

# LED MIRROR INSTALLATION INSTRUCTION

ITEM: LMIR-18R

Mirror

Mounting Bracket  
x1

Drywall Anchor  
x4

Screw  
x4

Wire Connector  
x3

## TOOLS REQUIRED

1/4" Drill Bit

## SAFETY INSTRUCTIONS

Read instructions completely before installing the mirror.

### ▲ WARNING:

- If the colors of the household supply wires are different than what is referred to in the instructions below, a professional electrician should determine proper wiring.
- An electrical mirror must be wired to a 20 amp GFCI (Ground Fault Circuit Interruptor) when used in a bathroom and all other locations required by the National Electrical Code.

### CAUTION:

- Rated for damp locations. Not suitable for outdoor use.
- Be sure the outlet box is properly grounded or that a green or bare (ground) wire is present.
- You may need a second person to support the mirror during installation.

## ASSEMBLY INSTRUCTIONS

1. Turn off circuit breakers and wall switch to the mirror. ▲DANGER: Failure to disconnect power supply prior to installation may result in serious injury or death.

2. Measure and note the distance between the centers of the two mounting brackets. Determine the location of the mirror and using a spirit level, mark the hole locations on the wall.

3. Use .25" diameter drill bit (not included) to drill the pilot holes for the drywall anchors.

4. Use a hammer (not included) to tap the drywall anchors into the pilot holes.

5. Secure all wire connections with wire connectors according to diagram and these steps:

- Connect the Bare wire from the fixture to the Bare/Green (ground) supply wire.
  - Connect the Black wire from the fixture to the Black (hot) supply wire.
  - Connect the White wire from the fixture to the White (neutral) supply wire.
- Note: If household supply wires are different colors than referred to above, it is recommended a professional electrician determines the proper wiring.

6. Lift the mirror onto the mounting bracket. Note: Ensure the bracket preassembled to the back of the mirror interlocks with the mounting bracket on the wall.

7. Turn on power supply at the breaker box and wall switch to the mirror.

## OPERATION INSTRUCTION TOUCH OF SWITCHES

- Switch: short press the touch key to turn on or off the strip and relay at the same time
- Color temperature adjustment: When the light is on, short press the touch key to switch the color temperature, each time the light is turned on to remember the color temperature and brightness of the last time the light was turned off. such as: 1 way bright → 2 way bright → 1+2 way bright → turn off the light → 1+2 way bright → 1 way bright → 2 way bright, in turn, cycle switching. After turning on the light, no operation within 4 seconds, then exit the switching color temperature mode, again short press directly off the light, the next time the light to retain the color temperature and brightness before turning off the light, such as: 1 way bright → 2 way bright (no operation within 4 seconds) → off the light → 2 way bright.
- Dimming: when the light is on, long press the touch key to adjust the brightness, stepless non-cyclic adjustment of light brightness.
