Learning Objective: The session aimed to inspire students, provide career insights, strengthen alumni-student bonds, and enhance understanding of industry expectations.
Target Audience: Students of VSE
Number of Students: 63
Event Flyer -

Event Details-

The Alumni Relations Committee (ARC) of Vivekananda School of Economics successfully organized Alumni Speaks, featuring distinguished alumni Mr. Yogesh Chauhan (Batch 2017 - 2020), Ms. Riya Jain (Batch 2017 - 2020), and Ms. Apurva Singh (Batch 2018 - 2021). The session began with a warm welcome by Ms. Priya Jindal, the convener of ARC, followed by an introductory address by the hosts- Ms. Himanshi Gupta and Ms. Vyakhya (VSE students) who emphasized the importance of alumni engagement in guiding students through academic decisions and career pathways. The hosts also briefly highlighted the journeys of the alumni, setting the stage for an insightful discussion on professional growth, internships, and skill development.

During the interaction, Mr. Yogesh emphasized the importance of discipline and consistency as key values for long-term success. He encouraged students to build strong analytical foundations and focus on understanding concepts rather than simply learning multiple software tools. He highlighted the growing importance of data analytics, recommending students to develop familiarity with tools such as Python and Excel and to actively explore internships to gain practical exposure. Ms. Apurva, on the other hand, spoke about the importance of exploring diverse career paths and staying open to emerging domains such as Artificial Intelligence, consulting, and product management. She also discussed the significance of communication, networking, and personality development, while advising students to present themselves effectively through clear introductions, strong CVs, and professional confidence.

Adding to the discussion, Ms. Riya highlighted the importance of developing strong research habits during the academic journey. She encouraged students to stay aware of current developments by regularly reading newspapers, improving concise writing skills, and engaging with people to gain diverse perspectives. She also explained that real policy environments often differ from classroom learning, emphasizing the importance of data interpretation, working with secondary data, and approaching problems from a stakeholder-oriented perspective. The session concluded with an engaging interaction and a rapid-fire round, where the alumni shared additional practical insights on communication, internships, and professional preparedness, making the session both informative and inspiring for the students.

Highlights of the Event-

- Gained valuable insights from alumni on career exploration, internships, and professional growth.
- Understood the importance of discipline, conceptual clarity, and analytical skills in academic and professional development.
- Learned about the growing relevance of AI, consulting, and data analytics tools such as Python and Excel.
- Explored the role of research habits, newspaper reading, networking, and communication skills in bridging the gap between academics and real-world professional environments.
