote the community correctly with a full understanding of culture, trends, and relevance in francophone countries. We will attract new users and will be able to develop Free TON in many countries at the same time to provide more decentralization. Also, we will work with the already existing Free TON France community.

Initial Members

Names	Telegram Handle	Background

Qualifiers public duties contests

Following the launch of this subgovernance, the French community launches two contests to find a jury among the Free TON community:

- 4 secondary members
- 8 juror members

Decentralized Contest

Decentralized Contest (“DC”) will be the engine of the French community. The goal of the Decentralized Contest Proposal (“DCP”) is to design a powerful community that builds itself autonomously. All DCs must adhere to the Governance Best Practice (“GBP”) guidelines.
