

Hey ! I present my competition work Freedom Funky! (The track is not for sadness) I was inspired by a good mood and a sunny day. In my opinion, the track is great for many applications in Free TON. By using parts of a multitrack, you can mix different parts well and creatively. This simple ringtone is dedicated to the Free TON community! I wish you only good)

The image features three large, faceted diamonds resting on a smooth, grey surface. The central diamond is the largest and most prominent, with its facets catching the light and creating a complex pattern of reflections. Two other diamonds are positioned to its left and right, slightly out of focus. The background is a soft, neutral grey, which makes the diamonds stand out. The overall mood is elegant and sophisticated.

Seventh Space

Funky Freedom

Track - Freedom Funky

Composer - Seventh Space

Genre - Jazz Funk

Duration - 4:01

Telegram @seventhspace
