

Campus Plan 2050 is being developed through a year-long inclusive process designed to plan the future of the Ann Arbor campus. All information on this board is provided as a work in progress with the goal of capturing input from the community and informing the preferred direction for the campus. Your ideas and input will help ensure that Campus Plan 2050 evolves to provide the living, learning, and working environments necessary to fulfill Vision 2034, U-M's strategic plan.

### WORK IN PROGRESS - FOR COMMENT

## Introduction

Campus Plan 2050 will provide an integrated approach for the Ann Arbor campus with an emphasis on renovating existing space and identifying strategic opportunities for new facilities. It will address DEIA goals, promote health and well-being, increase the presence of art on campus, enhance the campus landscape, improve mobility, and reduce greenhouse gas emissions.

## Objectives

- Pursue “smart growth”\* and development policies that support growth potential, academic and research space needs, residential communities space needs, decarbonization goals, address infrastructure and deferred maintenance needs, and are compatible with community priorities
- Provide hybrid work and hoteling spaces
- Create shared academic and research space practices to promote an efficient, flexible, and vibrant collaborative environment

\*Smart growth in campus planning means sustainable, efficient development to support growth while minimizing environmental impact.

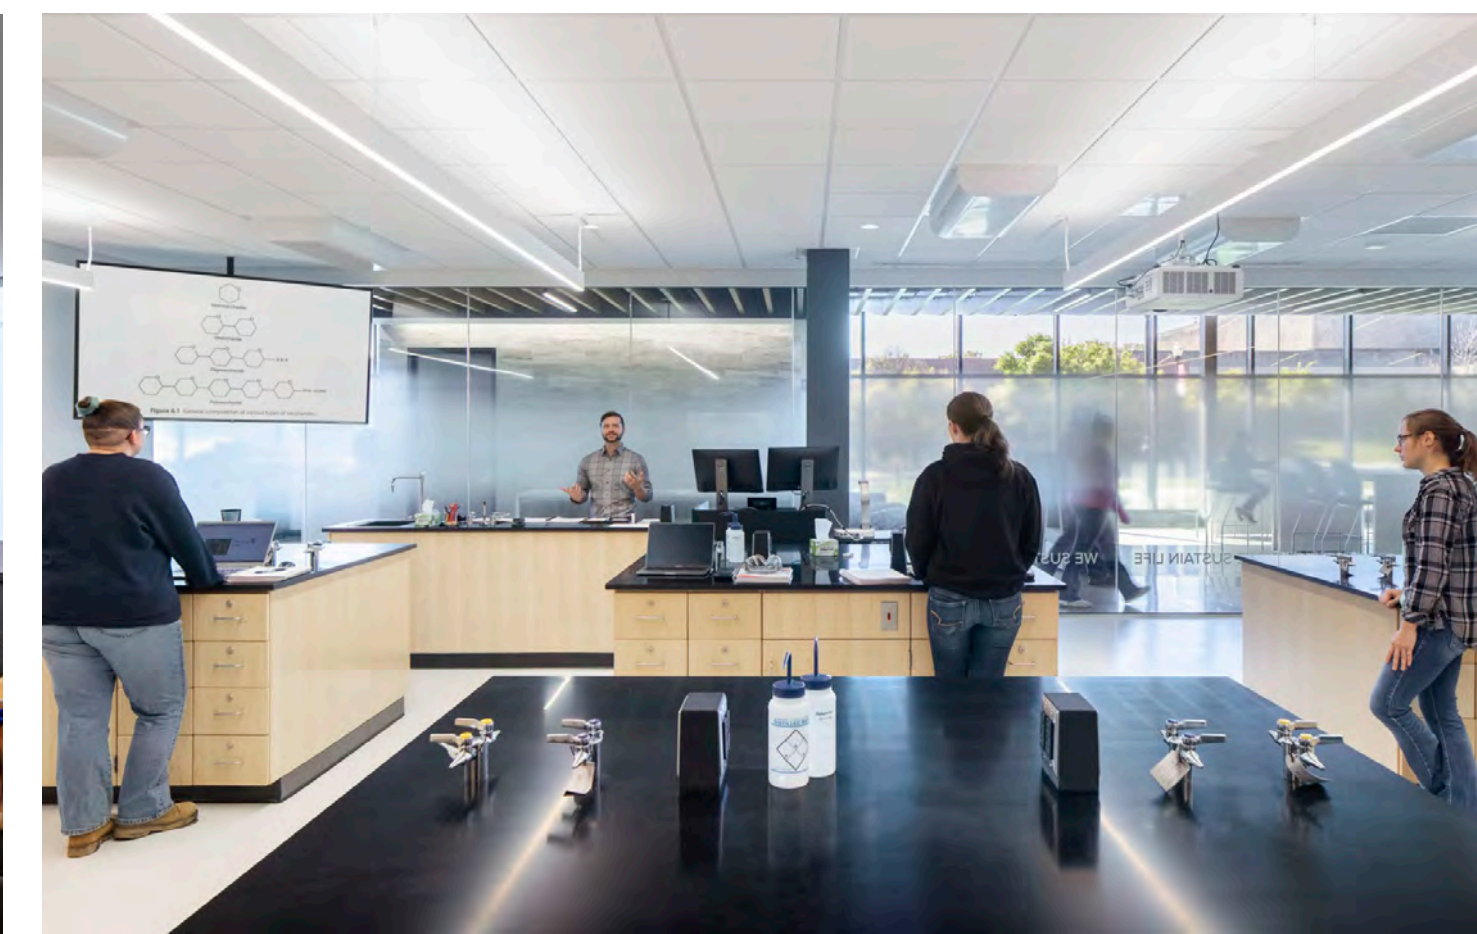

## Proposed Approaches

- Improve the quality of existing space and strategically increase space for research, instruction, and clinical activities to have a transformational impact
- Create an **Innovation District and Arts Network**
- **Increase undergraduate and graduate housing inventory** to meet housing goals, improve affordability, and replace aging facilities
- **House all first-year undergraduate students** and appropriate mix of other levels of students (undergraduate, graduate, and professional)
- Identify strategic development opportunities to **support growth and create a vibrant mixed-use campus experience** that is walkable and connected to transit
- Consider providing **workforce housing**

### Campus Plan 2050 will reinvest in existing buildings and infrastructure and establish new state-of-the-art buildings, districts, and hubs that...

Renew classrooms and instructional space

Modernize teaching labs

Provide new undergraduate housing experiences

Invest in graduate, family, and workforce housing

Provide collaboration spaces in renovations and new buildings

Provide places for study and social engagement

Plan for Athletic expansion and support facilities

Strengthen the Arts and Humanities

Provide new environments for hybrid work and hoteling

Provide space for interdisciplinary research and innovation

Increase access to and enhance space that promotes health and well-being

Integrate sustainability into the open space network

Create an Innovation District with space for research and industry partnerships and ample amenities

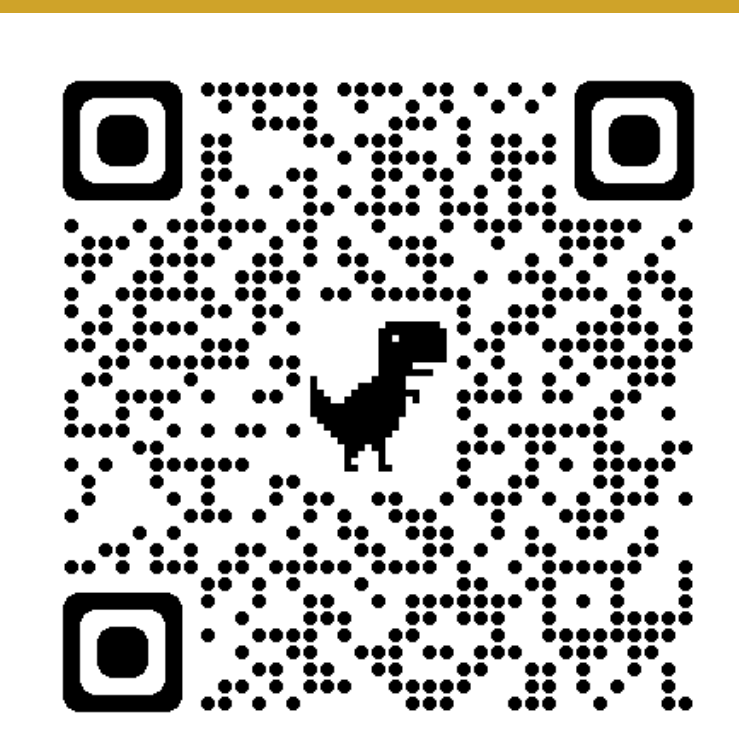

Explore opportunities for a hotel and conference center

Increase space for diversity, equity, inclusion and accessibility (DEIA) opportunities across campus

Establish new indoor and outdoor spaces for fitness and recreation

Welcome to the Fall Open House!  
The fall open houses are an opportunity to participate in the development of Campus Plan 2050.
