

Keratin Lash Lift Pre & Post-Care Instructions

Proper lash prep and aftercare play a crucial role in the overall outcome of the service. The correct aftercare practices will help you achieve optimal, long-lasting results.

Please follow the instructions below to ensure the best results.

Pre-care Instructions:

- Remove contact lenses before your treatment.
- Come to your appointment without any eye makeup.
- Avoid using waterproof mascara 2-3 days prior as it can leave a residue that may prevent lashes from lifting properly.
- Avoid curling your natural lashes with a lash curler for 24 hours prior to your appointment.
- Ensure that you do not have an eye infection or irritation of the eye area – as treatment cannot be performed until this has cleared up.
- If you have had eye surgery, you must wait a minimum of 6 months from the time of your procedure.

Post-care Instructions:

- Do not get your lashes wet for the first 24-48 hours (48 hours is best!).
- Avoid hot water, steam rooms & swimming for the first 24 hours.
- No mascara for the first 24 hours
