What is 🚀 wedevelop ?

A HUMAN-CENTERED COMPANY

People first

We are a people-first company that provides value beyond coding by engaging in the culture and context of the company to find the best possible solution.

Relationship building

Trust is built over time. The best teamwork comes from members who trust each other and we'll work every day to achieve that with you.

PEOPLE THAT CARE ABOUT YOU AND YOUR PROJECT

Cost-efficient service

As followers of the LEAN Methodology, we focus on eliminating waste and focusing on priority tasks. We make sure every minute of our work provides value to your Business.

Progress visibility

Forget about hard-to-read roadmaps or meaningless reports. For us, progress means one thing: get closer to the goal, quickly.

A TEAM THAT BELIEVES IN OVER COMMUNICATING

Crystal-clear communication

Get the team on the same page and keep them in sync while working as a unit. We believe in proactive communication.

Honesty

Good communication is the mean to an honest message. Honesty is one of our best weapons to gain your trust.

We are very objective when evaluating ourselves but we don't expect you to believe it blindly.

Please, read the next page (or visit our Clutch profile) where you'll find out what our customers say about us.

APP DEVELOPMENT FOR ONLINE FITNESS COMPANY

"They're a well-rounded team, which is conducive to troubleshooting [and] having difficult conversations."

5.0 ★★★★★

Project Summary

WeDevelop teamed up with a fitness technology company to expand the capabilities of their platform. They rebuilt several aspects of the app to better scale the business and allow for white-label offerings.

Feedback Summary

The team consistently impressed with their innovative thinking and attention to detail, building a trusting relationship with the partner early into the engagement. Their support, understanding company culture aided them in communicating honestly about project challenges at all project stages.

PRODUCT DEVELOPMENT FOR FERRY BOOKING PLATFORM

"WeDevelop was resourceful, unafraid of problems and blockers, creative, professional, and fast."

5.0 ★★★★★

Project Summary

WeDevelop was hired to build a platform for a ferry booking search engine. The team built the product from the ground up, utilizing SQL and AWS.

Feedback Summary

Internal stakeholders are extremely impressed with WeDevelop's work, noting the effectiveness in developing the complex solution. Their intelligence, technical skill, and creative expertise make them excellent, long-term partners. Customers can expect a tenacious team dedicated to project success.

WEB APP DEVELOPMENT FOR A LOAN COMPANY

"The project cost about half of what it would have had we hired local engineers."

5.0 ★★★★★

Project Summary

WeDevelop took care of backend development, AWS set up, and frontend design and implementation for a loan system with several automated processes.

Feedback Summary

Thanks to their involvement, the new system launched on time and with the ability to start issuing loans right away. Regular standups paired with their extensive knowledge and adaptability contributed to the project's success.

SOFTWARE DEVELOPMENT FOR SPORTS BETTING STARTUP

"They're willing to engage with a problem to figure it out rather than waiting to be told what to do."

5.0 ★★★★★

Project Summary

WeDevelop is building an MVP of a sports betting software. They're looking to enhance the solution's performance so that it can display a high volume of pricing data in real time.

Feedback Summary

The software is still in development, but internal stakeholders have praised WeDevelop for their proactive problem-solving skills. The team brings an agile approach to the project, maintaining open communication lines and adapting well to client requests.
