

Good day!

Our team “GramKit” is very glad to take part in this amazing contest.

Telegram: [@gramkit\\_ton](https://t.me/gramkit_ton)

Our work is available at Figma:

<https://www.figma.com/file/WpxVQ6flNVS7v1I4xo9Bjx/FreeTON>

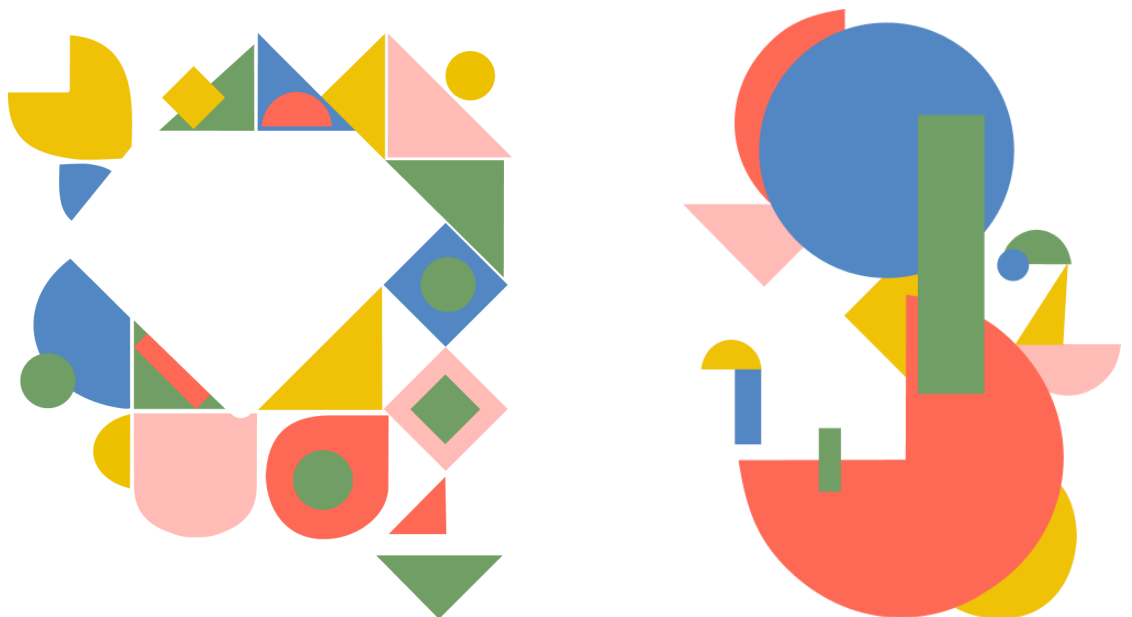

## Some words about the design

1. One of the main ideas was to keep some styles (buttons, headings sizes and so on) of current Free TON's projects design, so that the landing page could be easily "integrated" into the entire system.
2. White and clear design with large indents between blocks helps users to feel freedom
3. Unique icons for displaying elements: symbiosis of classic icons and texts with abstract illustrations

4. Colourful illustrations maximize the potential of abstract figures, which are usually involved in design of Free TON projects.

5. Large texts on the background are new trick and big idea for variety of design

Blockchain

### Key features of Free TON blockchain

**Transaction speed**  
Free TON is capable of handling millions of transactions

**Multiblockchain**  
Free TON is a multiblockchain platform. It means that it is

6. Unusual design decisions

# What is Free TON?

**01** Free TON is a multiblockchain platform. It is capable of handling millions of transactions per second if necessary. Free TON is based on the principles of free speech, information and free software.

**02** Free TON was developed by TON Labs, Nikolai Durov and others. Free TON was launched on the 7th of May. TON Labs team was responsible for the technical part of launch.

**03** Free TON, launched by the principles described in the Declaration of Decentralization, is deemed to be fully decentralized, because we need equal economic opportunities for The People of this world; and a new, more effective way to govern public finance – without influence from political elites.

**04** Free TON has a all-in-one crypto wallet, blockchain browser, and secure chat – TON Surf. It helps users navigate in the TON

*“The Want, Will, and Hopes of the People.”*

*– The Declaration of Independence.*

We, the undersigned Free TON Community, Validators and Developers, hereby announce the launch of Free TON Blockchain upon the principles and terms stated in this Declaration of Decentralization.

Free TON Blockchain

Free TON is a protocol proposed and developed by Dr. Nikolai Durov. We, the Free TON Developers are grateful for Nikolai's contribution to the TON protocol and wish him to continue developing it as part of a wider community effort.

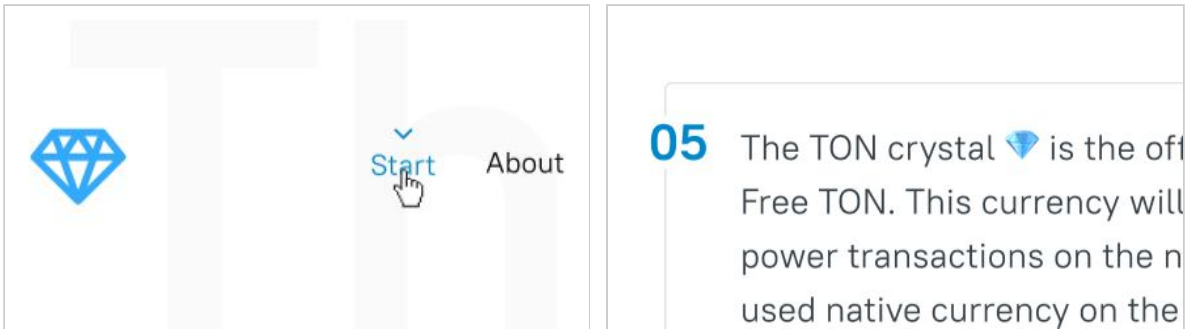

Since we believe in freedom of speech, in information sharing, and in free software, we have decided to give the power back to the community and unanimously proclaim the launch of the Free TON blockchain and the Free TON Crystal (or TON for short) as its native token.

The Free TON Crystal symbol will be (U+1F48E) 🦋

The Free TON Crystal will be (U+1F48E) 🦋

The Free TON Crystal will be (U+1F48E) 🦋

7. And attention to details, because the overall perception is made up of every detail

05 The TON crystal  is the official Free TON. This currency will power transactions on the network used native currency on the

companies and individuals. Among the active representatives of our brothers' blockchain company TON Labs, investment firms, Everstake, Chorus, Bitscale Capital, Anatoly Kaplan.
