“Ctrl + Alt + Success”

I am writing to express my interest in the IT Network Engineer position. As a dedicated IT professional with solid hands-on experience in network configuration, monitoring, and support, I am confident in my ability to contribute effectively to your technical team. With a strong foundation in network engineering, I have experience in configuring Layer 2 and Layer 3 switches, managing VLANs, and implementing 802.1Q trunking. I am proficient in deploying and maintaining Cisco, HP, Dell, and Aruba network devices. My technical background also includes IP telephony installation (Softel, Mitel), LAN/WAN troubleshooting, and the use of monitoring tools like PRTG and UniFi Network Controller.

I possess a clear understanding of network security protocols, including firewall management, and basic knowledge of Fortinet, SonicWall, and Ubiquiti devices. I am skilled in documenting network configurations, supporting end-users, and ensuring high network uptime and reliability.

My goal is to grow further as a network engineer by contributing to a forward-thinking company that values IT infrastructure excellence, continuous learning, and team collaboration.

I would welcome the opportunity to discuss how I can support your team in achieving efficient and secure network operations. Thank you for considering my application.

Best Regards

Mark Raven Catindig
