Some fact about me:

I have been participating in the development of the Free TON blockchain since the launch of the project. I am an active member of the community. I am an initial member of W&D SubGovernance and an active member of Wiki SubGovernance.

I have contributed immensely to the design of the contests at W&D SubGovernance and have participated in some of them. Also, I actively communicate with the community, often help new users to get answers to their questions about Free TON on the forum and in Telegram.

I have deep analytical skills in the field of blockchain, I have the ability to concentrate for many hours, I can find simple solutions to complex problems.
