

Brow Lamination Pre & Post-Care Instructions

Proper brow prep and aftercare play a crucial role in the overall outcome of the service. The correct aftercare practices will help you achieve optimal, long-lasting results.

Please follow the instructions below to ensure the best results.

- Avoid using makeup and facial cleansers around the brow area 24 hours post-treatment.
- Avoid prolonged exposure to direct sunlight, and the use of sunbeds, saunas, steam rooms, and swimming pools for 24 hours post-treatment.
- Avoid exfoliating and using anti-aging products around the brow area for 72 hours before or after treatment.
- Avoid using Retin-A and AHA around the brow area for 72 hours before or after treatment.
- Avoid using any self-tanning products on the face for 72 hours before or after treatment.
- Keep your brows dry for 24 hours post-treatment.
- Avoid the temptation to over-touch the brow area after treatment.
- Apply a brow oil daily to keep the brows healthy and nourished.
