

Application template for participation in the Free TON Dev Experience Jury Contest

The application for participation in the contest must be submitted no later than **05 November, 2020 at 24:00 (Moscow time)**. Applications submitted after this time will not be considered.

If you are confident that you can be a member of the jury, but have a problem making an application, you can use this template. All you need to do is to fill out the sections. Don't hesitate to show your best qualities.

| | Free TON Dev Experience Jury Contest |
|---|---|
| Name | Dmitry Borisenkov |
| E-mail | dmitriy.borisenkov89@gmail.com |
| Telegram ID | @d_borisenkov |
| LinkedIn ID | https://www.linkedin.com/in/borisenkov/ |
| Github ID | https://github.com/akiramennai |
| Choose the Jury Groups which you want to join (underline your choice, multiple choice is possible) | SDK Contests Toolchain Contests X Node Contests Smart Contracts Other Contests within Free Ton Dev Exp subgovernance |
| Professional Experience (underline all what is relevant to blockchain development) | I dont have much blockchain-related experiense, but I have plenty of toolchain-related one. I worked on several LLVM-based toolchains (all the projects are listed in my LinkedIn profile) for more than 8 years. My employees were such companies as Embarcadero, Samsung and ARM. I have breadth experience in compiles and compiler runtimes, toolchains in general, and some experience in programming language design. Aside from that I am one of the contributors for C++ compiler for Free TON. |
| Proof of qualifications (links to open-source projects, etc) | https://github.com/tonlabs/TON-Compiler https://reviews.lvm.org/p/dmitry/ |

| | |
|--|---|
| Describe what you have done using, what you know about code base of Free TON | I somewhat familiar with C++ compiler for Free TON. I also have a few patches in the linker and work with these tools on day to day basis. |
| Proof of your skills in building smart-contracts (only for those who want to join Smart Contract Jury group) (links to the deployed by you smart-contracts) | I don't have strong skills in this field. I wrote a couple of examples in C and C++ (see https://github.com/tonlabs/samples/tree/master/c , https://github.com/tonlabs/samples/tree/master/cpp N.B. Not all of the samples listed above of my authorship, use git blame for details) and that's it. |
| Describe your understanding of the decentralised governance | I only vaguely understand it, but to the best of my understanding decentralized governance is a form of governance Free TON uses. These are Soft Majority Voting contracts and there are proposals and contests. The proposal passes if it's approved by voters who submitted their votes on time. Thus there is no single authority in the network and the democracy is everywhere. |
| Give examples of organizations with the decentralized management | I don't know any. |
| Disclose the organisations/the companies you are working for | I'm affiliated with TON Labs |
| Personal Information (add anything about yourself that you consider relevant) | |

To submit your application you have to go [here](#).

Please note:

- These are just the basic requirements that must be included in your application. This template is only a recommendation form. You are free to create an application in any form.
- All submissions must include the contestant's social network identity, a Telegram ID and Github ID, by which the jurors can verify that the submission belongs to the individual who submitted it. If not, the submission may be rejected.
