Docker

CI / CD with Circle CI

Web and mobile application to manage workflows for bot chats

React-Native

React

Firebase

Garage management ERP system

React

Elastic-Search and Logstash

CI / CD with Appveyor

Soft skills

I am a tech enthusiast with a craving for learning who enjoys attending tech events and participating in hackathons. I love talking to other people about technology and share knowledge as I think this is the best way of learning.

I like relaxed work environments where trust is the key to success, where people have a great sense of humor and can become friends.

I practiced competitive swimming for about five years for the FPN and still do some sports now and then.

Lastly I enjoy playing videogames and the taste of a cold beer.
