3. Purpose of the Event:

The roundtable was led by distinguished faculty members, each with extensive experience in research and publication. Participants engaged in discussions focused on the following key areas:

1. **Constructive Feedback:** Students presented their research drafts and received valuable feedback from faculty and peers, enabling them to refine their ideas.

2. **Idea Generation:** Participants were encouraged to brainstorm and share fresh ideas, fostering an environment of creativity and collaboration.

3. **Methodological Insights:** Faculty provided insights into various methodological designs within the Humanities, helping students understand the importance of selecting appropriate research methods.

4. **Drafting and Editing Guidance**: The event covered essential stages of research development, from drafting and editing to the nuances of publishing, ensuring students felt supported throughout their research journey.

4. Outcomes:

The "Research Roundtable: Craft de Draft!" was a great success, providing students with invaluable clarity and direction for their research endeavours. Through one-on-one interactions with our esteemed faculty, participants received tailored guidance addressing their challenges and questions. This personalized approach helped students refine their research drafts and empowered them to explore new ideas and methodologies. The positive feedback from attendees highlighted the event's impact, fostering a sense of confidence and motivation among students as they moved forward with their research projects. Through the event, the department reaffirmed its commitment to nurturing scholarly excellence and fostering a community where intellectual curiosity thrives.

5. Challenges and Lessons Learned:

Despite the overall success of the "Research Roundtable: Craft de Draft!", several challenges were encountered during the event. One notable issue was the varying levels of preparedness among students, with some participants presenting drafts that required significant development. This disparity sometimes made it difficult for faculty to provide focused feedback within the limited time. Additionally, some students expressed concerns about specific research methodologies, indicating a need for more comprehensive pre-event preparation materials or workshops. Lastly, while the interactive format fostered engagement, it also led to a few logistical challenges in managing time effectively during the discussions, as many students were eager to share their ideas and seek advice. Addressing these challenges will be essential for improving future events and ensuring all participants can maximize their learning experiences.

6. Future Plans:

Looking ahead, Mimansa aims to further enhance the research capabilities of VSES students by organizing a series of focused events. These will include workshops on research methodology to equip students with essential skills in designing and conducting research effectively. Additionally, we plan to host paper presentation sessions, allowing students to showcase their findings and receive constructive feedback from peers and faculty alike. To provide comprehensive support, we will also conduct a detailed workshop on research paper formats, guiding students through the intricacies of structuring and writing a compelling research paper. By implementing these initiatives, Mimansa seeks to create a robust platform for student engagement in research and facilitate their journey towards academic publication.
